

# INFECTIOUS WASTE GENERATION ANNUAL REPORT

2010 Estimate

October 2009

South Carolina Department of Health  
and Environmental Control

**Submitted by C. Earl Hunter, Commissioner  
S.C. Department of Health and Environmental Control**

The Infectious Waste Generation Annual Report - 2010 Estimate is submitted by the S.C. Department of Health and Environmental Control in compliance with S.C. Code Section 44-93-210. Additionally, Act 119 of 2005 mandates that agencies provide all reports to the General Assembly in an electronic format.

As required by the South Carolina Infectious Waste Management Act, the Department of Health and Environmental Control (the Department) annually publishes a projection of the estimated amount of infectious waste to be generated in South Carolina for the next calendar year. This report fulfills this requirement.

The data used to calculate this estimate has been derived from in-state generators. According to the South Carolina Infectious Waste Management Regulation, R.61-105, any person producing infectious waste in South Carolina must register with the Department annually in writing on a Department registration form. The registration form includes the name of the business, address of the site of generation (each site of generation must apply separately), and the amount of infectious waste generated monthly (estimated within + or -20%). The data upon which this estimate is based was derived from the generator registration forms.

For the one-year period of October 2, 2008 through October 1, 2009, 5,380 generators have reported they produce an estimated 657.36 tons of infectious waste per month or 7,888.32 tons of infectious waste in a one-year period. Based on these most recent monthly generation rates, the Department expects approximately 8,016.54 tons to be generated in calendar year 2010. Infectious waste generated in private households is excluded from the Infectious Waste Management Act and is not included in this report.

Additional information and resources regarding the Infectious Waste Management Program may be found at: [www.scdhec.gov/infectiouswaste](http://www.scdhec.gov/infectiouswaste).

The table below illustrates past generation rates.

Tons per year

INFECTIOUS WASTE GENERATORS

TOTAL AMOUNT OF INFECTIOUS WASTE GENERATED IN SOUTH CAROLINA

SHARPS: Needles, syringes, lancets and scalpel blades.	275,222.47 pounds per month
MICROBIOLOGICALS: Specimens, cultures and stocks of human pathogenic agents.	150,175.74 pounds per month
BLOOD AND BLOOD PRODUCTS: Unabsorbed human blood, or blood products, or absorbed blood and bloody body fluids.	516,969.01 pounds per month
PATHOLOGICAL: Tissues, organs, limbs, products of conception and other body parts removed from the whole body.	112,559.30 pounds per month
ANIMAL: Animal carcasses, body parts and bedding of animals intentionally exposed to human pathogens during research.	31,531.00 pounds per month
ISOLATION: Biosafety Level Four, highly communicable diseases classified by the Centers for Disease Control and Prevention.	138,144.17 pounds per month
OTHER: Other waste material designated by the generator as infectious waste.	90,109.94 pounds per month

TOTALS OF ALL WASTE STREAMS: 1,314,711.63 pounds per month  
(657.36 tons per month)

TOTAL NUMBER OF GENERATORS REGISTERED: 5380
