61-9. Water Pollution Control Permits

Preamble:

The Department proposes to amend R.61-9 to strengthen and improve the existing regulation and make appropriate revisions to address land application of sludge with PCB contamination. To address PCB contamination in sludge, which occurred in 2013, the Department issued an emergency regulation (September 25, 2013) and this proposed regulation follows. Amendments are from sections 503 (domestic sludge) and 504 (industrial sludge) of R.61-9.

A Notice of Drafting was published in the *State Register* on October 25, 2013. The Notice of Drafting was also published on the Department's Regulatory Page in its DHEC Regulation Development Update. Comments were received and used in the drafting of the proposed regulation.

Discussion of Proposed Revisions

Regulation sections 503 and 504 are similar, so changes are proposed to both sections.

Preliminary Fiscal Impact Statement:

No costs to the State or significant cost to its political subdivisions as a whole should be incurred by these amendments. See Statement of Need and Reasonableness below.

Statement of Need and Reasonableness:

The statement of need and reasonableness was determined by staff analysis pursuant to S.C. Code Ann. Section 1-23-115(C)(1)-(3) and (9)-(11) (2005).

DESCRIPTION OF REGULATIONS: Amendment of Regulation 61-9, *Water Pollution Control Permits*.

Purpose: Proposed amendment of R.61-9 will clarify, strengthen, and improve the overall quality of the existing regulation to regulate land application of sludge relative to PCBs.

Legal Authority: S.C. 1976 Code Sections 48-1-10 et seq.

Plan for Implementation: The proposed amendments would be incorporated within R.61-9 upon approval of the General Assembly and publication in the State Register. The proposed amendments will be implemented in the same manner in which the present regulation is implemented.

DETERMINATION OF NEED AND REASONABLENESS OF THE PROPOSED REGULATIONS BASED ON ALL FACTORS HEREIN AND EXPECTED BENEFITS:

The amendment to R.61-9 is important to properly regulate PCBs in sludge. The proposed amendments to R.61-9 include the following: A prohibition of land application of sludge where PCBs can be analytically quantified and a requirement to monitor PCBs in sludge quarterly. Sections 61-9.503 and 504 address domestic sludge and industrial sludge respectively. Both sections are amended in similar fashion.

DETERMINATION OF COSTS AND BENEFITS:

Existing staff and resources will be utilized to implement these amendments to the regulation. No additional cost will be incurred by the State if the revisions are implemented and therefore, no additional State funding is being requested.

In reviewing the potential for significant economic impact of the proposed amendment to R.61-9, the Department identified that a significant portion of sludge generated in South Carolina is landfilled. In the situation where PCB levels prohibited land application, landfilling remains a viable option. The Department found that the overall impact to the State's political subdivisions or the regulated community as a whole was not likely to be significant in that typically PCBs are not found in sludge. The circumstances that led to the emergency regulation issued on September 25, 2013 were likely because of illegal dumping of PCB wastes into municipal sewer systems. Because these illegal activities don't occur often, the impact is not expected to be significant. However, in the event that they occur in the future, the regulation needs to be amended to protect public health and the environment from the discharge of PCBs onto the land (e.g., private farm land).

UNCERTAINTIES OF ESTIMATES:

Minimal.

EFFECT ON ENVIRONMENT AND PUBLIC HEALTH:

Implementation of these amendments will not compromise the protection of the environment or the health and safety of the citizenry of the State. The amendments to R.61-9 will promote and protect the environment and human health by the regulation of pollutants onto land in South Carolina.

DETRIMENTAL EFFECT ON THE ENVIRONMENT AND PUBLIC HEALTH IF THE REGULATIONS ARE NOT IMPLEMENTED:

Failure by the Department to regulate PCB contaminated sludge would result in PCB contaminated soils on farm land (or other areas) where sludge is applied. This may result in the need for site remediation.

Statement of Rationale:

The statement of rationale was determined by staff analysis pursuant to S.C. Code Ann. Section 1-23-110(A)(3)(h) (2005).

The federal Toxic Substances Control Act (TSCA) regulates PCB levels in sludge at levels equal to or greater than 50 parts per million (ppm). Because PCBs were banned in the United States over thirty years ago, typically PCBs are not expected to be found in wastewater systems. Therefore, there are currently no federal or state regulations to limit the land application of sludge below 50 ppm. However, because PCBs were found in sludge in South Carolina in 2013, leading to the issuance of an emergency regulation, the Department believes it is warranted to have a regulation to address PCB contamination in the event that such contamination occurs in the future.

A Notice of Drafting was published in the *State Register* on November 22, 2013, Volume 37, Issue No. 11.

Notice of Public Hearing and Opportunity for Public Comment:

Should a hearing be requested pursuant to Section 1-23-110(A)(3) of the 1976 Code, as amended, such hearing will be conducted at 1000 Assembly Street on Monday, January 27, 2014 at 10:00 am in Room 335, Third Floor, Rembert C. Dennis Building. Written comments may be directed to Emily Cope, Wildlife & Freshwater Fisheries Division, Department of Natural Resources, Post Office Box 167, Columbia, SC 29202, no later than January 27, 2014.

Preliminary Fiscal Impact Statement:

The amendment of Regulations 123-40, 123-50, 123-51, 123-52 and 123-53 will result in increased public hunting opportunities which should generate additional State revenue through license sales. In addition, the local economy should benefit from sales of hunting supplies, food and overnight accommodations. Sales taxes on these items will also directly benefit government.

Statement of Need and Reasonableness:

The statement of need and reasonableness was determined based on staff analysis pursuant to S.C. Code Sections 1-23-115(C) (1) through (3) and (9) through (11).

DESCRIPTION OF THE REGULATION:

Purpose: These regulations amend Chapter 123-40, 123-50, 123-51, 123-52, 123-53 in order to set seasons, bag limits and methods of hunting and taking of wildlife on existing and additional Wildlife Management Areas and to clarify the use of Individual Antlerless Deer Tags in all Game Zones and delete regulations 123-42.1 and 123-47 that are obsolete.

Legal Authority: Under Sections 50-11-2200 and 50-11-2210 of the S.C. Code of Laws, the Department of Natural Resources has jurisdiction over all Wildlife Management Areas to protect, preserve, operate, maintain and regulate use, as well as to establish open and closed seasons, bag limits, and methods of taking wildlife. Under Section 50-11-96 of the S.C. Code of Laws, the Department of Natural Resources is authorized to promulgate regulations to implement and regulate the provisions of this section.

Plan for Implementation: Once the regulation has been approved by the General Assembly, the Department will incorporate all regulations in the annual Rules and Regulations Brochure. The public will be notified through this publication and through news releases and other Department media outlets and publications.

34 PROPOSED REGULATIONS

DETERMINATION OF NEED AND REASONABLENESS OF THE REGULATION BASED ON ALL FACTORS HEREIN AND EXPECTED BENEFITS:

Periodically, additional lands are made available to the public through the Wildlife Management Area Program. Since existing regulations only apply to specific wildlife management areas, new regulations must be filed to establish seasons, bag limits and methods of hunting and taking of wildlife on these new WMAs as well as expanding use opportunities on existing WMAs.

DETERMINATION OF COSTS AND BENEFITS:

Implementation of the proposed regulation will not require any additional costs to the state or to the sporting community. There are no significant new costs imposed by the addition of new WMAs since the funding of leasing WMAs is provided through the existing WMA permit program. Clarification of existing regulations under appropriate authority will improve enforcement ability and therefore reduce staff time in handling prosecution of offenses. This amendment of these regulations will result in increased public hunting opportunities that should generate additional State revenue through license sales. In addition, the local economy should benefit from sales of hunting supplies, food and overnight accommodations. Sales taxes on these items will also directly benefit government.

UNCERTAINTIES OF ESTIMATES:

Staff does not anticipate any increased costs with the promulgation of this regulation. Accordingly, no costs estimates and the uncertainties associated with them are provided.

EFFECT ON ENVIRONMENT AND PUBLIC HEALTH:

The promulgation of this regulation will not have any impacts on public health.

DETRIMENTAL EFFECT ON THE ENVIRONMENT AND PUBLIC HEALTH IF THE REGULATION IS NOT IMPLEMENTED:

No detrimental impact on public health or the environment will occur if this proposed regulation is not implemented. Failure to implement this regulation will prevent positive benefits to public.

Statement of Rationale:

Rationale for the formulation of these regulations is based on over 60 years of experience by SCDNR in establishing public hunting areas. New areas are evaluated on location, size, current wildlife presence, access and recreation use potential. Contractual agreements with the landowners provide guidelines for the use and management of the property. Wildlife Management Area agreements are on file with the Wildlife Management Section of the Department of Natural Resources, Room 267, Dennis Building, 1000 Assembly Street, Columbia.

Document No. 4440
CRIMINAL JUSTICE ACADEMY
 CHAPTER 37

Statutory Authority: 1976 Code Sections 23-23-10 et seq. and 23-47-20(C)(15)

37-001. through 37-110. Criminal Justice Academy

Emergency Situation:

The General Assembly passed Act 317 (effective May 30, 2006) and Act 335 (effective June 16, 2008) separating the South Carolina Criminal Justice Academy from the Department of Public Safety. S.C. Code §23-23-10, et seq. requires the Criminal Justice Academy to train, certify, and evaluate eligibility for certification of candidates for law enforcement certification in the state of South Carolina. S.C. Code 23-47-20(C)(15) requires telecommunication operators or dispatchers to be trained and certified by the Law Enforcement Training Council (Criminal Justice Academy). The Act allows the Criminal Justice Academy to promulgate regulations as are necessary for the administration of Act 317. Consistent with these authorizations and requirements, the Criminal Justice Academy has attempted on three (3) occasions to “clean up” inconsistencies between S.C. Code §23-23-10, et seq., S.C. Code §23-47-20(C)(15), and the current regulations (Chapter 38). On November 13, 2013, the Criminal Justice Academy received a Final Order from the Administrative Law Court in Case Number 12-ALJ-30-0087-AP. This Order held that the regulations contained in Chapter 38 are “defunct” and, essentially, that until the Criminal Justice Academy promulgated regulations the Law Enforcement Training Council has no lawful “criteria for evaluating and exercising their authority to suspend, revoke, or restrict a law enforcement certification.”

Statement of Need and Reasonableness:

Since existing regulations only apply to specific wildlife management areas, new regulations must be filed to establish seasons, bag limits and methods of hunting and taking of wildlife on new WMAs as well as expanding use opportunities on existing WMAs. Since the availability of specific fields changes each year and season dates change as allowed by Federal Regulation, it is necessary to file Dove Field regulations annually. Because these hunts begin on September 2, it is necessary to file these regulations as emergency so they take effect immediately.

Fiscal Impact Statement:

This amendment of Regulation 123-40 will result in increased public hunting opportunities which should generate additional State revenue through license sales. In addition, the local economy should benefit from sales of hunting supplies, food and overnight accommodations. Sales taxes on these items will also directly benefit government.

All hunters must enter and leave the Potato Creek Hatchery Waterfowl Area through the designated public landing on secondary road 260 and complete a data card and deposit card in receptacle prior to leaving the area. Hunting hours are from 30 minutes before legal sunrise to legal sunset (including the special youth hunt). ~~Hunters may not enter the area prior to 3:00 a.m. on hunt days.~~ No airboats are allowed for hunting or fishing and no hunting from secondary road 260.

No airboats are allowed in the Hatchery WMA for hunting or fishing during the period 15 Nov.-31. Jan. No fishing allowed during scheduled waterfowl hunts.

10.20 On Enoree River, Dunaway, Duncan Creek, Russell Creek and Tyger River Waterfowl Areas data cards are required for hunter access during scheduled waterfowl hunts. Completed data cards must be returned daily upon leaving each of these areas. Hunters may not enter the areas prior to 5:00 am on hunt days.

123-52. Either-sex Days and Antlerless Deer Limits for Private Lands in Game Zones 1-6.

5. Individual Deer Tags: Individual Antlerless Deer Tags are not valid in Game Zone 1. Tags are valid in Game Zones 3 – 6 beginning Sept. 15 and in Game Zone 2 beginning Oct. 1. Individual tags are not valid on properties enrolled in the Antlerless Deer Quota Program. Tags do not alter the daily (2 per day) or seasonal limit or change the type of weapons that can be used during special weapons seasons.

Antlerless deer must be tagged immediately after harvest and before it is moved from the point of kill and the tag must be validated as prescribed by SCDNR.

6. Antlerless Deer Limits: Game Zone 1 – Archery and Muzzleloader period 2 per day, 2 Total (muzzleloader is buck only); Gun Hunt Period – 2 per day, Total 5 all methods combined (firearms is buck only except on either-sex days). Game Zone 2 – Archery Only Period 2 per day, Total 2; Archery and Muzzleloader Period 2 per day, Total 2 (muzzleloader is buck only except on either-sex day); Gun Hunt Period 2 per day, 5 Total all methods combined (Firearms is buck only except on either-sex days or with Individual Tags). 2. Legal weapons include archery equipment, muzzleloaders (.36 caliber or greater), centerfire rifles, centerfire handguns and shotguns with slugs or buckshot.

3. The orange permit must be displayed in a visible location on the dash of the vehicle while the person is actively bear hunting.

4. Harvested bear must be reported to SCDNR by telephone within 12 hours of the kill.

5. All persons drawn for the hunt must submit a harvest report, regardless if a bear was harvested or not, no later than 7 days after the close of the season and return the unused tag.

Statement of Need and Reasonableness:

Periodically, additional lands are made available to the public through the Wildlife Management Area Program. Since existing regulations only apply to specific wildlife management areas, new regulations must be filed to establish seasons, bag limits and methods of hunting and taking of wildlife on these new WMAs as

well as expanding use opportunities on existing WMAs. Amendments are needed to allow additional opportunity. Because some hunts begin on September 1, it is necessary to file these regulations as emergency so they take effect immediately.

Fiscal Impact Statement:

This amendment of Regulation 123-40, 123-52 and 123-53 will result in increased public hunting opportunities that should generate additional State revenue through license sales. In addition, the local economy should benefit from sales of hunting supplies, food and overnight accommodations. Sales taxes on these items will also directly benefit government.

61-62. Air Pollution Control Regulations and Standards

Synopsis:

The United States Environmental Protection Agency (EPA) promulgates amendments to 40 CFR Parts 51, 52, 60 and 63 throughout each calendar year. Recent federal amendments include clarification, guidance and technical amendments regarding state implementation plan (SIP) requirements, New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAP) for Source Categories.

The Department has amended Regulation 61-62.1, Definitions and General Requirements, to incorporate an amendment to the definition of Volatile Organic Compounds (VOCs) promulgated by the federal rule "Revision to Definition of Volatile Organic Compounds-Exclusion of trans-1,3,3,3-tetrafluoropropene" (77 FR 37610, June 22, 2012). The Department also amended Regulation 61-62.5, Standard No. 7, Prevention of Significant Deterioration, to incorporate a provision in the definition of "Regulated NSR Pollutant," as required by the federal rule "Implementation of the New Source Review (NSR) Program for Particulate Matter Less Than 2.5 Micrometers (PM_{2.5}): Amendment to the Definition of "Regulated NSR Pollutant" Concerning Condensable Particulate Matter" (77 FR 65107, October 25, 2012). Additionally, the Department amended Regulations 61-62.60, South Carolina Designated Facility Plan and New Source Performance Standards, and 61-62.63, National Emission Standards for Hazardous Air Pollutants (NESHAP) for Source Categories, to

Regulation 61-62.5, Air Pollution Control Standards, Standard No. 3.1, Hospital/Medical/Infectious Waste Incinerators (HMIWI)

Regulation 61-62.5, Standard No. 3.1, Section VII(b)(2)(iii)(B), shall be revised as follows:

(B) Demonstrate compliance with the PM, CO, and HCl emission limits by conducting an annual performance test (no more than 12 months following the previous performance test) using the applicable procedures and test methods in accordance with paragraph (a)(3) of this section. If all three performance tests over a three-year period indicate compliance with the emission limit for a pollutant (PM, CO, or HCl), the owner or operator may forego a performance test for that pollutant for the subsequent two years. At a minimum, a performance test for PM, CO, and HCl shall be conducted every third year (no more than 36 months following the previous performance test). If a performance test conducted every third year indicates compliance with the emission limit for a pollutant (PM, CO, or HCl), the owner or operator may forego a performance test for that pollutant

for an additional two years. If any performance test indicates noncompliance with the respective emission limit, a performance test for that pollutant shall be conducted annually until all annual performance tests over a three-year period indicate compliance with the emission limit. The use of the bypass stack during a performance test shall invalidate the performance test.

Regulation 61-62.5, Standard No. 3.1, Section VII(b)(3)(iii)(B), shall be revised as follows:

Regulation 61-62.5, Standard No. 3.1, Section VIII(c)(3), shall be revised as follows:

(3) Identification of calendar days for which data on emission rates or operating parameters specified under paragraph (c)(2) of this section have not been obtained, with an identification of the emission rates or operating parameters not measured, reasons for not obtaining the data, and a description of corrective actions taken.

Regulation 61-62.5, Standard No. 3.1, Section VIII(c)(5), shall be revised as follows:

(5) Identification of calendar days for which data on emission rates or operating parameters specified under paragraph (c)(2) of this section exceeded the applicable limits, with a description of the exceedances, reasons for such exceedances, and a description of corrective actions taken.

72 FINAL REGULATIONS

Regulation 61-62.5, Standard No. 3.1, Appendix B, shall be revised as follows:

STEP 5. Calculate the volume of product of combustion (F):

$$F \text{ (scfs)} = \frac{M}{d \times 60 \times 60}$$

$d \text{ (lb/ft}^3\text{)}$ = Density of exhaust gases at 70 degrees F, use a value of 0.075.

$$F^l \text{ (acfs)} = F \times \frac{(T_o + 460)}{530}$$

$$F^l \text{ design temperature} = F \times \frac{2460}{530}$$

scfs = standard cubic feet per second

acfs = actual cubic feet per second

Regulation 61-62.5, Air Pollution Control Standards, Standard No. 7, Prevention of Significant Deterioration

Regulation 61-62.5, Standard No. 7, (b)(44)(i), shall be revised as follows:

(44) **“Regulated NSR pollutant,”** for purposes of this regulation, means the following:

(i) Any pollutant for which a national ambient air quality standard has been promulgated. This includes, but is not limited to, the following:

(a) $PM_{2.5}$ emissions and PM_{10} emissions shall include gaseous emissions from a source or activity which condense to form particulate matter at ambient temperatures. On or after January 1, 2011, such condensable particulate matter shall be accounted for in applicability determinations and in establishing emissions limitations for $PM_{2.5}$ and PM_{10} in PSD permits. Compliance with emissions limitations for $PM_{2.5}$ and PM_{10} issued prior to this date shall not be based on condensable particulate matter unless required by the terms and conditions of the permit or the applicable implementation plan. Applicability determinations made prior to this date without accounting for condensable particulate matter shall not be considered in violation of this section unless the applicable implementation plan required condensable particulate matter to be included;

(b) Any pollutant identified under paragraph (b)(44)(i)(b) as a constituent or precursor to a pollutant for which a national ambient air quality standard has been promulgated. Precursors identified by the Administrator for purposes of NSR are the following:

(1) Volatile organic compounds and nitrogen oxides are precursors to ozone in all attainment and unclassifiable areas.

(2) Sulfur dioxide is a precursor to $PM_{2.5}$ in all attainment and unclassifiable areas.

(3) Nitrogen oxides are presumed to be precursors to $PM_{2.5}$ in all attainment and unclassifiable areas, unless the State demonstrates to the Administrator's satisfaction or EPA demonstrates that emissions of nitrogen oxides from sources in a specific area are not a significant contributor to that area's ambient $PM_{2.5}$ concentrations.

(4) Volatile organic compounds are presumed not to be precursors to PM_{2.5} in any attainment or unclassifiable area, unless the State demonstrates to the Administrator's satisfaction or EPA demonstrates that emissions of volatile organic compounds from sources in a specific area are a significant contributor to that area's ambient PM_{2.5} concentrations.

Regulation 61-62.5, Standard No. 7, (b)(44)(vi), shall be deleted.

Regulation 61-62.6, Control of Fugitive Particulate Matter

Regulation 61-62.6, Section I(b), shall be revised as follows:

(b) No visible dust in excess of ten (10) percent opacity will be allowed to come from transfer points of any conveyor system for raw material or finished product unless the source owner can demonstrate to the satisfaction of the Department that such control is not feasible.

Regulation 61-62.6, Section I(c), shall be revised as follows:

(c) No new source will be granted a permit to construct in a non-attainment area for primary standards if any part of materials handling of dry and dusty material is to be done with a front end loader, dump truck, or similar type handling which permits excessive dust to escape to the ambient air.

Regulation 61-62.6, Section III(c), shall be revised as follows:

(c) No source shall use any method of materials handling which will generate fugitive particulate matter that is not fully described in the permit application.

Regulation 61-62.60, South Carolina Designated Facility Plan and New Source Performance Standards

Regulation 61-62.60, Introductory Note shall be revised as follows:

Note: Facilities subject to the regulations listed below may be subject to additional requirements specified elsewhere in Regulation 61-62, Air Pollution Control Regulations and Standards.

Regulation 61-62.60, Subpart A, shall be revised as follows:

Regulation 61-62.70.2(r)(3)(iv), shall be revised as follows:

(iv) For particulate matter (PM₁₀) nonattainment areas classified as “serious,” sources with the potential to emit 70 tpy or more of PM₁₀.

(ii) All sources and source categories that would be required to obtain a permit solely because they are subject to Part 61, Subpart M - National Emission Standard for Hazardous Air Pollutants for Asbestos, Section 61.145, Standard for Demolition and Renovation.

Statement of Need and Reasonableness:

This Statement of Need and Reasonableness was determined by staff analysis pursuant to S.C. Code Section 1-23-115(C)(1)-(3) and (9)-(11).

DESCRIPTION OF REGULATION:

Purpose: (1) The EPA promulgates amendments to 40 CFR Parts 51, 52, 60 and 63 throughout each calendar year. Recent federal amendments include clarification, guidance and technical amendments regarding New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAP) for Source Categories.

(2) The Department has amended Regulation 61-62.1, Definitions and General Requirements, to incorporate an amendment to the definition of Volatile Organic Compounds (VOCs) promulgated by the federal rule "Revision to Definition of Volatile Organic Compounds-Exclusion of trans-1,3,3,3-tetrafluoropropene" (77 FR 37610, June 22, 2012). The Department also amended Regulation 61-62.5, Standard No. 7, Prevention of Significant Deterioration, to incorporate a provision in the definition of "Regulated NSR Pollutant," as required by the federal rule "Implementation of the New Source Review (NSR) Program for Particulate Matter Less Than 2.5 Micrometers (PM_{2.5}): Amendment to the Definition of "Regulated NSR Pollutant" Concerning Condensable Particulate Matter" (77 FR 65107, October 25, 2012). Additionally, the Department amended Regulations 61-62.60, South Carolina Designated Facility Plan and New Source Performance Standards, and 61-62.63, National Emission Standards for Hazardous Air Pollutants (NESHAP) for Source Categories, to incorporate by reference recent federal amendments promulgated during the period from January 1, 2012, through December 31, 2012.

(3) The Department also made changes to Regulation 61-62 that include corrections for internal consistency, clarification, reference, punctuation, codification, formatting, and spelling to improve the overall text of Regulation 61-62 as necessary. Pursuant to S.C. Code Section 1-23-120(H)(1), the amendments are not more stringent than current federal requirements and thus do not require legislative review.

Legal Authority: The legal authority for Regulation 61-62, Air Pollution Control Regulations and Standards, is S.C. Code Section 48-1-10 et seq.

Plan for Implementation: The amendments take effect upon approval by the Board of Health and Environmental Control and publication in the State Register. These requirements are in place at the federal level and are currently being implemented. The amendments will be implemented in South Carolina by providing the regulated community with copies of the regulation, publishing associated information on our website at <http://www.scdhec.gov/administration/regs/>, sending an email to stakeholders, and communicating with effected facilities during the permitting process.

DETERMINATION OF NEED AND REASONABLENESS OF THE REGULATION BASED ON ALL FACTORS HEREIN AND EXPECTED BENEFITS:

The EPA promulgates amendments to 40 CFR Parts 51, 52, 60 and 63 throughout each calendar year. Federal amendments in 2012 included new and revised NSPS rules, NESHAPs for Source Categories, and VOC definition revisions. States are mandated by law to adopt these federal amendments. These amendments are reasonable as they promote consistency and ensure compliance with both state and federal regulations.

88 FINAL REGULATIONS

DETERMINATION OF COSTS AND BENEFITS:

There will be no increased cost to the State or its political subdivisions resulting from these revisions. The standards to be adopted are already effective and applicable to the regulated community as a matter of federal law, thus the regulated community has already incurred the cost of these regulations. The amendments will benefit the regulated community by clarifying the regulations and increasing their ease of use.

UNCERTAINTIES OF ESTIMATES:

There are no uncertainties of estimates relative to the costs to the State or its political subdivisions.

EFFECT ON ENVIRONMENT AND PUBLIC HEALTH:

Adoption of the recent changes in federal regulations through the amendments to Regulation 61-62, Air Pollution Control Regulations and Standards, will provide continued protection of the environment and public health.

DETRIMENTAL EFFECT ON THE ENVIRONMENT AND PUBLIC HEALTH IF THE REGULATIONS ARE NOT IMPLEMENTED:

The State's authority to implement federal requirements, which are beneficial to the public health and environment, would be compromised if these amendments were not adopted in South Carolina.
