About this Report

The S.C. Solid Waste Policy and Management Act of 1991 (Act) requires the S.C. Department of Health and Environmental Control (DHEC) to publish an annual solid waste management report.

This report – which concentrates on municipal solid waste (MSW) as defined in the Act – summarizes activities by fiscal year (FY).

Required information includes:

- **The amount of MSW disposed of** (by county);
- **The amount of material recycled by commodity** (by county);
- **The progress towards meeting the state’s MSW waste reduction and recycling goals;**
- **A list of permitted solid waste facilities;**
- **An estimate of current capacity to manage solid waste;**
- **Recommendations for improving solid waste management; and**
- **An update on solid waste planning.**

“The S.C. Solid Waste Management Annual Report” must be submitted to the Governor and

General Assembly by March 15. This report provides an overview of FY19 (July 1, 2018 to June 30, 2019).

What is MSW?

MSW is defined by law as specific waste generated from residential, commercial, institutional and industrial sources. In South Carolina, MSW includes:

- **Aluminum and steel cans;**
- **Appliances;**
- **Automobile tires;**
- **Food waste;**
- **Glass bottles and jars;**
- **Newspapers and office paper;**
- **Packaging;**
- **Plastic bottles and jugs;**
- **Tire-derived fuel;**
- **Used motor oil from do-it-yourself oil changers; and**
- **Yard trimmings.**

SECTION 1

Acknowledgements

The “S.C. Solid Waste Management Annual Report for Fiscal Year 2019” is published by DHEC’s Office of Solid Waste Reduction and Recycling. The report is submitted in compliance with the S.C. Solid Waste Policy and Management Act of 1991 (S.C. Code of Laws § 44-96-60). In addition, Act 119 of 2005 mandates that agencies provide all reports to the General Assembly in an electronic format.

How are MSW disposal and recycling numbers collected?

Data is collected from the following sources.

- **Permitted solid waste facilities** are required by the Act and subsequent regulations to submit annual reports of the amount of material disposed of to DHEC.
- **County governments, state agencies and state-supported colleges/universities** also are required to report the amount and type of material recycled to DHEC. Please see the “S.C. State Agencies & Colleges/Universities Recycling & Buying Recycled Annual Report” at www.scdhec.gov/sites/default/files/Library/OR-2028.pdf for details about state agency and college/university recycling.
- **Businesses, municipalities and the recycling industry** are encouraged, but **not required** to report their recycling efforts. Because this reporting is voluntary, the data collected from these sources is inconsistent and impacts South Carolina’s annual recycling rate.

What are South Carolina’s waste reduction/recycling goals?

The state’s goals are to:

- **Recycle at least 40 percent of its MSW;** and
- **Reduce MSW disposal to 3.25 pounds per person per day.**

How are the disposal and recycling rates calculated?

The equations below are used for calculating the disposal and recycling rates.

$$\text{PER CAPITA DISPOSAL} = \frac{\text{TONNAGE}}{\text{POPULATION}} \times 2,000 \div 365$$

$$\text{RECYCLING RATE (\%)} = \frac{\text{AMOUNT RECYCLED}}{\text{AMOUNT GENERATED*}} \times 100$$

*Generated = Recycled + Disposed Of

What is TSW?

Although not required, amount of total solid waste (TSW) generated, disposed of and recycled is measured for a more comprehensive picture. TSW is collected from the same sources as MSW. TSW includes MSW as well as:

- **Automobile bodies;**
- **Combustion ash;**
- **Construction and demolition (C&D) debris;**
- **Industrial process waste;**
- **Land-clearing debris;** and
- **Municipal sludge.**

Please Note

Every effort is made to ensure the accuracy of the data and information provided for this report.

Given that, this edition of the S.C. Solid Waste Management Annual Report reflects several key changes in the verification and use or omission of data - done so with the idea of protecting the integrity of the report.

When Using this Report

When reviewing tables, remember that recycling tonnages are rounded to the nearest hundredth and disposal data is rounded to the nearest ton. Some totals do not equal 100 percent due to rounding.

The Year at a Glance

SECTION 2

Measurement matters.

Solid waste measurement is no different. Measurement provides a wide range of information including disposal and recycling numbers, types of material recycled, program costs and more. Simply put, where are we? Any trends? What is working? What isn't?

This report is designed to answer those questions and more through data collection, verification, compilation and analysis. The answers provide information on how to more efficiently manage solid waste.

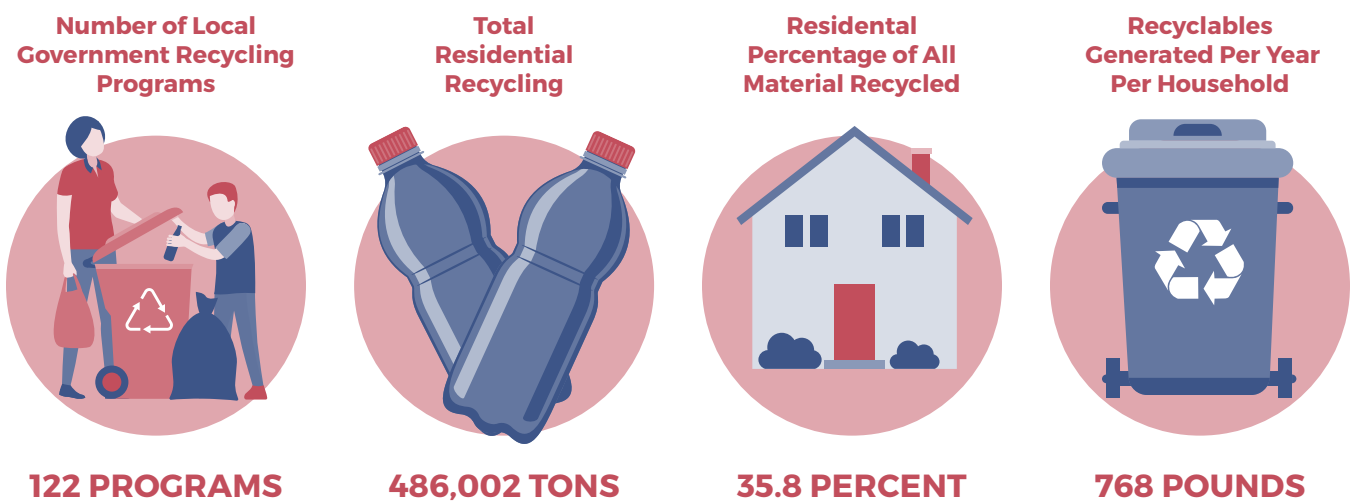

Here are 10 key takeaways.

- 1** In FY19, the amount of municipal solid waste (MSW) generated (recycled plus disposed of) was **4,809,041 tons** - an increase of 519,450 tons (12.1 percent) from the previous FY.
- 2** Disposal increased **366,684 tons** (11.9 percent) to **3,452,678 tons** from the previous FY.
- 3** The amount of material recycled was **1,356,362** - an increase of 152,765 (12.7 percent) from the previous FY. The growth raised South Carolina's recycling rate from 28.1 percent to 28.2 percent.
- 4** The primary reason for the increase was the surge in the recycling of **ferrous and non-ferrous metals**. This is due in large part to a major steel mill expanding operations. Ferrous metal rose 186,846 tons (113.5 percent) from the previous FY and non-ferrous metal increased 104,933 tons (551.7 percent).
- 5** It was the **11th consecutive FY that more than 1 million tons of material was recycled in South Carolina.**

Continued on the following page

FIGURE 2.1: Snapshot of S.C. Residential Recycling in FY19

SOURCE: The Recycling Partnership

- 6 Local governments reported spending \$390,420,298 on solid waste management** – reflecting an upsurge of more than \$26 million from FY18. It is estimated that most of the increase is related to higher charges by processors.
- 7 Five companies made capital investments of more than \$50 million creating nearly 240 jobs.** In the past six years, the recycling industry has announced more than \$1.65 billion in investments and the creation of more than 3,600 jobs.
- 8 Of the eight categories measured, five** (organics, paper, commingled, miscellaneous and banned items) **resulted in less material recovered and three** (glass, metal and plastic) **in more material recovered.**
- 9 Poor markets, contamination, low tipping fees and increased local government program costs** continued to impact recycling. See Figure 2.2 for common contaminants in curbside recycling.
- 10 Metal replaced paper as the No. 1 recycled commodity.** Local governments, businesses and institutions reported recovering 480,187.83 tons of metal in FY19. This was made possible because metal (while fluctuating like all markets) maintained higher revenues than most other material.

For details, see “Recycling: The State and Counties at a Glance” on page 23 and “Disposal” on page 72 and Tables 2.3 to 2.9 for five-year trends on population, MSW generated, disposed of and recycled.

FIGURE 2.2: Recycling’s Dirty Dozen – Keep These Things in Mind When Recycling

 <p>1</p>	 <p>2</p>	 <p>3</p>	 <p>4</p>	 <p>5</p>	 <p>6</p>
PLASTIC BAGS	BAGGED ITEMS	SHREDDED PAPER	SCRAP METAL	HAZARDOUS MATERIAL	FLATTENED CONTAINERS
Recycle these at your local grocery store or food bank. Use cloth bags.	Don't bag recycled items. Keep them loose in your bin.	It can become litter or jam equipment at the recycling facility.	Some metal breaks sorting machines. Take it to drop-off sites.	Recycle it at a county drop-off center or collection event.	Flat cans and bottles cause issues at sorting facilities.
 <p>7</p>	 <p>8</p>	 <p>9</p>	 <p>10</p>	 <p>11</p>	 <p>12</p>
PLASTIC THAT CAN'T BE RECYCLED	CAPS ON GLASS BOTTLES	GREASE, FOODS OR LIQUIDS	GLASS THAT CAN'T BE RECYCLED	WIRE OR ROPE-LIKE ITEMS	HAZARDOUS BIOLOGICAL WASTE
See if it is accepted in your program before placing it in your bins.	Remove and discard caps before recycling containers.	Empty and rinse containers to recycle. Discard greasy items.	Don't put dishes, bulbs, ceramics or windows in the curbside bin.	These items can jam or damage sorting equipment.	Diapers, sharps, syringes and similar waste can hurt workers.

The Economics of Managing Solid Waste

The purpose of the S.C. Solid Waste Policy and Management Act of 1991 (Act) is to protect public health and safety, protect and preserve the environment, and recover resources in the most environmentally safe, economically feasible and cost-effective manner.

The Act places the responsibility of managing solid waste on county governments. This essential service includes collection, disposal,

recycling, composting and education. These services require solid waste facilities, equipment, staff and more.

The costs for the services are significant and rising. Local governments reported spending \$390,420,298 on solid waste management in fiscal year (FY) 2019 (July 1, 2018 to June 30, 2019) – an upsurge of more than \$26 million (7.13 percent) from the previous FY. Most of that increase is centered on recycling.

Why? In the past several years, dramatic declines in the value of recyclables due to shifts in the global market have resulted in increased costs for local governments nationwide. Many local governments are paying more to send material to material recovery facilities than the landfill. According to the “2020 State of Curbside Recycling Report” released by The Recycling Partnership, local programs pay an average processing fee of \$64 per ton nationwide with some programs having fees of more than \$100 per ton.

In summary, local governments will continue to face challenging markets, rising costs, funding issues and inexpensive tipping fees. Economic pressures will continue to be a major issue with little relief in sight. The value, however, that many residents place on recycling is helping local governments maintain recycling programs through the difficult times.

Recycling Market Development

The Recycling Market Development Advisory Council (RMDAC) – housed at the S.C. Department of Commerce (Commerce) – supports the state’s recycling industry by working to build markets, increase material recovery and promote the impact of recycling on South Carolina’s economy.

Established by the Act, RMDAC consists of 14 members appointed by the Governor that represent the solid waste industry, recycling sectors, government, higher education and the public.

At Commerce, the RMDAC staff coordinates the activities of the council while providing technical and economic development assistance to recycling businesses and the industry. Key market development activities for the past FY include composting, food waste, carpet, plastic and glass.

Please visit at www.recyclinginsc.com to learn more.

Department of Commerce

Just right for business.

South Carolina’s Recycling Industry, Capital Investment

While challenges remain, South Carolina has developed a robust recycling industry of 500-plus companies. These companies – which collect, haul, process and broker material, sell equipment and manufacture recycled-content products – provide more than 22,000 jobs, about \$2.7 billion in annual labor income and nearly \$330 million in state and local taxes according to “The Economic Impact of the Recycling Industry in South Carolina” study conducted by the College of Charleston.

The industry – which includes 10 plastic reclaimers, four recycled cardboard mills and four steel mills – has the home-grown capacity to manage much of the state’s recycling stream.

Both post-consumer and post-industrial recycling commodities have homes here including metal, cardboard, paper, plastic, glass, tires and even zinc.

In addition, the industry continues to grow. Five companies made more than \$50 million in capital investment in 2019, potentially creating nearly 240 jobs according to Commerce.

Overall, in the past six years more than \$1.65 billion has been invested and about 3,600 jobs produced. For every 10 jobs created in the recycling industry, there are 14 others created elsewhere in the state’s economy.

Recycling by Commodity

SECTION 4

The S.C. Solid Waste Policy and Management Act of 1991 (Act) requires the S.C. Department of Health and Environmental Control to report the amount and type of municipal solid waste (MSW) recycled. (For more information about this requirement, see Section 1.)

In South Carolina, recycled MSW is measured by category. The eight categories collected are listed in Figure 4.2.

Specific items – commodities – comprise each of these categories.

- **Glass, metal, paper and plastic** are recyclables traditionally accepted by most local programs.
- **Banned items** are items listed in the Act or other legislation that cannot be disposed of and must be recycled. Those items include appliances, electronics, lead-acid batteries, used motor oil and whole tires. Yard trimmings are banned from MSW landfills,

but may be disposed of in land-clearing debris landfills.

- **Commingled items** are collected together by local programs and not reported by type.
- **Miscellaneous items** are accepted by local programs and include antifreeze, cooking oil, fluorescent bulbs, hazardous household material (HHM), inkjet/toner cartridges, mattresses, paint, rechargeable batteries, textiles, used motor oil filters and wood packaging.
- **Organics** include yard trimmings and food waste.

Here are some key takeaways.

- **In FY19, 120,756.83 tons of commingled material was recycled.** This is a decrease of about 8 percent, likely due to a statewide focus on reducing contamination and increasing education on recycling right.
- **Metal was the No. 1 material recycled,** composing 35 percent of material recycled in FY19.

See Tables 4.3 to 4.10 for a breakdown of commodities recycled by county.

Used Motor Oil Recycling

The S.C. Solid Waste Policy and Management Act of 1991 (Act) requires the S.C. Department of Health and Environmental Control (DHEC) to provide an annual update on the state’s used motor oil recycling program for do-it-yourself (DIY) oil changers.

The Act bans the disposal of used motor oil in landfills.

The report must include:

- **The amount of used motor oil collected in each county;**
- **The number of used motor oil collection sites in each county;** and
- **A summary of grant funding provided by DHEC to local government programs.**

Used motor oil that is recycled is counted as part of South Carolina’s MSW recycling total. Gallons are converted to weight with 1 gallon equaling 7 pounds.

In fiscal year (FY) 2019 (July 1, 2018 to June 30, 2019), 953,793.71 gallons of used motor oil were recycled – a decrease of about 6,452 gallons (0.67 percent) from the previous FY. Since the program began in 1990, more than 24.3 million gallons of used motor oil have been collected.

Counties offered 553 used motor oil collection sites in FY19. There are, however, an additional 400 locations offered by retailers that include quick lube and auto parts stores.

DHEC awarded \$704,714.79 in grant funding to local government programs in FY19 for the purchase of equipment and supplies for their used motor oil collections sites. Grants also were used to fund the recycling of used motor oil filters, public outreach and professional development to local government solid waste professionals.

See Table 5.2 on page 22 for a county-by-county breakdown of sites, gallons collected and grant awards.

TABLE 5.1: Gallons of Used Motor Oil Recycled by S.C. DIYers by FY

FY	GALLONS
2015	711,147
2016	888,079
2017	917,174*
2018	960,246
2019	953,794

*This is a corrected number from the FY17 annual report.

Advanced Recycling Fee

There is an advanced recycling fee on oil of 2 cents per quart paid by consumers. The fee – which is part of South Carolina’s solid waste legislation – provides grant funding to local governments for the recycling of used motor oil, oil filters and oil bottles as well as DHEC’s MSW program.

South Carolina has no other fee associated with the sale of oil. Retailers may charge additional fees as a matter of company policy.

1. The Three Rivers Solid Waste Authority (SWA) provides solid waste management services to local governments in Aiken, Allendale, Bamberg, Barnwell, Calhoun, Edgefield, McCormick, Orangeburg and Saluda counties.

2. The Tri-County SWA provides solid waste management services to local governments in Edgefield, McCormick and Saluda counties.

• Collection sites and/or used motor oil collected by a municipality are included in the county's total.

NOTES: The number of sites listed above are provided by local governments. There are about 400 additional locations offered by retailers that include quick lubes and auto parts stores. Gallons are converted to weight (1 gallon = 7 pounds).

Recycling: The State & Counties at a Glance

The S.C. Solid Waste Policy and Management Act of 1991 requires the S.C. Department of Health and Environmental Control to report the amount and type of municipal solid waste (MSW) recycled.

Here are key takeaways.

1 The total amount of MSW recycled in fiscal year (FY) 2019 (July 1, 2018 to June 30, 2019) rose 152,765 tons (12.7 percent) to 1,356,362 tons. It was the 11th consecutive FY and 16th in the past 17 FYs that residents recycled more than 1 million tons of MSW.

2 South Carolina's recycling rate grew from 28.1 percent in FY18 to 28.2 percent in FY19.

3 Residential recycling programs accounted for 35.8 percent of all of the MSW recycled. Commercial/institutional recycling comprised 52.0 percent.

4 Twenty-three counties met the waste reduction goal of disposing 3.25 pounds (or less) per person per day (p/p/d). See Table 6.2 for the disposal rate of each county.

5 Four counties accounted for more than 50 percent of MSW recycled. Spartanburg, Lexington, Charleston and Horry make up 27 percent of South Carolina's population of 5 million residents.

6 Nineteen of South Carolina's 46 county recycling programs do not have any curbside collection. Greenville and Pickens counties have the most with seven programs each.

TABLE 6.1: S.C. Residential Recycling as a Percentage of Total MSW Recycled

FY15	FY16	FY17	FY18	FY19
43%	44%	42%	41%	36%

Disposal

SECTION 7

Permitted public and private landfills are required by the S.C. Solid Waste Policy and Management Act of 1991 to annually report the amount and type of solid waste disposed of to the S.C. Department of Health and Environmental Control (DHEC).

This section provides data on the disposal of both municipal solid waste (MSW) and total solid waste (TSW). As directed by the Act, the focus of this report is MSW. For more information about these requirements, see “About this Report” on page 1.

In fiscal year (FY) 2019 (July 1, 2018 to June 30, 2019) South Carolina had 139 permitted solid waste landfills. The state has three landfill classifications with each type limited to accept specific waste. (See Table 7.1.) For a list of Class 1 landfills and additional information see Table 7.17. For Class 2 landfills, see Table 7.16.

Only Class 3 landfills accept MSW. Of the 27 Class 3 landfills, 12 are publicly owned and 15 are privately owned. For a list of Class 3 landfills and locations, see the Class 3 Landfill Map on page 96. For Class 3 disposal information, see Tables 7.12 to 7.14.

Here are key MSW disposal takeaways.

- **The amount of MSW disposed of was 3,452,678 tons** – an increase of 366,684 tons (11.9 percent) from the previous FY.
- **Overall, roughly 71.8 percent of the MSW generated was disposed of** with the remainder being recycled.
- **The state’s per capita MSW disposal rose from 3.3 pounds to 3.7 pounds.** South Carolina’s goal is 3.25 pounds per person per day (P/P/D).

TABLE 7.1: S.C. Landfill Classifications

TYPE	NUMBER OF FACILITIES IN FY19	MATERIAL ACCEPTED
Class 1	34	Land-clearing debris
Class 2	78	Construction and demolition (C&D) debris
Class 3	27	MSW, C&D debris and industrial solid waste

Tipping Fees

Tipping fees are the amount charged to dispose of solid waste in a landfill. Generally, South Carolina has fees that are lower than other states in the region. The data that follows is the average of the fees reported to DHEC per landfill classification. The amounts are per ton.

- **Class 1: \$17** – the same as the previous FY.
- **Class 2: \$28** – the same as the previous FY
- **Class 3: \$40** – up \$2 from the previous FY.

In FY19, South Carolina had 342 permitted solid waste facilities. For a listing of all these facilities – with the exception of landfills – see Section 8.

TABLE 7.2: S.C. Waste Disposed of by FY

	FY15	FY16	FY17	FY18	FY19
MSW Disposed of in Tons	3,058,338	3,213,592	3,295,360	3,085,994	3,452,678
MSW Disposed of in P/P/D	3.5	3.6	3.6	3.3	3.7
TSW Disposed of in Tons	8,317,621	8,376,283	9,381,361	6,926,363	9,023,631
TSW Disposed of in P/P/D	9.4	9.4	10.4	7.6	9.7

Import & Export of Municipal Solid Waste

South Carolina both imports and exports solid waste. For this report, imported municipal solid waste (MSW) is **not counted** as part of the state's generation. MSW generated in South Carolina and exported to other states **is counted**.

In FY19, South Carolina accepted 499,153 tons of out-of-state MSW for disposal in Class 3 landfills. This is a 7.8 percent increase from the 462,953 tons imported in the previous FY.

In addition:

- **Almost 95 percent of the imported waste was from North Carolina and New York.**
- **Eight MSW landfills accepted imported waste** – Hickory Hill, Lee County, Northeast, Oakridge, Richland, Three Rivers, Twin Chimneys and Upstate Regional.

South Carolina exported 117,160 tons of MSW in FY19 – an increase of more than 7,000 tons from the previous FY. Seven counties accounted for this waste – all of which was sent to landfills in North Carolina and Georgia. For more information about imported/exported solid waste, please see page 74.

South Carolina's Class 3 Landfills in FY19

COMMERCIAL, PUBLICLY OWNED LANDFILLS

- 1 Abbeville County Landfill
- 2 Bees Ferry Landfill
- 3 Berkeley County Landfill
- 4 Georgetown County Landfill
- 5 Greenwood County Landfill
- 6 Horry County SWA Landfill
- 7 Three Rivers SWA Landfill
- 8 Twin Chimneys Landfill

NON-COMMERCIAL, PUBLICLY OWNED LANDFILLS¹

- 10 Santee Cooper - Cross
- 11 Santee Cooper - Winyah
- 12 Savannah River Site Z-Area Landfill

COMMERCIAL, PRIVATELY OWNED LANDFILLS

- 13 Anderson Regional Landfill
- 14 Hickory Hill Landfill
- 15 Lee County Landfill LLC
- 16 Northeast Landfill LLC
- 17 Oakridge Landfill
- 18 Pepperhill Landfill
- 19 Richland Landfill
- 20 Upstate Regional Landfill

NON-COMMERCIAL, PRIVATELY OWNED LANDFILLS¹

- 21 SI Group/Albemarle Corp. Landfill
- 22 CMC Landfill 1602
- 23 Dominion - Cope
- 24 Dominion - Wateree Landfill
- 25 Dominion - Williams Hwy. 52 Landfill
- 26 Sonoco Products
- 27 Duke Energy Progress - H.B. Robinson

1. Non-commercial landfills are defined by regulation as facilities that only manage the solid waste generated in the course of normal operations on property under the same ownership or control as the facility itself (i.e., "on site"). For more information, see Section 8.

South Carolina's Permitted Solid Waste Facilities

The S.C. Solid Waste Policy and Management Act of 1991 requires the S.C. Department of Health and Environmental Control to provide an inventory of solid waste facilities in this report.

In fiscal year (FY) 2019 (July 1, 2018 to June 30, 2019), South Carolina had 10 types of solid waste facilities, 341 facilities overall, operating under 15 types of permits.

Some permits apply to multiple facility types. There are, for example, six types of solid waste processing facilities as well as three types of landfills and transfer stations. Of the 15 types of solid waste permits, only three are allowed to accept municipal solid waste – Class 3 landfills, Class 3 transfer stations and Class 3 processing facilities. Here are the FY19 facilities:

- **139 landfills;**
- **102 composting and wood-grinding facilities;**
- **41 transfer stations;**
- **20 processing facilities;**
- **15 waste tire facilities;**
- **12 used oil facilities;**
- **5 land-application facilities;**
- **4 incinerators** (all are Air Curtain);
- **2 research, development and demonstration facilities;** and
- **1 soil treatment facility.**

Table 8.1 provides the measurement acronyms. Tables 8.2 to 8.8 provide a list of permitted facilities by category with additional information. For the list of permitted landfills, see Section 7.

Solid Waste Planning

SECTION 9

The S.C. Solid Waste Policy and Management Act of 1991 (Act) requires the S.C. Department of Health and Environmental Control (DHEC) to develop a state solid waste management plan (State Plan). Specific data, analysis, descriptions, evaluations, projections and recommendations that address a 20-year planning period must be provided in the State Plan.

State Plan Requirements

The information required by the Act includes:

- **The amount and type of solid waste being disposed of and disposal projections;**
- **An estimate of current capacity in the state to manage solid waste;**
- **An analysis of the types of facilities that will be needed to manage solid waste;**
- **An evaluation of current management practices; and**
- **Recommendations on how South Carolina can meet its waste reduction and recycling goals.**

The “S.C. Solid Waste Management Annual Report” serves as an update to the State Plan.

Additional DHEC Responsibilities

Beyond the State Plan, DHEC has additional responsibilities including:

- **Determining consistency with state and local or regional solid waste management plans; and**
- **Approving Demonstration of Need (DON) for certain solid waste management facilities.**

CONSISTENCY DETERMINATIONS

Before a solid waste management facility can be permitted, it must be determined by DHEC to be consistent with the State Plan and the county/regional plan.

DHEC looks at many factors when reviewing the county/regional plan and making its consistency decision. Chiefly, DHEC considers the amount of waste that the county or region is projected

County/Regional Plan Requirements

County governments or regions are required to develop solid waste management plans that are consistent with the State Plan. These plans, which also must address a 20-year planning period, must include:

- **The amount and type of solid waste projected to be managed;**
- **An estimate of the current capacity within the county or region to manage its solid waste;**
- **An analysis of facilities that will be needed to manage solid waste;**
- **The designation of a recycling coordinator, description of the recycling program and outreach/education initiatives;**
- **An outline on how the county or region plans to meet South Carolina’s waste reduction and recycling goals; and**
- **An estimate of the cost of implementing the plan.**

to generate during the 20-year planning period and reviews the county's or region's proposed means of managing that waste through a combination of transfer, disposal, incineration and/or recycling.

DEMONSTRATION OF NEED (DON)

DON refers to the criteria established for the:

- **Geographical placement;** and
- **Allowable annual disposal rate** of new and expanding solid waste management facilities.

The original DON regulation was put into effect in June 2000. On June 26, 2009, a revision to Regulation 61-107.17 SWM: Demonstration-of-Need became effective.

The DON regulation addresses:

- **Commercial Class 3 landfills;**
- **Commercial Class 2 landfills;**
- **Commercial solid waste incinerators** that incinerate waste other than wood waste or yard trimmings; and
- **Commercial solid waste processing facilities** that process waste destined for disposal at Class 3 landfills.

The DON regulation stipulates that where there are at least two commercial solid waste management facilities of the same type within a specified planning area, no new facility is allowed. Non-commercial facilities are not required to demonstrate need.

CLASS 2 LANDFILLS

Class 2 landfills accept land-clearing debris, certain construction and demolition debris, certain household furniture and under certain conditions, animal carcasses. Class 2 landfills have a 20-mile planning radius. (See pages 94-95 for a map detailing Class 2 landfill locations and planning radii.)

DHEC calculates allowable annual disposal at new Class 2 landfills using:

- **100 percent of the host county generation;** and
- **30 percent of the generation in other counties within the planning area.**

Tonnage increases for existing Class 2 facilities are allowed only if the facility is operating within 20 percent of its permitted amount, (i.e., the amount of waste disposed per year is 80 percent or more of the annual permitted capacity).

If a Class 2 landfill qualifies for an increase, it can receive the lesser of the amount that disposal in the planning area has increased since the facility last received a permitted increase or 50,000 tons.

Class 2 landfills operating on the effective date of the regulation may be allowed variances from certain DON requirements with respect to replacement facilities and expansions. See Table 9.1 for Class 2 waste generated for disposal by county for use in DON.

CLASS 3 LANDFILLS

Class 3 landfills accept municipal solid waste (MSW), industrial solid waste, sewage sludge, non-hazardous MSW incinerator ash and other non-hazardous waste.

For new commercial Class 3 landfills, allowable tonnage is calculated using:

- **100 percent of the host county generation;** and
- **50 percent of the waste generated in other counties within the planning area.** (None is counted from other counties that have an existing Class 3 landfill.)

Class 3 landfills have a 75-mile planning radius. (See pages 96-97 for a map detailing Class 3 landfill locations and planning radii.)

The yearly disposal rate at an existing landfill is allowed to increase only if the facility is within 20 percent of its permitted disposal rate (i.e., the amount of waste disposed of per year is 80 percent or more of the annual permitted capacity).

If a Class 3 landfill qualifies for an increase, it can receive the lesser of the amount that disposal in South Carolina has increased since the facility last received a permitted increase or 150,000 tons.

In addition, the allowable yearly disposal rate at any Class 3 landfill cannot exceed 30 percent of the total solid waste generated in South Carolina that is destined for disposal in Class 3 landfills.

Class 3 landfills operating on the effective date of the regulation are allowed variances from

certain DON requirements. See Table 9.2 for Class 3 waste generated for disposal by county for use in DON.

SOLID WASTE INCINERATORS

The yearly throughput for a solid waste incinerator is based on the manufacturer's design of the incinerator, but it cannot exceed 600 tons per day. The DON regulation does not apply to air curtain incinerators that receive only wood waste and yard trimmings.

The planning area for a solid waste incinerator is 75 miles. There are no permitted MSW incinerators in the state.

SOLID WASTE PROCESSING FACILITIES

The maximum allowable yearly throughput of a solid waste processing facility that processes waste destined for disposal at a Class 3 landfill is equal to:

- **100 percent of the solid waste destined for disposal that is generated in the host county;** and
- **50 percent of the waste generated in each county other than the host county,** that falls wholly or partially within the 75-mile planning radius.

See pages 98-99 for a map detailing Class 3 Solid Waste Processing Facility locations and planning radii.

Solid Waste processing facilities that process waste destined for recycling or disposal in a Class 1 or Class 2 landfill are not required to demonstrate need.

NOTE: This data is used for calculating annual tonnage limits as related to R.61-107.17 – effective June 26, 2009. The historical data reported has been adjusted to reflect changes in the DON regulation.

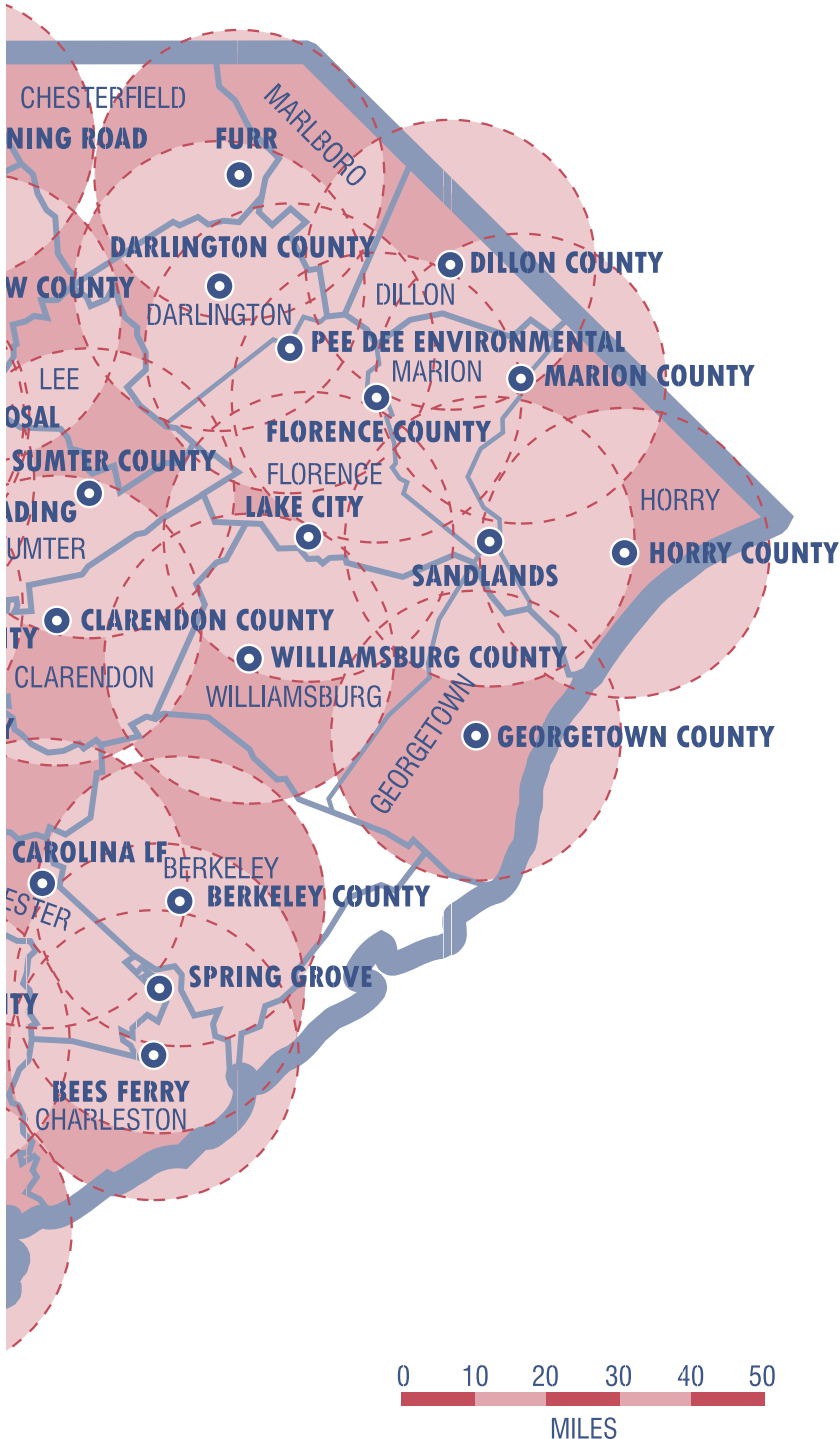

*This amount does not include 128 tons exported to Georgia that is not listed by county.

Demonstration of Need Map

Class 2 Landfills

As of June 30, 2019

CLASS 2

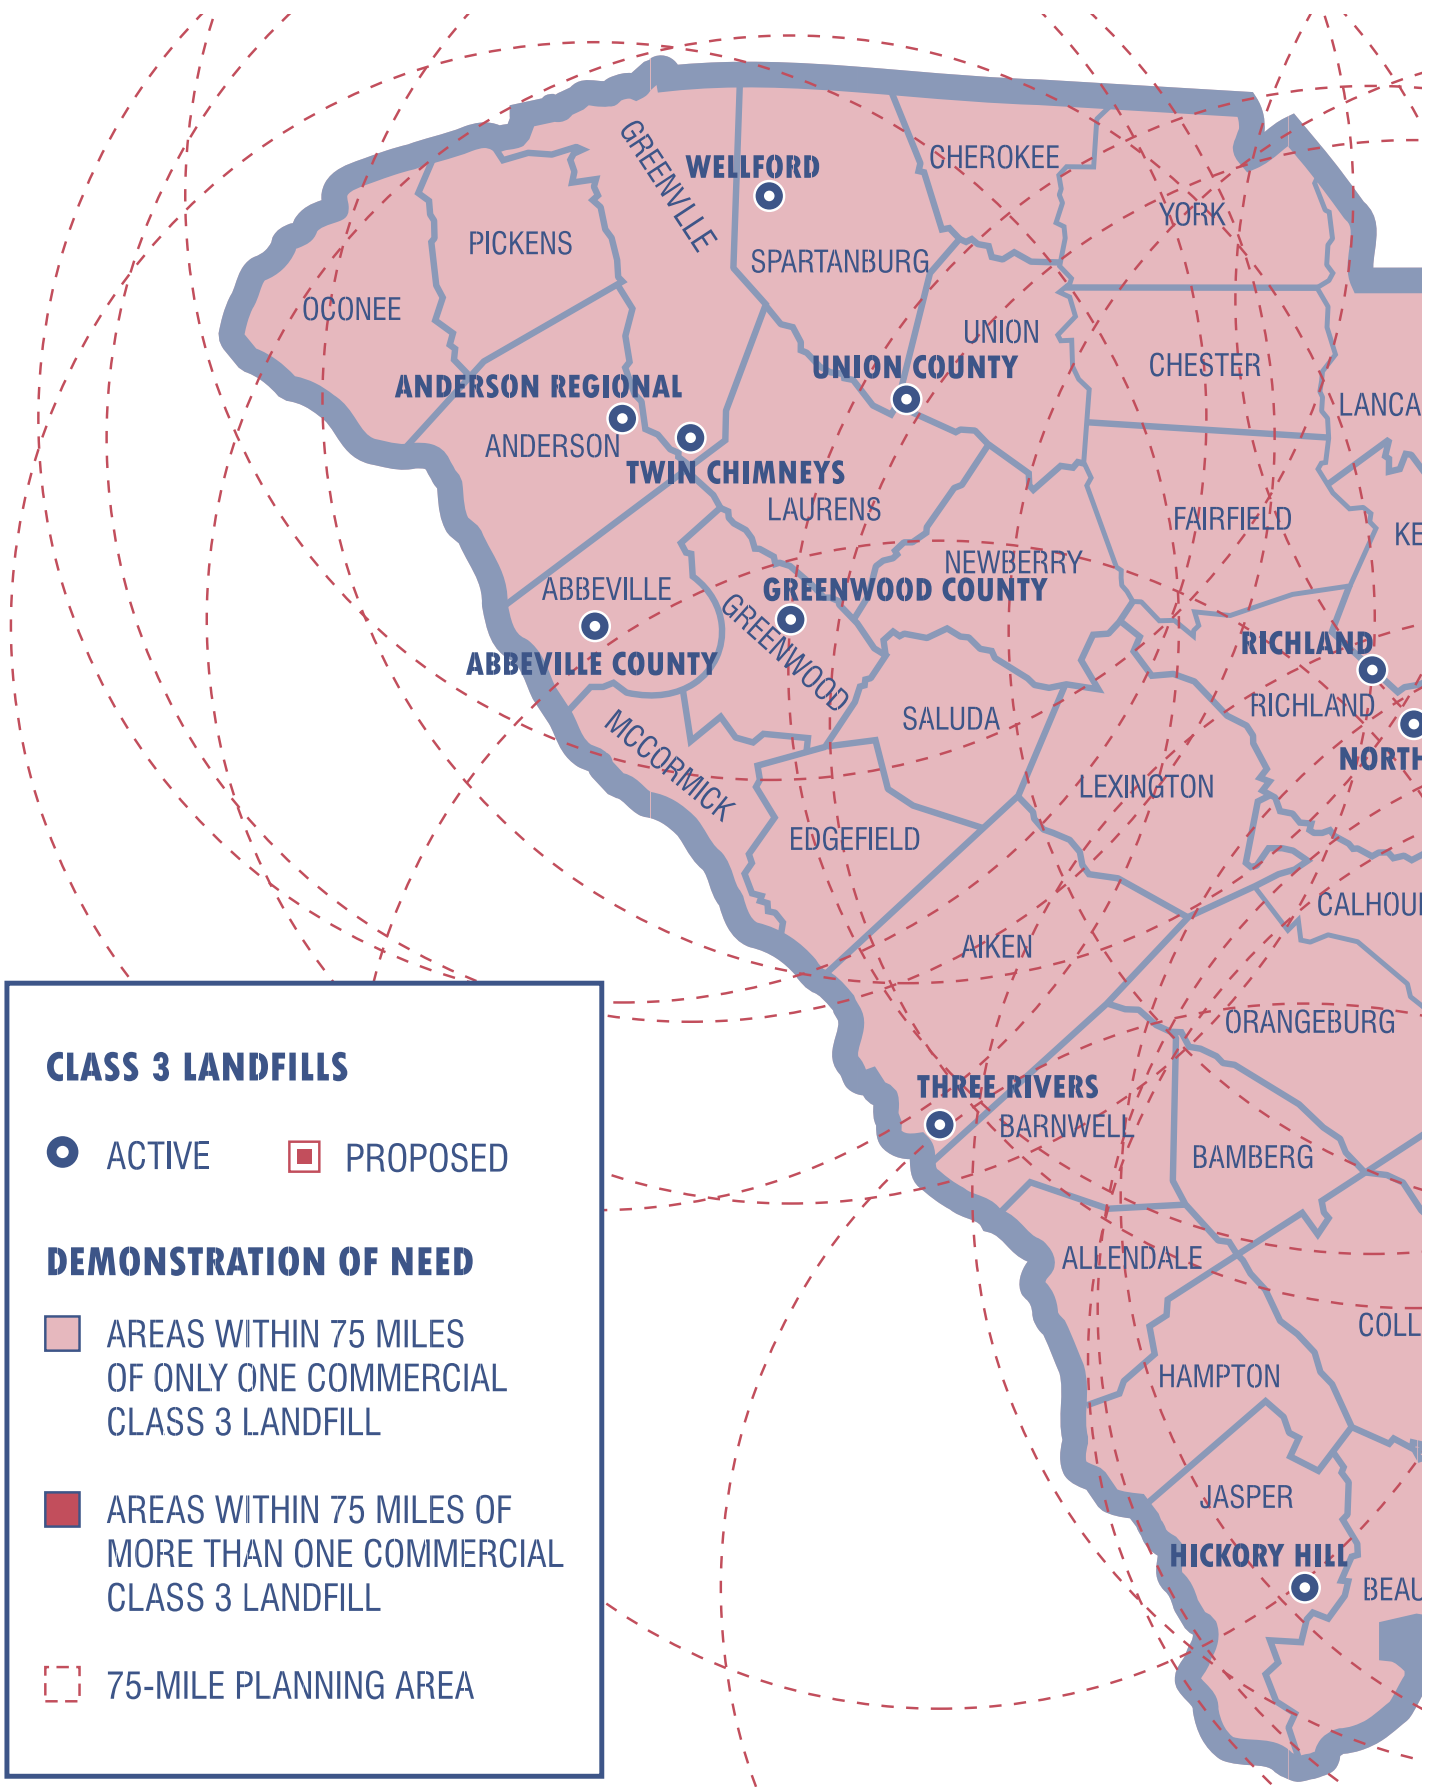

- Limits waste streams as specified in Regulation 61-107.19 SWM: Solid Waste Landfills and Structural Fill
- Waste that is characterized as less than 10 times the maximum contaminant level (MCL) and approved by DHEC may be added to the permit for acceptance/disposal

Operational Criteria:

- Unauthorized waste may be stored at the facility for 30 days; except that putrescible waste must be removed within 72 hours
- An annual survey to determine landfill capacity used and the remaining permitted capacity may be required
- Require scales - but exempts scales for facilities permitted for less than 10,000 tons per year and on-site landfills

Design Criteria:

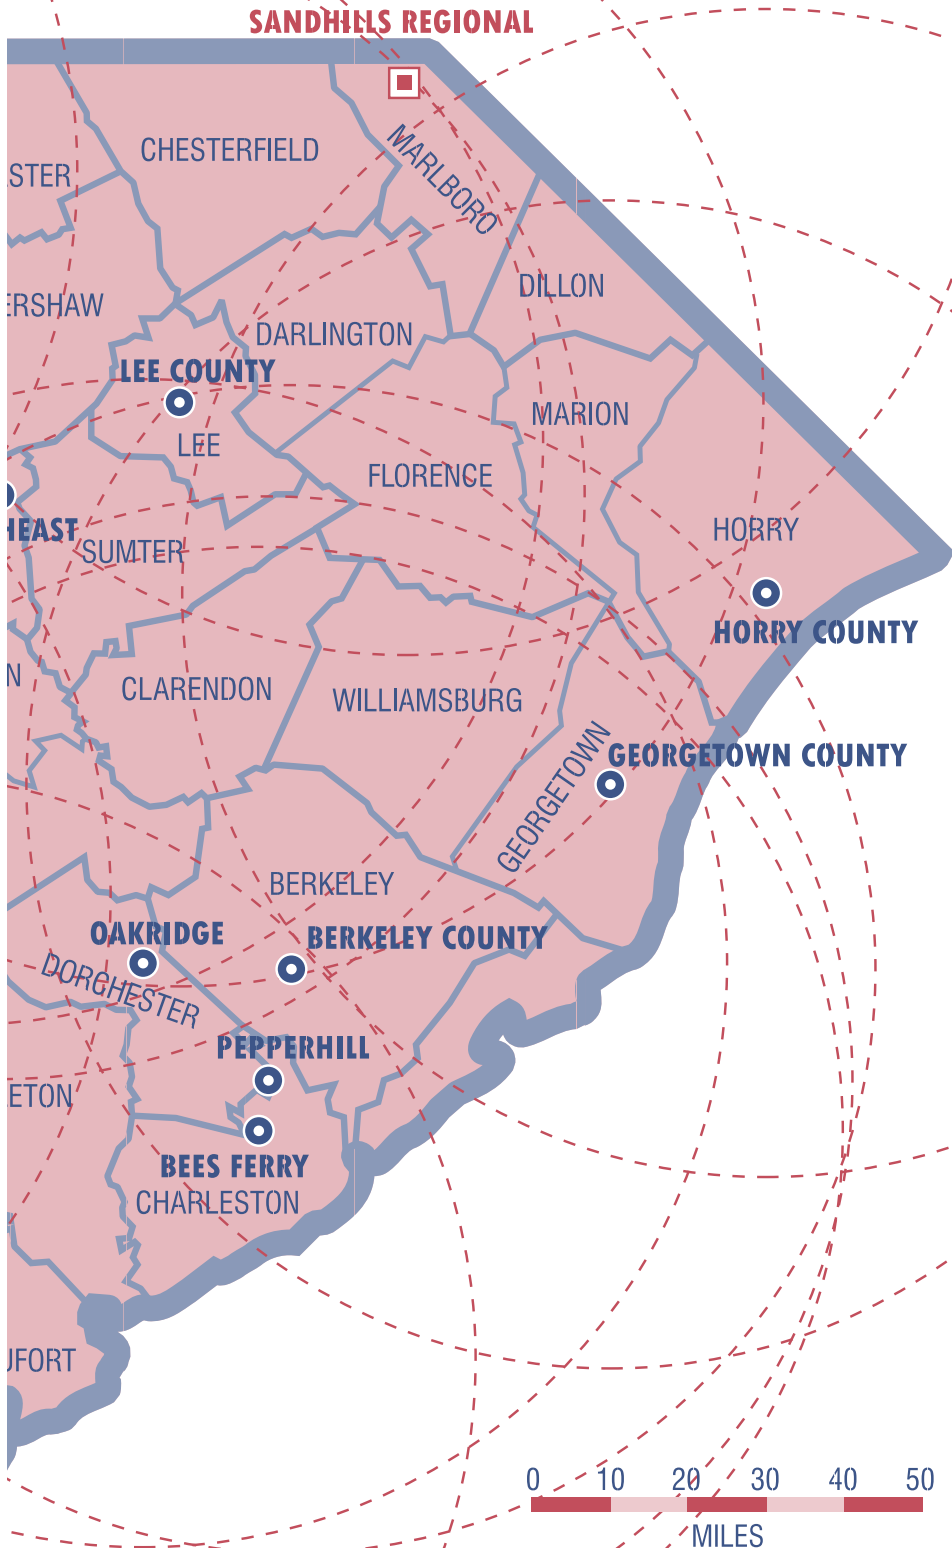

- Require settlement calculations on the bottom elevation
- Require DHEC to inspect the landfill prior to waste placement
- Set cap requirements at 2 feet of soil
- Establish certain buffers when "Notice of Intent to File a Permit Application" is published
- Require groundwater monitoring and corrective action
- Set post-closure (20 years)
- Require closure and post-closure financial assurance

Demonstration of Need Map

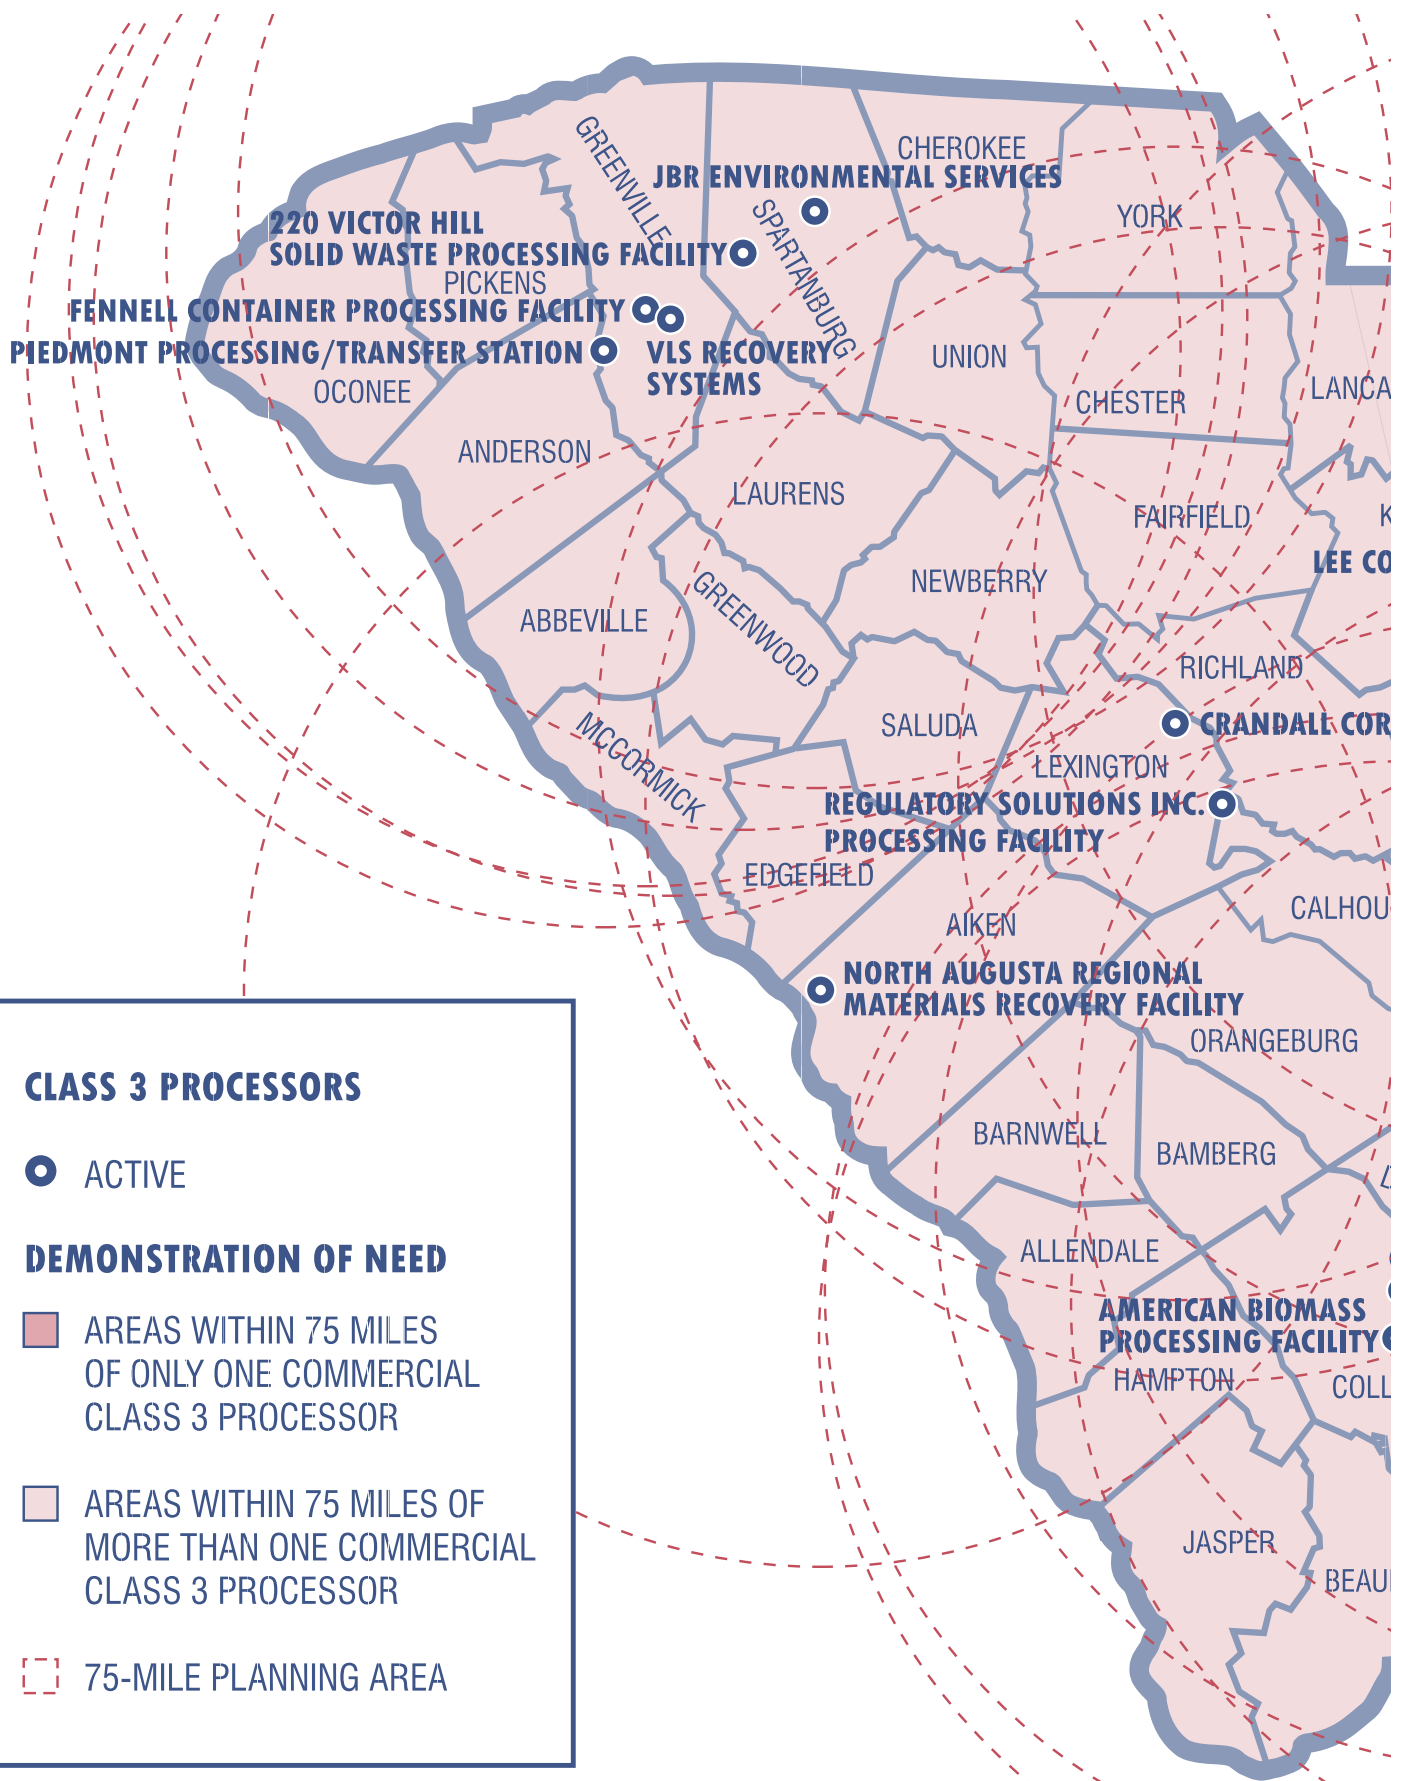

Class 3 Landfills

As of June 30, 2019

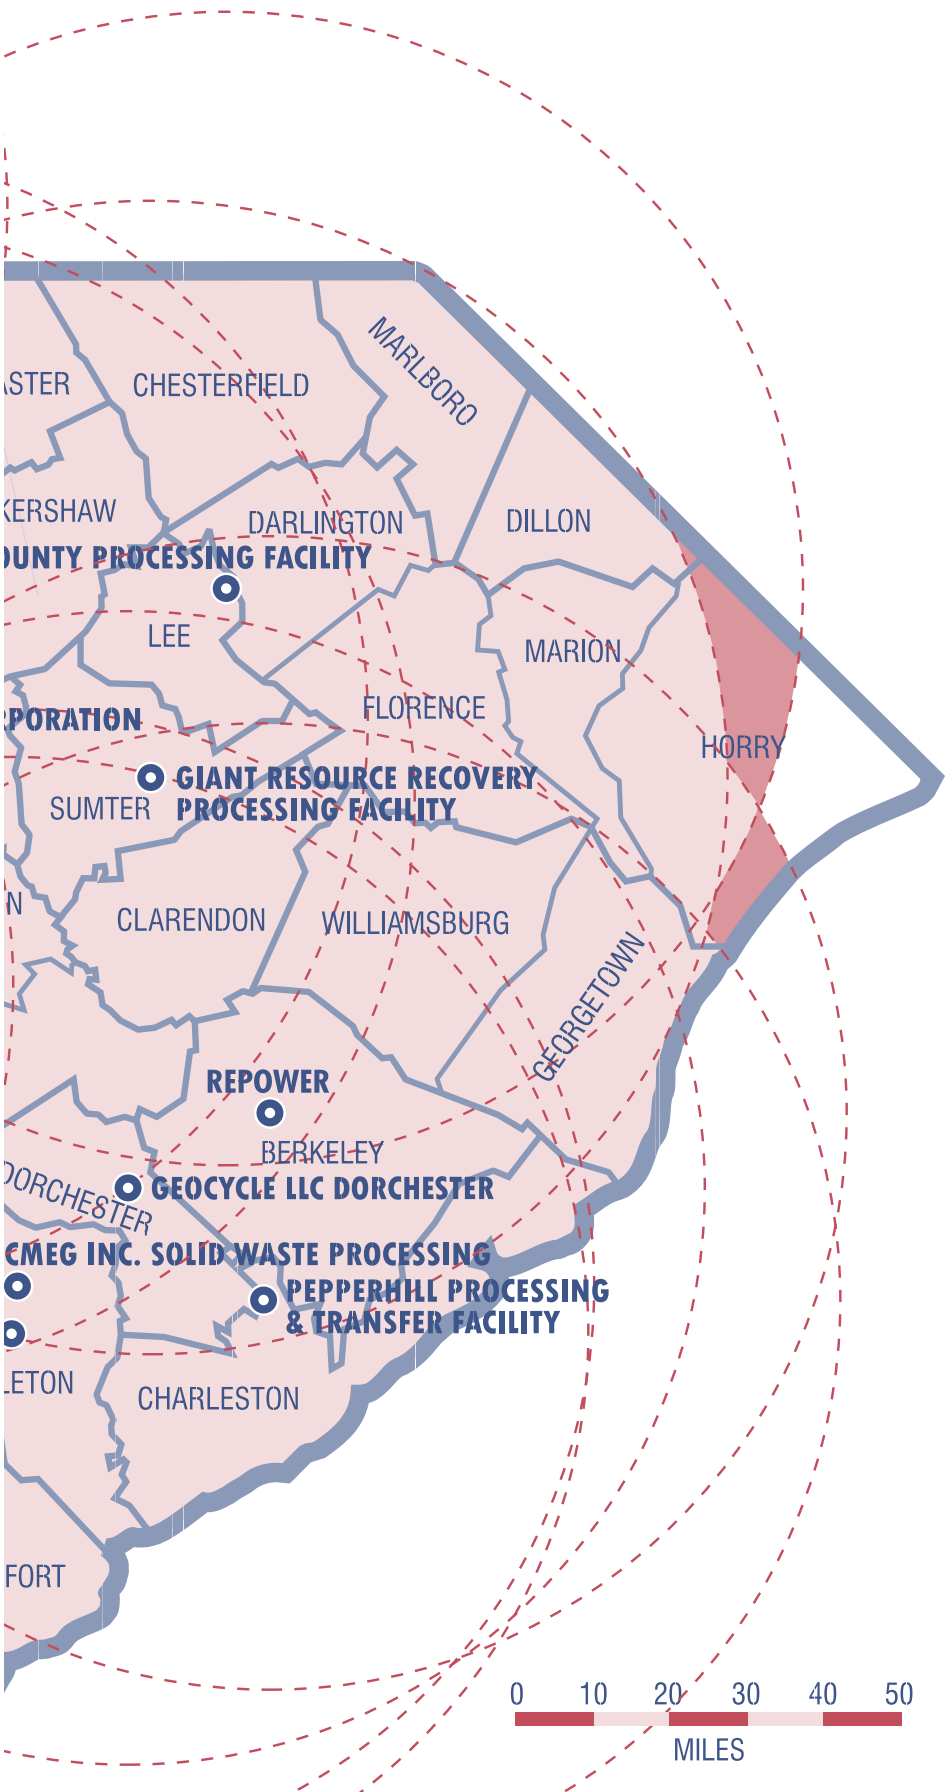

CLASS 3

- Requires waste characterization through the Special Waste Analysis and Implementation Plan
 - Requirement to inspect 10 percent of incoming loads
 - Landfills that were permitted as Industrial Solid Waste Landfills prior to the effective date of Regulation 61-107.19 are exempt from design criteria provided the waste streams remain below 30 times the MCLs
 - Leachate recirculation allowed under permit modification
 - Buffers established when "Notice of Intent to File a Permit Application" is published
 - Notification required within 72 hours of receipt of hazardous or PCB waste
 - Slope-stability requirements
- Certification testing of cap to include:
- One permeability test per acre
 - Four density/thickness tests per acre

About the Office

The S.C. Department of Health and Environmental Control's (DHEC) Office of Solid Waste Reduction and Recycling continues to provide technical assistance and grant funding to local governments.

Key projects and services include:

- **RECYCLE RIGHT SC** focuses on one of the largest issues facing recycling – reducing contamination in the recycling stream. The campaign provides technical assistance and outreach material including artwork for billboards, cart stickers, door hangers, fliers and more for local government programs. Learn more at www.scdhec.gov/recyclerightsc.

- **DON'T WASTE FOOD SC** (DWFSC) is a collaborative outreach public awareness campaign that brings together shareholders from the public and private sectors dedicated to reducing food waste in South Carolina. The goals of the campaign are to:

- **Increase the awareness of the economic, environmental and social impacts** of wasted food;
- **Inspire individuals, communities, restaurants, schools and others** to take action to reduce food waste through **prevention, donation and composting**; and
- **Cut food waste in half** in South Carolina by 2030.

For more information, visit www.scdhec.gov/dwfsc.

- **SMART BUSINESS RECYCLING PROGRAM** is a free, voluntary program designed to:

- **Help South Carolina companies reduce the environmental impact** of their operations;
- **Provide technical assistance to help businesses begin or expand green practices** such as waste reduction, recycling, composting, energy and water conservation and environmentally preferred purchasing; and
- **Promote and recognize businesses** for their sustainability efforts.

To participate, visit www.scdhec.gov/smartbusiness.

- **TAKE ACTION SC ENVIRONMENTAL EDUCATION PARTNERSHIP** is designed to inform, inspire and empower students and teachers to protect and preserve the environment. The program offers lessons, support material, teacher workshops and classroom presentations to promote composting, recycling, waste reduction, litter prevention and sustainability.

The centerpiece of the program is DHEC's "Action for a Cleaner Tomorrow: A South Carolina Environmental Curriculum Supplement" ("Action"). The partnership is comprised of Coastal Carolina University, Palmetto Pride, Keep South Carolina Beautiful, S.C. Energy Office and DHEC.

Visit www.takeactionsc.org for more information.

GRANT PROGRAMS continue to be an integral part of the Office's services. In fiscal year 2019 (July 1, 2018 to June 30, 2019) the Office awarded more than \$7.2 million in funding to local governments, schools and colleges/universities.
