JOURNAL
OF THE
SENATE
OF THE
STATE OF SOUTH CAROLINA

REGULAR SESSION BEGINNING TUESDAY, JANUARY 10, 2023

TUESDAY, MAY 7, 2024

**Tuesday, May 7, 2024
(Statewide Session)**

~~Indicates Matter Stricken~~
Indicates New Matter

The Senate assembled at 12:00 Noon, the hour to which it stood adjourned, and was called to order by the PRESIDENT.

A quorum being present, the proceedings were opened with a devotion by the Chaplain as follows:

Genesis 12:2

We read in Genesis that the Lord said to Abram:“ ‘I will make you into a great nation and I will bless you. I will make your name great, and you will be a blessing.’ ”

Please join me as we bow in prayer: Most Holy God, how attuned are we all to the fact that the last day of this regular legislative session draws ever closer. And these Senators and their aides are equally aware, assuredly, of some major issues that remain unresolved: an energy bill, whether a certain position should be an appointed or elected one, judicial reform, plus finalizing the budget. Therefore, O God, we pray fervently today that You will bestow Your guidance and blessing upon these leaders that they might by Your grace have the stamina and wisdom to wrap up this year’s State business in ways that truly benefit all of our people. So we pray in Your wondrous name, dear Lord. Amen.

The PRESIDENT called for Petitions, Memorials, Presentments of Grand Juries and such like papers.

ten days of service of the motion on the opposing party, and any adjustment to the thirty-day payment amount shall become effective five days after the court orders, or refuses to order, an adjustment.

(2) Upon final disposition of the animal, remaining funds deposited with the court shall be refunded to the owner.

The Senate proceeded to a consideration of the Bill.

The Committee on Judiciary proposed the following amendment (SJ-5118.BJ0052S):

Amend the bill, after the title but before the enacting words, by striking the twenty eighth paragraph and inserting:

Whereas, the South Carolina General Assembly recognizes the strategic importance of investigating in and pursuing fusion energy and advanced nuclear technologies such as small modular reactors and molten salt reactors at this time, understanding that proactive engagement in research and development positions the state to capitalize on future opportunities when SMRs become economically and technologically viable; and

TUESDAY, MAY 7, 2024

Amend the bill further, by deleting SECTION 2.

Amend the bill further, SECTION 5, by striking Section 58-4-10(B) and inserting:

(B) Unless and until it chooses not to participate, the Office of Regulatory Staff must be considered a party of record in all filings, applications, or proceedings before the commission. The regulatory staff must represent the public interest of South Carolina before the commission as it pertains to the matters below: ~~For purposes of this chapter only, “public interest” means~~

(1) the concerns of the using and consuming public with respect to public utility services, regardless of the class of customer;

(2) economic development and job attraction and retention in South Carolina; and

(3) preservation of the ~~of~~ continued investment in and maintenance of utility facilities so as to provide reliable and high quality utility services.

Amend the bill further, SECTION 6, by striking Section 58-4-150(A) and inserting:

(A) To further advance and expand upon Executive Order 2023-18 which established the PowerSC Energy Resources and Economic Development Interagency Working Group, the Office of Regulatory Staff, in consultation with a stakeholder group that includes representatives of consumer, environmental, manufacturing, forestry, and agricultural organizations, natural gas and electrical utilities, the South Carolina Public Service Authority, and other affected state agencies, shall prepare a comprehensive South Carolina energy assessment and action plan, hereinafter referred to as “the plan”. This plan must identify recommended actions over a ten-year period to ensure the availability of adequate, reliable, and economical supply of electric power and natural gas to the people and economy of South Carolina. For purposes of this section, natural gas and electrical utilities also includes any investor-owned electrical utility, a public utility as defined in Section 58-5-10, electric cooperatives, and any consolidated political subdivision that owns or operates in this State equipment or facilities for generating, transmitting, delivering, or furnishing electricity, but does not include an entity that furnishes electricity only to itself, its residents, or tenants when such current is not resold or used by others.

Amend the bill further, SECTION 7, by striking Section 58-38-20(7) and inserting:

(7) The EPI shall collaborate across South Carolina in coordination with SC Nexus, Savannah River National Laboratory, energy utility

providers, private industry, and workforce development to deliver advice on policy creation aligned with the state's distinctive needs and opportunities. EPI shall support and collaborate with SC Nexus, a consortium of public and private entities, formed within the South Carolina Department of Commerce concerning power generation, transmission, and storage.

(8) The EPI shall collaborate with the Energy Center at Clemson University to identify research funding opportunities to meet the urgent needs for energy technology innovation in South Carolina, develop curriculum to ensure relevant academic programming for the future jobs and leadership roles in the new energy industry, provide energy-related training programs to meet the increasing demand for skilled workers in the new energy industry, and promote technology innovation, translational research, and rapid technology transfer from research labs to industry.

Amend the bill further, SECTION 8, by striking Section 58-33-195(A)(2) and inserting:

(2) The General Assembly encourages Dominion Energy South Carolina, Inc. and the Public Service Authority to jointly complete evaluations related to the Joint Resource and to use such information as may be necessary from such evaluations to make a filing as soon as practicable with the commission to obtain a certificate pursuant to Article 3 of this chapter. The General Assembly instructs all governmental agencies to provide accelerated consideration of any action required to permit or authorize construction and operation of the facilities subject to this section in preference to all other pending nonemergency applications or requests. The General Assembly finds adding natural gas generation capacity at the retired Canadys coal site would advance the economy and general welfare of the State based on current conditions and information as of the effective date of this Act. However, this subsection does not exempt the entities from complying with the requirements of the Utility Facility Siting and Environmental Protection Act, including the requirement to seek commission approval for a certificate of environmental compatibility and public convenience and necessity nor does this subsection limit the commission's independent decision-making authority. The entities are further encouraged to use existing rights of way for new natural gas lines to the Canadys site to the greatest extent practicable.

Amend the bill further, SECTION 10, by striking Section 13-7-820(5) and inserting:

TUESDAY, MAY 7, 2024

(5) to engage stakeholders and develop a strategic plan to advance the development of advanced nuclear generation including small modular reactors, molten salt reactors, fusion energy, and spent nuclear fuel recycling facilities to serve customers in this State in the most economical manner at the earliest reasonable time possible.

Amend the bill further, SECTION 12, by striking Section 58-33-196 and inserting:

Section 58-33-196. Electrical utilities and the Public Service Authority are encouraged to explore the potential for deploying fusion energy and advanced nuclear facilities including, but not limited to, small modular nuclear facilities at suitable sites. Suitable sites may include sites of current nuclear facilities, sites where nuclear facilities have been proposed but not constructed, and other brownfield sites, such as coal-generation sites. Any utility pursuing deployment of such nuclear facilities must provide annual progress reports to the commission and the Public Utilities Review Committee; this report may be in writing or in the form of testimony in an appropriate proceeding. A utility whose rates are regulated by the commission must provide estimates of the cost of the studies including, but not limited to, planning, licensing, and project development to the commission. If the commission finds such estimated costs are reasonable, prudent, and in the public interest, such costs may be recoverable through rates as they are incurred. Nothing in this section relieves an electrical utility of the burden of filing for a certificate under this article and obtaining appropriate approvals from the commission before commencing construction.

Amend the bill further, SECTION 13, by striking Section 58-37-70(B)(1) and inserting:

(1) “Electrical utility” has the same meaning as provided in Section 58-27-10(7).

Amend the bill further, SECTION 13, by striking Section 58-37-70(F)(3) and inserting:

(3) In the event the commission finds cost estimates provided by an electrical utility pursuant to item (2) are reasonable and prudent, the costs may be recoverable through rates, even if an application for a certificate of environmental compatibility and public convenience and necessity have not been filed. However, these costs shall not include a rate of return.

Amend the bill further, SECTION 14, by striking Section 58-37-130 and inserting:

Section 58-37-130. The applicant or any person whose private rights are affected by an agency decision or action on an application for a

permit for any energy infrastructure project may appeal that decision or action to the South Carolina Supreme Court. The Supreme Court shall hear these appeals as a direct appeal in accordance with South Carolina Appellate Court Rule 203. The utility shall also describe how it evaluated alternate transmission technologies when developing solutions for identified transmission needs for interconnecting resources. The utility's transmission report must include how the utility evaluates transmission investments, including:

(i) a description of how the utility evaluated a range of transmission solutions, including non-wires alternatives, joint projects with neighboring and other regional utilities, other upgrades to existing facilities, and other best practices. Modeling may consider, as appropriate, grid-enhancing technologies and alternate transmission technologies such as static synchronous compensators, static Volt-Ampere Reactive (VAR) compensators, advanced power flow control devices, transmission switching, synchronous condensers, voltage source converters, advanced conductors, switchable reactors, and tower lifting in a manner consistent with common utility practice;

(ii) a description of how transmission factored into the utility's evaluation of the range of future scenarios included in the fifteen-year time period of the utility's resource plan, including significant continued economic growth and the retirement of the utility's coal generation;

(iii) a discussion of transmission considerations for facilities included in the utility's preferred resource plan for which there are particular sites specified;

Amend the bill, by striking all after the title but before the enacting words and inserting:

TUESDAY, MAY 7, 2024

Amend the bill further, by striking all after the enacting words and inserting:

SECTION 1. (A) The General Assembly finds:

(1) South Carolina is achieving remarkable economic development success, which is bringing jobs and prosperity to its citizens.

(2) From January to December 2023, the state announced total capital investments of 9.22 billion dollars and over 14,000 jobs, the second largest amount in state history.

(3) In 2022, the state announced 120 projects creating over 14,000 new jobs with 10.27 billion dollars in new capital investment, the largest amount in state history.

(4) Since 2017, the state has announced over 36.4 billion dollars in new investments and 86,378 new jobs.

(5) Sustaining this success in economic development requires an electric system that can grow and modernize to meet the demands that a prosperous and developing economy places on it.

(6) According to the U.S. Census Bureau, South Carolina led the nation in population growth in 2023.

(7) The rapidly expanding population and record-breaking economic development successes necessitate a strategic and forward-thinking approach to developing new energy infrastructure capable of meeting the energy needs of South Carolina's residents and supporting the continued prosperity of the state.

(8) The urgency of addressing this situation is underscored by the interconnected challenges of meeting surging energy demand, ensuring grid reliability, and fortifying the state's resilience against potential disruptions, thereby compelling the imperative for the timely construction of new generation and transmission facilities to safeguard the continued well-being and economic vitality of South Carolina.

(9) The economic and financial well-being of South Carolina and its citizens depends upon continued economic development, industry retention, and opportunities for job attraction and retention.

(10) Major commercial and industrial enterprises with the potential to bring substantial investments and employment opportunities are increasingly making decisions on the location of new facilities and investments in existing facilities based on the availability of safe, reliable, and affordable electricity generated from a diverse portfolio of resources.

(11) Electrical utilities, the South Carolina Public Service Authority, and electric cooperatives are critical economic development

TUESDAY, MAY 7, 2024

and industry retention partners for South Carolina by offering affordable power that has helped to attract jobs and associated development.

(12) Natural gas combined-cycle generation provides dispatchability and operating flexibility that will allow the State's electrical utilities and the South Carolina Public Service Authority to add large amounts of flexible resources to their systems without jeopardizing cost-efficient and reliable service to customers.

(13) Integrated resource planning by the State's electrical utilities and the South Carolina Public Service Authority consistently indicates the need for and benefit of additional combined-cycle natural gas resources under multiple planning scenarios.

(14) Cooperatively building new generation resources can enable the State's electrical utilities and the South Carolina Public Service Authority to benefit from economies of scale to reduce the capital cost of these units compared to building single, stand-alone units sized to meet their individual needs alone, while at the same time reducing the environmental and land-use impact of the natural gas pipeline and transmission infrastructure required to support separate units.

(15) Cooperatively building projects can provide a unique opportunity to anchor the expansion of natural gas pipelines serving certain coastal counties of South Carolina where economic development is currently hampered by the lack of such supplies, thereby increasing jobs, prosperity, and public welfare in those areas, and cooperatively built projects do so with minimal environmental disruption.

(16) The rates, services, and operations of electrical utilities are a matter of public interest, and the availability of an adequate, reliable, and economical supply of electric power and natural gas to the people and economy of South Carolina is a matter of public policy.

(17) Certain aspects of the current regulatory structure in South Carolina can be revised to reduce the cost, delay, and uncertainty of planning, siting, and constructing new generation and transmission resources serving customers in this state.

(18) It is important that the General Assembly take action to ensure that generation and transmission providers are able to plan, site, and construct new and replacement generation and transmission resources in a timely and cost-effective manner, utilizing procedures that are fair, prompt, efficient, and guided by an informed Public Service Commission.

(19) It is important that the General Assembly take action to ensure that permitting and litigation processes for utility facilities are streamlined and do not cause unnecessary cost and delay.

TUESDAY, MAY 7, 2024

(B) The General Assembly declares it is the policy of this State to:

(1) ensure South Carolina customers have access to an adequate, reliable, and economical supply of energy resources;

(2) sustain growth in industrial and economic development by ensuring an electric generation, transmission, and distribution system that can grow and modernize to meet the demands that a prosperous and developing economy places on it;

(3) provide fair regulation of electrical utilities in the interest of the public in a manner that maintains the financial integrity of the electrical utility by assuring a sufficient and fair rate of return, supports economic development and industry retention, and provides just and reasonable rates to be established for entities providing electrical utility services to customers in this State while promoting adequate, reliable, and economical utility service to all of the citizens and residents of this State;

(4) provide the State and the public with a well-regulated electrical utility environment;

(5) assure that resources necessary to meet future growth through the provision of adequate, reliable electrical utility and South Carolina Public Service Authority services include use of the entire spectrum of demand-side options, including but not limited to, conservation, load management, and energy efficiency programs as additional sources of energy supply and energy demand reduction;

(6) provide just and reasonable rates and charges for electrical utility and South Carolina Public Service Authority services without undue preferences or advantages, or unfair or destructive competitive practices, and consistent with long-term management and conservation of energy resources by avoiding wasteful, uneconomic generation and uses of energy;

(7) assure that facilities necessary to meet future growth can be financed by the utilities operating in this State on terms which are reasonable and fair to both the customers and existing investors of such utilities, and to that end, to authorize fixing of rates in such a manner as to result in lower costs of new facilities and lower rates over the operating lives of such new facilities;

(8) recognize the important role of utilities in economic development and industry retention, and the necessity for utilities to maintain the ability to finance continued investment in, and operation and maintenance of, the electric system, rapid restoration of power after major storms and outages, rate designs, and infrastructure necessary to attract and retain businesses and jobs to South Carolina, to maintain the ability to obtain financing at attractive rates, and to ensure a viable

TUESDAY, MAY 7, 2024

workforce for providing electricity and to attract such utility workers at market-competitive wages;

(9) seek to encourage and promote harmony between public utilities, their users, and the environment;

(10) foster the continued service of electrical utilities and the South Carolina Public Service Authority on a well-planned and coordinated basis that is consistent with the level of energy needed for the protection of public health and safety, and for the promotion of the general welfare, economic development, and industry retention;

(11) seek to adjust the rate of growth of regulated energy supply facilities serving the State to the policy requirements of statewide economic development and industry retention;

(12) encourage the continued study and research on new and innovative rate designs, which will protect the State, the public, the ratepayers, and the utilities;

(13) facilitate the construction of facilities in and the extension of natural gas service to unserved and underserved areas in order to promote the public welfare throughout the State;

(14) encourage electric providers to cooperate and collaborate on the development of new energy infrastructure where economies of scale and spreading of cost and risk bring benefit to consumers;

(15) further the development of cleaner energy technologies on a cost-effective basis to protect the natural resources of this State, promote the health and well-being of the people of this State, and attract investments, create employment opportunities, drive economic growth, and foster innovation in this State; and

(16) accomplish regulatory processes and issue orders in a timely manner.

(C) The General Assembly finds that comprehensive legislation is needed to promote the development of new and reliable energy infrastructure resources, fostering resilient and reliable energy infrastructure critical to the economic success of the state of South Carolina.
