South Carolina Department of Health and Human Services

House Ways and Means Healthcare Subcommittee Budget Presentation December 15, 2011

Mission of South Carolina Department of South Carolina Health & Human Services **Health & Human Services:**

To purchase the most health for our citizens in need at the least possible cost to the taxpayer.

Medicaid serves the state's vulnerable citizens. Our job is to ensure the program is effective and sustainable.

Strategy Drivers

 80 to 90% of health and well-being is not the result of health services, but income, education, personal choices, genetics and environment.

(Social Determinants of Health model)

 30% of all health care expenditures in the U.S. in 2009 were actually excess costs that contribute nothing to health outcomes. The Institute of Medicine recommends pushing out 10% of excess health costs in 10 years.

(Institute of Medicine)

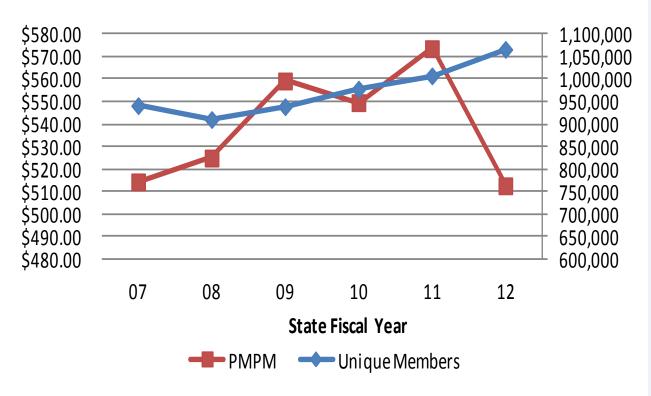

We can invest in more health services, or we can invest in better health.

Removing excess costs from the system allows us to invest in other state priorities or prepare the state for future Medicaid expansions and federal cost shifting.

Unique Medicaid Members Compared to Per Member Per Month (PMPM) Costs

Purchasing more value involves the management of PMPM costs. The department is already pushing costs out of the system, and bending Medicaid's PMPM cost curve.

The PMPM in FY 2011 was \$573.57. In FY 2012 it is projected to be \$512.65.

Section 2: FY 2012 Update

FY 2011: Enrollment Overview

Actual Monthly Medicaid Enrollment with Percent Change SFY 2011

FY 2011 program growth indicates a 4.88% increase equivalent to 47,000 members.

In June 2011, there were 870,000 members enrolled in Medicaid.

In FY 2012, the average monthly enrollment is expected to grow by 40,000 members. This will be a growth of 4.8%.

Historical Medicaid Enrollment

State Fiscal Year	Unique Members	Member Months
2007	941,317	9,158,360
2008	910,486	8,895,323
2009	938,979	9,218,144
2010	978,095	9,731,923
2011	1,007,408	10,255,356
2012 Budget		10,747,596
2013 Budget		11,091,768
% Change in Growth	7.0%	21.1%

Sources: RSS3870 & Thomson Reuters Advantage Suite All Medicaid and CHIP excluding GAPS and Refugees Includes SSI, Duals, or disabled members that have received retroactive eligibility since the cut off of standard RSS reporting. Member months represent all Medicaid enrollees multiplied by the number of months they were enrolled in Medicaid.

Greater growth in member months versus unique individuals served indicates that people are spending longer on Medicaid today than in the past.

FY 2011 Actuals Compared to FY 2012 Budgeted

The SFY12 appropriation equals \$5.8 billion, which includes excess "other funds" and "federal funds" authority.

The department is working to remove excess authority from the budget because it can be misleading as to the actual amount of cash available.

ACA Projections

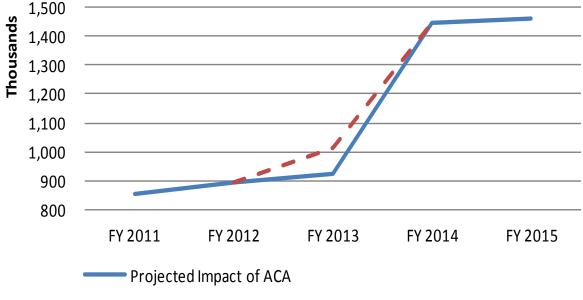

By FY 2015, latest actuarial estimates indicate that enrollment in the SC Medicaid program will exceed 1.46 million members.

For FY 2014 and 2015, SCDHHS will need at least \$147 million in additional match for ACA provisions and enrollment.

The Projected Impact of the Affordable Care Act on the Average Number of Monthly Eligibles

Projected Impact of ACA including Express Lane Eligibles

Establishing an "Express Lane" to enroll 78,137 currently eligible children during FY 2013 will prepare South Carolina for the impact of ACA.

Looking Ahead: Reduced Federal Medicaid Contributions

Federal Cost Shifting Currently Planned or Under Consideration

Reduced Federal Financial Participation

Various proposals' recommendations to change FMAP funding formula will increase states' contributions

 Reduced Disproportionate Share Hospital (DSH) Allotment

Affordable Care Act: \$518 million reduction in federal funds from FY 2014 – FY 2020 for South Carolina*

Cap on Provider Taxes as a Source of State Match

President's Budget Control Act: Reduce provider tax revenue threshold from current 6% to 3.5%

As in all states, SC Medicaid is facing enrollment increases even as federal matching funds are projected to decrease.

The potential for decreased federal contributions will require states to fund a larger share for their Medicaid programs.

By pushing out costs in the Medicaid program now, and making down payments toward FY 2014 expansions, the state can better respond to this new fiscal environment.
