Biosparge Control Building- Street View

Path Forward

- Continued periodic meetings with Plantation Pipe Line.
- Continued community meetings to provide updates on the cleanup.
- Continued oversight of petroleum removal, monitoring, and operation of the groundwater cleanup system.

Information regarding the site can be viewed on our website: www.scdhec.gov/LewisDrivePipelineSpill

Surface Water Sampling Event

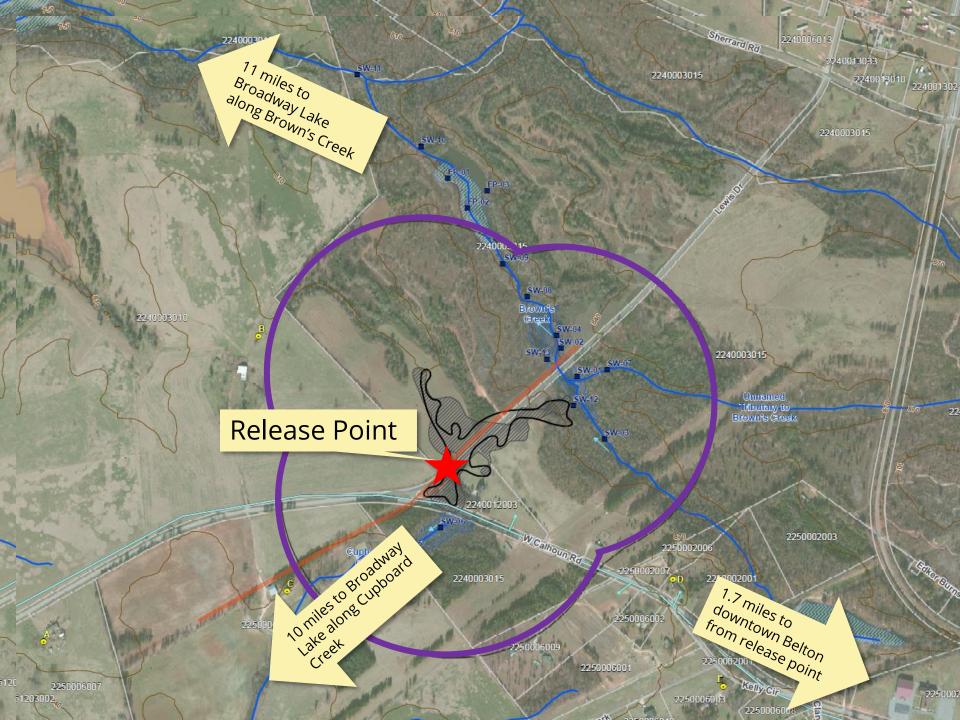

• In response to community concerns expressed during the January 31, 2017 Public Meeting.

 On February 28, 2017, DHEC collected surface water samples from 23 locations from the site to Broadway

Anderson County, Plantation Pipe Line, and DHEC sent samples to different laboratories.

Surface Water Sampling Results

Results were consistent from all three labs.

No detects of petroleum constituents above risk based screening levels at **any** of the locations except for three near the release site in Brown's Creek at SW-1, SW-2, and SW-12 (consistent with previous data).
