

The funds will be used to create or build a health and wellness activity room for the senior citizens of Florence County.

Currently, the Leatherman Senior Center has limited activity space to meet the demanding needs of senior citizens in Florence County. We are challenged with activity group numbers growing at a rapid pace, and there are limited spaces that are capable of hosting activities at the same time. One of the dilemmas we face is not being able to create new activities for our seniors due to the lack of space. The Senior Citizens Association in Florence County needs to promote the overall health and well-being of older adults. The addition of the new Health and Wellness Activity Room will allow our seniors to prioritize their health and wellness and ensure a better quality of life.
