

# MEETING THE NEEDS OF OUR CITY

## >>> PUBLIC SAFETY TRAINING FACILITY

Estimated Cost: \$3.5 million to \$5 million

A Master-Planned Training Facility like the examples above would include comprehensive training for both Police and Fire personnel; individual and separate training buildings; and classroom space, showers and restrooms. This project, estimated to cost \$3.5 - \$5 million, could be completed in phases.

Above, a Burn Building would be utilized for training by firefighters.

At right, a possible location for the facility is to the north of the GCFD Headquarters Station, where there is nearly 7 acres of usable space.
