Law Enforcement and Criminal Justice Subcommittee
Bond Bill Recommendations (Rep. Pitts)

Judicial Department

\$3,000,000 – Statewide Court Case Management System

Explanation of request:

- The existing Court Case Management System (CMS), designed to function as a desktop application and launched in 2003, is outdated technology and has reached the end of its lifecycle. With the advancements in today's technology, the CMS application would greatly benefit from the enhancements afforded to it by migrating to a cloud/web base platform. With the demand of inter-agency data exchange, the request for accurate statewide and federal court data has significantly increased. The CMS functionality needs to be improved in order to keep up to date with the progress in modern court houses. The estimated cost to modernization the statewide Court Case Management System is \$20 million dollars.
