COVID-19 Vaccine Distribution System: Responsibilities*

<u>Individual</u>	<u>System</u>	<u>Provider</u>	DHEC	<u>Federal</u>
Schedule 1 st dose appointment AND Arrive for 1 st dose AND	Administer 1st dose Vaccination NOT Complete	Ensure individual is registered in VAMS AND Administer 1 st dose to individual (ONLY use 1 st dose) AND	Ensure efficient distribution and administration of vaccines within S.C.	Ensure efficient manufacturing of vaccines and distribution to states
Schedule 2 nd dose appointment with same provider	Schedule 2 nd dose	Schedule 2 nd dose appointment		
	Order 2 nd dose	Week before individual arrives for 2 nd dose, submit order (guaranteed to receive all that match a 1 st dose**)	Submit order of 2 nd doses from providers	Receive each state's order
		AND	AND	AND
		Receive order directly from federal or from DHEC redistribution center^	Ensure 2 nd doses given to each provider match their 1 st dose allocation	Send amount of 2 nd doses ordered (max is amount of 1 st dose ordered 3-4 weeks prior)
Arrive for appointment	Administer 2 nd dose	Administer 2 nd dose to individual (ONLY use 2 nd doses)		
	FULL VACCINATION			

*Note: Chart is a simplified summary acknowledged as accurate by DHEC staff. It does not include aspects of the distribution such as enrollment/activation of providers nor order/allocation of first doses. "Provider" means medical personnel providing vaccine directly to the individual (e.g., hospital, pharmacy, individual physician); "DHEC" means the S.C. Department of Health and Environmental Control; "VAMS" means Vaccine Administration Management System. **DHEC can only provide second dose allocations as provided by the federal government which matches the states allocated first dose allocations. Therefore, a provider is only guaranteed to receive the second doses they order that match the amount of first doses they received three to four weeks prior, so they can complete the dosing schedule. ^Certain providers include those without ultra-cold storage facilities.
