Subject: Oversight Committee Notification

TO ALL EMPLOYEES:

The Department of Natural Resources has been selected by the House Legislative Oversight Committee as a part of their periodic review process. The purpose of this Committee is to study and review agencies' laws and programs once every seven years to determine if those laws and programs are being implemented and carried out with the intent of the General Assembly and whether or not they should be continued, curtailed or even eliminated.

The Committee considers public input to be a very important part of this process in addition to various reports and information provided by the Agency. Employees, constituents, stakeholders, and interested public may share comments and concerns with the Committee through public surveys regarding the Department.

This process is completely transparent and available for you to provide input and see the Department's responses at the General Assembly's website, www.scstatehouse.gov, under "Citizens' Interest," and under "Agency Oversight by House Legislative Oversight Committee." In addition to electronically submitted comments, members of the public may also testify before the Committee, if desired. An ongoing opportunity to provide anonymous input to the Committee is available on the Committee's webpage.

I encourage you to participate in this process so that we may continue to build upon our strong foundation of advocating for and protecting our natural resources. As always, I look forward to sharing information with the Committee and telling those members and the public more about the Department and the great work performed by you every day.

Alvin
