RESTRUCTURING REPORT

V. Key Performance Measurement Processes

This category examines the agency's performance and improvement in key areas. Performance levels are examined relative to those of competitors and other organizations providing similar programs and services. Information is typically displayed by the use of performance measures. Quantitative measures may be supplemented by a discussion of qualitative measures where appropriate; however, every effort should be made to use appropriate quantitative measures that can be charted to show trends and comparisons to benchmarks.

Address only top-level results showing aggregate measures of agency-wide performance that are reflective of the value added to customers. Please include comparative data as applicable. These results are typically captured in performance goals and planning documents. When determining which processes are "key processes" consider the business impacts, and select those processes that are most important to the customer (both internal and external) to satisfy their requirements and/or those processes with problem areas identified by management.

Note: Results information (i.e., each chart, graph, table) reported for this category should be referenced to the specific question number (Ex. Chart 5.1-1, Graph 5.1-2, Table 5.1-3). The third digit identifies the sequential position of the specific chart, graph or table included in the agency's responses to each questions.

For each performance measurement included in response to the questions on the next page under Subsection A, please provide the following information:

- a. The performance goal(s)/benchmark(s) for the overall process output, and/or critical activities that produce the output.
 - i. Three agency/government entities in other states or non-government entities the agency considers the best in the country in this process or similar process and why.
 - ii. If the agency did not use results from an entity the agency listed in response to "i" as a performance goal/benchmark, why not and why did the agency choose the goal/benchmark it did?
 - iii. Individual(s) who are not employed by the agency (government or non-government, located anywhere in the country) whom the agency considers an expert in the process or similar process and their contact information, or if deceased, name of books authored.
- b. List the senior leaders who review the performance measure, their title and frequency with which they monitor it.
- c. Trends the agency has seen and the method by which it analyzes trends in these results.
- d. Whether the agency has reasonable control over this result (i.e., more than 50% or enough to be able to influence and accurately measure the result).
 - i. If the agency does not have reasonable control over this result, the other one or more agencies, who when combined with the agency, together have reasonable control over the result and names of those other agencies.

The agency does not document this information.

Does the agency already provide the information requested on this page, or similar information, in a report required by another entity? If yes, add the appropriate information to the **Similar Information Requested Chart**. If the agency looks in the Excel document attached, there is a template for the agency to complete for any questions which ask for the same information under the tab labeled, "Similar Info Requested."
