Agency Mission

The Court's mission is to provide a neutral forum for fair, prompt, and objective hearings for person(s) affected by an action or proposed action of State agencies or departments within the Court's jurisdiction. Prior to the creation of the Court, citizens who had a dispute with a state agency and wanted to challenge any action related to the dispute had to appear before hearing officers employed or contracted by that particular agency. However, the Administrative Law Court now provides separate adjudicatory proceedings from agencies which conduct the investigative and policy-making functions. The ALC also offers a forum to enforce the decisions of administrative agencies. In fulfilling its function, the Court places a very high value on its ability to be fair and neutral to all litigants that appear before it and continues efforts to improve those results.

Adopted in: 1994

Agency Vision

The Courts vision, including OMVH, is to provide a technologically advanced court, easily accessible by all customers and stakeholders, to ensure the fair, prompt and objective resolution of all cases.

AGENCY’S DISCUSSION AND ANALYSIS

The Administrative Law Court (ALC) is an independent agency and court of record in the Executive Branch. The ALC has six (6) Administrative Law Judges (ALJ), each of whom is elected to a specific seat by the South Carolina General Assembly and may employ other staff as authorized by the General Assembly to hear and dispose of its statutorily mandated jurisdiction. The Office of Motor Vehicle Hearings (OMVH), is a division of the ALC and has five (5) hearings officers and staff, appointed and hired by the Chief Judge, who serves as the Director of the Office. The Court hears certain case types involving all state agencies except those arising under the Consolidated Procurement Code, the Public Service Commission and the Workers’ Compensation Commission. (See Age of Disposed Cases below for specific case types filed with the Court). The OMVH conducts contested cases regarding certain decisions issued by the Department of Motor Vehicles.

There are currently no plans in development to change the structure or organizational framework and procedures of the Court or to recommend that the General Assembly make any statutory changes. However, we continue to closely monitor our results and performance measures to determine if any future changes would be necessary.

The Court is always improving upon how we protect data and Information Technology assets against increasing cyber threats and vulnerabilities. The Court depends heavily on network and information systems for essential operations and data security. A culture of awareness regarding security risks is our standard at the Court and we accomplish that with a multi-layered security and defense approach focusing on sophisticated and blended cyber-attacks. The Court places extremely high importance on the cyber security education of all agency employees making sure users stay informed. We recognize that the first line of defense in maintaining the security and integrity of our IT assets and networks starts with informed IT personnel and network users.

RISK ASSESSMENT AND MITIGATION STRATEGIES

The Chief Judge is statutorily responsible for assigning a specific Administrative Law Judge (ALJ) to each case filed with the Court. At the OMVH, the cases are automatically assigned to a hearing officer based on specific geographic regions. The Chief Judge is also responsible for the administration of the Court and OMVH, including budgetary matters and supervision of the support staff. The other ALJs have supervision of their administrative assistant/law clerk.

Each ALJ is individually responsible for ensuring the fair and prompt disposition of the cases assigned to his or her office. If the Court is unable to accomplish its goals and objectives of the timely disposal of cases, the greatest risk of a negative impact on the public would be for a determination of the case to be delayed or denied. If a case becomes moot due to lack of a timely decision, this could potentially have a negative impact on the parties involved. Although the litigants often ask for continuances due to discovery and scheduling issues, the Court seeks to balance those requests to ensure a court system that is fair and prompt for all litigants. The primary support for a court to efficiently dispose of its docket timely is to have adequate resources to do so. This may be in the form of additional judges, staff or to be fully funded without reliance on fees.
