| | 3 |
|----|---|
| 1 | SENATOR RANKIN: We're going to go on |
| 2 | the record. The court reporter will give you the |
| 3 | oath and we'll get this ball get this process |
| 4 | started again. |
| 5 | Shut that door, if you will, ma'am. |
| 6 | Thank. You. |
| 7 | All right. |
| 8 | KRISTOFER D. CLARK |
| 9 | being first duly sworn, testified as follows: |
| 10 | SENATOR RANKIN: Welcome. We're going |
| 11 | to dispense with the spoken overview of the |
| 12 | screening process. You've done this. I think |
| 13 | everyone but two in the audience, or three, I |
| 14 | guess, have been here and done this before. |
| 15 | But how long ago did we see you up |
| 16 | here? How long did you serve? |
| 17 | MR. CLARK: June will be three years. |
| 18 | SENATOR RANKIN: Wow. And I don't see |
| 19 | any gray. |
| 20 | MR. CLARK: There's a few. I got a |
| 21 | haircut before I came here. |
| 22 | SENATOR RANKIN: Very good. Shoe |
| 23 | polish and clouds kind of help hide the gray. I'm |
| 24 | hoping it will work on my head too. |
| 25 | Okay. Again, as you've done it before, |

| | $oxed{4}$ |
|----|---|
| 1 | we're going to dispense with the overview of this. |
| 2 | And we may do that later with others. But who's |
| 3 | got Mr. Clark? |
| 4 | MS. ANDERSON: I have Mr. Clark. |
| 5 | SENATOR RANKIN: All right. |
| 6 | MS. ANDERSON: And just for your |
| 7 | reference, in your notebooks, for the statutory |
| 8 | qualifications of the board of directors it's |
| 9 | 58-31-20(c) and the language is contained in your |
| 10 | notebooks if you all want to refer back to it. |
| 11 | Good morning, Mr. Clark. |
| 12 | MR. CLARK: Good morning. |
| 13 | MS. ANDERSON: Could you please state |
| 14 | your full name and current address for the record. |
| 15 | MR. CLARK: Kristofer Daniel Clark, |
| 16 | 2310 Earls Bridge Road, Easley, 29640. |
| 17 | MS. ANDERSON: We received your |
| 18 | complete confirmation package. Are there any |
| 19 | changes or is there any additional information that |
| 20 | you would like to provide for either your Personal |
| 21 | Data Questionnaire or Statement of Economic |
| 22 | Interest? |
| 23 | MR. CLARK: Yes. In addition to what I |
| 24 | have there, I am working in a management role with |
| 25 | Easlan Capital as well. |

| | 5 |
|----|---|
| 1 | MS. ANDERSON: Mr. Chairman, we'd like |
| 2 | to enter into the record his PDQ, his Personal Data |
| 3 | Questionnaire. |
| 4 | SENATOR RANKIN: Okay. |
| 5 | MS. ANDERSON: Do we need a motion? |
| 6 | SENATOR RANKIN: No objections to that |
| 7 | peer motion. Will that be all in favor? |
| 8 | That's in. |
| 9 | (EXH. 1, Senate Confirmation |
| 10 | Confidential Personal Data Questionnaire of |
| 11 | Kristofer D. Clark, was marked for identification.) |
| 12 | MS. ANDERSON: Mr. Clark, we sent you a |
| 13 | set of questions and received your responses. If |
| 14 | we asked you these questions today would your |
| 15 | answers be the same? |
| 16 | MR. CLARK: Yes. |
| 17 | MS. ZIEGLER: Mr. Chairman, we'd like |
| 18 | to enter into the record the set of preliminary |
| 19 | questions. |
| 20 | SENATOR RANKIN: Same motion and |
| 21 | seconded. That'll come in without objection. |
| 22 | (EXH. 2, Preliminary Questions |
| 23 | Responses of Kristofer D. Clark, was marked for |
| 24 | identification.) |
| 25 | MS ANDERSON: Please name the top |

6 three statutory or regulatory changes that have 1 occurred during -- since your service and how 2. Santee Cooper has responded. 3 MR. CLARK: Statutory changes? 4 5 MS. ANDERSON: Or regulatory. MR. CLARK: Santee Cooper continues to 6 7 deal with carbon emission regulation. Are you looking for state or federal? 8 9 MS. ANDERSON: Either. MR. CLARK: Okay. Federal carbon 10 11 emission requirements, and that's continued to be a challenge for Santee Cooper on several fronts. 12 One, with the existing coal fleet 13 Santee Cooper has done a good job of being 14 15 proactive in reducing emissions and -- but from another side, when doing generation planning it 16 makes it difficult in determining what generation 17 18 of the existing fleet will be available and what 19 will be available to plan in the future. 20 And in addition to those changes, prior 21 to me coming on -- right before I came on there 22 were some issues that revolved to how Santee Cooper 2.3 property could be sold, and that was a -- it wasn't 24 a change, but it was brought to my attention 25 several times. And the need for any

rating agencies was due to nuclear in general, just

25

the -- I guess the uncertainty of that as a generation source based on what has happened around the world. So Santee Cooper has sold a portion of the nuclear station to its partner, SCE&G, with an option to sell an additional portion.

We have, like I said, renewed our contract with Central, our largest customer.

2.

2.3

Those two things have really impacted our ability to borrow money and at the rate that we can borrow it, so it's saved quite a bit of money due to our ability to extend our credit out and refinance some of that debt.

MS. ANDERSON: Does the recent agreement to sell part of the interest in the Summer plant to SCE&G address the concerns about excess capacity or do you think additional action will be needed?

MR. CLARK: The agreement we have is for 5 percent with an option of an additional five, and I believe it does address the issues of excess capacity. It's a difficult issue because long-term we'll need all the capacity, but short-term we don't want our rates to suffer because of the excess capacity, so to speak, but there are several things the board is working on to offset that

expense. So long-term, the capacity that we currently have will be needed.

2.

2.3

And it also fits in with our goal of diversifying our generation with about 30 percent nuclear, 30 percent coal, and so that -- you know, that will help in that way as well.

MS. ANDERSON: Okay. And speaking of the long-term plans, and you have mentioned the word -- you have used the word uncertainty in talking about some of the changes. How should Santee Cooper approach its long-term planning in an era on uncertainty?

MR. CLARK: Generation planning?

MS. ANDERSON: Uh-huh.

MR. CLARK: That's difficult. The uncertainty -- there are so many uncertainties today -- one, with the economy -- it makes it difficult to plan -- one, with the federal regulations on carbon -- and with those two unknowns and the fact that you have to make decisions 20 years in advance in some cases for generation planning from the time you start planning until the time a generation is brought online -- a lot can change in 20 years, so from my standpoint, one way to offset that is a consortium

approach where utilities partner together to 1 2 minimize the risk, and to minimize the capital expenses of bringing on new generation, and also to 3 diversify the generation to offset the risk of the 4 federal emissions. 5 Like I mentioned earlier, the goal of 6 7 30 percent coal, 30 percent nuclear, and 30 percent gas, and the remaining 10 being the hydro and 8 9 renewables, that offsets some of the uncertainty or the challenges that could come from additional 10 11 federal regulation. MS. ANDERSON: Can you elaborate a 12 little bit more on the role of renewable energy and 13 Santee Cooper's diversification plan? 14 15 MR. CLARK: Sure. Santee Cooper is a 16 leader in renewables. We recently brought on a three megawatt solar farm with some of our 17 18 partners. So we're very interested in renewables, 19 but we're interested in it in a smart way. 20 say that I mean we can't sacrifice reliability or 21 the low-cost power that we bring to our customers 22 and we have to bring renewables in a safe way that's fair to all of our customers. 2.3 24 So we're very committed to looking for 25 renewable opportunities, developing new

opportunities in a way that, like I said, remains reliable at a cost that benefits all of our customers.

MS. ANDERSON: Are there any additional

2.3

studies or any evaluations that are being done for other renewable or energy efficiency programs?

MR. CLARK: Well, currently we have the solar farm. Which we initiated that for -- or we participated in that for the purpose of studying solar in our state because that's one that's difficult, and currently we do have some of our executives that are looking at additional renewable opportunities.

MS. ANDERSON: Santee Cooper recently implemented the second phase of its rate increase. How does Santee Cooper set its rates? What are some of the factors that are considered?

MR. CLARK: We go through -- it's a pretty extensive process. Of course, every year when we look at our budget we look at what requirements from a revenue standpoint we need, but we go through a rate study and we have consultants that come in and they advise us and the management team on how to set our rates and how to go about setting our rates because the setting of rates is

25

very difficult for the different customers that we So we have to look at how the rates affect all the different customers and how they can -- how the changes impact our customers. So there's quite a bit of study that goes into that, and throughout the years we -- you know, we try -- we communicate with our customers to see how we can better serve their needs. So all that folds into how we develop our rates, and then once we do that we take that out to the public and we get feedback from the public. We have a comment period where they bring us comments and we consider all that before we make our final decisions. MS. ANDERSON: What steps are taken to try and keep costs low? MR. CLARK: Several steps have been I mentioned a couple earlier. Our contract taken. with Central, that has allowed us to save roughly \$40 million in finance charges through refinancing debt, and the management team has taken out an

operational, but it's something that is an expense

that we were able to save due to the conditions.

additional 40 million in operating expenses. We've

had -- we've saved quite a bit of money this year

on fuel. And that's not something that's

| 1 | So Santee Cooper has done quite a few |
|----|---|
| 2 | things in an effort to reduce the rates by reducing |
| 3 | the expenses. In addition, we've not hired several |
| 4 | employees through attrition. We've eliminated some |
| 5 | of the positions at Santee Cooper. |
| 6 | MS. ANDERSON: What is the current |
| 7 | debt-equity ratio for Santee Cooper? |
| 8 | MR. CLARK: It is 70/30. |
| 9 | MS. ANDERSON: What constitutes the |
| 10 | bulk of the debt? |
| 11 | MR. CLARK: The nuclear station. |
| 12 | MS. ANDERSON: There's been a number of |
| 13 | roles which Santee Cooper has tried to play in the |
| 14 | part of economic development. What do you see as |
| 15 | its role for the upcoming decade? |
| 16 | MR. CLARK: That's interesting. That's |
| 17 | one of my goals, is to look at new ways and new |
| 18 | programs for economic development. We've done a |
| 19 | tremendous amount of work in economic development. |
| 20 | We have our economic development staff. At Santee |
| 21 | Cooper we've partnered with the South Carolina |
| 22 | Power Team and we've lent money to the different |
| 23 | rural areas to build spec product to encourage |
| 24 | industry to come into our state. |
| 25 | So we've done a lot in economic |

development, but I don't think that's what we're 1 going to have to look at for the future. We're 2. 3 going to have to be creative and look for additional opportunities to bring business to South 4 What that looks like I'm not sure, but I 5 know that what we've done in the past ten years is 6 7 not going to be what we need to do going forward because the, you know, technology is changing, the 8 9 world is changing and we have to be innovative and creative to find ways to market South Carolina to 10 provide opportunities for South Carolinians. 11 MS. ANDERSON: I believe as part of the 12 economic development part of the project there's 13 been a 55 percent discounted electric rate offered. 14 15 How does Santee Cooper absorb the cost for a discounted rate? 16 MR. CLARK: Well, several different 17 18 There's a balance between how much demand we have for electricity and how much we have 19 20 available. We certainly don't want excess 21 capacity, but to not have enough capacity would be 22 a disaster, as you can appreciate. So Santee 2.3 Cooper -- in an effort to grow and an effort to 24 provide opportunities in South Carolina, we have --25 we try to balance having excess capacity in order

to bring new business in, and honestly, it's a 1 strategy to bring businesses in and also to retain 2. the business for future growth and future revenue. 3 So while it may be a discount upfront, long-term it 4 provides additional revenue to Santee Cooper and 5 additional revenue to the co-ops or to the state. 6 7 MS. ANDERSON: Have the economic development offerings been -- have they been as 8 9 successful as anticipated? MR. CLARK: Yes. 10 11 MS. ANDERSON: Can you name the top three ways in which Santee Cooper has accomplished 12 its mission to be the state's leading resource? 13 MR. CLARK: Well, one is we provide 14 15 low-cost, reliable power. Our reliability rating 16 is one of the highest and at a cost that's lower than, you know, the other competitors in the state, 17 18 and I believe we can continue doing that. 19 One of our missions is economic 20 development, and like we mentioned and discussed 21 earlier, there are several programs that we 22 currently have in place that have been successful 2.3 where we've been able to provide buildings and 24 opportunities for businesses to come to provide 25 jobs and for us to provide power to companies.

In addition, our customer service 1 satisfaction rating through surveys is the highest 2. it's ever been this past year. 3 So those are three ways that we have 4 successfully fulfilled our mission. 5 MS. ANDERSON: How has your service 6 7 impacted compatibility of executive staff and helped relationships with customers? 8 9 MR. CLARK: Our service on the board --I have made an effort to be effective as a board 10 11 member and to not get involved in the day-to-day operations of Santee Cooper and to allow them to do 12 what they need to do as a management team. 13 As such, I've encouraged relationships between 14 management and also with people throughout the 15 state and our customers. I've initiated meetings 16 with some of the management team and some of our 17 18 customers. In addition, I have established 19 relationships with them and encouraged them to do 20 the same too. 21 MS. ANDERSON: What are some 22 considerations for the best interest of the Public 2.3 Service Authority? 24 MR. CLARK: The best interest is 25 defined as balancing three things. One is the

| | 18 |
|----|--|
| 1 | from your appointment? |
| 2 | MR. CLARK: No. |
| 3 | MS. ANDERSON: What would you do if a |
| 4 | conflict arose? |
| 5 | MR. CLARK: I would disclose it and |
| 6 | recuse myself. |
| 7 | MS. ANDERSON: Do you have any holdings |
| 8 | in any electrical utilities or other entities that |
| 9 | may be impacted by decisions of the Santee Cooper |
| 10 | board? |
| 11 | MR. CLARK: Not that I'm aware of. |
| 12 | MS. ANDERSON: Do you understand the |
| 13 | obligations and responsibilities of the position? |
| 14 | MR. CLARK: I do. |
| 15 | MS. ANDERSON: What duty of loyalty or |
| 16 | duty of care do you owe Santee Cooper? |
| 17 | MR. CLARK: The duty of loyalty and |
| 18 | care is the fiduciary duties, and the duty of |
| 19 | loyalty is to be loyal to the company and to put |
| 20 | its interest above the director's interest, my own |
| 21 | interest or one of the officers. |
| 22 | In addition, it's the duty of |
| 23 | loyalty includes the duty to avoid conflicts of |
| 24 | interest or self stealing, and the duty of care is |
| 25 | to act in good faith and with care of an ordinary |

1 you're a young dynamo. On paper your personality -- you just described it as your unique 2 background and personality. You've got a lot on 3 paper that you just don't braq about. My sense of 4 your unique personality is you're a humble but 5 sharp guy that's got a lot of ability here to lend 6 7 a lot of experience to this board young though as 8 you are. 9 THE WITNESS: Thank you. So that's a refreshing 10 SENATOR RANKIN: 11 thing to have; and humility is a great thing too, I believe. 12 13 THE WITNESS: Thank you. 14 SENATOR RANKIN: The success of this 15 board and the differences in personality that I think corporately exists has partly been due to 16 your tempered personality. Probably if you yelled 17 18 at somebody I'd be shocked to know if it's anything 19 other than, go Carolina Gamecocks, or maybe I've 20 qot that --21 MR. CLARK: Bulldogs. 22 SENATOR RANKIN: Yeah. Anything on the 23 renewable side that is a concern to you that you 24 see not as a board member, but as the board itself, 25 that we're dealing with up here or you hear pulling

and prodding in the press about that would have 1 Santee Cooper go perhaps in a different direction? 2. 3 MR. CLARK: My only concern with renewables is that we do it in a smart way, as I 4 mentioned earlier, we do it in a way that's fair to 5 all our customers, and we do it in a way that's 6 7 safe for our employees and our customers and is reliable. Because, you know, we certainly -- I 8 9 support renewables and I want to look for additional opportunities to invest in and develop 10 11 renewables, but I don't want our reliability rating to suffer, and because we have expectations -- all 12 13 of our customers expect a certain reliability rating from us and we want to be sure we're able to 14 15 deliver that. SENATOR RANKIN: Credit rating and the 16 contract with Central and the sale to SCE&G of a 17 18 greater percentage with the right to sell more, is 19 that going to get us back to where we need to be? 20 Are your folks telling you those were the fixes 21 that needed to be made? 22 It is. It has enabled us MR. CLARK: 2.3 to refinance our debt and save quite a bit of 24 So I do believe, you know, we -- we 25 currently have a good credit rating. Could it be

better, possibly, but I think that that along with 1 what we're doing here today and the stability of 2. the board and things like that all help with credit 3 ratings. 4 5 SENATOR RANKIN: And lastly, the relationship with your largest customers, and then 6 7 those that you serve, how do you see this year versus walking into it without any knowledge --8 9 you've heard things, I'm sure. How do you see that relationship, again, with Central and all that you 10 11 serve? 12 MR. CLARK: It's changed quite a bit, drastically over the past few years. Our 13 relationship -- I don't know that it was as bad as 14 15 it's ever been, but it certainly wasn't as good as it could have been. Like I mentioned earlier, now 16 it's as good as it's ever been historically. 17 18 So with the industrial customers and 19 other customers our rating was pretty good, and 20 that's how I have to judge it, based on our rating 21 and our feedback from the different customer 22 classes. 2.3 SENATOR RANKIN: A real brief 24 interruption. How do you all measure that? 25 MR. CLARK: Through surveys. We have

| | 23 |
|----|---|
| 1 | surveys that go out to our customer. In addition, |
| 2 | we also meet with our customers. I meet |
| 3 | individually; other board members and management |
| 4 | does as well. But with our largest customer, that |
| 5 | relationship has improved drastically. |
| 6 | SENATOR RANKIN: Very good. |
| 7 | And apparently you announced yesterday |
| 8 | you've sent one judge out to pasture and you're |
| 9 | bringing another young judge in to succeed as |
| 10 | general counsel, right? |
| 11 | MR. CLARK: Yes, sir. |
| 12 | SENATOR RANKIN: And I applaud the |
| 13 | decision. You've got a super guy coming in with a |
| 14 | breadth of knowledge of lots of things, not just |
| 15 | evidentiary rulings in a trial. So good move. |
| 16 | MR. CLARK: We're looking forward to |
| 17 | it. |
| 18 | SENATOR RANKIN: I know you personally |
| 19 | single-handedly sought him out and |
| 20 | THE WITNESS: I wish I was that smart. |
| 21 | SENATOR RANKIN: I think you are. |
| 22 | All right. Anything else? |
| 23 | MS. ZIEGLER: If you don't mind. |
| 24 | Senator Rankin focused on the |
| 25 | diversification and renewables, and that's a |

subject that the Committee as a whole has been wrestling with.

2.3

You assigned 10 percent to, I guess, the point that you now feel that you can continue to provide reliable service and still have renewables as part of the mix. Is that something you're actively looking at ways to increase or what's your feeling about where you want that needle to go?

MR. CLARK: Sure. Well, 10 percent is a long-term goal. Like I said, that's also with 30 percent nuclear, 30 percent natural gas and 30 percent coal, and that 10 percent also includes hydro. So that's a long-term goal.

And changing any generation takes quite a bit of time because if not then there's a significant amount of financial loss due to the capital investments you have in the current fleet. So that takes guite a bit of time.

And what that 10 percent looks like from the hydro, solar and other renewables that we currently have, the natural gas and such, what that looks like I'm not sure because I would venture to say over the next few years that technology is going to change and there will be some new

| | 26 |
|----|---|
| 1 | we're going to have the court reporter swear you, |
| 2 | and then we're going to start the questions and try |
| 3 | to get you out of here as fast as we can. |
| 4 | MERRELL W. FLOYD |
| 5 | being first duly sworn, testified as follows: |
| 6 | MR. FIFFICK: Please state your name |
| 7 | and current address for the record. |
| 8 | MR. FLOYD: Merrell Floyd, |
| 9 | 513 Merrywood Road, Conway, South Carolina 29526. |
| 10 | MR. FIFFICK: We've received your |
| 11 | completed confirmation package, including Page 7. |
| 12 | Appreciate that. Are there any changes or is there |
| 13 | any additional information that you would like to |
| 14 | provide for your Personal Data Questionnaire or |
| 15 | your Statement of Economic Interest? |
| 16 | MR. FLOYD: No, sir. Everything is the |
| 17 | same. |
| 18 | MR. FIFFICK: Mr. Chairman, you can |
| 19 | enter that into the record. |
| 20 | SENATOR RANKIN: So moved and entered |
| 21 | into the record. |
| 22 | (EXH. 3, Senate Confirmation |
| 23 | Confidential Personal Data Questionnaire for |
| 24 | Merrell W. Floyd, was marked for identification.) |
| 25 | MR. FIFFICK: We sent you a set of |

What is Santee Cooper's current

25

28 1 generation mix? MR. FLOYD: 58 percent coal, 10 percent 2. nuclear, 30 percent natural gas and 2 percent 3 renewables. 4 MR. FIFFICK: And what is the relative 5 age of their base load fleet? 6 7 MR. FLOYD: Compared to other utilities, it's relatively new. 8 MR. FIFFICK: What are the challenges 9 presented by this mix and the age of the fleet if 10 11 Congress and the EPA were to pass measures requiring a transition to a carbon-constrained 12 13 economy? 14 MR. FLOYD: If legislation is passed 15 that impacts the coal, the newer plants having to be retired would be a significant loss in retiring 16 them early. 17 18 MR. FIFFICK: Who are Santee Cooper's 19 electricity customers? 20 MR. FLOYD: Twenty electric 21 cooperatives in the state that sold through Central 22 Electric Power Cooperative. There are about 2.3 165,000 retail customers in Georgetown, Berkeley 24 and Horry Counties, mostly along the Grand Strand, 25 and 29 industrial accounts to include Charleston

| | 29 |
|----|--|
| 1 | Air Force Base. |
| 2 | MR. FIFFICK: What are the relative |
| 3 | percentages of, A, each group's share of Santee |
| 4 | Cooper's sales and, B, each group of customers' |
| 5 | responsibility for capital cost for capacity? |
| 6 | MR. FLOYD: In sales the co-ops are |
| 7 | responsible for about 60 percent, 21 percent for |
| 8 | industrials, and about 18 percent for residential |
| 9 | and small commercial. |
| 10 | MR. FIFFICK: And what about their |
| 11 | responsibility for capital costs? |
| 12 | MR. FLOYD: About 70 percent for the |
| 13 | electric cooperatives and about 30 percent for the |
| 14 | industrial/commercial/residential. |
| 15 | MR. FIFFICK: What steps can Santee |
| 16 | Cooper take to expand its energy efficiency |
| 17 | conservation programs? |
| 18 | MR. FLOYD: I think to continue |
| 19 | educating its customers and young people, schools, |
| 20 | continue the rebate program for energy efficient |
| 21 | water heaters, heat pumps and refrigerators and |
| 22 | such, continuing to expand, possibly, the energy |
| 23 | efficient home improvements and the like. |
| 24 | MR. FIFFICK: And how should these |
| 25 | programs be paid for? |

MR. FLOYD: I think some of it could 1 probably be put in the rates because if you can 2 3 lower the peak demand then you can prolong having to build generation. There may be some government 4 5 loans or grants that may be available. MR. FIFFICK: Approximately what 6 7 percentage of Santee Cooper's energy needs can now 8 be met by renewable energy? 9 MR. FLOYD: About 2 percent. MR. FIFFICK: Given the fact that it is 10 11 more expensive to build generation today than it was even a few years ago, do you favor a consortium 12 13 approach to generation where utilities join together to share the costs and risks of projects? 14 MR. FLOYD: Yes. I think as expensive 15 16 as nuclear is to build that part ownership with the shared risks and shared expenses is certainly the 17 18 way to go to maintain financial stability in a 19 utility. 20 What are your thoughts on MR. FIFFICK: 21 generating electricity in South Carolina and 22 selling outside of the state such as in a merchant nuclear situation? 2.3 24 MR. FLOYD: Well, I think it's a good 25 idea if you have excess generation, but not to

build generation within the state with the idea of 1 selling it outside. 2. 3 MR. FIFFICK: Do you support further investment and reliance upon nuclear generation? 4 MR. FLOYD: Yes, because I think if 5 we're going to address the carbon emissions problem 6 7 we're going to have to look at a full range of generation: As expensive as nuclear plants are, 8 9 are they going to have to be built using a consortium approach? 10 11 MR. FIFFICK: Sort of to that end, what do you see or could you please describe your 12 thoughts on long-term planning 30, 40, 50 years out 13 for Santee Cooper? How should they be planning? 14 15 What should they be looking for? MR. FLOYD: Well, they need to be --16 need to keep in mind -- try to control the rates, 17 18 be sure the rates are within reason. We're going 19 to have to move away from coal so we're going to 20 certainly need to go, as we presently are, in the 21 nuclear direction. 22 MR. FIFFICK: Who is responsible for 2.3 loss if Santee Cooper makes a bad investment or 24 loses money? 25 MR. FLOYD: I think Santee Cooper would

be, not the people of South Carolina, but you need 1 to determine where those decisions were made, maybe 2. what expertise was used to make those decisions so 3 that same mistake wouldn't be made again. 4 MR. FIFFICK: What about within the 5 company regarding electricity and water services, 6 7 can one of those -- can profit from one be applied to make up for losses in another? 8 9 MR. FLOYD: No, I don't think so. MR. FIFFICK: Generally, what are some 10 11 of the factors to be considered for electric rates? MR. FLOYD: Well, cost of power, costs 12 for generation, distribution, overall cost to 13 administer all factor into the rates. 14 15 MR. FIFFICK: Do you have any direct or 16 indirect business relationships with Santee Cooper or any of its wholesale power customers? 17 18 MR. FLOYD: No, sir. 19 MR. FIFFICK: Describe the role you 20 believe can be played by public power. How does 21 Santee Cooper fit into that role? 22 MR. FLOYD: Well, the electric industry 2.3 is a mix of public power, private power and 24 nonprofit power. Private power is committed to 25 holding costs down, leading the way with renewables

and promoting economic development. There are 1 about 2,000 public power companies in the country. 2. I think Santee Cooper is one of the larger ones. 3 MR. FIFFICK: Describe the role you 4 5 think Santee Cooper should play in economic development and any constraints you may see upon 6 7 that role. MR. FLOYD: Well, I think the board 8 9 needs to be aggressive in economic development. That is one of the reasons that it was originally 10 11 established, was to promote economic development, but keeping in mind that the only -- you need to be 12 concerned about the rates as many have invested in 13 pursuing economic development. 14 15 MR. FIFFICK: What do you think Santee Cooper as a lessor should be in relationship to the 16 public and to the FURC? Is it to make a profit for 17 18 Santee Cooper or to make facilities open to a 19 diverse public? 20 MR. FLOYD: I think to -- for the 21 facilities for a diverse public since it's a public 22 utility. 2.3 MR. FIFFICK: I'm going to ask you some 24 questions more towards board member qualities now. 25 Provide an overview of your view of the role of

| | 34 |
|----|--|
| 1 | director on the PSA board. How is that role |
| 2 | different from the role of someone on the PSA's |
| 3 | executive staff? |
| 4 | MR. FLOYD: Well, the board is |
| 5 | responsible for setting policies, hiring the CEO, |
| 6 | approving budgets and such. The staff is |
| 7 | responsible for the day-to-day operations and |
| 8 | seeing to it that the board policies are carried |
| 9 | out. |
| 10 | MR. FIFFICK: Aside from annual audits |
| 11 | performed by outside firms, what other types of |
| 12 | independent expertise should a member of the board |
| 13 | utilize in decision making? |
| 14 | MR. FLOYD: Well, the board always |
| 15 | depends on the staff for information, but if the |
| 16 | board as a whole decides they need outside |
| 17 | expertise to gain additional knowledge to make |
| 18 | decisions then outside expertise would be the main |
| 19 | one, I'd think. |
| 20 | MR. FIFFICK: What are some |
| 21 | considerations for the best interest of Santee |
| 22 | Cooper? |
| 23 | MR. FLOYD: Repeat that again, please. |
| 24 | MR. FIFFICK: Some of the and they |
| 25 | are statutory. There's some of them name some |

considerations for the best interests of Santee 1 2 Cooper. 3 MR. FLOYD: Well, there's the duty of loyalty, duty of loyalty and care to act in good 4 faith and in the best interests of Santee Cooper, 5 to use the care of a prudent person in a like 6 7 position and to use good business practices. MR. FIFFICK: Could you please describe 8 9 any experience you have, and I assume you have a lot of it, in interpreting financial documents. 10 11 MR. FLOYD: During my time with the cooperative I worked for two different CEOs and the 12 staff in developing and administering budgets and 13 also presenting them to the board. 14 15 MR. FIFFICK: Are you familiar with any recent legal opinions or orders or state or federal 16 agency decisions that have impacted Santee Cooper 17 18 that you would care to discuss? MR. FLOYD: Well, I know the Clean Air 19 20 Act is -- the EPA is going to -- is having a big 21 effect, but that's something I'm going to have to 22 give some additional time and study to. I'm not that familiar with it. 2.3 24 MR. FIFFICK: Does your affiliation 25 with any professional, civic, charitable or other

back and we're sitting here with other folks asking 1 you questions about your service, what is your goal 2. or what would your legacy be on this board? 3 MR. FLOYD: Goodness. I'd like to 4 think that it would be one that would be looked at 5 that was beneficial and not a waste of time, and 6 7 that of a person that contributed and would be missed if -- when he's not on the board. 8 9 SENATOR RANKIN: That's well said. Well said. 10 You come from, obviously, a co-op 11 background which equips you to know a lot of stuff 12 right off the bat, so your learning curve won't be 13 that steep at all. Some will be suspicious of you 14 15 and your votes, that you're the co-op guy. you plan to be Santee Cooper's guy and not the 16 whole into one or the other. 17 18 MR. FLOYD: Well, I think this board 19 represents the people of South Carolina and it 20 is -- you need to be responsible not just to the 21 Seventh District but to everybody within the state, 22 try to be fair -- you know, fair and honest with 2.3 everything concerned. 24 SENATOR RANKIN: Whether you're the actual designee or not, you have co-op experience. 25

SENATOR RANKIN: And you've got a nice

25

| | 41 |
|----|--|
| | |
| 1 | no one wanted to take when she'd walk up and |
| 2 | dilly-dally and after hundreds of trees, I'm done. |
| 3 | MR. FLOYD: Probably the first one she |
| 4 | looked at. |
| 5 | SENATOR RANKIN: Thank you very much. |
| 6 | MR. FLOYD: Thank you. |
| 7 | SENATOR RANKIN: You are free to leave. |
| 8 | MR. FLOYD: Thank you, sir. |
| 9 | SENATOR RANKIN: All right. Welcome. |
| 10 | MS. HEIGEL: Thank you. |
| 11 | SENATOR RANKIN: We're moving along. |
| 12 | We're going to get you out of here by two o'clock, |
| 13 | is our goal. |
| 14 | MS. HEIGEL: By two o'clock. Well, I |
| 15 | was told that I can defer anything that I can't |
| 16 | answer to Cal Land. |
| 17 | SENATOR RANKIN: Well, that was a lie. |
| 18 | And that's not on the record. |
| 19 | MS. HEIGEL: We won't tell Cal that. |
| 20 | SENATOR RANKIN: Well, that's true. |
| 21 | And, in fact, he's been here the longest now. |
| 22 | MS. HEIGEL: He has. |
| 23 | SENATOR RANKIN: Since '99, I think. |
| 24 | MS. HEIGEL: Yes. |
| 25 | SENATOR RANKIN: So he knows where the |

43 1 SENATOR RANKIN: Please. (EXH. 5, Senate Confirmation 2 Confidential Personal Data Questionnaire, was 3 marked for identification.) 4 5 MR. FIFFICK: We sent you a set of questions and received your responses. If we asked 6 7 you those questions today would your answers be the 8 same? 9 MS. HEIGEL: Yes, they would. MR. FIFFICK: Mr. Chairman, can we have 10 11 those questions entered into the record? SENATOR RANKIN: 12 No objection. (EXH. 6, Preliminary Questions 13 Responses of Catherine E. Heigel, was marked for 14 15 identification.) What experience would you 16 MR. FIFFICK: bring to the Santee Cooper board that would be 17 18 beneficial to the board? 19 MS. HEIGEL: I believe my experience in 20 the energy industry would be very beneficial in 21 terms of other inside perspectives, in terms of 22 current trends and challenges that the industry 2.3 faces. I also believe that my experience as an 24 attorney and as a general counsel of a utility in 25 terms of risk management and corporate governance

44 would be of value to the board. 1 MR. FIFFICK: What's Santee Cooper's 2. 3 current generation mix? MS. HEIGEL: Generation mix is coal, 4 5 nuclear, natural gas, some hydro, fuel oil. mostly coal, a little less than 60 percent. 6 7 MR. FIFFICK: And what's the relative 8 age of the base load fleet? 9 MS. HEIGEL: I do not know the answer to that. 10 11 MR. FIFFICK: What are the challenges presented by this mix and the age of the fleet if 12 13 Congress or the EPA were to pass measures or require a transition to a carbon-constrained 14 15 economy? MS. HEIGEL: The challenges are 16 significant. Aging coal is a significant 17 18 challenge. And, again, I don't know the specific 19 age of Santee Cooper's coal fleet. My prior 20 experience with Duke Energy, the coal fleet was on 21 average 60 years old. So I'm quessing that we're 22 talking of similar age challenges, and that is the cost of removal, so determining what assets to 2.3 24 decommission and in what time frame and how to 25 replace, you know, that energy, that capacity, and

what to replace it with and in what time frame. 1 So these are challenges, and those 2. challenges I don't think have ever been greater for 3 the industry than they are today because of 4 uncertainty, fuel commodity uncertainty, regulatory 5 uncertainty in terms of ongoing regulatory action 6 7 relative to coal and coal combustion residuals, effluent standards and other things that could 8 9 impact the cost -- the total operational cost of coal. 10 11 MR. FIFFICK: Who are Santee Cooper's electricity customers? 12 13 MS. HEIGEL: Santee Cooper's electricity customers are largely wholesale. 14 15 there is about 166,000 customers, as I understand it, that are retail customers served in Horry, 16 Berkeley and Georgetown Counties, so there are some 17 18 institutional and industrial customers as well. So it's mixed, commercial, industrial and residential. 19 20 MR. FIFFICK: Do you know the relative 21 percentages of each group's share of energy sales? 22 MS. HEIGEL: Relatively speaking, and 2.3 I'm going to go off recall so this would certainly 24 be subject to check, about 60 percent or so would 25 be for resale purposes to Central and roughly

20 percent to the retail customer base. Beyond 1 that, I'm not sure. 2. 3 MR. FIFFICK: Are you familiar with what each of those groups' relative percentage of 4 responsibility for capital costs is? 5 MS. HEIGEL: I'm not familiar with the 6 7 exact rate structure, I've not been privy to their rate documents, but typically utilities design 8 9 their rates in accordance with cost-causation principles, and so the cost to serve. The rates 10 11 would therefore be somewhat proportionate to the cost to serve that particular customer class. 12 13 Again, I'm not privy to Santee Cooper's exact 14 rates. 15 MR. FIFFICK: What steps can Santee 16 Cooper take to expand its energy efficiency and conservation programs? 17 18 MS. HEIGEL: Well, I think that the challenge with energy efficiency -- and, again, I'm 19 20 not currently on the board, so I'm -- I know what I 21 know about their energy efficiency programs from 22 just my time at Duke. Let me first start by saying 2.3 that when Duke was looking to pursue energy 24 efficiency as a line of business, which it had not

been viewed as a line of business previously, we

25

actually -- and at the time I was in the legal department at Duke. We actually looked at what Santee Cooper was doing because Santee Cooper was ahead of where the regulated IOUs were as it relates to energy efficiency, demand, time management.

2.3

So, first, just giving kudos to Santee Cooper for having really stayed in the game.

Utilities were in the game. They kind of got out of the game in the '80s and '90s. Santee Cooper stayed the course, so they have -- this is a company that has a lot of experience with energy efficiency programming.

The challenge with energy efficiency is the cost to achieve. So as you -- as a low-hanging fruit comes off the tree, so the CFLs, the light bulbs, the easy things to do to achieve energy savings at a relatively low cost, the cost to achieve become higher, so that payback period becomes longer, and when your customer base, as Santee Cooper's is, is largely more rural and perhaps less affluent, that is a huge barrier to participation because you can have the best programs in the world, but if your customers can't afford to participate or don't participate then

2.3

you're not going to achieve the savings that you seek. So I think trying to find a funding mechanism that enables customers to participate in energy efficiencies, whether it's the high-cost things like HVAC units and things like that, really is that financial loan mechanism that I think is the game changer for allowing greater participation by customers.

MR. FIFFICK: What percent of Santee Cooper's energy needs can now be met by renewable energy?

MS. HEIGEL: Can now be met by renewable energy. I do not know the answer to what can be met by renewable energy. Again, it's a -- renewables have a place. Typically to date renewables have had a place in terms of potentially replacing or supplementing peaking power; that is, when you don't -- it's that time of the peak, but renewables at this point without commercial battery storage technology to allow them to be dispatchable cannot operate. They don't have the same operating characteristics of a base load unit, a coal unit, even uranium or natural gas unit, or a nuclear unit, so that limits their capabilities in terms of within the Santee Cooper generation mix.

49

Having said that, there are some tremendous advances that are being made in battery storage technology that have the ability, the potential to really change that landscape and there are studies out there that show, in terms of grid parity, pairing solar, for example, with battery storage, that in the Northeast and California we may be there in ten years, but in the Southeast, where our rates are relatively low, that grid parity scenario is probably out further from that absent some major technological innovation or disruption occurring before that. But I think we have to keep our eye on that landscape because there is a lot happening in the industry from a technology standpoint. Given the fact that it is MR. FIFFICK: more expensive to build generation today than it was in the past, do you favor a consortium approach to generation where utilities join together to share the cost and risks of building projects? MS. HEIGEL: I favor that approach. Ι think a regional approach to generation, especially costly assets like nuclear base load units, are the best way and the right way. That said, the reality is that getting players to the table to achieve

regional generation, to cede operating control or 1 2 to cede certain governments' rights, that's easier 3 said than done. So what makes sense is absolutely to do regional generation. You know, where it 4 actually ends up at the end of the day, I think 5 what we're seeing is more go-it-alone strategies. 6 7 Again, it comes down to risk and control for a lot 8 of companies. 9 MR. FIFFICK: What are your thoughts on generating electricity in South Carolina and 10 selling it outside --11 12 SENATOR RANKIN: Let me interrupt you on that. Walk me down that scenario at the very 13 end where you -- and perhaps I didn't hear it 14 15 correctly -- where you see it swinging to going it 16 alone. MS. HEIGEL: I'm not saying swinging 17 18 it. I think it's been go-it-alone, and I think we 19 all believe, especially with nuclear assets, that a 20 regional approach makes sense. I think translating 21 that into making regional happen for nuclear hasn't 22 really occurred, and there are a lot of good and valid reasons on everybody's side why that is. 2.3 24 so, you know, as utilities look to meet their 25 generating needs going forward that experience

informs their decisions. 1 Regional makes sense. Regional is 2. Santee Cooper and SCE&G are a great example 3 right. of regional generation and co-ownership of these 4 nuclear assets, and that's good and that's a --5 SENATOR RANKIN: Is that an anomaly, 6 7 though? I mean, the Georgia Power, is that regional or is that --8 9 MS. HEIGEL: That's regional for Georgia, as they see it, and it certainly mirrors 10 11 the ownership, for the most part, of the older unit there at Vogtle. 12 But it is the right way and it is what 13 should be pursued. All I'm saying is that it is 14 15 a -- it is not always easy and that you have to go in eyes wide open as to what the issues will be. 16 SENATOR RANKIN: And does the South 17 18 Carolina experience lend itself to that in terms of 19 perhaps Santee Cooper's buying off more originally 20 than it should have and SCE&G taking some of that 21 percentage back? 22 MS. HEIGEL: I don't have any knowledge 2.3 as to, you know, when those original decisions were 24 made and what was needed. I know that nuclear is a 25 long-term horizon in terms of development, and so

at the time that V.C. Summer or Vogtle, Lee, units 1 that Duke had, Levy down in Florida, that these 2. units were being -- these new units were being 3 pursued at the NRC, that the load growth projects 4 that all the utilities saw were fundamentally 5 different than what today we sit here and we expect 6 7 to see. So that's a change in circumstance that I don't think anybody really foresaw after 2008 when 8 9 most of these companies were well into their commitment. So I certainly would not, you know, 10 11 pass judgment on any decisions that were made because I believe they were made with the best 12 information and best intentions at the time. 13 14 SENATOR RANKIN: Okav. Excuse me. 15 MR. FIFFICK: What are your thoughts on 16 generating electricity in South Carolina and selling it outside of the state in a scenario such 17 18 as a merchant nuclear situation? MS. HEIGEL: First, I would say that we 19 20 generate electricity in the state of South Carolina 21 that goes outside the state today, so it would not be new, and there is, you know, a market for that. 22 2.3 In Duke's case they have a system that 24 North and South Carolina -- it serves North and 25 South Carolina, and generation -- nuclear

generation for Duke is disproportionately based in South Carolina, so one might argue that they're already exporting it into North Carolina.

2.

2.3

I think the question is what's in the best interest of the state of South Carolina, what's in the best interest of our citizens, our consumers in the case of Santee Cooper, bondholders, and, you know, that should govern what gets built.

You know, the notion of merchant nuclear, candidly, I think, is probably not a real risk. As we've seen, most of the independent power producers that had merchant nuclear on the drawing board have abandoned those projects. So I'm not aware of any merchant nuclear plant that is currently still on the drawing board.

investment in a reliance upon nuclear generation?

MS. HEIGEL: I support nuclear. I'm a big proponent of nuclear energy. I think it has served our state well. I think that are there some challenging issues that have to be addressed that aren't necessarily ours as a state to determine, but certainly ours as a state to influence, and that relates to waste storage and disposal.

MR. FIFFICK: Do you support further

But I think it's been a reliable, 1 clean, carbon-free source of electricity 2. generation. I think that we as a state have made a 3 decision and a commitment to nuclear in the form of 4 two V.C. Summer nuclear units that in the short run 5 may prove difficult in terms of the cost impact to 6 7 consumers, but I do very firmly believe that in the long run that those units will prove out to be in 8 9 the best interest of South Carolina's consumers, much as the nuclear plants that came into service 10 in the '70s and '80s that at the time seemed to 11 come with an exorbitant price tag. Today we 12 continue to reap the benefits in low fuel and 13 operating cost of those units and the relative high 14 15 capacity factors in excess of 90 percent. So I think nuclear is absolutely the 16 right investment for us to make as a state. 17 18 have to go into it, though, with that long-term 19 view. 20 MR. FIFFICK: Who's responsible for the 21 loss if Santee Cooper makes a bad investment and 22 loses money? 2.3 MS. HEIGEL: It becomes ultimately a 24 shared responsibility. Santee Cooper is a quasi 25 state agency. Its customers will ultimately bear

that cost and/or whatever risk associated with 1 2 bonds. 3 MR. FIFFICK: Can the state or local governments provide credit or raise taxes to pay 4 5 Santee Cooper's debts? MS. HEIGEL: I do not know the answer 6 7 to that. MR. FIFFICK: If a bad investment is 8 9 made regarding the electricity side of Santee 10 Cooper, can profits from water services compensate 11 or vice versa? 12 MS. HEIGEL: I do not know the answer 13 to that. MR. FIFFICK: Generally, what are some 14 15 of the factors to be considered for electric rates? 16 MS. HEIGEL: Again, I go back to that 17 cost-causation principle. My background is with a 18 regulated utility and the rates may be set 19 differently than Santee Cooper does, but typically 20 what you will do is you will look at your, just in 21 simplistic terms, what is your cost to serve. So, 22 in other words, you have an obligation. What does 2.3 it cost you to fulfill that obligation, so what are 24 your operating costs, capital costs, et cetera, and 25 with a regulated utility you pick a moment in time,

you pick a test year, you pick a period, and you 1 2 determine what those costs are and then you segregate those costs based on cost-causation. 3 So depending on the utility, typically 4 it's contribution to peak, it's some type of SCP, 5 and you will allocate costs based on demand, and so 6 7 typically you will see industrial rates lower than commercial and residential rates because the cost 8 9 to serve them typically -- not always -- is less. And that's what you strive to do, is to place the 10 11 cost with those entities that cause you to incur 12 those. Do you have any direct or 13 MR. FIFFICK: indirect business relationships with Santee Cooper 14 15 or any of its wholesale power customers? MS. HEIGEL: I do not. 16 MR. FIFFICK: Describe the role you 17 18 believe that can be played by public power and how 19 Santee Cooper fits in that role. 20 MS. HEIGEL: I believe public power has 21 a very unique and specific role that it fills in 22 providing low-cost power to areas that at one time, 2.3 not necessarily today, were not deemed attractive 24 to serve by investor-owned utilities. 25 Public power has the benefit of

managing its capital structure in a way that can 1 benefit customers through lower overall costs. 2. Being more leveraged, having more debt can, within 3 reason, benefit customers because debt is cheaper 4 5 than equity. I believe one of the advantages and 6 7 benefits that Santee Cooper has is they are able to act and react more quickly than a regulated utility 8 9 by board action and so that gives them speed to ball that I think is an advantage. 10 11 So, you know, public power continues to serve the mission of economic development. 12 Ultimately, that's what Santee Cooper's mission is, 13 is to improve the lives of South Carolina citizens 14 15 and it does that through providing low-cost, affordable power. Which I think it continues to 16 meet that mission. 17 18 MR. FIFFICK: Should Santee Cooper play 19 a role in economic development, and if so, describe 20 how you envision that role and any constraints if 21 they're placed upon that role. 22 MS. HEIGEL: Sure. I do believe --2.3 yes, I believe that it has a role in economic 24 development. I believe that the company does 25 employ an economic development professional. Ι

believe they're very active with the power team and with their local and regional economical development alliances.

2.

2.3

Many companies that are looking to locate or expand in a given area are going to consider a number of things: Labor; and what's the workforce like; and how well-trained are they; can we get the workers that we need for whatever it is that we're doing. Energy costs are usually one of the top three to top five, at least in terms of manufacturing, and so knowing that that is going to be a major element of any company's decision to expand or to locate in South Carolina, it's imperative that the utility that serves these areas be mindful of that and have economic development as part of its mission because ultimately we all benefit from growth and from that economic benefit that jobs and skilled workforce will bring.

At Duke I was very involved with economic development and, you know, we put a lot of the resources there. The challenge becomes -- I think part of your question was what are the limits, what should be the limits. The challenge becomes what are those limits, and my experience is different than had I worked at SCE&G or some other

2.3

utilities. Every utility deals with that and draws that line in a different place in terms of special contract rates versus shareholder money versus whatever, you know, funds or options might be there. So, you know, my goal would be in joining the Santee Cooper board to understand, you know, what those before me have looked at and what they considered to be appropriate and, you know, to be part of that discussion going forward.

MR. FIFFICK: What do you think Santee Cooper as a lessor should be in relationship to the public and the FURC? Is it to make a profit for Santee Cooper or to make facilities open to a diverse public?

MS. HEIGEL: I believe that the ultimate goal is to balance all those interests. And it's not easy. The FURC licensure of those facilities is important to the operation of the utility. So a governing rule is you shouldn't do anything that's going to jeopardize your license because that's paramount. Beyond that, the goal should be to try to accommodate the public's desire to have access to these facilities within the bounds and the limits of what the regulators allow, and that is — that is an issue that I have a fair

2.

2.3

bit of experience dealing with in the upstate. You know, it's not easy when you tell someone that they can't extend their dock or rebuild their dock or, you know, explain why the lake level is the way it is a certain day, but at the end of the day the paramount concern and consideration is that license and what's required there.

As I understand it, I believe that their system is going through a relicensure or in that process. That is the time when these various stakeholders can come together and come to the table with their various concerns, whether it be access, whether it be water levels, whether it be water flows, whatever those issues might be, the goal being to come up with a comprehensive relicensing agreement that as many stakeholders as possible can buy into because, again, it's a shared resource.

MR. FIFFICK: And a few more questions about board member qualities. Provide an overview of your view of the role of a director on the PSA board and how is that role different from the role of PSA's executive staff.

MS. HEIGEL: The board member's role is distinctly different than that of management. A

2.

2.3

board member's role is that of fiduciary with the duty of care, duty of loyalty to the company, and in fulfilling that role and to setting strategy and general direction for the entity. The management's role is in the day-to-day execution on that path that the board has approved.

So they're two different roles, and as a former general counsel of a utility, I can attest to the fact that sometimes it gets gray where board members want to understand more about the business, and so it's making sure that you have a board that is informed and has the appropriate information upon which to act and to make decisions without being engaged in the day-to-day activity. And so, you know, generally speaking, that's the difference and distinction.

MR. FIFFICK: Aside from annual audits by outside firms, what other types of independent expertise should a member of the board utilize in decision making?

MS. HEIGEL: It depends on the issues. I think that it is always good to have an economist that you can go to. I think it's good to have an environmental subject matter expert. Certainly lawyers and legal advisors, financial advisors. So

there are, you know, any number of subject matter 1 experts that you will bring to the table depending 2. on the issue that's being discussed. 3 MR. FIFFICK: What are some 4 considerations for the best interest of the Public 5 Service Authority? 6 7 MS. HEIGEL: Considerations including, you know, the stakeholders that you're serving. 8 9 it's the citizens of South Carolina, the customers, your bondholders, and it's really trying to balance 10 11 all their respective interests and doing what is in the best interest of Santee Cooper and the state. 12 13 MR. FIFFICK: What has been your experience with interpreting financial documents? 14 15 MS. HEIGEL: Mixed. I'm lawyer by training, I'm not an MBA or accountant, so I've had 16 a fair number of attempts at training and I believe 17 18 that, like with most things, it comes down to 19 practice and how much you use the knowledge that 20 you have. So I can stumble my way through a 21 financial statement, but I would be remiss if I led 22 you to believe that I was an Excel spreadsheet 2.3 whiz. 24 MR. FIFFICK: Are you familiar with any 25 recent legal opinions or orders or agency decisions

impacting Santee Cooper that you would care to 1 2 discuss? 3 MS. HEIGEL: I'm not aware of any at this moment. I know that certainly the greenhouse 4 5 gas performance standards for existing plants that are expected to come out later this year could have 6 7 significant impact on Santee Cooper and its existing coal fleet, but those have not been 8 9 issued. MR. FIFFICK: Does your affiliation 10 11 with any professional, civic, charitable or other organization present a conflict with your 12 13 appointment? 14 MS. HEIGEL: Not to my knowledge. 15 MR. FIFFICK: And more to -- and a more 16 pointed question. Are there potential -- are there potentially clients of Elliott Davis that could 17 18 have interest that would conflict with Santee 19 Cooper, and how would you propose to handle that 20 situation? And it may be helpful if you just gave 21 a background on more of what you do there at 22 Elliott Davis. 2.3 MS. HEIGEL: Yes. So, you know, I've 24 thought a lot about that. Santee Cooper is not a 25 client of Elliott Davis, and if I were to be

2.

3

4

25

64

confirmed on the board, they would not be able to be an audit client of Elliott Davis because my position on the board would knock us out because of independent requirements for accountants. So -- and we aren't doing any other tax work or other work.

You know, I suppose where there could be an issue is where I might do work for a company or vendor that also is a supplier or vendor to Santee Cooper. In some of my consulting work that I do I do consulting for companies that may provide services or goods to utilities. And so my work for them is strategy and sustainability and innovation related, and I can -- I have one client that I know is a supplier, but the work that I do is completely The way I would propose to handle that unrelated. is -- and I only know of one that comes to mind -is to fully disclose who that client is and the nature of my work for them and, you know, let the general counsel decide if there's, you know, ever a conflict.

It would be unlikely because most of the things that would impact them would be handled at the management level, which would be out of the purview I would have insight into, but as a board

65 member there's the perception that you always have 1 to be worried about impropriety. 2. 3 So that's really only the circumstance that I can think of at this moment in time given 4 what I'm doing, but my role is an internal/external 5 consultant role for Elliott Davis and I do serve as 6 7 their general counsel. Generally, what would you 8 MR. FIFFICK: 9 do if any other sort of financial conflict arose? MS. HEIGEL: Disclose it and seek 10 11 advice from legal counsel and direction, as I used to do as general counsel at the utility that I 12 served with. 13 14 MR. FIFFICK: Thank you. 15 Do you have any holdings in any 16 electrical utilities or any other entities that may be impacted by decisions of the Santee Cooper 17 18 board? 19 MS. HEIGEL: I do not. 20 MR. FIFFICK: Do you understand the 21 obligations and responsibilities of this position? 22 MS. HEIGEL: I do. 2.3 MR. FIFFICK: And what duty of loyalty 24 or duty of care would you owe to Santee Cooper? 25 MS. HEIGEL: I owe the duty of care to

make sure that I am as informed on the issues 1 affecting the company as I possibly can be and the 2. duty of loyalty, to act in the best interest of 3 Santee Cooper, its customers and bond owners. 4 5 MR. FIFFICK: Have you had any conversations with the governor regarding how 6 7 Santee Cooper should be run or what direction it 8 should take? 9 MS. HEIGEL: I have had no conversations with the governor about my 10 11 appointment or how Santee Cooper should be run. MR. FIFFICK: Do you have a brief 12 statement that you would like to give to the 13 subcommittee concerning your appointment? 14 15 MS. HEIGEL: Yes. I just briefly 16 wanted to say that it is an honor to be nominated by the governor for this position and it would be a 17 18 privilege for me to serve on the board. I have a 19 passion for energy and I believe that my experience 20 could be valuable to the board, but most 21 importantly, it is my desire to serve South 22 Carolina and to use my experience in the service of 2.3 the citizens of this state that prompts me to seek 24 this board position. So I thank you for your time 25 and for your consideration. Thank you.

| | 67 |
|----|---|
| 1 | MR. FIFFICK: Thank you. |
| 2 | Mr. Chairman, I have no further |
| 3 | questions. |
| | |
| 4 | SENATOR RANKIN: Thank you. |
| 5 | Ms. Heigel, I'll tell you, I've |
| 6 | we've gone through a number of these, I don't know |
| 7 | how many over the years, but you are one of the |
| 8 | most unique, uniquely credentialed nominees in |
| 9 | terms of scope of knowledge in a field that you've |
| 10 | asked to serve not as management, not as corporate |
| 11 | counsel, not as corporate secretary, but as a board |
| 12 | member. I made a quip out there that you've gone |
| 13 | from the depths of Duke to the heights of Santee |
| 14 | Cooper. Maybe I've got that kind of right, maybe |
| 15 | kind of wrong, but have you ever did you ever |
| 16 | see yourself switching roles and doing this as |
| 17 | have you ever done this before on this side of the |
| 18 | table? |
| 19 | MS. HEIGEL: Not on this side of the |
| 20 | table. And did I see myself in this role, yes. At |
| 21 | this point in my career, no. |
| 22 | SENATOR RANKIN: Well, you've embraced |
| 23 | it, obviously. |
| 24 | MS. HEIGEL: Yes. |
| 25 | SENATOR RANKIN: You want to do it. |

1 MS. HEIGEL: Sure. In some respects, with envy, as I said, because of the speed to ball, 2 the ability to adjust rates and deal with those 3 types of things in what appears to be in an easier 4 manner formality-wise than the regulatory process 5 of public hearings and going through the fully 6 7 litigated cases that the investor-owned utilities have to go through, but also with great respect. 8 9 Certainly Santee Cooper is one of the top five largest public power entities in the 10 11 It operates a very substantial generation country. fleet of over 22,000 megawatts and -- I mean, 12 that's roughly the size of what Duke Energy's 13 14 Carolinas generation portfolio is. So with great 15 respect is how we at Duke viewed Santee Cooper. SENATOR RANKIN: 16 The American Transmission Company where you worked for about a 17 18 year --19 MS. HEIGEL: Yes. 20 SENATOR RANKIN: -- last year, I was 21 doing a little digging on that. It's a privately 22 held public -- or not public? You've got lots of cities who are members or owners, but --2.3 24 MS. HEIGEL: Right. So American Transmission Company back in the early -- around 25

2000 they had some significant transmission 1 constraints that led to brownout/blackout-type 2. conditions, and so in a great deal of frustration, 3 legislators in that state said investor-owned 4 utilities have not been making investments in the 5 transmission infrastructure that they need to make 6 7 and so they effectively divested the regulated utilities of all of their transmission assets and 8 9 pulled them and put them into this new entity called American Transmission Company and each of 10 11 those respective investor-owned utilities, munis, co-ops got a percentage ownership share 12 commensurate with the assets that they 13 contributed -- the value of the assets that they 14 15 contributed to American Transmission Company. The mission of the American 16 Transmission Company was to fix the problem, was to 17 18 go out and make the needed investments in 19 transmission in Wisconsin, the upper peninsula of 20 Michigan, lower portion of Illinois feeding Chicago 21 and into Iowa. And so it -- because of the three 22 largest owners, Integris Energy, which is based in Chicago, Wisconsin Energy -- they've changed their 2.3 24 name, but it's We Energies, and then Alliant are 25 the three largest owners and they are

| | 71 |
|----|---|
| 1 | investor-owned utilities and they have SEC |
| 2 | reporting requirements, we at ATC behaved and acted |
| 3 | as if we were an SEC registrant. So we complied |
| 4 | with Sarbanes-Oxley. We issued all the financial |
| 5 | statements and reports in a manner that because |
| 6 | we were a growing percentage of the financial |
| 7 | contribution for those utilities, they were wanting |
| 8 | to focus more of their time and attention in their |
| 9 | investor analyst presentations on what we were |
| 10 | contributing, and so we spent a lot of time working |
| 11 | with them on those presentations with the board. |
| 12 | So it's an odd it was you had a |
| 13 | foot in each camp and so you kind of had the |
| 14 | worst in some cases, the worst of both |
| 15 | structures, but very transparent. |
| 16 | SENATOR RANKIN: All right. And you |
| 17 | currently maintain three states' law license? |
| 18 | MS. HEIGEL: So I'm barred in five |
| 19 | states. |
| 20 | SENATOR RANKIN: Barred in five, two |
| 21 | inactive. |
| 22 | MS. HEIGEL: And then I'm inactive I |
| 23 | went inactive in Georgia early, and then I went |
| 24 | inactive in Ohio. |
| 25 | SENATOR RANKIN: And for the record, |

through May of 2019.

2.

2.3

All those experiences -- and ultimately the question to you, as to him, is: What's the legacy you hope to bring and the difference that you'll make here that we'll be talking about, or somebody, at the end of your term?

MS. HEIGEL: Well, I hope the legacy is a legacy of continued success in Santee Cooper meeting its mission through that time period. So continuing to improve the lives of the customers that it serves directly and indirectly and bringing new jobs and growth to South Carolina. So I hope that as part of my tenure that we continue as a company to achieve those things.

On a more personal note, I think that my experience starting as a consumer advocate, and maybe even, you know, more recently with Duke as president of the South Carolina retail operations, you can't ever lose sight of who your customer is and it is sometimes easy to do that when you're in an office building or you're, you know, in a boardroom, but for me, as painful as those public rate case hearings were at times, it was an important reminder of who we're serving. I won't ever forget the testimony of a man in Anderson back

2.

2.3

in, I want to say, 2009 who said he had moved from an apartment into a mobile home because the rent was cheaper. What he had not banked on was the fact that his electric bill was going to more than eat up that rent savings. And he had children, he was between jobs -- he had lost his job, he was, you know, trying to get a new job, and he -- he said he thanked God for school so that his kids could eat. When you hear that kind of personal testimony you remember that it's not an easy balance, but you have -- you have to balance the respective needs and interests of all the constituents that you serve, even those that you aren't seeing every day.

So I think that it's that perspective from all ranks within the industry, but also from the consumer advocate, to -- to really seeing the impact of what those rate increases mean for people, I think that that hopefully will be a value in my service on the board.

SENATOR RANKIN: The demographic of
Santee Cooper's customers is not dramatically
unlike what you've just described; the senior
population as well. In my area we talk about the
in migration of retirees and the wealth factors.

| | 76 |
|----|--|
| 1 | MR. LAND: No. It should all be the |
| 2 | same. |
| 3 | MR. FIFFICK: Mr. Chairman, if we could |
| 4 | have that entered into the record, please. |
| 5 | SENATOR RANKIN: Yes, sir. |
| 6 | (EXH. 7, Senate Confirmation |
| 7 | Confidential Personal Data Questionnaire, was |
| 8 | marked for identification.) |
| 9 | MR. FIFFICK: We sent a you set of |
| 10 | questions and received the responses. If we asked |
| 11 | you the same questions today would your answers be |
| 12 | the same? |
| 13 | MR. LAND: Yes. |
| 14 | MR. FIFFICK: Mr. Chairman, could that |
| 15 | please be entered into the record. |
| 16 | SENATOR RANKIN: Yes, sir. |
| 17 | (EXH. 8, Preliminary Questions |
| 18 | Responses of John Calhoun Land, IV, was marked for |
| 19 | identification.) |
| 20 | MR. FIFFICK: What experience do you |
| 21 | feel that you bring to the Santee Cooper board |
| 22 | given your long tenure there? |
| 23 | MR. LAND: Well, I guess what would |
| 24 | naturally come from that, which is, you know, I've |
| 25 | just seen a perspective even if you count all |

2.

2.3

the executive staff in the room like at our meeting yesterday, I've been on that board longer than anyone else in the room has been on the executive staff. So I've seen the staff turn over about two and a half times. We're almost to a complete third revolution on that. Probably will be by the end of this year. So, you know, surprisingly, to me at least, they sometimes ask me some historical questions that I kind of thought they might know and typically I have some good information for them in that regard.

You know, the board -- I've seen the board come and go. I'm still here, thank goodness. I really enjoy doing the work and take a lot of pride in doing a good job and, again, get a lot of pleasure from it.

But, you know, I've seen some good things happen from a board standpoint. I guess it helped me understand what influence a board cohesively can have on the place. And I've seen the board do some things which I think most folks in here would be familiar with a few years ago that just weren't good, and it wasn't hard for me to see that when it was happening -- you know, I was in a minority at that time -- and eventually the good

prevailed, I guess you'd say.

2.

2.3

So that from standpoint I think I bring a good bit of knowledge and to the extent I can claim wisdom from the standpoint of how a board functions and how they can make mistakes, and then the opposite of that, how we can really work to do good things down there at Santee Cooper.

MR. FIFFICK: What are the top three statutory or regulatory changes that you've seen in your service?

MR. LAND: You know, from a regulatory standpoint, of course, you know -- and I hope I'm answering your question correctly. You know, obviously there have been some changes in the board and how it's approved and those type things, but I don't think that's your question.

You know, environmental regulations from the federal and, to some lesser extent, the state level, you know, have been pretty challenging. I mean, we've had over the years in doing some plant construction and some plant modifications and plant improvements that have run into some tripwires where Santee Cooper actually had to pay fines for upgrading some equipment to essentially make a 1985 car run like a 2012 car and

came back and realized when we did that that maybe 1 we didn't exactly comply with some of the 2. regulations or either we had a different opinion. 3 Eventually we had to agree through a consent order 4 or consent agreement with the government that we, 5 in fact, did some things that maybe if we read the 6 7 law a different way we shouldn't have. So, I mean, that would be the thing 8 9 that -- did you ask me for three? MR. FIFFICK: 10 Two or three. 11 MR. LAND: Okay. That's the biggest 12 one. You know, a lot of new financing rules 13 and regulations don't necessarily apply to Santee 14 15 Sarbanes-Oxley, some of the things that came out of the banking crisis, I guess, is a term 16 people use, you know, we use those as a quidance 17 18 and we kind of do a test to make sure that we would comply, if we had to, with those regulations. 19 So I 20 quess that's something different. 21 You know, in general, I think that we probably are not being responsive to legislation or 22 2.3 regulation, but in a way I think that we're trying 24 to beat that, so to speak, from a timing 25 standpoint. Just like what we're doing with our

80

coal ash ponds now, we have reached an agreement whereby we're going to mine those things and make sure that any of the waste that was there is removed and those things are restored back to their natural condition before these waste sites were created. And I think, you know, there's nothing that's forcing us to do that, at least there's no regulation I'm aware that's forcing us to do that, but we're doing what we think is the right thing, but we never -- you know, all along in looking at that, the plan we ultimately came up with to deal with this was -- you know, we looked at a lot of different scenarios and we ended up picking the one that we thought would be the best and have the best outcome for everybody.

Of course, all these things were permitted properly when they were initially sited many, many years ago, but of course, as times changes peoples' views on environmental things like that change, and of course, although you've got a good, valid permit, you know, it probably is a good thing to look at what people in today's world expect and try to comply with that in a fair and economical way and in a way that shows good stewardship toward the environment and peoples'

1 feelings, so the speak. MR. FIFFICK: Last year Fitch gave 2. Santee Cooper a negative outlook. What steps do 3 you think the board can take to respond to these 4 5 concerns? MR. LAND: Well, first, I think that 6 7 that negative downgrade or outlook, that change in our credit rating, probably had to do with two main 8 9 things. The first and the probably the minor of the two would be the ongoing renegotiation of our 10 11 contract with our largest wholesale customer. That's roughly a billion dollars a year, give or 12 13 take, in revenue to Santee Cooper; some years more than that depending on load. So, you know, we're a 14 15 revenue-based debt service structure at Santee Cooper. All of our bonds are simply secured by the 16 revenue that that company produces, so when 17 18 somebody buys our debt they expect the revenue to 19 be there to repay them their interest plus 20 principal. 21 With that being said, we had a big, big 22 deal to get that agreement approved. Now, I never 2.3 really thought, because I've been around long

enough and knew the structures -- we're more or

less married -- our large industrial -- our

24

25

82 wholesale customers and Santee Cooper, I mean, 1 we're pretty much -- it's hard for us to live 2. apart. I mean, we can fuss and fight, but at the 3 end of the day we've got to be back there together 4 5 because there are just too many reasons why we can't live apart. Okay? 6 7 And so that was one. We successfully just last late summer approved that document --8 9 excuse me -- early summer, in May, approved that document and that agreement is going to take effect 10 11 and is going to secure that revenue for decades to So I think, from the concern the credit 12 come. rating agencies had there, we've probably checked 13 I doubt they're worried about that now. that box. 14 15 The second would be the V.C. Summer construction project. Everybody, I think, is 16 familiar with that. That's a 9 to 10 billion 17 18 dollar project that Santee Cooper will own 19 40 percent of. We currently are 45 percent owner, 20 but we recently shed 5 percent of that to South 21 Carolina Electric & Gas. 22 You know, if anybody tells you that 2.3 building a nuclear plant is not a risky thing to 24 do, you know, they really don't know what they're 25 talking about. That's a very, very risky

| | 0.3 |
|----|---|
| 1 | proposition. Everybody knows that going into it. |
| 2 | I really would have been with how everything |
| 3 | looks, I probably would have been more surprised if |
| 4 | they hadn't made some comment or downgrade. |
| 5 | Certainly we don't want that or a negative |
| 6 | watch. We don't want that, but it has to do with |
| 7 | that. I mean, that's you know, there are all |
| 8 | kinds of nuclear plants out in the Midwest that |
| 9 | they make movies in now, underwater movies, because |
| 10 | they started building them and then they quit. |
| 11 | Okay? Billions of dollars. Probably hundreds of |
| 12 | millions back when those were done in the '70s, but |
| 13 | a lot of money just putting a big concrete hole in |
| 14 | the ground nothing ever happened to. |
| 15 | You know, that's not going to happen |
| 16 | I'll tell you that's not going to happen at V.C. |
| 17 | Summer, but, you know, there's always that risk and |
| 18 | I think they are respectful of that when they do |
| 19 | that. And they're doing their service to our debt |
| 20 | holders to let them know, you know, Santee Cooper |
| 21 | is doing some big stuff, you know, watch them. |
| 22 | MR. FIFFICK: What do you see as the |
| 23 | top three challenges facing Santee Cooper right |
| 24 | now? |
| 25 | MR. LAND: The V.C. Summer facility |

would be number one, you know, and I pretty much just described why just in my last answer. So, I mean, that's the eye on the ball currently.

2.

2.3

The federal regulations having to do with our emissions from our fossil fuel fired plants would probably be number two, and that goes back purely to an economic cost to Santee Cooper and ultimately to our customers, number one, and secondly, whether or not we can institute changes to emissions systems or plant operation strategies that would make those things operate.

There are some things you can do.

These plants are made when they're designed to work at certain speeds and certain pressures and certain temperatures and a lot of these -- a lot of these regulations tend to try to move those things around because they arguably can't or maybe won't make it more efficient or produce less emissions. But you have to be able to operate those plants reliably.

So influencing what happens there would be, I think, a primary concern for a board member now, and making sure that Santee Cooper lets its position be known to those making the decisions, and also, of course, whatever decisions are made, making sure we can implement those in a way that

2.

85

doesn't impact the -- you know, from a financial side or an operations or a liability side the whole entity of Santee Cooper supplying its product to its end customer and -- you know, and fighting those things, I guess, through litigation if it looks like we're put in a position where they're mandating we do something that we can't do I guess would be a call that would have to be made. So, you know, that would be the second.

]And, I guess, the third would be -and I put it third not because it's least important, but probably because it's the one that's most developing now, would be the renewable portfolio standards that we aren't yet under, you know, in South Carolina. Some other bordering states have those, but, you know, that's a -again, back to a revenue standpoint, that's a very touchy thing from the standpoint that, you know, renewable energy -- you know, Santee Cooper's got some landfill gas, we've got some sources of energy of that type. We've got some folks who are producing some biomass and wood fired electricity and some digester source, methane fired electricity, and we're integrating all that in there and we're paying them a rate -- most of

2.

2.3

those -- not all of them, but most of those we're paying them a rate that's really above what we could produce it for, okay, and we're trying to promote the development of that, but at the same time we have to be careful that we don't paint ourselves into a box. We have got requirements that the federal government puts on electric utilities to serve their customers, and we have to have certain reserves in case we have a breakdown in our system, and we have to, you know, have certain reliability number to keep from being fined or penalized or investigated for those matters.

You just have to -- there's a balance there, number one, from a reliability standpoint that we don't get so much of whatever type renewable energy source it is that it gets it -- it puts it where we're having to, say, idle a big multi-hundred million dollar generator with essentially the key on and it's running but we don't have a foot on the gas, you know, for days and days at a time waiting for that cloud or whatever, storm or some breakdown in a renewable source of energy that then makes us have to hit the gas pedal on that multi-hundred million dollar generating unit and, of course, all the time we're

2.

2.3

really not generating any revenue out of this big unit to pay for the O&M, the employees that work there, the paint that needs repainting, the bearings that need replacing or the capital costs, the debt that we had to secure to finance that project and we have to pay those bondholders back while that thing is sitting there idling.

So it's balance. We want to encourage this because, you know, from a future standpoint there's a future there, a very bright one, but we have to integrate it in a way that's responsible and then, secondly, doesn't come back to that bond and capital requirement of a generating unit that doesn't then make us tax -- I'm not using that word -- or add to the rate the carrying cost of this idled unit on to our customers.

And that's -- you know, there's a fair way to do it, but we have to develop that. And I can't tell you I know what that is today. It's actually a challenge. You know, the consequences aren't as dire probably as the V.C. Summer project, but there are consequences there and we need to make sure we do a good job and make the right decisions in addressing that third challenge.

MR. FIFFICK: How do Santee Cooper's

rates compare with IOUs in South Carolina and 1 nationally? 2. 3 MR. LAND: You know, our rates would be -- historically they have been lower, okay? And 4 there are some IOUs around us, at least as I see 5 it, who are much older entities, South Carolina 6 7 Electric & Gas being one. Probably more identifiable with this is Duke, who is much older 8 9 and they've been much bigger than Santee Cooper. And Santee Cooper's always grown its generation as 10 11 it has grown. I guess most of the growth in Santee Cooper has been in the '80s and '90s and early 12 2000s. We were building big coal units. That was 13 the -- economically all the numbers worked, that 14 15 was the best way to go. You do a generation plan 16 study and it would say build coal, this is the way to do it. We could permit them, they would meet 17 18 the environmental regulations of the time, it was 19 the cheapest source of electricity, so certainly 20 that's the way you go. And, of course, you had 21 Duke and some others. I'm not going to use Duke's 22 name anymore, but other utilities who had more 2.3 nuclear, and that's just historical. 24 Back in the '60s and '50s and '70s, 25 when nuclear was being built -- there was a time

when a lot of nuke was built. They built that and that's historically the cheapest, at least from a fuel cost, power you can get.

2.

2.3

And so I think recently with the run up in fossil fuel, primarily coal -- it had a big jump back several years ago. I mean, it went from the 40 to \$55 a ton range up above a hundred dollars a ton. Natural gas, same thing. Historically 2.80, 3, \$3.30 gas went up to 9, 10, sometimes even higher than that. And we're -- if you combine our gas and our coal, you know, that's about 85 percent of our generation. We have a little bit of nuclear from the existing V.C. Summer. So that put our rates under a bunch of pressure say in the last seven -- five to seven, maybe even arguably ten years. Probably more likely seven.

But we've gotten through that. Our rates were not as competitive during that period of time. We were before. We've made it through this period of time where we're neck-and-neck, and I really feel with the introduction of the new V.C. Summer generation over the next, you know, five years, when those units come online, the fact that we've got a good, reliable natural gas fire plant up there in Anderson, the Rainey Station, gas, I

think, is pretty predictably going to be low in the 1 next say decade. I think that we're going to 2. 3 really come back down. The rates are going to -at least they're not going up any more. 4 5 they're going to moderate down some, and I think some of the other entities' rates may go up a 6 7 little bit. So I don't know if that answered your 8

9

24

25

question, but I think our rates are competitive, I think we are making good decisions, and I think we're trying to be efficient. And to that, we've done some cost cutting internally at Santee Cooper. We were able to do some refinancing. I think the number for 2013 was roughly 130 to \$150 million -- I don't think all the numbers are solid yet -- that we were able to either through refinancing or interest savings, internal, you know, cost controls and other things, we were able to reduce our expenses.

So we're trying. We're going to get the rates back down or either we're going to hold them where they are, but they're going to be competitive, to answer your question in a simple way.

MR. FIFFICK: Also related to V.C.

Summer, are there any concerns about excess capacity or is the recent agreement to sell part of that sufficient or is additional action possibly needed?

24

25

Well, that's predicting the MR. LAND: future, but I can tell you that all of the studies that we've done show that even at 40 percent if you look out over a certain period of time that really from a revenue standpoint it's not excess. a belief at least that power -- we may be idling some of these other units that are much smaller and arguably from a fuel standpoint less efficient or less economical. I think we're going to be fine. I don't think we're going to have an excess. of the projections I show -- I mean, right now looking at -- and I would say economic activity is still depressed in our service area some. coming back, but it's still depressed. You know, at our last peak we had about a thousand megawatts of surplus power on that day and I believe we were able to sell a good bit of that on the market. Ι don't know that for certain, but I understood we did because that same peak day other people were peaking and they needed power too in the Southeast.

I don't -- I guess to answer to your

question, it's technically a surplus, but I don't 1 2 think it's going to be a problem. I don't think 3 that surplus is going to be a problem. I think it's going to work for us, maybe even in our favor. 4 Who knows, some big 500 megawatt industry might 5 want to locate in South Carolina and have 500 extra 6 7 megawatts of power. It would be a wonderful thing 8 to have. 9 MR. FIFFICK: Along those lines, during the last decade what role has Santee Cooper played 10 11 in economic development? MR. LAND: Well, I think -- more 12 fundamentally, I think that we are seen as a very 13 reliable electricity provider. I think a lot of 14 15 these companies who have located in our service area or either in the cooperative's service area --16 I've always heard that we've just gotten a lot of 17 18 complements on -- when they look at our numbers, 19 how reliable our service is and how responsive we 20 are as a generator. And I've always -- I guess I 21 said that to some of our wholesale customers. 22 those negotiations I said, you know, you're sitting 2.3 here, you know, talking to me. You think that 24 you're going to be able to get Duke's board member on the phone with you when, you know, you go with 25

Duke or some other company, large IOU? You think 1 you're ever going to get their CEO on the phone --2. you, a customer, are going to be able to get a CEO 3 on the phone like you can at Santee Cooper? 4 5 everybody agrees, no, we won't. That's a good So I think the culture of Santee Cooper is 6 7 attractive to people. We provide a good, stable 8 product at a competitive price. 9 And lastly, I mean, we've done some things through our loan programs, some of our 10 rates -- and I've actually probably -- on some of 11 these industrial rates we've given, you know, I've 12 13 looked at them. In a way, I wish we would do more. So I wasn't excited about doing what we did 14 15 sometimes because I wish we could have done it -offered it to more people, but we've offered some 16 rates I think that have helped people and some rate 17 18 relief that has helped people. 19 I just think we've tried to be 20 responsive, be there for the existing and potential 21 industrial developments or economic developments. 22 I think we've been there for them and we're 2.3 accommodating to them once they get here. 24 MR. FIFFICK: Is there anything you would have done differently throughout your 25

service?

2.

2.3

MR. LAND: Well, I mean, there are some things we did that resulted in litigation. I guess I'd go back and probably say, this isn't a good thing to do, but I didn't have that information at the time. But I think that's natural. I don't think that's -- a mistake was made there. I think that's just sometimes -- as long as you're right most of the time you're in pretty good shape.

You know, there are some HR related decisions we made having to do with company policy -- not individual employees, but company policy that I think probably if we could go back I would make a different argument. We probably would have still made the same decision, but I would have made a different argument. You know, I don't reckon there's -- you know, and, of course, during some of the bad times I don't know if there's anything differently I would have done. I think I did what I did and I think it was all appropriate.

MR. FIFFICK: A few more just basic board member quality questions. Provide an overview of your view of your role as a director on the Public Service Authority board. How is that role different from the role of someone who is on

the executive staff?

1

2.

3

13

14

15

16

17

18

19

20

21

22

2.3

24

25

MR. LAND: Well, you know, I guess I'd have to answer that backwards, but, you know, I think the role is not to try to portray or act as if I'm an executive staff member. I mean, there -you know, we've got methods of interaction within the company that don't necessarily apply to board members. The chain of command, we're supposed to be respectful of that, but that's not -- you know, if I want to call an employee six levels down to ask them some question, you know, it's well understood I've got the right to do that, but you don't -- I guess it's not to be abusive of the capacity you have. You don't -- you know, where it's not warranted. I guess if something -- you see something that you think is terrible you need to act on it. Typically that's not -- doesn't appear.

But I think to be respectful to staff, to be helpful to staff. I mean, we're a policy making board where we make major decisions. I mean, I think our job is to disagree with staff where we think we need to on an issue or -- and, of course, support staff and encourage staff to move forward on an issue that we do agree with the

1 approach or the strategy. But, I mean, I guess the answer is I 2. don't need to be calling prospective suppliers of 3 products or prospective customers and making 4 5 promises or making statements about what Santee Cooper's going to do for them. That's not a 6 7 director's job, that's the staff's job. 8 MR. FIFFICK: What are some 9 considerations for the best interest of the Public Service Authority under 58-31-50? 10 11 MR. LAND: The best interest test is to make it -- at least as I've interpreted it, is to 12 make a very, very well-informed decision that 13 reflects that you have acted in the best interest 14 of the stakeholders of the agency, and that would 15 be, you know, the bondholders, the customers, the 16 employees, and then in a larger sense the citizenry 17 18 of the state, all of those in the state of South 19 Carolina who in a way -- although not equitably, I 20 guess, through just pride -- own a part of Santee 21 Cooper. 22 MR. FIFFICK: A couple more for you. Does your affiliation with any professional, civic, 2.3 24 charitable or other civil organization present a 25 conflict with your reappointment?

| 1 | MR. LAND: Not that I'm aware of. You |
|----|---|
| 2 | know, if you have one in mind I have a few, but |
| 3 | I don't not that I'm aware of, no. |
| 4 | MR. FIFFICK: Do you have any financial |
| 5 | conflicts of interest that could result from your |
| 6 | reappointment? |
| 7 | MR. LAND: Not that I'm aware of, no. |
| 8 | MR. FIFFICK: What would you do if such |
| 9 | a conflict arose? |
| 10 | MR. LAND: Well, I mean, I guess, |
| 11 | first, I would disclose it if I knew what it was or |
| 12 | if there was one out there. Secondly, I certainly |
| 13 | would insulate myself from making any decisions |
| 14 | which would reflect that I'm using any influence I |
| 15 | have for personal benefit. That's what I'd do. |
| 16 | Of course, I'd try to avoid them, I |
| 17 | guess, is the first thing I'd try to do. |
| 18 | MR. FIFFICK: Do you have any holdings |
| 19 | in any electrical utilities or other entities that |
| 20 | may be impacted by decisions of the board? |
| 21 | MR. LAND: No. You know, I disclosed |
| 22 | on that questionnaire, I think, some mutual funds |
| 23 | that I own, some varying energy related companies, |
| 24 | and I you know, I might, but I'm not smart |
| 25 | enough to understand how I could to answer your |

98 question, no, I don't know how I could influence 1 anything. 2. 3 MR. FIFFICK: Have you had any conversations with the governor regarding how 4 Santee Cooper should be run or what direction it 5 should take? 6 7 MR. LAND: No. I've talked to some of her staff members. You know, we talked about, you 8 9 know, Santee Cooper was doing well when I talked to the governor about it, and that was about the 10 extent of that. Some of her staff members, I 11 think, were -- discussions with them. 12 they're very supportive of what we're trying to do 13 down there and I've never seen them where they've 14 15 tried to exert any influence. I mean, I think they're interested in what we're doing and I think 16 they know that I'm open if they ever have some 17 18 concept or discussion they want to have, but to 19 date there's really been nothing meaningful other 20 than they like what they see, I guess, is the 21 simplest way to put it. 22 MR. FIFFICK: Do you have any 2.3 additional brief statements or comments you'd like 24 to make to your report? 25 MR. LAND: You know, I think in the

| | 99 |
|----|---|
| 1 | first question I appreciate you all having me |
| 2 | here. I'm just terribly, terribly honored that I'm |
| 3 | sitting here. I really appreciate, you know, all |
| 4 | the folks who have been involved in me getting here |
| 5 | and I hope that my service over the last 15 years |
| 6 | is maybe some of the reason why I'm here. And I |
| 7 | certainly would continue that. You know, I'd try |
| 8 | to do better, if that's you know, I'm sure it's |
| 9 | possible. I'll try to do better. |
| 10 | MR. FIFFICK: No further questions. |
| 11 | SENATOR RANKIN: Thank you. |
| 12 | Thank you. And I'm going to call you |
| 13 | Cal |
| 14 | MR. LAND: That's fine. |
| 15 | SENATOR RANKIN: because to address |
| 16 | you formally would be a lie. |
| 17 | MR. LAND: That's fine. |
| 18 | SENATOR RANKIN: Cal is a friend. |
| 19 | Each of the last appointees that have |
| 20 | come up I've commented that I think to a person has |
| 21 | a unique gift, not the spiritual or the religious |
| 22 | type, but from an experience and from an |
| 23 | educational side, and yours is not just OJT of 14 |
| 24 | years, but your answers have been longer, your |
| 25 | written responses have been longer. Not that |

100 that's -- you're over the top, but the passion that 1 you have about Santee Cooper just exudes from you 2. in word, written and spoken. 3 MR. LAND: Well, I appreciate that. 4 5 SENATOR RANKIN: You act like you're brand new at it and you've got such a vigor about 6 7 this that's refreshing, as I said of the young man, 8 Kris Clark, the very first guy --9 MR. LAND: Yeah. SENATOR RANKIN: -- who was three years 10 11 into it but likewise expresses and shows a youthful excitement about this. So I commend you for it. 12 13 It's amazing. 14 And I've looked through -- is there any 15 committee you've not served on? Can they make one up if you haven't. 16 MR. LAND: We used to have one called 17 18 the Nuclear Committee and I don't think I was ever 19 on that one, but it met about once every five 20 years, so that didn't bother me. They really 21 didn't have a lot of activity. We probably may 22 have that one reinstated, though. 2.3 SENATOR RANKIN: Your comment about 24 turnover of staff -- I ran into Graham Edwards. 25 Was he the first --

1 MR. LAND: Yeah. He was the CEO when I originally was on and was there for about a year 2 and a half. Then we had John Tiencken who was 3 there for, I think, about five or six years. 4 then we've had -- Lonnie Carter has been there the 5 last seven years. 6 7 SENATOR RANKIN: So you have seen 8 them --9 MR. LAND: Yeah. And I've seen the You know, it was -- I've seen the styles, 10 11 without commenting on who they were or what they were. But there have been different styles there. 12 I wouldn't have been able to tell you that when I 13 first got on there. Different management styles. 14 15 There are some things that work well and then there are some things that don't. And even our current 16 CEO, I mean, I've had a discussion with him that, 17 18 you know, I really think you ought -- and this was 19 many years ago, three or four years ago when he was 20 still relatively new. You know, I had some 21 suggestions for him that I think I got from some of 22 the successes of his predecessors and I think he 2.3 implemented those. I saw it and I think it worked 24 well. So I was able to help there and, you know, I 25 think -- but we've done -- we've been fortunate,

and I think by saying that, I guess the board's 1 done a good job with who we've chosen as our CEOs. 2. 3 They've all been the right people for the right time. 4 SENATOR RANKIN: The politics of your 5 board activity, you didn't reference what, but 6 7 certainly you mentioned being in the minority early on and some difficult times not just for you, but 8 9 for the legislature on what was going on there. MR. LAND: 10 Right. 11 SENATOR RANKIN: What do you see that has -- other than the law, which I hope is not the 12 only impetus -- that has changed what goes on in 13 that board and at least perhaps the fiduciary duty 14 15 that you look upon the role you hold? Well, I mean, you 16 MR. LAND: Yeah. know, that -- all that happened back then with the 17 18 study sale of -- the sale of Santee Cooper study 19 and those things. You know, it was really -- I 20 guess the first answer would be, you know, the 21 radar certainly was tuned down a little bit to be 22 more sensitive. I mean, nobody even -- that was 2.3 the last thing on anybody's mind, that a group 24 would be looking at that without a cohesive 25 decision being made and support of the chairman or

at least a well-discussed, you know, dissenting 1 crowd doing somebody that was broadcast this is 2. 3 what was going to happen. So, I mean, it was just kind of odd in that regard, but I think everybody's 4 radar is more sensitive now. I think it would be 5 very difficult for something like that to happen 6 7 now. You know, I think the statutory 8 9 language and best interest test, you know, I guess the way I look at it is before that I kind of feel 10 11 that all the boards were operating under a best interest definition that would be very close to 12 what is statutory law now. So, you know, I just 13 think that was just a unique and unusual time and, 14 15 you know... 16 And there were some good people. not saying anybody is good or bad in that. I do 17 18 think the process that was used was terrible, and I 19 think it was improper and -- and just very 20 interesting, I mean, but it had support from a lot 21 of people outside of Santee Cooper who were 22 involved in that, which is interesting too.

I don't think in today's world that would happen. You wouldn't get that outside influence at least as secretly applied to Santee

2.3

24

25

```
104
              I think it would be much more openly
1
     applied, if applied at all.
2
3
                 SENATOR RANKIN: The tussles or the
     tugs of war outside of the political nature that I
4
     think that was -- and I don't want to keep going
5
     back there, but today what would it be, Central
6
7
     versus my folks --
8
                 MR. LAND: Yeah. Correct.
9
                 SENATOR RANKIN: -- industrial folks,
     or my rooftops versus --
10
11
                 MR. LAND: Yeah.
                                    Yes, to all of
     your -- I think obviously Central -- I mean,
12
     everything. We've really worked hard and that's
13
     coming up to that. I mean, we saw this do-or-die,
14
15
     in my opinion, agreement with Central.
                                              I mean, we
     were -- we lost a billion dollars a year in
16
     revenue, to use that number, and that's not a --
17
18
                 SENATOR RANKIN: And that contract was
19
     to expire when?
20
                 MR. LAND: Well, it would have expired
21
     in about 15 years from when we did it, or 10.
22
     had the right to show they were leaving -- maybe it
2.3
     was ten years. We were negotiating on it so long I
24
     can't remember exactly, but, you know, we were
25
     running up -- within 15 years they would no longer
```

be our customer and, I mean, in the utility world 1 that's really not a long length. And these 2. agreements are for 30 years, so, you know, 3 they're -- they have a lot of life. I think this 4 gets us up through '58, and, I guess, maybe, 5 thinking back, to '03, when that 15-year period 6 7 started. But that's always -- I mean, you know, 8 9 they're a customer, and they are a big customer and they're always going to be, you know, putting 10 11 pressure on Santee Cooper from a number of different fronts to be efficient, to do things that 12 13 they may do. Their direct serve 14 Santee-Cooper-meter-on-the-side-of-your-house 15 folks, you know, they're going to want their customers to be treated fairly because we have the 16 capacity to do some things over here that arguably 17 18 could be unfair to them. They're going to want 19 that the be fair and they're going to use all the 20 influence they need to help us craft those 21 decisions. And I welcome that. I mean, you know, 22 they're such a big partner, anything that's going 2.3 to be good for them is going to be good in general 24 for the whole. So they're going to use that. 25 And then, you know, with the renewable

2.

2.3

standards, potential legislation -- I know there's some draft-type legislation that's been filed here -- you know, getting those right. And we don't want -- we want to support the advancement of the technology. We want to support people who want to do this stuff. You know, it can have a good economic benefit from the standpoint of equipment suppliers and installers, and, of course, people are going to be happy, and maybe folks from another part of the world will come here and see that we're doing some modern, advanced things and maybe it makes us look good from that standpoint.

So we want to encourage all that, but it goes back more to a financial argument that you want to do it in a way that's fair to someone who doesn't have a -- use a solar panel, for example, on the top of their house. It's great and fair to promote the solar panel, but I can't really balance out whether it's great and fair that you would somehow make the person without a solar panel on their house pay for that, especially if it's not penny-for-penny.

Now, maybe you could make some argument that, well, you know, it makes sense to pay 20 point -- you know, 25 percent of the expense.

107 1 SENATOR RANKIN: Have you ever heard the accounting term goodwill? 2 3 MR. LAND: Goodwill, yeah. Maybe it's worth purchasing some goodwill. 4 5 SENATOR RANKIN: All the things you all are generating -- and I'm not endorsing that, but I 6 7 can't help but --But, I mean, 8 MR. LAND: Yeah. 9 that's -- I think those are the only -- and, you know, environmentally I think that Santee Cooper 10 always been a -- I mean, we're in a potentially 11 environmentally challenging business from, you 12 know, the environment of the world, so to speak, 13 the birds and the bees and everything around, and 14 15 we want to be good stewards there. I mean, we burn a lot of coal and other things that I think whether 16 you believe in certain sciences or not, I mean, you 17 18 know, they have some effect on the environment, 19 whether it's long-term or short-term or good or 20 But we want to be respectful of people who 21 have different positions there. We don't expect to 22 be a bully, so to speak, to run over people. 2.3 want to hear their positions, and if they've got 24 some good ideas... 25 It's just like the coal ash ponds there

at Granger, to use that one. You know, we have 1 2 looked at some scenarios where we would actually encase that thing and kind of build a concrete box, 3 for lack of a better term, around it underground. 4 You dig down around it, build a concrete box and 5 cap it with a waterproof layer and then certainly 6 7 the stuff, in theory, would just sit there, and I think the science --8 9 SENATOR RANKIN: The old plant in Conway is where you're talking about? 10 11 MR. LAND: Yeah, the old plant in Conway. And that probably at the time was the most 12 economical route to go, and I think the science 13 would have predicted pretty accurately that it was 14 15 a safe way to do it, but, you know, I think people didn't agree that a hundred years from now -- and I 16 can even make a good argument that it's real hard 17 18 for me to say what a hundred years from now is 19 going to look like down there -- that a hundred 20 years from now it's best not to have that thing in 21 a concrete box where it is. 22 So going back a little bit, we looked 2.3 at another capacity that kind of developed as a 24 result in a way. It was a technology that was in 25 the works where they use certain processes to fluff

up and dry this landfill material and process it to 1 get some impurities out to the point where it can 2. be used to make cement and concrete. So that's 3 primarily what's going to happen with all that. 4 5 It's going to be dug up and the stuff that meets spec will be used for that. Some, you know, 6 7 percentage of it probably won't meet spec and will have to go somewhere else, but it will go to a 8 9 lined, certified, permitted landfill. So, you know, I think that's how to 10 11 respond. 12 SENATOR RANKIN: Last question for me. The use of the generation mix and the ebb and flow 13 of gas, coal, all these things that we've talked 14 15 about, we got the EAC report not long ago and the shift from what was cost prohibitive to which is 16 now in a favorable rate and price structure is gas. 17 18 A real quick -- real quick answer to this. 19 you do today affects and sets into play what time 20 frame and what allowance for the ebb and flow of 21 coal price and gas price and wind, that evolution, 22 et cetera --2.3 MR. LAND: Well, I mean, it's -- I 24 mean, you know, it's -- you know, again, you're 25 looking at projections when you make these

2.

2.3

decisions. You can't start a coal plant or start a natural gas plant and then change your mind, well, halfway through it I want to -- you know, natural gas has dropped a little bit, let's stop. Well, of course, with the Pee Dee plant we kind of in a way did that, but we hadn't started construction. But, I mean, a lot of reasons. Economically, the economic depression, those things. I mean, we stopped that.

But, I guess, back to your question, we try to make the best decision we can with the information we have. I mean, gas is really where most people -- gas or nuclear. There's no -- there's a coal plant under construction. There's no new coal construction I'm aware of in this country. There's one or two that are still under construction that were started in last ten years.

But, you know, the gas -- we would be building more gas but for transportation. One of the problems that we have in South Carolina, at least for the people who use it to generate electricity, is we don't have enough pipeline capacity to get the gas at an economical rate to the generator. I mean, that's why the gas plant we have now is situated up where it is in Iva, South

Carolina, because we were able to go underneath the river into the Georgia border and tap onto the gas line in Georgia, and that saved us money on -- I think once it crosses the South Carolina line the -- whatever federal regulations there allows that pipeline company to hit us again for more expense when it crosses state line. And that's a simple way of giving you a complex answer, but we were able to get it cheaper there.

Really, we've got another site up in the upstate that was purchased for a gas plant, and it's near a gas line, as I understand it, but the numbers -- the economic numbers on the generation studies we've done have never said that we need to pull the plug on that and start -- not pull the plug, but start construction. Pull the trigger, I guess, is what I meant to say -- on that, and it mainly has to do with the transmission of gas. Right now the price of gas is, you know, about as good as it can get. Looking at inflation and everything else, it's as cheap and economical as it's ever been.

SENATOR RANKIN: That's all I have.

Any of you have anything?

Cal, thank you for continuing to serve

| | 112 |
|----|---|
| 1 | and doing it with excitement. |
| | |
| 2 | MR. LAND: Well, thank you. And I do. |
| 3 | And you asked me if I had something to |
| 4 | say and then you asked me six questions, but |
| 5 | SENATOR RANKIN: Thank you for |
| 6 | answering nine of them. |
| 7 | MR. LAND: I would like to say thank |
| 8 | you, and I really do enjoy the work and I do hope |
| 9 | you all find me qualified or feel like I'm |
| 10 | qualified. |
| 11 | SENATOR RANKIN: You have done a great |
| 12 | job and it truly is a blessing to have you there. |
| 13 | MR. LAND: Thank you. I appreciate all |
| 14 | of you all. That's it. Thank you. |
| 15 | MR. RAY: Good morning or, actually |
| 16 | afternoon. |
| 17 | SENATOR RANKIN: How do you do, sir? |
| 18 | MR. RAY: I'm doing well. |
| 19 | SENATOR RANKIN: Luke Rankin. |
| 20 | MR. RAY: Dan Ray. |
| 21 | SENATOR RANKIN: Dan Ray. I'm sorry I |
| 22 | didn't meet you a couple of Thursdays ago for the |
| 23 | sports thing. What was the thing that you helped |
| 24 | out on with Chip Campsen and the others? |
| 25 | MR. RAY: The Fish, Game and Forestry |

113 Committee tour of the Santee Delta. 1 SENATOR RANKIN: I'm sorry I didn't get 2. 3 to go to that. Welcome. What we're going to do is, as 4 5 you have an idea with the written questions you've been given, we're going to put you under oath, the 6 7 court reporter will swear you and we'll start 8 asking you some questions. We have kept you here 9 too long already. We're going to do dispense with the findings of what the role is. You can read 10 11 about that. You've probably read about it. You know why you're here and let's get started. Okay? 12 13 MR. RAY: Okay. DANNY JOE RAY 14 15 being first duly sworn, testified as follows: MS. ANDERSON: Good afternoon. 16 MR. RAY: Hello. 17 18 MS. ANDERSON: Please state your name 19 and current address for the record. 20 MR. RAY: Danny Joe Ray, 735 Beach 21 Bridge Road, Pawleys Island, South Carolina. 22 MS. ANDERSON: We've received your 2.3 complete confirmation package. Are there any 24 changes or is there any additional information you might provide to your Personal Data Questionnaire 25

| | 114 |
|----|---|
| 1 | or Statement of Economic Interest? |
| 2 | MR. RAY: No. |
| 3 | MS. ANDERSON: Mr. Chairman, if we |
| 4 | could enter that into the record. |
| 5 | SENATOR RANKIN: So moved in. |
| 6 | (EXH. 9, Senate Confirmation |
| 7 | Confidential Personal Data Questionnaire, was |
| 8 | marked for identification.) |
| 9 | MS. ANDERSON: We sent you a set of |
| 10 | questions and received your responses. If we asked |
| 11 | you these questions today would your answers be the |
| 12 | same? |
| 13 | MR. RAY: Yes. |
| 14 | MS. ANDERSON: Mr. Chairman, if we |
| 15 | could enter that into the record as well. |
| 16 | SENATOR RANKIN: Okay. |
| 17 | (EXH. 10, Preliminary Questions |
| 18 | Responses of Danny Joe Ray, was marked for |
| 19 | identification.) |
| 20 | MS. ANDERSON: Mr. Ray, you are |
| 21 | currently a managing director and global head of |
| 22 | project finance for Jefferies, LLC. Can you |
| 23 | elaborate a little bit more about your job and the |
| 24 | company you work for. |
| 25 | MR. RAY: Sure. I work for Jefferies, |

which is a global investment banking firm, and my 1 2 responsibilities include project finance for all 3 large infrastructure, privatization and project finance opportunities for the company around the 4 5 globe. MS. ANDERSON: Okay. What experience 6 7 would you bring to the Santee Cooper board that would be beneficial to an energy utility? 8 9 MR. RAY: Sure. I've got over 20 years of experience financing large projects, including 10 11 utility and energy projects. So from a finance standpoint, clearly I have a lot of experience 12 evaluating opportunities, evaluating financial 13 documents, due diligence, et cetera. In addition, 14 15 I've -- over that period of time I've advised multiple Fortune 500 as well as state agency and 16 state level authority municipal government on 17 18 comparable projectss. 19 MS. ANDERSON: What is Santee Cooper's 20 current generation mix? 21 MR. RAY: The current mix is -- I can 22 give you the percentages, but the mix includes coal, nuclear, natural gas, hydro and a small 2.3 24 amount of fuel oil. 25 MS. ANDERSON: What is the relative age

116 of the base load fleet? 1 MR. RAY: I think the average age is 2. 3 around 20 years. MS. ANDERSON: What are the challenges 4 presented by this mix and the age if Congress or 5 the EPA were to pass measures for requiring a 6 7 transition to a carbon-constrained economy? MR. RAY: Well, clearly the biggest 8 9 issue is the relative youth of -- or remaining life of the assets and with additional environmental 10 11 regulations there could be constraints on being able to use those assets for their full life, to 12 their full capacity. 13 14 MS. ANDERSON: Who are Santee Cooper's 15 electricity customers? MR. RAY: The customer base is 16 approximately 2 million customers across the 17 18 state -- I think it's all 46 counties within the 19 state -- and that's a mix of retail customers --20 approximately 186,000 retail customers, and the 21 rest are wholesale customers, both industrial and 22 cooperative customers. 2.3 MS. ANDERSON: Do you have a relative 24 percentage of each group's share of Santee Cooper 25 sales?

MR. RAY: Well, on a percentage basis, 1 the 180,000 retail customers divided by 2 million, 2. 3 whatever that percentage is. I can look it up. don't have it in front of me. But obviously the 4 majority of Santee's customers are wholesale 5 customers through the Central cooperative. 6 7 MS. ANDERSON: How do you think that energy efficiency/energy conservation programs 8 9 should be paid for? MR. RAY: That's an interesting 10 11 question. Clearly there's an education component to energy savings and ultimately, you know, the 12 customer has a responsibility to be efficient, and 13 14 I think from the utility's perspective, they have a 15 responsibility to educate the customer in terms of when is the most efficient time to run the 16 dishwasher, whether it's at seven o'clock at night 17 18 or midnight, and the potential savings that a 19 customer could get from running those appliances 20 later when the cost of electricity is lower. 21 MS. ANDERSON: You stated earlier that 22 Santee Cooper -- a small amount was generated by renewables. What is your opinion regarding the 2.3 24 role of renewable energy? 25 I think renewable energy has MR. RAY:

a place within the overall framework. I do believe 1 that renewable energy has to be cost efficient and 2. has to pay for itself either through some subsidies 3 that the federal government may provide, but to --4 for a utility to provide renewable energy for the 5 sake of having a certain percentage requirement, 6 7 for me, I have to look at the cost associated with 8 that. 9 MS. ANDERSON: Do you support further 10 investment and reliance upon nuclear energy? MR. RAY: Well, obviously Santee 11 Cooper's made that bed already, but my answer is, 12 13 yes, I do. 14 MS. ANDERSON: And what are your 15 thoughts on generating electricity in South Carolina and selling it outside of the state? 16 MR. RAY: I wouldn't see that as a 17 18 I mean, clearly if you look at the amount of electricity produced today and the amount that 19 20 will come online once the nuclear plants are 21 operational there is excess capacity. 22 capacity, from a nuclear standpoint, has been paid 2.3 for or will have been paid for. So, in my opinion, 24 we should -- Santee Cooper should try to maximize the revenue potential because they have already 25

| | 119 |
|----|---|
| 1 | paid for the capital investment. |
| 2 | MS. ANDERSON: Since it's more |
| 3 | expensive to build generation today than even it |
| 4 | was just a few years ago would you favor a |
| 5 | consortium approach to generation where utilities |
| 6 | would join together to share the cost and the risk? |
| 7 | MR. RAY: I would. |
| 8 | MS. ANDERSON: There is a lot of |
| 9 | uncertainty facing South Carolina and the nation |
| 10 | regarding its utilities and how it plans 30, 40, |
| 11 | 50 years out. How do you think the Santee Cooper |
| 12 | board should approach planning in an era of |
| 13 | uncertainty? |
| 14 | MR. RAY: Well, I think that you have |
| 15 | to be fairly conservative in your planning. I |
| 16 | don't think for example, building speculative |
| 17 | energy assets without knowing how you're going to |
| 18 | pay for them is not something that I would |
| 19 | subscribe to. So from my perspective, a |
| 20 | conservative approach in terms of building capacity |
| 21 | based on a conservative estimate of growth. |
| 22 | MS. ANDERSON: How important is it for |
| 23 | Santee Cooper to deliver electricity at prices that |
| 24 | are as reasonable as possible? |
| 25 | MR. RAY: ^ it's very important. Just |

120 by way of background, most of my family come from 1 the rural part of Georgetown and Williamsburg 2. County and it's clearly important for the people I 3 know and my relatives that their power bill be as 4 5 low as possible. MS. ANDERSON: Who is responsible for 6 7 the loss if Santee Cooper loses money or makes a bad investment? 8 9 MR. RAY: Well, ultimately Santee Cooper is responsible. 10 11 MS. ANDERSON: Could the state or local government raise money or raise their taxes to 12 cover losses? 13 14 MR. RAY: I'm not sure how legally -- I 15 guess if they wanted to give money to Santee Cooper to lower their cost they could, but ultimately my 16 assumption is that Santee Cooper is responsible for 17 18 their own costs. 19 MS. ANDERSON: If Santee Cooper, say, 20 for example, lost money on its electric side could 21 they raise rates on its water side to cover the 22 cost? 2.3 MR. RAY: I don't know legally within 24 the framework of the governance whether they could 25 or couldn't. I don't know.

```
121
1
                 MS. ANDERSON:
                                 Okay. Do you have any
     direct or indirect business relationships with
2.
3
     Santee Cooper or any of its wholesale power
     customers?
4
                 MR. RAY:
5
                            No.
                 MS. ANDERSON: Okay. You mentioned
6
7
     before you have done some work with some
     utilities --
8
9
                 MR. RAY:
                            Sure.
                 MS. ANDERSON: -- and large scale
10
11
     businesses. How would you try to protect -- make
     sure there are no conflicts of interest?
12
                 MR. RAY:
13
                            Sure. You're correct.
                                                     In my
     job I do see utility opportunities from time to
14
15
     time, and I would -- to the extent there was a
     potential -- even a potential for a conflict, I
16
     would disclose that relationship and I would
17
18
     abstain from any actions relating to that.
19
                 MS. ANDERSON: But at this time you
20
     don't foresee any conflict that you're aware of?
21
                 MR. RAY:
                            I don't.
                                      I don't.
22
                 MS. ANDERSON: Can you describe the
2.3
     role that you believe can be played by public
24
     power?
                            Sure. I think it's an
25
                 MR. RAY:
```

important element of providing low-cost, efficient 1 power generation. Clearly Santee Cooper is in an 2. 3 enviable position of having the resources and the credit profile to provide low-cost and efficient 4 power generation to the citizens of South Carolina. 5 MS. ANDERSON: Should Santee Cooper 6 7 play a role in economic development? 8 MR. RAY: Yes. 9 MS. ANDERSON: How would you envision that role and any constraints? 10 11 MR. RAY: Sure. I don't have a lot of information in terms of what the current policies 12 are in terms of what their strategy or budget is 13 related to economic development, but clearly it's 14 15 important for South Carolina to continue to grow and we need to attract businesses that provide jobs 16 and to the extent Santee Cooper can play a role in 17 18 that, I think they should. 19 MS. ANDERSON: What do you think of 20 Santee Cooper as a lessor? What kind of 21 relationship should they be to the public? Should 22 they keep the facilities open to the public -- to 2.3 the diverse public? 24 MR. RAY: I'm not certain what type of facilities you're talking about. Is this related 25

```
123
     to economic development or --
1
                 MS. ANDERSON:
                                 No, sir.
2
3
                 MR. RAY: I'm sorry. Can you ask you
     me again?
4
5
                 MS. ANDERSON: I'm trying to think of a
6
     way.
7
                 Santee Cooper as a lesser, how do you
     think they should play in a role in a relationship
8
9
     with the public?
                            I'm not familiar with --
10
                 MR. RAY:
11
                 MS. ANDERSON: Let's say, for example,
12
     you have lake property.
13
                 MR. RAY: Okay.
14
                 MS. ANDERSON: Should it be maybe used
15
     for commercialization if it's something that's
     currently utilized for public recreation?
16
     would be some factors that you would consider with
17
18
     that?
19
                 MR. RAY: Not knowing any of the facts
20
     around your question, I think just generally -- I
21
     think it's important to preserve the lake resources
22
     as they are today. Now, whether Santee Cooper can
2.3
     benefit economically from either leasing assets or
     selling assets -- I guess leasing is your question.
24
25
     I'd have to look at it. I would not be opposed to
```

124 it, but I think what's important from -- at least 1 in my background, maintaining the nature of the 2. lakes and the overall sporting, fishing, 3 conservation objectives are important. 4 5 MS. ANDERSON: Can you provide an overview of your view of the role of director on 6 7 the Santee Cooper board? The role that I see as 8 MR. RAY: Sure. 9 a board member is to provide guidance to the executive staff and then to participate in the 10 11 strategic discussions around budgeting, the mission and the strategic objectives of Santee Cooper as a 12 whole, and then to hold the executive team 13 accountable as they operate Santee Cooper. 14 15 MS. ANDERSON: Aside from annual audits 16 by outside firms, what other types of independent expertise should a member utilize in his decision 17 18 making? 19 MR. RAY: I assume that there should be 20 some external consulting quidance related to any 21 rate discussion or increases in rate. I would want 22 to see some additional outside consultants or some 2.3 studies that discuss rates as opposed to a 24 unilateral decision on increasing rates. 25 MS. ANDERSON: What are some

| | 125 |
|----|---|
| 1 | considerations for the best interest of the Public |
| 2 | Service Authority? |
| 3 | MR. RAY: Well, as a board member, I |
| 4 | assume? |
| 5 | MS. ANDERSON: Yes. |
| 6 | MR. RAY: Okay. So clearly the board |
| 7 | and board of directors have a fiduciary duty to the |
| 8 | company and to the citizens of South Carolina and |
| 9 | to the bondholders. |
| 10 | MS. ANDERSON: And you've already |
| 11 | briefly covered this, but if you can elaborate. |
| 12 | What has been your experience with interpreting |
| 13 | financial documents? |
| 14 | MR. RAY: Sure. I've got over 20 years |
| 15 | of experience not only interpreting financial |
| 16 | documents, but underwriting and evaluating and due |
| 17 | diligence of all types of financial documents, |
| 18 | whether it be audited, unaudited, forecast, |
| 19 | projected, et cetera. |
| 20 | MS. ANDERSON: Are you familiar with |
| 21 | any legal opinions or orders or agency decisions |
| 22 | impacting Santee Cooper? |
| 23 | MR. RAY: I missed the last part of the |
| 24 | question. |
| 25 | MC ANDEDCON: Any agency degicions or |

| | 126 |
|----|---|
| 1 | legal opinions or orders that impact Santee Cooper? |
| 2 | MR. RAY: Not specifically, no. |
| 3 | MS. ANDERSON: Does your affiliation |
| 4 | with any professional, civic, charitable or other |
| 5 | similar organization present a conflict within your |
| 6 | appointment? |
| 7 | MR. RAY: No. |
| 8 | MS. ANDERSON: Would you have any |
| 9 | conflicts of interest financially that could result |
| 10 | from your appointment? |
| 11 | MR. RAY: No. |
| 12 | MS. ANDERSON: What would you do if a |
| 13 | conflict arose? |
| 14 | MR. RAY: I'd disclose the conflict and |
| 15 | then, obviously, I would what's the word I'm |
| 16 | looking for? |
| 17 | SENATOR RANKIN: Recuse. |
| 18 | MR. RAY: I would recuse myself. Thank |
| 19 | you very much. |
| 20 | MS. ANDERSON: And I've already asked |
| 21 | this too, we've covered this, but one more time for |
| 22 | the record. Do you have any holdings in any |
| 23 | electrical utilities or other entities that may be |
| 24 | impacted by the decisions of the Santee Cooper |
| 25 | board? |

1 MR. RAY: I do not. MS. ANDERSON: Do you understand the 2 obligations and responsibilities of the position? 3 MR. RAY: I do. 4 5 MS. ANDERSON: What duty of loyalty or duty of care would you owe to Santee Cooper? 6 MR. RAY: 7 Sure. I just want to make sure I get this -- the duty of loyalty requires 8 9 that the board member exercise good fiduciary judgment on behalf of the stockholders, which in 10 11 the case of Santee Cooper are the people of South Carolina, the bondholders and its customers. 12 13 MS. ANDERSON: What have you done in preparation for serving as a member of the board? 14 15 MR. RAY: I've looked at all the public 16 disclosure that Santee Cooper has on its website, the audited financials, including the ones that 17 18 were released yesterday for 2013. I've looked at 19 the bond disclosure documents from their public 20 offering last year. I've looked at the SCANA 21 website for disclosure on progress related to the 22 nuclear power plant construction, and I've had a 2.3 two-hour meeting with senior management to discuss 24 current events related to the operation of the 25 facility.

128 1 MS. ANDERSON: Have you had any conversations with the governor regarding how 2. 3 Santee Cooper should be run or what direction it should take? 4 5 MR. RAY: No. I've actually never met the governor. 6 7 MS. ANDERSON: Do you have a brief statement concerning your desire to serve on the 8 9 board you'd like to make? MR. RAY: Sure. I was born in 10 11 Georgetown. I grew up in Georgetown County. went and served in the Army for ten years and then 12 13 served in an investment banking role for the last 20 years, so I left the state for 25 years. I 14 15 moved back in 2006 and so as I wind down my professional corporate career I feel an obligation 16 to sort of give back to the state of South Carolina 17 18 and to me this is an opportunity to do that and I'm 19 excited about the opportunity. 20 MS. ANDERSON: Thank you, Mr. Ray. 21 have no further questions. 22 Mr. Chairman. 2.3 SENATOR RANKIN: Thank you. Again, 24 just a few -- do you go by Danny or Dan? 25 MR. RAY: Dan. My mother calls me

| | 129 |
|----|---|
| 1 | Danny. |
| 2 | SENATOR RANKIN: Okay. Well, I won't. |
| 3 | Your folks live in Georgetown? |
| 4 | MR. RAY: They do. My dad passed away |
| 5 | last year, but my mom lives in Georgetown. |
| 6 | SENATOR RANKIN: Well, you are a credit |
| 7 | to I guess Furman would try to claim you, but |
| 8 | Winthrop really has the |
| 9 | MR. RAY: You would be correct, yes. |
| 10 | SENATOR RANKIN: real claim on you. |
| 11 | I've obviously looked through your |
| 12 | resumé and, as with each of the appointees and |
| 13 | nominees, you've got a unique offering for this |
| 14 | board. I don't know that there's ever been someone |
| 15 | so steeped in finance that has served on this |
| 16 | board, at least in my days of screening. Now, back |
| 17 | in the political days when it was just an |
| 18 | appointment and a friend of the Gov.'s there may be |
| 19 | somebody else, but I don't know. |
| 20 | You all let me know if you know of any |
| 21 | in your history at Santee Cooper. Point that |
| 22 | person out. I'd like to know it. |
| 23 | But Jefferies and Leucadia, that's |
| 24 | whose corporate employers' hat you work for? |
| 25 | MR RAY: That's correct So Jefferies |

necessary to be an active board member, and I'm confident that I can do that.

2.3

SENATOR RANKIN: And your work, is it from your home or do you have to --

MR. RAY: No. I do have an office in a cottage in my backyard, but I work in New York three days a week or I'm traveling somewhere else normally three to four days a week, but I'm usually back in South Carolina on Fridays.

SENATOR RANKIN: Okay. In the corporate world and investment world, banking world, et cetera, that you serve in and work in, have you ever heard of Santee Cooper other than paying a bill?

MR. RAY: Well, the answer is yes.

Even though I'm not in a municipal securities group and I'm not a municipal financial professional, which is a defined term in our world, I am fully aware of Santee Cooper and have -- since being asked to sit on the board I have spent quite a bit of time looking at Santee Cooper's outstanding public debt and where it trades and so I'm pretty familiar with it not only from being asked to serve, but also just generally. It's a fairly high profile name in the corporate -- in the municipal

| | 132 |
|----|---|
| 1 | debt market. |
| 2 | SENATOR RANKIN: And the credit |
| 3 | agency's review of Santee Cooper's debt |
| 4 | MR. RAY: Yes. |
| 5 | SENATOR RANKIN: do you think you'll |
| 6 | be able to get that rating improved? |
| 7 | MR. RAY: Yes. Specifically on the |
| 8 | Moody's rating, I think I wasn't at the table, |
| 9 | so I don't know the specifics around why it was |
| 10 | downgraded. I did read the rating report. It |
| 11 | seems to me some of their concerns have been |
| 12 | addressed by the Central contract and also the sell |
| 13 | down of 5 percent of the capacity of the nuclear |
| 14 | facility. I think I've been sitting on the |
| 15 | other side of that table for 20 years talking about |
| 16 | ratings with the rating agencies. I'm pretty |
| 17 | confident I can add some value in the discussion |
| 18 | around how to make the argument for an upgrade with |
| 19 | Moody's. |
| 20 | SENATOR RANKIN: Very good. |
| 21 | You are a giver of time and land. You |
| 22 | have contributed property in Georgetown for |
| 23 | conservation management; is that correct? |
| 24 | MR. RAY: That's correct. I own a |
| 25 | 3,500 acre plantation on the North Santee River and |

I have a conservation easement on that property 1 with Ducks Unlimited and I sit on the national 2 3 Ducks Unlimited board. It's called Wetlands America Trust. 4 5 SENATOR RANKIN: Are you a stranger to politics? 6 7 MR. RAY: Yes, sir. SENATOR RANKIN: Tell us, if you will, 8 9 your invitation to the table today. So a very good friend of mine 10 MR. RAY: 11 and neighbor is a law partner of Leighton Lord's and unbeknownst to me made a recommendation to 12 13 Leighton that he talk to me, and Leighton called me, and I agreed to pursue it. It was as simple as 14 15 that. 16 SENATOR RANKIN: That's a pretty clean; not that any other introduction is less. But your 17 18 role will be -- the term, if you are successfully 19 appointed, will have you going through -- is it 20 Yeah. So you're succeeding David Springs' 2015? 21 position. At the end of -- what, a year and three 22 months and a few days. What's your hope to have accomplished at the end of that short term? 2.3 24 MR. RAY: I wasn't aware of that, so 25 I've got a lot of work to do in a very short period

of time. So is your question: What are sort of my 1 first goals as a bored member? 2. 3 SENATOR RANKIN: In looking back, as hopefully you'll be back for another term, what do 4 you hope you can point to as your accomplishments? 5 MR. RAY: Well, I think, for me, 6 7 intellectual curiosity and just wanting to make sure I understand the assets of Santee Cooper, the 8 9 generation assets, and how they function within the overall framework of the mix of different power 10 11 sources. Also I think, just in a realtime 12 short-term basis, getting up to speed on the 13 upcoming bond issues that Santee Cooper has this 14

short-term basis, getting up to speed on the upcoming bond issues that Santee Cooper has this year and just making sure that from an overall cost-to-capital standpoint that Santee Cooper's getting the best execution they can on their debt that will be sold later this year, and part of that will be discussions around ratings. And I understand a lot of that is operational and, you know, my role will be to sort of assist the CEO and CFO as they begin that process.

24

25

SENATOR RANKIN: And last I want to go back to the land thing, and then I'm done. We talked off the record earlier. You were gracious

| | 136 |
|----|---|
| 1 | All right. Thank you very much. |
| 2 | SENATOR RANKIN: Welcome, Mr. Wolfe. |
| 3 | We're about to get started here. You've sat in one |
| 4 | of these before a time or two, have you not? |
| 5 | MR. WOLFE: Yes, over the years. I |
| 6 | worked for Mid Carolina Cooperative and I've sat in |
| 7 | on some of these, right. |
| 8 | SENATOR RANKIN: You know exactly |
| 9 | what's going to happen. |
| 10 | MR. WOLFE: I guess. |
| 11 | SENATOR RANKIN: Would you like a stiff |
| 12 | drink or novocaine? |
| 13 | MR. WOLFE: No. |
| 14 | SENATOR RANKIN: A shot or a shot. |
| 15 | MR. WOLFE: Yeah. |
| 16 | SENATOR RANKIN: All right. She's |
| 17 | going to administer the oath, the court reporter |
| 18 | over here, and then we'll start with some questions |
| 19 | and move on. |
| 20 | JACK F. WOLFE, JR. |
| 21 | being first duly sworn, testified as follows: |
| 22 | SENATOR RANKIN: All right. Welcome. |
| 23 | MR. WOLFE: Thank you. |
| 24 | MS. ANDERSON: Good afternoon. Can you |
| 25 | please state your full name and current address for |

| | 137 |
|----|---|
| 1 | the record. |
| 2 | MR. WOLFE: Jack F. Wolfe, Jr., 2012 |
| 3 | Johnson Arena Road, Chapin, South Carolina. |
| 4 | MS. ANDERSON: We've received your |
| 5 | |
| | complete confirmation package. Are there any |
| 6 | changes or additional information you'd like to |
| 7 | provide to your Personal Data Questionnaire or |
| 8 | Statement of Economic Interest? |
| 9 | MR. WOLFE: No. |
| 10 | MS. ANDERSON: Mr. Chairman, I'd like |
| 11 | to enter that into the record, please. |
| 12 | SENATOR RANKIN: Okay. No objection. |
| 13 | (EXH. 11, Senate Confirmation |
| 14 | Confidential Personal Data Questionnaire, was |
| 15 | marked for identification.) |
| 16 | MS. ANDERSON: We sent you a set of |
| 17 | questions and received your response. |
| 18 | MR. WOLFE: Yes. |
| 19 | MS. ANDERSON: If we asked you those |
| 20 | questions today would your answers be the same? |
| 21 | MR. WOLFE: Yes. |
| 22 | MS. ANDERSON: Mr. Chairman, if we |
| 23 | could enter those into the record as well. |
| 24 | SENATOR RANKIN: No objection on that. |
| 25 | (EXH. 12, Preliminary Questions |

138 Responses of Jack F. Wolfe, Jr., was marked for 1 2 identification.) 3 MS. ANDERSON: What experience would you bring to the Santee Cooper board that would be 4 beneficial to an energy utility board? 5 MR. WOLFE: Well, I've been involved in 6 7 electric utilities 40 years. I worked at Mid Carolina Electric Cooperative for 40 years, 8 9 38 years as the CEO and general manager. I worked on our national association which is an association 10 11 of electric cooperatives across the country, about 900 cooperatives. I did a lot of work in various 12 ways with legislation helping the cooperatives get 13 those passed. I worked the statewide association. 14 15 Many of you may be aware of that. I served on the board there. I also worked with Central Power 16 Cooperative for 35 years and served on the board 17 18 there. So I have a very broad background in the 19 electric utility industry which I think gives me 20 experience and knowledge -- institutional knowledge 21 to serve on the Santee Cooper board. 22 MS. ANDERSON: What is Santee Cooper's 23

current generation mix?

MR. WOLFE: There's about 58 percent coal, 30 percent natural gas, 10 percent nuclear

24

25

| | 139 |
|----|---|
| 1 | and 2 percent green power. |
| 2 | MS. ANDERSON: What is the relative age |
| 3 | of the base load units? |
| 4 | MR. WOLFE: Base load units? |
| 5 | MS. ANDERSON: Yes, sir. |
| 6 | MR. WOLFE: I don't know the exact age |
| 7 | of those units, but I know they're getting old. |
| 8 | They're taking one out of service now, which is |
| 9 | Granger down in Conway, because of a million |
| 10 | different reasons. And then they've got the |
| 11 | Jefferies Unit, which is an older unit. They're |
| 12 | cross units, so they're starting to getting older. |
| 13 | MS. ANDERSON: What are some of the |
| 14 | challenges presented by the age? |
| 15 | MR. WOLFE: Well, naturally you have to |
| 16 | replace that generation with new generation and the |
| 17 | cost of new generation today has become |
| 18 | significant. Not knowing what type of generation |
| 19 | to build because of all the EPA rules and |
| 20 | regulations going on, those are major issues that |
| 21 | we'll be facing down the road. |
| 22 | MS. ANDERSON: Who are Santee Cooper's |
| 23 | electricity customers? |
| 24 | MR. WOLFE: Santee Cooper serves about, |
| 25 | T believe 165 000 customers along the Grand |

Strand, Berkeley County -- in Conway, Berkeley and 1 Georgetown Counties. They also serve about 22 2. large industries, two cities, and the majority of 3 their service goes to electric cooperatives, which 4 5 is about 60 percent. MS. ANDERSON: How do you think energy 6 7 efficiency programs should be paid for? Well, in any type of 8 MR. WOLFE: 9 program you have you always have costs. You make sure that you don't subsidize one set of customers 10 11 from another set of customers. So anytime you have energy efficiency programs you have to look at what 12 the savings are to the whole. If you have energy 13 efficiency then you can reduce the need for 14 15 additional generation that you otherwise would have to have if you didn't have it. So those factors 16 have to be taken into consideration. So there are 17 18 a lot of ways to use that money to help pay for the 19 upfront costs of energy efficiency. 20 MS. ANDERSON: Approximately what 21 percent of Santee Cooper's energy needs can now be 22 met by renewable energy? 2.3 MR. WOLFE: There's about 2 percent 24 now. 25 MS. ANDERSON: What is your opinion

regarding the role of renewable energy in Santee 1 2 Cooper's energy needs? 3 MR. WOLFE: I think renewable energy always needs to be looked at and studied and make 4 sure it works, make sure it's cost efficient. 5 They've got a study going on now with a solar unit 6 7 that's being worked on and looking at how that integrates into a distribution system, but you also 8 9 have to look at the total cost because what the customer pays should be fair. 10 11 MS. ANDERSON: Given the fact that it is more expensive to build generation today than it 12 has been in the past, would you favor a consortium 13 approach to generation? 14 15 MR. WOLFE: I like the idea of a 16 consortium approach because it spreads the risk. Risk is always a big factor when you spend, you 17 18 know, a billion dollars on a generation plant. 19 if you can spread the risk and not take it all on 20 yourself, I think it's good. 21 MS. ANDERSON: What are your thoughts 22 on generating electricity in South Carolina and selling it outside the state? 2.3 24 MR. WOLFE: Well, I think that 25 generating in the state is good for what it brings

2.

to the state, the jobs and all that, but selling it outside of the state, I think that you have to look at -- if you've got excess capacity and you need to sell some outside of the state so you can bring revenue in to lower the cost to the customers who are paying for the whole plant anyway, I think that's a challenge you have. So I think if you're not, then you should sell it in the state. MS. ANDERSON: Do you support further investment in a reliance upon nuclear energy? MR. WOLFE: Well, that all depends on the mix because you have base load units, and nuclear is a base load unit because you want it to run all the time because when you build a nuclear plant you put all your money into the cost of the The fuel is low-cost to operate, so you want to run it all the time as a base load unit, a nuclear plant, but it costs a lot of money. Then you have other plants which are

Then you have other plants which are peaking units, which are gas units, for example, which you can turn on and off fairly easily. So those units, you want a mix of those as well.

So there needs to be a good mix of fuels to operate an efficient utility depending on their load characteristics.

| | 143 |
|----|---|
| 1 | MS. ANDERSON: There's a lot of |
| 2 | uncertainty for electric utilities in the state and |
| 3 | nationally. How should a board plan long-term in |
| 4 | the air of uncertainty? |
| 5 | MR. WOLFE: That's always a challenge. |
| 6 | You get a dartboard and no. I'm just kidding. |
| 7 | No. No. |
| 8 | It's very difficult, particularly in |
| 9 | this age when we don't know what the rules are. |
| 10 | Utilities have a real challenge in not knowing what |
| 11 | the rules are because they're constantly changing. |
| 12 | Certainty would be great, but not knowing that, you |
| 13 | have to make your best guess. You get the experts |
| 14 | who can help you with that who have a lot broader |
| 15 | knowledge of what's going on out there so that you |
| 16 | make good, sound decisions on what type of |
| 17 | generation to build or not to build. |
| 18 | MS. ANDERSON: How important is it for |
| 19 | Santee Cooper to deliver electricity at prices that |
| 20 | are as reasonable as possible? |
| 21 | MR. WOLFE: Very important because |
| 22 | they're not-for-profit and that's one of their |
| 23 | goals, is to deliver low-cost electricity. |
| 24 | MS. ANDERSON: Who is responsible for a |
| 25 | loss if Santee Cooper makes a bad investment or |

144 1 loses money? MR. WOLFE: Well, ultimately the 2. customers of Santee Cooper will pay for the loss. 3 MS. ANDERSON: Can the state or local 4 5 government raise taxes in order to pay for Santee Cooper's debt? 6 7 MR. WOLFE: No, I don't think so. They only have -- they're based on the revenue they 8 9 generate from the sale of electricity and other things like water. 10 11 MS. ANDERSON: If they lost water -- if they lost money, revenue, on the electricity side 12 could they raise the rates in the water to make up 13 for it? 14 15 MR. WOLFE: I wouldn't think so. 16 want to base all that on the cost to service, cost of water, cost of electricity. 17 18 MS. ANDERSON: Do you have any direct 19 or indirect business relationships with Santee 20 Cooper or any of its wholesale power customers? 21 MR. WOLFE: I know a lot of co-ops 22 because I worked one for 40 years. So if they're 2.3 considered a wholesale power customer, I know a lot 24 of them. 25 MS. ANDERSON: Aside from your personal

145 knowledge when you were employed by the co-op, do 1 you know --2. 3 MR. WOLFE: No. MS. ANDERSON: Describe the role you 4 5 believe can be played by public power. MR. WOLFE: Well, public power is a 6 7 valuable asset and Santee Cooper is a very valuable asset for the state and it can play many roles. 8 Tt. 9 was created to be able to do hydroelectricity, improve navigation along the Cooper and Santee 10 11 Rivers, and to improve the economy and help the citizens of that area. It's been expanded now to 12 provide electricity all over the state with its 13 contracts with electric cooperatives. So Santee 14 15 Cooper is the largest generator of electricity in 16 the state. MS. ANDERSON: What role, if any, do 17 18 you think Santee Cooper should play in economic 19 development? 20 MR. WOLFE: I think they should play a 21 role of attracting, finding good customers and 22 bring them into our state co-ops. Santee Cooper 2.3 entered into Palmetto Economic Development, which 24 has created a network with all the counties and

their economic development people to help them

| | 146 |
|----|---|
| 1 | bring industry into the state, and done a good job |
| 2 | of that. |
| 3 | MS. ANDERSON: Can you provide an |
| 4 | overview of the role of a director of a Public |
| 5 | Service Authority board? |
| 6 | MR. WOLFE: On the public service |
| 7 | director? |
| 8 | MS. ANDERSON: Yes, sir. What is your |
| 9 | view of the role that a board member would play. |
| 10 | MR. WOLFE: Okay. Well, they've got to |
| 11 | look at the global goals of Santee Cooper to make |
| 12 | sure they fit within the mission that Santee Cooper |
| 13 | was created and the laws that exist and they've got |
| 14 | to make sure that the policies that they adopt are |
| 15 | carried out by the manager. |
| 16 | MS. ANDERSON: And how does that differ |
| 17 | from executive staff? |
| 18 | MR. WOLFE: How is |
| 19 | MS. ANDERSON: How does the role of a |
| 20 | board member differ from |
| 21 | MR. WOLFE: The executive staff should |
| 22 | be involved in the day-to-day activities of |
| 23 | managing the organization, the board should not be. |
| 24 | MS. ANDERSON: Aside from annual audits |
| 25 | by outside firms, what other type of independent |

| | 147 |
|----|---|
| 1 | expertise should a member of the board utilize in |
| 2 | decision making? |
| 3 | MR. WOLFE: Well, the board should make |
| 4 | sure that, for example, rates are done by an |
| 5 | outside independent consultant to make sure that, |
| 6 | based on a cost of service study, that the costs |
| 7 | are shared equally between classes and paid fairly. |
| 8 | In addition to that, you need to be sure that wage |
| 9 | and salary studies are done, particularly for the |
| 10 | CEO, and keep his salary in with what the market |
| 11 | bears. |
| 12 | MS. ANDERSON: What are some |
| 13 | considerations for the best interest of the Public |
| 14 | Service Authority? |
| 15 | MR. WOLFE: Considerations for the best |
| 16 | interest? |
| 17 | MS. ANDERSON: Yes, sir. |
| 18 | MR. WOLFE: What does that mean, you |
| 19 | mean? |
| 20 | MS. ANDERSON: Yes. What factors, what |
| 21 | would you consider in trying to determine what's in |
| 22 | the best interest of Santee Cooper? |
| 23 | MR. WOLFE: Well, I think you have to |
| 24 | make sure that it benefits when I say Santee |
| 25 | Cooper I'm always talking about its customers, its |

bondholders, its stakeholders -- and to make sure 1 2 that those things are done fairly and done in a way that a prudent man would make a decision. 3 MS. ANDERSON: What has been your 4 experience with interpreting financial documents? 5 MR. WOLFE: Well, I was CEO for 6 7 38 years at Mid Carolina Electric Cooperative, and that was the background I came from, was the 8 9 accounting background, so I am very involved in the planning of financial documents. 10 11 MS. ANDERSON: Are you familiar with any legal opinions or orders of agencies or agency 12 decisions impacting Santee Cooper? 13 MR. WOLFE: Well, I know that EPA 14 15 ruling on coal and CO2 concerns will have major impacts down the road possibly on Santee Cooper. 16 17 Those legal decisions may be challenged in court. 18 I'm not sure what Santee Cooper's role will be yet, 19 but all of those will be major, major impacts on 20 Santee Cooper. 21 MS. ANDERSON: Does your affiliation 22 with any professional, civic, charitable or other 23 similar organizations present a conflict with your 24 appointment? 25 MR. WOLFE: No.

| | 149 |
|----|---|
| 1 | MS. ANDERSON: Would you have any |
| 2 | financial conflicts of interest that could result |
| 3 | from your appointment? |
| 4 | MR. WOLFE: No. |
| 5 | MS. ANDERSON: What would you do if a |
| 6 | conflict arose? |
| 7 | MR. WOLFE: If there was a conflict, I |
| 8 | was aware of it, and a matter before the board was |
| 9 | coming up, I would inform both management and the |
| 10 | board of whatever that conflict is before it was |
| 11 | discussed and I would recuse myself and leave the |
| 12 | room. |
| 13 | MS. ANDERSON: Do you have any holdings |
| 14 | in any electrical utilities or other entities that |
| 15 | may be impacted by decisions of the Santee Cooper |
| 16 | board? |
| 17 | MR. WOLFE: No. |
| 18 | MS. ANDERSON: Do you understand the |
| 19 | obligations and responsibilities of the position? |
| 20 | MR. WOLFE: Yes, I do. |
| 21 | MS. ANDERSON: What duty of loyalty or |
| 22 | duty of care would you owe to Santee Cooper? |
| 23 | MR. WOLFE: Well, I would have a |
| 24 | fiduciary responsibility to ensure that the |
| 25 | decisions that I make are done in the best interest |

of the customers, the people of South Carolina and 1 everyone Santee Cooper serves. 2. 3 MS. ANDERSON: What have you done in preparation for serving as a member of the board? 4 I've looked over some of 5 MR. WOLFE: the information that I received. I've had a lot --6 7 serving on Central's board, a lot of information that Santee Cooper had Cental had because they're 8 9 60 percent of -- they pay 60 percent of the bills down there. So a lot of that I had known over the 10 11 years and I've had a long historical background in 12 that regard. 13 MS. ANDERSON: Have you had any conversations with the governor regarding Santee 14 15 Cooper and how it should be run or what direction it should take? 16 MR. WOLFE: I have filled out the 17 18 information, you know, and submitted it. I have 19 not directly had a conversation with her, no. 20 MS. ANDERSON: Do you have a brief 21 statement concerning your desire to serve on the 22 board you'd like to make to the subcommittee? 2.3 MR. WOLFE: Well, I have spent my life 24 in the electric utility industry. I think I've got 25 a lot of knowledge. I've retired. I thought I'd

get out of it and let my wife be my supervisor of 1 2 my life, but I found out that didn't work. she's my supervisor. This will give me a great 3 opportunity to go out and use some of the knowledge 4 5 that I've gained. I look forward to the opportunity. 6 7 MS. ANDERSON: Thank you. I have no further questions. 8 9 SENATOR RANKIN: Mr. Wolfe, you are highly credentialed and you are ready to go. 10 11 There's no learning curve ahead of you at all. I'm looking forward to it. 12 MR. WOLFE: 13 SENATOR RANKIN: A couple of brief questions here. In looking through your resumé, 14 15 Mid Carolina -- I mean, I don't know your customer base as compared to Horry Electric. Are you 16 17 bigger? 18 MR. WOLFE: Horry is probably just a 19 little bit bigger than Mid Carolina, about 55,000. 20 I think it was about like that. Horry may be up 21 They grew up faster than us because of around 60. the beach, but we serve in five counties, Aiken, 22 2.3 Lexington, Saluda, Richland Counties up around Lake 24 Murray on both sides. 25 SENATOR RANKIN: So you've got water,

152 you've got recreation, you've got industrial --1 MR. WOLFE: Oh, yeah. 2. SENATOR RANKIN: -- all that stuff. 3 MR. WOLFE: Yeah. I live on Lake 4 5 Murray, so -- it's all in there. SENATOR RANKIN: National Rural 6 7 Electric Cooperative Association. 8 MR. WOLFE: Yes. 9 SENATOR RANKIN: In reading about that -- were you involved with the financial side 10 11 of that, the pension side of that, the benefit side 12 of that, or was that just --MR. WOLFE: Well, I was involved a 13 little bit with everything. I was the president of 14 15 the board and I was the secretary-treasure. All of 16 you saw that. But I was -- they have a -- there are 900 cooperatives across this country and that 17 18 association provides the employee benefit programs 19 for the electric cooperatives. It's a ten billion 20 dollar trust fund that's set up. I served on 21 the -- as chairman of the IFFS committee before I 22 became president and they actually have a fiduciary 2.3 responsibility to RSMA and all of those agencies. 24 So we had a lot of work to do to make sure that 25 everything was done in compliance with that law.

| 1 | So I've also we also provided | | | |
|----|---|--|--|--|
| 2 | training for boards, how to go about being a board | | | |
| 3 | member in the proper way for all electric | | | |
| 4 | cooperatives, how to train employees. So it's a | | | |
| 5 | vast area that they cover. They do all of the | | | |
| 6 | lobbying in Washington for electric cooperatives. | | | |
| 7 | They also lobby the various agencies that oversee | | | |
| 8 | electric cooperatives throughout the country. | | | |
| 9 | SENATOR RANKIN: Very good. Your | | | |
| 10 | MR. WOLFE: I also was involved with | | | |
| 11 | CFC, which was the bank about a \$20 million bank | | | |
| 12 | which loans money to electric cooperatives to do | | | |
| 13 | their to build and construct their facilities. | | | |
| 14 | And it's been very successful and that was a great | | | |
| 15 | experience. About three years on that board. | | | |
| 16 | SENATOR RANKIN: In your role as the | | | |
| 17 | customer for effectively your adult life, as the | | | |
| 18 | Mid Carolina employee and president up until | | | |
| 19 | January of last year you have a unique knowledge of | | | |
| 20 | Santee Cooper. | | | |
| 21 | MR. WOLFE: Yes. | | | |
| 22 | SENATOR RANKIN: Fair to say? | | | |
| 23 | MR. WOLFE: Yes. | | | |
| 24 | SENATOR RANKIN: Can you describe what | | | |
| 25 | you see as the relationship presently with Santee | | | |

154 1 Cooper and Central? MR. WOLFE: Well, I think it's great 2. They worked out many differences in 3 right now. this new coordination agreement that was signed 4 just last year. I had the privilege of being down 5 at that signing and everything. That's a great 6 7 document. It's working very well. It's brought the two entities closer than they have been since 8 9 I've been there -- I've been around the program. So I think it's doing real good now and everything 10 is well. It's a -- what is it, a 50-year contract? 11 So it's tied down now. 12 SENATOR RANKIN: As Cal Land said 13 before you, the two can't live asunder so you all 14 15 need to get it together and extend it. 16 MR. WOLFE: Get it together, that's That's good. Leave it to Cal to come up 17 18 with -- that's right. SENATOR RANKIN: Well, I'm paraphrasing 19 20 that or adding an eloquence to it perhaps. 21 But the mission now or the challenges 22 now that you've got the agreement -- the 2.3 coordinating agreement put to bed, what do you see 24 ahead of you that --25 MR. WOLFE: I see the challenges being

| | 155 |
|----|---|
| 1 | not between the two entities because I think what's |
| 2 | good for Central is also good for Santee Cooper and |
| 3 | vice versa. So you need to look together down the |
| 4 | road. And so the major challenge is going to be |
| 5 | regulations, environmental concerns, the cost to |
| 6 | build new generation because it's becoming very |
| 7 | expensive to build new generation, the cost of |
| 8 | electricity to the customers because electricity is |
| 9 | vital, as we all know. So those are the major |
| 10 | concerns I see coming down the road. |
| 11 | Employees. A lot of retirements I |
| 12 | understand are coming up at Santee Cooper like it |
| 13 | is in the co-op world. You know, 50 percent, |
| 14 | possibly, of the CEOs that I knew when I retired |
| 15 | will be retired at the co-ops in about five years. |
| 16 | So it's major change coming with all the |
| 17 | retirements and replacing those retirements. So |
| 18 | the same thing is true for Santee Cooper. |
| 19 | SENATOR RANKIN: The other |
| 20 | 40 percent you said Santee or Central pays |
| 21 | about 60 percent of the bills down there. |
| 22 | MR. WOLFE: Yes. |
| 23 | SENATOR RANKIN: The other |
| 24 | 40 percent speak to the industrial customers |
| 25 | MR. WOLFE: Sure. |

| | 156 |
|-----|---|
| 1 | SENATOR RANKIN: or the others and |
| 2 | make them feel comfortable about your role in |
| 3 | looking out for them as well. |
| 4 | MR. WOLFE: Sure. Absolutely. See, |
| 5 | when I become a member of the Santee Cooper board I |
| 6 | have a fiduciary responsibility to all customers, |
| 7 | including the industrial customers, and so my role |
| 8 | will be to make sure that the rates are fair, and |
| 9 | that's done through cost of service studies and |
| 10 | making sure that they're fair and equitable for |
| 11 | all. |
| 12 | SENATOR RANKIN: Very good. Thank you. |
| 13 | Anything? |
| 14 | All right. Thank you, Mr. Wolfe. |
| 15 | MR. WOLFE: Well, good. I appreciate |
| 16 | this opportunity and I look forward to serving at |
| 17 | Santee Cooper. |
| 18 | SENATOR RANKIN: A long time in coming. |
| 19 | Welcome. |
| 20 | MR. WOLFE: All right. Thank you very |
| 21 | much. |
| 22 | SENATOR RANKIN: Thank you. |
| 23 | We're going to now get to what I I |
| 24 | don't know that we've done it before, but I think |
| 2 5 | we need to formally yets on whether any gandidate |

157 is what is defined as qualified. 1 MS. ANDERSON: Yes, whether they meet 2. statutory qualifications. 3 SENATOR RANKIN: So that's attached 4 ahead of us. Certainly on behalf of -- to a 5 person, there's not a runt in the lot, not a --6 7 MS. ANDERSON: Since we didn't go over this in the beginning, if we can -- if I can just 8 9 outline what --SENATOR RANKIN: Get this on the record 10 11 real quick. MS. ANDERSON: The qualifications that 12 need to be found, it's in 58-31-20(c). 13 It says each member must possess abilities and experience 14 15 that are generally found among directors of energy utilities serving in our state and allow them to 16 make valuable contributions to the conduct of the 17 18 authorities in business. This includes substantial 19 business skills and experience, included but not 20 limited to, general knowledge of the history, 21 process and operations of the Public Service 22 Authority and the responsibility of being a 2.3 director, the ability to interpret legal and 24 financial documents and information so as to 25 further the activities and affairs of the Public

| | 158 | | | | |
|----|---|--|--|--|--|
| 1 | Service Authority, with the assistance of counsel | | | | |
| 2 | the ability to understand and apply federal and | | | | |
| 3 | state laws, rules and regulations, and with the | | | | |
| 4 | assistance of counsel the ability to understand and | | | | |
| 5 | apply judicial decisions as they relate to | | | | |
| 6 | activities and affairs of Santee Cooper. | | | | |
| 7 | SENATOR RANKIN: I think we can do this | | | | |
| 8 | in mass or we can name each one, but do I hear a | | | | |
| 9 | motion for qualified I would say we could add an | | | | |
| 10 | adjective to that for writing purposes, extremely | | | | |
| 11 | qualified on behalf of each of these nominees or | | | | |
| 12 | appointees? | | | | |
| 13 | REPRESENTATIVE HAYES: Yes. | | | | |
| 14 | SENATOR RANKIN: You second that. | | | | |
| 15 | All right. I'm going to support that | | | | |
| 16 | unanimously each of these have been found extremely | | | | |
| 17 | qualified. And that concludes our business. | | | | |
| 18 | We will get a report to the full | | | | |
| 19 | committee and then we have a | | | | |
| 20 | MS. ANDERSON: We'll meet on the 9th | | | | |
| 21 | for the Senate subcommittee report. | | | | |
| 22 | SENATOR RANKIN: We stand adjourned. | | | | |
| 23 | (The meeting was adjourned at | | | | |
| 24 | 1:30 p.m.) | | | | |
| 25 | | | | | |
