## **Fiscal Impact Summary**

This legislation will have a minimal expenditure impact from revising forms and instructions. The Department of Revenue will have some additional General Fund expenditures that can be absorbed within their current funding.

This bill would reduce General Fund individual income tax revenue by an estimated \$9,442,160 in FY 2015-16, the first year of the three year phase-in. In FY 2016-17 when the deduction increases to 66.66 percent, the additional revenue reduction is an estimated \$10,256,119. In the final year with the 100 percent deduction, the additional revenue reduction is an estimated \$11,133,974 in FY 2017-18 for an estimated total reduction in General Fund individual income tax revenue of \$30,832,254 over the three-year phase-in.

# **Explanation of Fiscal Impact**

#### State Expenditure

A bill relating to deductions from South Carolina taxable income of individuals so as to allow a deduction of retirement benefits attributable to service on active duty in the armed forces of the United States.

The Department of Revenue estimates that this legislation will have a minimal expenditure impact on the department from revising forms and instructions. The department will have some additional General Fund expenditures that can be absorbed within their current funding.

#### State Revenue

This bill allows a deduction of military retirement benefits attributable to service on active duty in the armed forces of the United States for taxable years beginning after 2014 from South Carolina individual income tax. This deduction is phased-in over three years with the deduction being 33.33 percent in tax year 2015. The deduction rises to 66.66 percent in tax year 2016 and reaches 100 percent in tax year 2017. This proposal would also amend Section 12-6-1170(A)(2) to modify the definition of "retirement income" that is subject to the \$3,000 or \$15,000 exclusion, depending on the age of the taxpayer, to not include military retirement income for taxable years beginning after 2016. This ensures that taxpayers cannot deduct military retirement benefits twice.

Based on the latest data from the U.S. Department of Defense, Office of the Actuary, there were 57,755 military retirees in South Carolina as of September 2013 receiving \$1,361,388,000 in annual military retirement benefits. This equates to an average annual retirement benefit of \$23,572 for each retiree in South Carolina.

Since §12-6-1170 allows different amounts of retirement income deductions by taxpayers depending on their age, we use Department of Defense data to segregate these taxpayers into two categories: age 65 and older, and under age 65. Taxpayers age 65 and older may deduct retirement income of up to \$15,000 per year, while taxpayers under age 65 may deduct retirement income up to \$3,000 per year.

Adjusting the number of South Carolina military retirees and their retirement income in tax year 2013 to tax year 2015, or FY 2015-16, we anticipate 30,450 taxpayers age 65 or older with military retirement income totaling \$798,214,000. This results in an average \$26,214 annual military retirement benefit. After accounting for the current \$15,000 deduction and any non-taxable retirement income such as disability payments, we estimate that the remaining \$323,210,000 in taxable retirement benefits at an average tax rate of 2.9% would generate \$9,373,090 in individual income tax revenue in FY 2015-16. Adjusting this amount for the 33.33 percent deduction allowed in tax year 2015 results in an estimated \$3,124,051 reduction in General Fund individual income tax revenue in FY 2015-16.

We also anticipate 28,717 taxpayers under age 65 with military retirement income totaling \$665,618,000, resulting in an average \$23,179 annual military retirement benefit. After accounting for the current \$3,000 deduction and any non-taxable retirement income such as disability payments, we estimate that the remaining \$557,536,000 in taxable retirement benefits multiplied by an average tax rate of 3.4% will generate \$18,956,224 in individual income tax revenue in FY 2015-16. Adjusting this amount for the 33.33 percent deduction allowed in tax year 2015 results in an estimated \$6,318,109 reduction in General Fund individual income tax revenue in FY 2015-16.

The average tax rates used in this analysis are based on a re-calculation of the income tax for each return after the proposed deduction is applied. This method takes into account the large number of returns that have zero taxable income, returns that are reduced to zero taxable income by the deduction, and returns that do not benefit from the full amount of the proposed deduction.

H3147 Page 2 of 3

The tax rates for the two age groups are different because the larger deduction for age 65 and older further reduces remaining South Carolina income subject to tax.

Combining the revenue impact for these two age groups results in an estimated \$9,442,160 total reduction in General Fund individual income tax revenue in FY 2015-16, the first year of the three year phase-in. The total reduction in General Fund individual income tax revenue in FY 2016-17 with the 66.66 percent deduction is an estimated \$19,698,280. In the final year with the 100 percent deduction, the total reduction in General Fund individual income tax revenue is an estimated \$30,832,254 for FY 2017-18. The attached tables report the total revenue reduction by fiscal year for all military retirees and by the two age groups, age 65 and older and below age 65, discussed above.
