Jana,

There are only two Judges that can now and have ever had the capability to do a remote workplace session into the SCALC network.

- Ralph K Anderson
- Shirley C Robinson

.....and neither of them shows in event logs as using it in the past.

As far as email to cell phones, I can say I haven't setup any of the Judges to get SCALC mail on their phone. But, that doesn't mean they haven't set it up themselves or had someone tech savvy to do it for them. I know Niki setup several iPhone users (not judges) while she was here, the iPhone setup is pretty simple. The Droid takes a bit more configuration.

Let me know if you need anything else, Jack

Jack,

Please let me know if any of the other judges have used any means that you can see to login remotely to the office. I realize that since we went to the cloud that anyone can access the email through microsoftonline. Have any had you put email on their phones? Thanks.

Try the VPN portal. I'm not confident it will work...it always has to be adjusted but we can work together to get it working. Jack

Subject: Remote Workplace

Jana,

In order for an employee to be able to start a remote workplace session into the SCALC network I have to physically put there profile into the remote desktop users group. Judge Matthews cannot and has never been able to do a remote session from home.

Jack
