90–001. Introduction.
The South Carolina (SC) Department of Motor Vehicles (DMV) is implementing the South Carolina Automobile Liability Insurance Reporting (SC ALIR) System that collects automobile liability insurance information from insurers that are licensed to provide automobile liability insurance in the state. The DMV will cross-reference the collected information to South Carolina driver and vehicle data to identify registered vehicles that do not meet the minimum automotive liability insurance requirements of the state.

HISTORY: Added by State Register Volume 29, Issue No. 6, eff June 24, 2005.

90–003. Method of Communication Options for Insurers.
A. The SC ALIR System will provide insurers with the following options for data communications with the SC ALIR System for reporting cancellation and compliance transactions.
   (1) Internet File Transfer Protocol (FTP) accepting both Electronic Data Interchange (EDI) and Text document.
   (2) Value Added Network (VAN) accepting EDI documents.
   (3) Internet Hyper-Text Transfer Protocol (HTTP) or Web accepting direct data entry.
   (4) Other forms of communication approved by the Department in the Implementation Guide, upon recommendation of the Working Group.
B. During registration with the SC ALIR System, each insurer will select the communication. This selection applies to both sending data to the SC ALIR System and receiving data from the system.
During registration, each insurer will also select the data document type to be exchanged with the system, based on the selected communication option.

C. Insurers will be responsible for the costs associated with programming their systems to utilize the options for data communications with the SC ALIR System.

**HISTORY:** Added by State Register Volume 29, Issue No. 6, eff June 24, 2005.

**90–003.1. File Transfer Protocol (FTP) Data Communication.**

Insurers that wish to transmit large files to the SC ALIR System without incurring the costs of a VAN may use the FTP option. Secured FTP accounts and folders will be created within the SC ALIR System for the insurers that choose the FTP option while registering with the SC ALIR System. Login, folder structure and other necessary information will be provided to insurers to allow access to their specific folders.

**HISTORY:** Added by State Register Volume 29, Issue No. 6, eff June 24, 2005.

**90–003.2. Value Added Network (VAN) Data Communication.**

Insurers may select the VAN option. Insurers using the VAN option will have to set up mailboxes and communications. Insurers utilizing the VAN option will be required to pay an additional fee which will be placed by the Comptroller General into a special restricted account to be used by the Department to defray its expenses in administering this program.

**HISTORY:** Added by State Register Volume 29, Issue No. 6, eff June 24, 2005.

**90–003.3. Web Data Communication.**

For low reporting volumes, insurers may prefer the option of entering data directly on the SC ALIR System’s secure website. All registered users will have the ability to submit data over the web. However only users that have selected Web as the communication option will be able to retrieve Error Transactions via the web. After insurers have successfully registered, they will be provided with a unique user name and password to access the secure website. The confidentiality and continued security of the username and password will be the insurer’s responsibility.

**HISTORY:** Added by State Register Volume 29, Issue No. 6, eff June 24, 2005.

**90–004. File Formatting Options.**

Insurers submitting data using FTP will have the option of submitting either text or EDI files. Insurers using the VAN will only be able to submit EDI files. The file formatting option will be selected during registration.

**HISTORY:** Added by State Register Volume 29, Issue No. 6, eff June 24, 2005.

**90–004.1. Electronic Data Interchange Documents.**

The SC ALIR System supports the American National Standards Institute, Accredited Standards Committee (ANSI ASC) X12 Standard, Transaction Sets 811 and 997, Release 3050. This standard has been identified for use in state government ALIR applications by insurance industry trade groups such as the Insurance Industry Committee on Motor Vehicle Administration (IICMVA) and is already in use by some other state DMVs for Automobile Insurance Liability Reporting.

**HISTORY:** Added by State Register Volume 29, Issue No. 6, eff June 24, 2005.

**90–004.2. Text Documents.**

Insurers will have the alternative of using Text data interchange with the SC ALIR System. A Text data interchange format will be specified to support the needs of the SC ALIR System.

**HISTORY:** Added by State Register Volume 29, Issue No. 6, eff June 24, 2005.

**90–005. Data Security.**

A. FTP

The SC ALIR System will implement FTP using a Secured Sockets Layer (SSL) enabled FTP server and a PGP option will also be provided. An SSL enabled FTP client is required to exchange
files with the server. The SC ALIR Program will supply an SSL enabled FTP client for the Microsoft Windows family of operating systems on request of any insurer.

B. Web

All data submitted/retrieved over the web will also be encrypted using SSL.

C. VAN

The Value Added Network is a private network that ensures data security.
