

SOUTH CAROLINA
**SOLID WASTE
MANAGEMENT**
ANNUAL REPORT

FISCAL YEAR

2025

SC DEPARTMENT of
**ENVIRONMENTAL
SERVICES**

Myra Reece, Director

About This Report

This comprehensive report – prepared by the S.C. Department of Environmental Services (SCDES) – is a requirement of the S.C. Solid Waste Policy and Management Act of 1991 (Act) and must be submitted to the Governor and General Assembly annually by March 15.

Solid waste management (SWM) is the process associated with the generation, collection, transport, storage, treatment, disposal and recovery of solid waste.

The Act outlines specific data and information required in this report including:

- **The amount of solid waste disposed of and incinerated by county;**
- **The amount and type of solid waste recycled by county;**
- **Identification of permitted SWM facilities and projection of remaining life of certain facilities;**
- **An estimate of current capacity to manage solid waste;**
- **The progress towards meeting the state's waste reduction and recycling goals;**
- **Recommendations on improving SWM;** and
- **Revisions to the State Solid Waste Management Plan** (State Plan) and an evaluation of progress made from the implementation of the State Plan.

"The South Carolina Solid Waste Management Annual Report" (Annual Report) reflects SWM activities in fiscal year (FY) 2025 (July 1, 2024 – June 30, 2025).

What is measured?

The focus of this reporting is the measurement of two categories of solid waste.

1. **Municipal Solid Waste** (MSW) includes “everyday” items that are discarded from residential (i.e., single and multi-family homes), commercial (e.g., stores, office buildings, restaurants, hotels, groceries), institutional (e.g., schools, colleges/universities, government agencies, hospitals, military bases) and industrial sources (i.e., manufacturing).

Items include:

- **Containers and packaging** (e.g., aluminum, glass, plastic, cardboard, steel);
- **Durable goods** (e.g., appliances, carpet, rugs, electronics, furniture);
- **Food waste;**
- **Lead-acid batteries;**
- **Non-durable goods** (e.g., clothing, paper, magazines);
- **Tires;**
- **Used motor oil from at-home oil changers;**
- **Wood pallets;** and
- **Yard trimmings.**

2. **Total Solid Waste** (TSW) is comprised of all solid waste that is generated, disposed of and recovered. MSW, as defined in the Act, offers a narrow view while TSW provides a more realistic picture.

Table of Contents

SECTION 2: Year at a Glance	4
SECTION 3: Solid Waste Planning.....	8
SECTION 4: Permitted Solid Waste Facilities.....	20
SECTION 5: Landfills & Disposal.....	27
SECTION 6: Recycling by Commodity	37
SECTION 7: Recycling by State & County	47
SECTION 8: Improving Solid Waste Management.....	74

TSW includes:

- **Automobile bodies;**
- **Combustion ash;**
- **Construction and demolition (C&D) debris;**
- **Industrial process waste** (i.e., scraps and by-products from manufacturing);
- **Land-clearing debris;**
- **MSW;**
- **Natural disaster debris;**
- **Processed waste tires;** and
- **Other material** (e.g., asbestos, contaminated soil, sludge, treated wood, manure).

Exported and imported waste is considered in the TSW totals. When discussing TSW generation, only South Carolina tonnages are included. However, only recycling tonnages generated in South Carolina counties are included in TSW calculations.

Waste Reduction & Recycling Goals

Below are South Carolina's goals to achieve by 2030.

50 percent

Recycle at least 50 percent of the state's MSW.

50 percent

Reduce food loss and waste by 50 percent.

3.25 p/p/d

Reduce MSW disposal to 3.25 pounds per person per day (p/p/d) or less.

Commonly Used Acronyms & Abbreviations

- **Act** – S.C. Solid Waste Policy and Management Act of 1991 (S.C. Code of Laws § 44-96-60)
- **C&D** – Construction and Demolition
- **EPA** – U.S. Environmental Protection Agency
- **FY** – Fiscal Year
- **FY25** – July 1, 2024 to June 30, 2025
- **MSW** – Municipal Solid Waste
- **p/p/d** – Pounds Per Person Per Day
- **SWM** – Solid Waste Management
- **TSW** – Total Solid Waste
- **SCDES** – S.C. Department of Environmental Services

Disclaimers

- Every effort is made to ensure data accuracy. Any decisions on the use or omission of data were made with the goal of protecting the quality of information reported.
- Recycling tonnages are rounded to the nearest hundredth and disposal data is rounded to the nearest ton. Some totals do not equal 100 percent due to rounding.
- Data collection ended December 31, 2025.

Dedication

This year's report is dedicated to **Marty Lindler**, Director of SCDES's Division of Mining and Solid Waste Management. After more than 38 years of service to the agency and the State of South Carolina, Marty is retiring. Best wishes and thank you for your dedication, professionalism and friendship.

S.C. Recycling Goal Calculations

Disposal and recycling data for this report is gathered from the following sources:

- **Permitted solid waste facilities** are required by the Act and subsequent regulations to submit annual reports of the amount of material disposed of to SCDES;
- **County governments, state agencies and state-supported colleges/universities** also are required to report the amount and type of material recycled;
- **Businesses** (e.g., commercial, industrial); and
- **U.S. Census Bureau.**

It is important to recognize that businesses, municipalities and the recycling industry are encouraged, but not required to report their recycling efforts. Because this reporting is voluntary, the data collected from these sources is inconsistent and impacts South Carolina's annual recycling rate.

The data is collected through two reporting systems – ReTRAC Connect and ePermitting. Re-TRAC Connect is used mainly by county and local governments as well as businesses while ePermitting is used by permitted solid waste facilities (e.g., landfills, transfer stations, processing facilities). The infographics below show the formulas used to determine the per capita disposal and the county and state recycling percentages.

How to Calculate the Recycling Percentage

NOTE: See page 48, Table 7.4 for more information.

How to Calculate the Disposal Rate (p/p/d)

Year at a Glance

SECTION

2

The tables below provide data for FY21 to FY25. In South Carolina, FY25 runs from July 1, 2024 through June 30, 2025.

TABLE 2.1: S.C. MSW Recycled, Disposed Of & Generated by FY¹

FISCAL YEAR	POPULATION	RECYCLED (tons)	RECYCLING RATE (percent)	RECYCLING RATE (p/p/d)	DISPOSAL (tons)	DISPOSAL RATE (p/p/d)	GENERATION (tons)	GENERATION RATE (p/p/d)
2021	5,118,425	1,183,984	23.9	1.3	3,772,282	4	4,956,266	5.3
2022	5,190,705	1,161,924	22.0	1.2	4,111,708	4.3	5,273,632	5.6
2023	5,282,634	1,135,905	20.9	1.2	4,311,032	4.5	5,446,937	5.7
2024	5,373,554	977,445	20.7	1.0	3,682,186	3.8	4,645,732	4.7
2025	5,373,554	1,190,234	23.5	1.2	3,883,455	4.0	5,073,689	5.2

¹ See Table 7.4 on page 48 for a breakdown by county of MSW recycling, disposal and generation.

TABLE 2.2: S.C. TSW Recycled, Disposed Of & Generated by FY¹

FISCAL YEAR	POPULATION	RECYCLED (tons)	RECYCLING RATE (percent)	RECYCLING RATE (p/p/d)	DISPOSAL (tons)	DISPOSAL RATE (p/p/d)	GENERATION (tons)	GENERATION RATE (p/p/d)
2021	5,118,425	5,374,903	32.0	5.7	11,436,163	12.2	16,811,066	18.0
2022	5,190,705	3,813,952	22.9	4.0	13,113,965	13.1	16,715,017	16.9
2023	5,282,634	6,782,116	35.6	7.0	12,992,863	12.8	19,070,512	19.8

2025	5,373,554	4,229,347	22.8	4.3	15,111,045	14.6	18,519,703	18.9

¹ See Table 7.5 on page 49 for a breakdown by county of TSW recycling, disposal and generation.

*As previously reported

TABLE 2.3: Cost of SWM for Local Governments by FY

FISCAL YEAR	EARNED REVENUE*	FULL COST**
2021	\$12,920,373.68	\$380,041,946
2022	\$14,378,824.39	\$422,970,685
2023	\$9,056,222.57	\$483,780,722
2024	\$9,938,030.81	\$540,899,863
2025	\$1,716,434.51	\$524,603,189

* Earned Revenue is money local governments (those that reported) earned from the sale of their recyclables. The number of counties reporting varies from year to year.

** Full cost is the total amount of money local governments spent on solid waste activities.

TABLE 2.4: Solid Waste Disposal and Recycling Costs in FY25

SOLID WASTE COLLECTION COST	SOLID WASTE DISPOSAL COST	RECYCLING COST	OTHER SOLID WASTE COSTS	CALCULATED TSW COSTS	POPULATION*	CALCULATED PER CAPITA COSTS
\$285,700,427.56	\$174,909,564.27	\$44,380,844.00	\$19,612,352.76	\$524,603,188.59	5,356,031	\$97.95

* Data for this table reflects population statistics provided by counties and municipalities.

Recycling Grants

SCDES's Office of Solid Waste Reduction and Recycling maintains three recycling grant programs for local governments.

- **Solid Waste Grant** funds can be used for general recycling projects and/or recycling education. In FY25, 53 grants were awarded totaling \$1,167,338.00.
- **Used Oil Grant** funds can be used for used motor oil related recycling. In FY25, 53 grants were awarded totaling \$754,829.59.
- **Waste Tire Grant** funds can be used for waste tire stockpile clean-ups, waste tire collection programs and public education. In FY25, 48 grants were awarded totaling \$2,339,561.00.

TABLE 2.5: Recycling Grants Awarded for FY21 to FY25

FISCAL YEAR	SOLID WASTE	USED OIL	WASTE TIRE
2021	\$1,705,084.00	\$688,066.60	\$3,343,126.35
2022	\$683,747.00	\$650,540.00	\$2,156,953.10
2023	\$713,400.00	\$704,953.00	\$2,215,065.00
2024	\$892,674.82	\$683,552.00	\$2,215,502.59
2025	\$1,167,338.00	\$754,829.59	\$2,339,561.00
TOTAL	\$5,162,243.82	\$3,481,941.19	\$12,270,208.04

S.C. Electronics Clearinghouse Update

The S.C. Manufacturers Responsibility and Consumer Convenience Act (S.C. Code of Laws § 44-96-130) was passed in 2010 imposing a landfill ban of specific residential electronics (i.e., computers, printers, televisions, computer monitors) and creating recycling obligations for electronics manufacturers. The legislation was revised in 2022 and among the changes set up the S.C. Electronics Clearinghouse for county governments.

The legislation also requires SCDES to provide data supplied by the manufacturers in this report. During calendar year (CY) 2025, 18 counties (shown in dark blue on the map) participated in the clearinghouse.

TABLE 2.6: Electronic Devices Recovered in Pounds by CY

	CY21	CY22	CY23	CY24	CY25

Solid Waste Planning

SECTION 3

State Plan Requirements

SCDES is required by law to maintain a state SWM plan (State Plan). The State Plan is required by the Act to address a 20-year planning period and at a minimum include:

- **An inventory of the amounts and types of solid waste currently being disposed of** at solid waste disposal facilities in the state;
- **An estimate of the amount of solid waste that will require disposal at solid waste disposal facilities** in the state for the projected planning period;
- **An estimate of current capacity in the state to manage solid waste** – including the identification of each SWM facility or treatment method and a projection of its remaining useful life;
- **An analysis of the types of solid waste facilities that will be needed** to manage the state's solid waste during the projected planning period; and
- **Recommendations on how to achieve the state's waste reduction/recycling goals.**

The complete list of requirements for the State Plan is in the Act (S.C. Section 44-96-60).

SCDES Guidance for Local Plans

The Act is the state law governing SWM. Local governments and regions are required to maintain SWM plans (local plans) that are consistent with the State Plan. Each local government and regional plan should address the requirements of the Act in a format chosen by the local government or region. Local government and regional plans should include specific information for the county or member counties and each city, town or service area located in the county or region.

In general, for a 20-year planning period, local plans should clearly provide for the management of existing, projected and potential solid waste streams through a combination of reduction, recycling, disposal and treatment options. How the local government intends to provide for the management of each waste stream should be supported by a discussion of current and future capacity of existing facilities and treatment methods, waste stream projections and other

factors the local government deems relevant when planning for the management of its solid waste.

Because local governments are responsible for providing for the management of all solid waste, the local plan should include a detailed discussion of each solid waste stream the county or region manages and could potentially manage and all the collection, transfer, recycling, treatment and disposal methods available for each waste stream, for each county, town and city.

The State Plan and its annual report updates should function as planning tools for local governments for the planning period. When writing and revising

State Plan Overview

- **On November 27, 1992, SCDES published the first State Plan, pursuant to the Act.** As required by the Act, subsequent annual reports have been developed each FY.
- **In 1998, SCDES adopted the U.S. Environmental Protection Agency's (EPA) definition of MSW.**
- **On June 29, 1999, SCDES approved a revised State Plan.** The FY98 Annual Report and State Plan were approved and published as one document.
- **On February 9, 2006, the State Plan was amended** to include criteria for Research, Development and Demonstration (RD&D) permitted facilities that utilize emerging technologies.
- **In 2011, the South Carolina Manufacturer Responsibility and Consumer Convenience Information Technology Equipment Collection and Recovery Act (e-Scrap Act) became effective.** This act was passed in order to promote the recycling of electronic devices at the end of their useful life.
- **In 2011, SCDES adopted new state solid waste recycling and reduction goals,** which were to recycle 40 percent or more of the state's MSW and to reduce the state's average per capita disposal to 3.25 p/p/d. This goal expired in 2020. The Act [S.C. Section 44-96-50 (F)] requires recycling and waste reduction goals to be revised.
- **In 2021, SCDES announced an updated solid waste recycling goal** with the publication of the FY21 Annual Report. The state's original reduction goal remained the same. With the adoption of EPA's new recycling goal – by 2030 and beginning in FY23 – new state solid waste recycling and reduction goals are to recycle 50 percent or more of the state's MSW and to reduce the state's average per capita disposal to 3.25 p/p/d.

county or regional plans, local governments and regional governing bodies should refer to the state's Annual Report for historical disposal and recycling data reported to SCDES for each county. Local governments should use appropriate local standards when calculating and determining projected solid waste maintenance needs for the planning period. SCDES maintains copies of local plans in the Division of Mining and Solid Waste Management (DMSWM). Solid waste planning, consistency and demonstration of need (DON) assistance is available from DMSWM.

Additional SCDES Responsibilities

Beyond the State Plan, SCDES has additional responsibilities including:

- **Determining consistency** with state and local or regional SWM plans; and
- **Approving DON** for certain SWM facilities.

CONSISTENCY DETERMINATIONS

Before a SWM facility can be permitted, it must be determined by SCDES to be consistent with the State Plan and the local county or regional plan. SCDES looks at many factors when reviewing the local county or regional plan and making a consistency decision.

DEMONSTRATION OF NEED (DON)

DON refers to the criteria established for the:

- **Geographical placement;** and
- **Allowable annual disposal rate** of new and expanding SWM facilities.

The original DON regulation was put into effect in June 2000. On June 26, 2009, a revision to Regulation 61-107.17 SWM: Demonstration-of-Need became effective. The DON regulation addresses:

- **Commercial Class 3 landfills;**
- **Commercial Class 2 landfills;**
- **Commercial solid waste incinerators** that incinerate waste other than wood waste or yard trimmings; and
- **Commercial solid waste processing facilities** that process waste destined for disposal at Class 3 landfills.

The DON regulation stipulates that where there are at least two commercial SWM facilities of the same type within a specified planning area, no new facility is allowed. Non-commercial facilities are not

required to demonstrate need. The data in Tables 3.2 and 3.3 is used for calculating annual tonnage limits as related to R.61-107.17 effective June 26, 2009. The historical data has been adjusted to reflect changes in the DON regulations.

CLASS 2 LANDFILLS

Class 2 landfills accept land-clearing debris, industrial process waste, C&D debris, household furniture and animal carcasses under specified conditions. Class 2 landfills have a 20-mile planning radius. (See pages 14-15 for a map detailing Class 2 landfill locations and planning radii.)

SCDES calculates allowable annual disposal at new Class 2 landfills using:

- **100 percent of the host county generation;** and
- **30 percent of the generation in other counties within the planning area.**

Tonnage increases for existing Class 2 facilities are allowed only if the facility is operating within 20

Local Plan Overview

County governments or regions are required to develop local plans that are consistent with the State Plan. These plans should be designed to achieve the current recycling and reduction goals, are required to address a 20-year planning period and at a minimum include:

- **An estimate of the amount of solid waste being disposed of at solid waste disposal facilities** in the county or region and a projection of the amount of solid waste that will be disposed of at solid waste disposal facilities during the planning period;
- **An estimate of the current capacity within the county or region to manage its solid waste** – including an identification of each SWM facility or treatment method and a projection of its remaining useful life;
- **An analysis of existing and new solid waste facilities and treatment methods that will be needed** to manage the county's or region's solid waste during the projected planning period;
- **The designation of a recycling coordinator, description of the recycling program and outreach/education initiatives;**
- **An outline on how the county or region plans to meet South Carolina's waste reduction and recycling goals;** and
- **An estimate of the cost of implementing the plan.**

The complete list of requirements for local plans may be found in the Act (S.C. Section 44-96-80).

percent of its permitted amount, (i.e., the amount of waste disposed per year is 80 percent or more of the annual permitted capacity). If a Class 2 landfill qualifies for an increase, it can receive the lesser of:

- **The increased amount of disposal in the planning area** since the last permitted increase; or
- **50,000 tons.**

Class 2 landfills operating on the effective date of the regulation may be allowed variances from certain DON requirements with respect to replacement facilities and expansions. See Table 3.2 for Class 2 waste generated for disposal by county for use in DON.

CLASS 3 LANDFILLS

Class 3 landfills accept MSW, industrial process waste, sewage sludge, non-hazardous MSW incinerator ash and other non-hazardous waste. For new commercial Class 3 landfills, allowable tonnage is calculated using:

- **100 percent of the host county generation;** and
- **50 percent of the waste generated in other counties within the planning area.** (None is counted from other counties that have an existing commercial Class 3 landfill.)

Class 3 landfills have a 75-mile planning radius. (See pages 16-17 for a map detailing Class 3 landfill locations and planning radii). The yearly disposal rate at an existing landfill is allowed to increase only if the facility is within 20 percent of its permitted disposal rate (i.e., the amount of waste disposed of per year is 80 percent or more of the annual permitted capacity). If a Class 3 landfill qualifies for an increase, it can receive the lesser of:

- **The amount that disposal in South Carolina has increased since the facility last received a permitted increase;** or
- **150,000 tons.**

In addition, the allowable yearly disposal rate at any Class 3 landfill cannot exceed 30 percent of the TSW generated in South Carolina that is destined for disposal in Class 3 landfills. Class 3 landfills

operating on the effective date of the regulation are allowed variances from certain DON requirements. See Table 3.3 for Class 3 waste generated for disposal by county for use in DON.

SOLID WASTE INCINERATORS

The yearly throughput for a solid waste incinerator is based on the manufacturer's design of the incinerator, but it cannot exceed 600 tons per day. The DON regulation does not apply to air curtain incinerators that receive only wood waste and yard trimmings. The planning area for a solid waste incinerator is 75 miles. There currently are no permitted MSW incinerators in the state.

SOLID WASTE PROCESSING FACILITIES

The maximum allowable yearly throughput of a solid waste processing facility that processes waste destined for disposal at a Class 3 landfill is equal to:

- **100 percent of the solid waste destined for disposal that is generated in the host county;** and
- **50 percent of the waste generated in each county other than the host county that falls wholly or partially within the 75-mile planning radius.**

See pages 18-19 for a map detailing Class 3 Solid Waste Processing Facility locations and planning radii. Solid waste processing facilities that process waste destined for recycling or disposal in a Class 1 or Class 2 landfill are not required to demonstrate need.

STATE SOLID WASTE REGULATIONS

Federal, state and local governments passed and continue to promulgate environmental laws to protect human health and the environment. EPA is the branch of the federal government that enforces the federal environmental laws and state environmental agencies enforce federal as well as state laws. SCDDES is responsible for writing and enforcing environmental laws and regulations. Solid waste regulations are provided in Table 3.1. To view current solid waste laws and regulations, please visit des.sc.gov/RegulationsTable.

TABLE 3.1: S.C. Solid Waste Regulations

REGULATION	NAME	EFFECTIVE DATE
61-107.1 SWM	Solid Waste Management Grants, Recycling Education Grants, and Waste Tire Grants	April 23, 1993
61-107.2 SWM	Full Cost Disclosure	April 23, 1993

* Disposal of coal ash and contaminated soil associated with site cleanups were excluded from the DON tables.

Demonstration of Need Map

Class 2 Landfills

As of June 30, 2025

CLASS 2

- Limits waste streams as specified in Regulation 61-107.19 SWM: Solid Waste Landfills and Structural Fill.
- Waste that is characterized as less than 10 times the maximum contaminant level (MCL) and approved by SCDES may be added to the permit for acceptance/disposal.

Operational Criteria:

- Unauthorized waste may be stored at the facility for 30 days – except that putrescible waste must be removed within 72 hours.
- An annual survey to determine landfill capacity used and the remaining permitted capacity may be required.
- Require scales – but exempts scales for facilities permitted for less than 10,000 tons per year and on-site landfills.

Design Criteria:

- Require settlement calculations on the base grades;
- Require SCDES to inspect the landfill prior to waste placement;
- Set cap requirements at 2 feet of soil;
- Establish certain buffers when “Notice of Intent to File a Permit Application” is published;
- Require groundwater monitoring and corrective action;
- Set post-closure (20 years); and
- Require closure and post-closure financial assurance.

Demonstration of Need Map

Class 3 Landfills

As of June 30, 2025

CLASS 3

- Requires waste characterization through the Special Waste Analysis and Implementation Plan.
- Requirement to inspect 10 percent of incoming loads.
- Landfills that were permitted as Industrial Solid Waste Landfills prior to the effective date of Regulation 61-107.19 are exempt from design criteria provided the waste streams remain below 30 times the MCLs.
- Leachate recirculation allowed under permit modification.
- Buffers established when "Notice of Intent to File a Permit Application" is published.
- Notification required within 72 hours of receipt of hazardous or PCB waste.
- Slope-stability requirements.

Certification testing of cap to include:

- One permeability test per acre; and
- Four density/thickness tests per acre.

Demonstration of Need Map

Class 3 Solid Waste Processing Facilities

As of June 30, 2025

Permitted Solid Waste Facilities

SECTION 4

SCDES regulates solid waste facilities and activities through permits or registrations.

In FY25, South Carolina had 448 and 12 types of permitted solid waste facilities. See Table 4.1 for additional information. Several permits apply to multiple facility types. For example, there are three types of composting facilities, landfills and transfer stations.

Beyond permits, SCDES requires registration for solid waste activities including lead-acid battery collectors, used oil transporters, waste tire haulers and C&D debris recyclers.

Composting & Wood-Grinding Facilities

These facilities convert land-clearing debris, yard trimmings and/or organics residuals into compost, mulch and boiler fuel. Type is determined by feedstock.

Facility types include:

- **TYPE 1 FACILITIES** grind or compost only source separated organic residuals described as Category 1 feedstocks;
- **TYPE 2 FACILITIES** compost only source separated compostable materials described as Category 2 feedstocks or mixtures of Category 1 and Category 2 feedstocks; and
- **TYPE 3 FACILITIES** compost Category 3 feedstocks or mixtures of Category 3 feedstocks with other feedstock categories.

All feedstocks are listed in the Appendix in R.61-107.4 SWM: Compost and Mulch Production from Land-Clearing Debris, Yard Trimmings and Organic Residuals.

Solid Waste Transfer Stations

These facilities accept and transfer solid waste from collection vehicles to larger vehicles for movement to another facility prior to its processing and disposal. As of June 30, 2025, there were 48 permitted transfer stations – nine Class 2 and 39 Class 3 – located across 32 counties.

C&D Debris

C&D debris is non-hazardous solid waste generated during the construction, remodeling, repair or demolition of homes, buildings, roads and bridges. C&D debris (as outlined in the Act) is not part of MSW. It is measured, however, given the sheer amount of material generated.

Registered C&D debris recyclers are required to report to SCDES each CY while other solid waste facilities report each FY. See Table 4.5 for additional information.

Solid Waste Processing Facilities

Processors reduce or alter the volume and chemical or physical characteristics of solid waste through processes such as shredding, baling, sorting or

(Continued on page 23)

* No Report Submitted

bulking waste. These actions result in the generation of a new waste stream. The newly generated waste stream is then delivered to a recycling, treatment or disposal facility.

For reporting purposes, waste received from a processing facility is attributed to the county where the processor is located. In FY25, there were 24 processors located in 16 counties as shown in Table 4.6.

Waste Tire Facilities

There are two types of waste tire facilities in the state – collectors and processors. Processors recover reusable by-products from waste tires or cut, burn or alter waste tires so the tires are no longer whole. This includes baling, compacting and pyrolysis. In FY25, there were 12 facilities located in 12 counties as seen in Table 4.7.

Used Oil

There are two types of used oil facilities – processors and burners. Processors are operations designed to produce or make used oil more amenable for production of fuel oils, lubricants and other products. Burners refer to facilities that burn off-specification used oil for energy recovery. In FY25, there were 12 facilities in eight counties as seen in Table 4.8.

Structural Fill

A structural fill is the filling of a natural low-lying area with land-clearing debris, hardened concrete/cured asphalt, bricks and/or masonry blocks for future beneficial use. These fills may not provide a structural base

for building purposes. In FY25, there were two permitted structural fills as seen in Table 4.9.

Land Application & Soil Treatment Facilities

Land application permits refer to builders, farmers and others that place non-hazardous solid waste on or into soil that is being used for agricultural, silvicultural and horticultural beneficial purposes and not as a means of disposal. In FY25, there were four facilities approved to land apply solid waste as shown in Table 4.10. Soil treatment facilities treat

contaminated (e.g., by petroleum) soil. In FY25, there was one facility permitted as shown in Table 4.10.

Incinerators

There are two types of incinerators – solid waste and air curtain. Currently, there are no permitted solid waste incinerators in the state. Air curtain incinerators are used to reduce the volume of land-clearing debris. All three air curtain incinerators were located in Beaufort County as seen in Table 4.11.

TABLE 4.6: Permitted Solid Waste Processing Facilities in FY25

COUNTY	FACILITY NAME	PERMITTED RATE	AMOUNT RECEIVED (tons)
CLASS 2 C&D DEBRIS PROCESSING FACILITIES

Beaufort	Oliver's Clean Burn	Air Curtain Incinerator	1,620 CYD	9,462

Landfills & Disposal

SECTION 5

The Act and subsequent regulation require permitted public and private solid waste facilities to report to SCDES the amount and type of solid waste disposed of, incinerated or exported.

The types of solid waste measured are:

- **MSW** as defined in the Act; and
- **TSW** is all solid waste disposed of including MSW, C&D debris, ash, industrial process waste, processed tires and land-clearing debris.

Almost all solid waste not recovered is disposed of in landfills with a small amount incinerated or exported.

In FY25, South Carolina had 134 permitted solid waste landfills as seen in Table 5.1. Tables 5.3 to 5.14 show all disposal information for FY25.

Imported & Exported Solid Waste

South Carolina both imports and exports solid waste. The vast majority of imported solid waste is MSW, but may include other material. The majority of all solid waste is disposed of in Class 3 landfills. For reporting purposes, imported solid waste is not counted as part of the state's solid waste generation since the waste is generated out of the state. Waste generated in South Carolina and waste exported to other states is counted.

TABLE 5.1: S.C. Landfill Classifications

TYPE	NUMBER OF FACILITIES IN FY25	WASTE ACCEPTED
Class 1	29	Land-Clearing Debris
Class 2	76	C&D Debris, Land-Clearing Debris & Industrial Process Waste
Class 3	29	MSW, C&D Debris & Industrial Process Waste

Class 1 Landfills

Only land-clearing debris can be disposed of in Class 1 landfills. However, land-clearing debris can also be disposed of in Class 2 landfills. The amount of material disposed of in Class 1 landfills was 68,153 tons – a increase of 24,322 tons from FY24. See Table 5.8 for more information.

Class 2 Landfills

Class 2 landfills accept three types of waste:

1. **C&D debris** as listed in Appendix I of R.61-107.19;
2. **Land-clearing debris** (e.g., trees, stumps, wood chips generated from land-clearing activities, yard trimmings that have not come into contact with petroleum products or hazardous constituents); and
3. **Industrial process waste** (i.e., scraps and by-products from the manufacturing process).

In FY25, the amount of solid waste disposed of in Class 2 landfills was 3,925,280 tons – an decrease of 44,989 tons from FY24. See Table 5.9 for more information.

TABLE 5.2: Sources & Examples of MSW

SOURCES	WASTE ACCEPTED
Residential (e.g., single-family homes, multi-family homes)	Appliances, bottles, cans, jars, cardboard, newspaper, paper, food, yard waste trimmings, clothing, electronics
Commercial (e.g., office buildings, retail establishments, hotels, restaurants)	Cardboard, office paper, cafeteria waste (e.g., food, bottles, cans), yard trimmings
Institutional (e.g., schools, libraries, hospitals, prisons)	Books, cardboard, office paper, cafeteria waste (e.g., food, bottles, cans), yard trimmings
Industrial Office/Packaging (e.g., warehouses, manufacturing facilities)	Cardboard, office paper, wood pallets, plastic film, cafeteria waste (e.g., food, bottles, cans)

TABLE 5.3: Disposal in South Carolina by FY

	FY21	FY22	FY23	FY24	FY25
MSW Disposed Of (tons)	3,772,282	3,951,239	4,311,032	3,682,186	3,883,455
MSW Disposed Of (p/p/d)	4.0	4.2	4.5	3.8	4.0
TSW Disposed Of (tons)	11,436,163	12,113,909	12,992,863	13,191,355	15,111,045
TSW Disposed Of (p/p/d)	12.2	12.8	12.8	13.5	14.6

Class 3 Landfills

Class 3 landfills are identified as commercial or non-commercial – with the non-commercial designation signifying that the landfill only accepts

waste generated on-site under the same ownership or control of the facility. Class 3 landfills accept MSW, C&D debris and industrial process waste. See Figure 5.10 for a map of Class 3 landfill locations at the close of FY25.

TABLE 5.8: Permitted Class 1 Landfills in FY25

COUNTY	FACILITY NAME	PERMITTED DISPOSAL RATE (tons/year)	AMOUNT DISPOSED OF (tons)

Tipping Fees

Here are the average fees calculated from the reported data for FY25:

- **Class 1: \$23/ton** – Of the 29 permitted Class 1 landfills, nine reported an average tipping fee;
- **Class 2: \$30/ton** – Of the 77 permitted Class 2 landfills, 53 reported an average fee; and
- **Class 3: \$44/ton** – Of the 29 permitted Class 3 commercial landfills required to report tipping fees, 17 facilities reported fees.

● No Permitted Disposal Rate **NOTE:** The remaining life of Class 2 landfills is reported in months then converted to years.

FIGURE 5.10:
Permitted Class 3 Landfills in FY25

1. Non-commercial landfills are defined by regulation as facilities that only manage the solid waste generated in the course of normal operations on property under the same ownership or control as the facility itself (i.e., “on site”). For more information, see Section 8.

Recycling by Commodity

Recycled MSW is measured by category and commodity. Each of the eight categories listed below is comprised of specific items (i.e., commodities). All material recycled is measured by weight.

1 Glass (i.e., primarily containers for beverages, food and other products) at one time was a traditional item accepted in residential recycling programs. The recycling environment has changed, however, as local programs nationwide – including South Carolina – have dropped glass collection due to unfavorable economics (i.e., high processing costs and low market value).

2 Metal is a traditionally accepted recyclable that includes aluminum cans, ferrous, non-ferrous, steel cans and other mixed scrap metal.

3 Paper is a traditionally accepted recyclable that includes cardboard, magazines, mixed paper, newspaper and inserts, office paper and paperboard.

4 Plastic is a traditionally accepted recyclable that includes PET (#1), HDPE (#2), vinyl (#3), LDPE (#4), PP (#5), PS (#6), commingled PET and HDPE and other mixed plastic.

5 Banned items cannot be disposed of by law in South Carolina and must be recycled. These items include appliances, electronics, lead-acid batteries, used motor oil and whole tires. Yard trimmings are banned from Class 3 landfills, but may be disposed of in Class 1 or Class 2 landfills.

6 Miscellaneous items include antifreeze, cooking oil, fluorescent bulbs, hazardous household material, inkjet/toner cartridges, mattresses, paint, rechargeable batteries, textiles, used motor oil filters and wood packaging as well as other specialty items. These items vary by program.

7 Organics include yard trimmings and food waste. Yard trimmings are banned from Class 3 landfills but may be disposed of in Class 1 or Class 2 landfills.

8 Commingled items – also known as single stream – are recyclable items collected together, not sorted by type.

Recycling by State & County

SECTION
7

Counties are required by the Act to submit annual reports to SCDES providing the amount and type of MSW recycled each FY. South Carolina has a 50 percent or more MSW recycling goal and 3.25 p/p/d or less disposal rate goal.

TABLE 7.1: S.C. MSW Recycling Tonnages

	TONS	+/- IN TONS FROM THE PREVIOUS FY	CHANGE FROM THE PREVIOUS FY
FY21			
ALL MSW	1,183,984	42,685	+3.7%
RESIDENTIAL ONLY	531,621	29,932	+6%
FY22			
ALL MSW	1,161,924	22,060	-1.9%
RESIDENTIAL ONLY	661,664	130,043	+21.8%
FY23			
ALL MSW	1,135,905	26,019	-1.02%
RESIDENTIAL ONLY	586,290	54,669	+1.1%
FY24			
ALL MSW	977,445	158,460	-13.95%
RESIDENTIAL ONLY	518,362	75,374	-12.08%
FY25			
ALL MSW	1,190,233	212,788	+19%
RESIDENTIAL ONLY	467,915	64,347	-13%

TABLE 7.2: S.C. Residential Recycling as a Percentage of Total MSW Recycled

FY21	FY22	FY23	FY24	FY25
45%	55%	51%	54%	39%

In FY25:

- **One county – Chesterfield** – met both the recycling rate goal – 50 percent or more MSW recycled – and the disposal rate of 3.25 p/p/d; and
- **Eighteen counties – Aiken, Allendale, Anderson, Berkeley, Chesterfield, Clarendon, Hampton, Jasper, Kershaw, Lancaster, Laurens, Lexington, Marion, Marlboro, McCormick, Pickens, Union and Williamsburg** – met the disposal rate goal of 3.25 pounds per person per day (p/p/d) or less.

Figure 7.3 highlights the counties that met the waste reduction goal.

Improving Solid Waste Management

SECTION 8

Recommendations for FY25

1 Complete a wide-ranging MSW characterization study. In the 35 years since the passage of the Act, SCDES has not conducted a detailed analysis of solid waste generated in South Carolina. Instead, it has relied on data collected by local governments, EPA and independent organizations.

Having a better understanding of what makes up South Carolina's waste is essential for statewide, regional and local planning. The study will identify the types and amounts of waste generated that will allow decision makers opportunities to:

- **Assess their programs;**
- **Explore ways to develop more efficient and cost-effective management practices;**
- **Identify infrastructure needs;**
- **Improve resource recovery;** and
- **Support recycling markets.**

The comprehensive analysis will not only include traditional recyclables (e.g., aluminum, cardboard, glass, paper, plastic, steel, tires, food waste), but under-addressed emerging waste streams such as C&D debris as well as newer commodities like solar panels and rechargeable batteries.

2 Complete a revision of the State Plan. Improperly managed solid waste poses a risk to human health and safety as well as the environment. The Act (Section 44-96-60) requires SCDES to develop and maintain a comprehensive State Plan to manage solid waste in an economically and environmentally responsible manner. In turn, county governments or regions must develop and maintain SWM plans consistent with the State Plan.

Although the Annual Report is an update of the current plan, a thorough revision of the State Plan has not been completed since 1999. The new plan will address the many changes impacting SWM including recent technologies, new commodities, population growth, economic development, recycling markets, landfill capacity, infrastructure needs and more.

The State Plan revision will be coordinated with the completion of the waste characterization analysis.

This two-step approach will provide South Carolina with information to plan smartly to address the next decade.

3 Maximize food waste reduction and recovery. Food waste is the No. 1 item disposed of in South Carolina's landfills. The impact is huge. Wasted food wastes resources. All labor, energy, water, land and other resources used to produce, package and move food from the farm to our plates are lost. In addition, wholesome food that could have helped families in need is lost. Lost, too, is the money spent to buy food that is never eaten. Food waste also wastes landfill space reducing the capacity (life expectancy) of the facilities.

Greater outreach efforts must occur to increase awareness of the economic, environmental and social impact of food waste through the Don't Waste Food SC campaign. SCDES and the S.C. Department of Education must increase efforts to minimize food waste at schools and to have share table. SCDES – in partnership with the S.C. Department of Commerce Recycling Market Development program and other stakeholders – must explore ways to grow organics recovery infrastructure.

4 Encourage and grow regionalization through the development of a hub-and-spoke infrastructure. This system features hubs (i.e., regional collection centers located in larger counties that prepare recyclables for market) and spokes (i.e., smaller programs that collect and deliver recyclables to the hub).

The system provides an opportunity to increase resource recovery and use limited grant funding (and other funding) more efficiently. With smaller populations, rural communities nationwide struggle to provide recycling services because of the low volume of recyclables collected. The hub-and-spoke system provides an opportunity to collect a specific recyclable and potentially reduce program costs. Hubs benefit through improved economies of scale – the consolidation of recyclables resulting in higher revenue.

In the short term, South Carolina, like many states, will face landfill capacity issues. Increased resource recovery will slow the need to build new landfills.

SCDES's Office of Solid Waste Reduction & Recycling

The Office of Solid Waste Reduction and Recycling (Office) continues to provide technical assistance and grant funding to local governments. Below is a list of the key programs and campaigns. For more information, visit des.sc.gov/recycle.

DON'T WASTE FOOD SC

(DWFSC) is a collaborative outreach public awareness campaign that brings together shareholders from the public and private sectors dedicated to reducing food waste in South Carolina.

The goals of the campaign are to:

- **Increase the awareness of the economic, environmental and social impacts** of wasted food;
- **Inspire individuals, communities, restaurants, schools and others** to take action to reduce food waste through **prevention** and **donation**; and
- **Cut food waste in half** in South Carolina by 2030.

For more information, visit des.sc.gov/dwfsc.

GREEN GOVERNMENT INITIATIVE

provides assistance to state agencies in order for them to lead by example and operate in an environmentally-responsible manner.

Services provided include:

- **Technical assistance to support, improve or expand state agency waste reduction and recycling programs;**
- **Signage, posters and other material to promote programs;**
- **Current information about recycled-content product vendors and state contracts;**
- **Quarterly newsletters and workshops;**
- **S.C. State Agency Recycling Professionals Certification;** and
- **Recognition** through an annual awards program.

RECYCLE RIGHT SC

focuses on one of the largest issues facing recycling – contamination in the recycling stream.

The campaign provides technical assistance and outreach material including artwork and messaging for billboards, cart stickers, door hangers, fliers and more for local government programs.

Please visit des.sc.gov/recyclerightsc for more information.

RECYCLE U offers free, non-regulatory services to colleges and universities in South Carolina that includes:

- **Site visits** to assess waste reduction, reuse and recycling successes and opportunities;
- **Technical assistance** including phone/email consultations, research and contacts for potential markets, service providers and beneficial reuse; and
- **The S.C. Collegiate Recycling Professionals Certification** and other workshops.

SMART BUSINESS RECYCLING PROGRAM is a free, voluntary program designed to:

- **Help South Carolina companies reduce the environmental impact** of their operations;
- **Provide technical assistance to help businesses begin or expand green practices** such as waste reduction, recycling, composting, energy and water conservation and environmentally preferred purchasing; and
- **Recognize businesses** for their recycling and sustainability efforts with an annual awards program.

Please visit des.sc.gov/smartbusiness to schedule a site visit, to participate in the program or for additional information.

(Continued on the follow page)

TAKE ACTION SC ENVIRONMENTAL EDUCATION PARTNERSHIP

is designed to inform, inspire and empower students and teachers to protect and preserve the environment. The program offers lessons, support material, teacher workshops and classroom presentations to promote composting, recycling, waste reduction, litter prevention and sustainability.

The centerpiece of the program is SCDES's "Action for a Cleaner Tomorrow: A South Carolina Environmental Curriculum Supplement." The partnership is comprised of Coastal Carolina University, Palmetto Pride, Keep South Carolina Beautiful, S.C. Energy Office and SCDES.

For more information, visit takeactionsc.org.

TAKE CHARGE! BE BATTERY

SMART is outreach campaign to raise awareness of both the safety concerns and the recycling opportunities for household batteries – especially rechargeable and button batteries. This campaign was developed by SCDES in partnership with the Recycled Materials Association (ReMA). Batteries can be a hidden household hazard. If improperly

installed, charged, stored, used, damaged or disposed of, some batteries can catch fire or explode, putting your family and others at risk. If swallowed, button and coin batteries can cause injuries and death.

Learn more at des.sc.gov/bebatterysmart.

GRANT PROGRAMS continue to be an integral part of the Office's services. The Office awards annual funding to S.C. local governments, schools and colleges/universities. In FY25, the grant program offered five types of grants totaling about \$4.3 million. See page 5 for more details.

Those grants included the following:

- **Solid Waste Grants** issued to 53 local governments for general recycling;
- **Waste Tire Grants** issued to 48 local governments for waste tire recycling expenses;
- **Used Oil Grants** issued to 53 local governments for expenses related to used oil recycling;
- **Collegiate Recycling Grants** included 10 grants to colleges and universities; and
- **Recycling Education Grants** issued to 55 K-12 schools.

Acknowledgments

The "S.C. Solid Waste Management Annual Report for Fiscal Year 2025" is published by SCDES's Office of Solid Waste Regulation Development, Planning, and Reporting. The report is submitted in compliance with the Act (S.C. Code of Laws § 44-96-60). In addition, Act 119 of 2005 mandates that agencies provide all reports to the General Assembly in an electronic format.
