## Fiscal Year 2017-18 Accountability Report

### SUBMISSION FORM

**AGENCY MISSION**

The mission of the Rural Infrastructure Authority (RIA) is to assist in financing qualified infrastructure projects that will protect public health, comply with environmental quality standards and support economic opportunities.

**AGENCY VISION**

Our vision is that communities will make the necessary investments in infrastructure to support economic opportunities that will lead to greater sustainability while protecting the quality of life.

Please select yes or no if the agency has any major or minor (internal or external) recommendations that would allow the agency to operate more effectively and efficiently.

	Yes	No
<b>RESTRUCTURING RECOMMENDATIONS:</b>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Please identify your agency's preferred contacts for this year's accountability report.

	<u>Name</u>	<u>Phone</u>	<u>Email</u>
<b>PRIMARY CONTACT:</b>	Bonnie Ammons	803-737-0226	bammons@ria.sc.gov

## **AGENCY’S DISCUSSION AND ANALYSIS**

### **INFRASTRUCTURE FINANCE PROGRAMS – SUMMARY OF EFFORTS AND RESULTS**

The SC Rural Infrastructure Authority (RIA) makes grant and loan financing available for qualified infrastructure (drinking water, sanitary sewer and storm water drainage facilities) statewide. By working in partnership with local communities, these financial investments are designed to address the key objectives of protecting public health, addressing environmental quality standards and preparing communities for economic opportunities. RIA assistance helps close financial gaps for areas in need of reliable infrastructure. In addition, RIA collaborates with stakeholders to identify and coordinate additional resources for infrastructure improvements.

This year a total of \$166 million in projects were approved through RIA’s grant and loan financing programs. See Figure 1: FY 18 Projects Funded by Location.

#### ***GRANT PROGRAMS***

Financial assistance is made available to eligible applicants (local governments, special purpose districts and public works commissions) annually through two competitive funding rounds. Funds are distributed through two program categories which align with the agency’s objectives:

- **Basic Infrastructure** – to address environmental concerns, public health issues and aging infrastructure needs.
- **Economic Infrastructure** – to provide reliable infrastructure serving new or existing businesses and expanding system capacity to support new jobs and economic development opportunities.

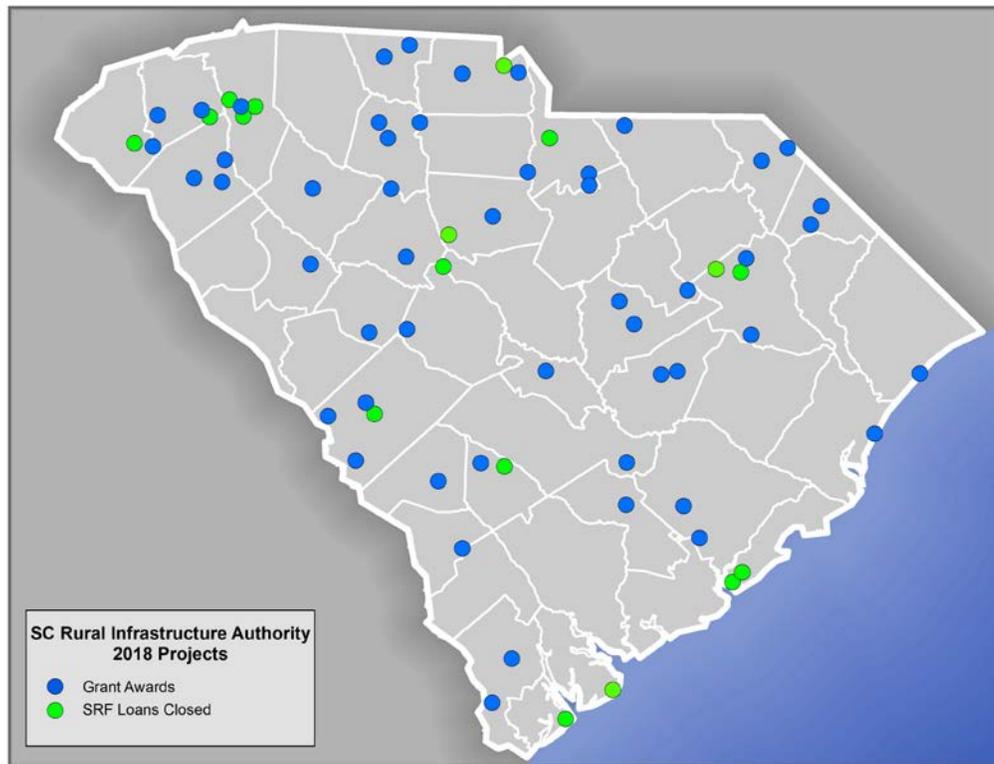

Qualified projects are selected by the Board based on a comparative analysis of need, feasibility and impact and all applicants are notified of the results. Technical assistance is provided to applicants whose projects are not funded.

#### ***SUMMARY OF RESULTS:***

- The RIA’s Board of Directors (Board) approved 51 new grants totaling \$22.3 million.
- The grants awarded will impact more than 72,000 residential and business customers and are expected to result in 993 new jobs from announced economic development projects.
- 64% of projects funded were located in distressed or least developed areas
- Approximately 75% of funds awarded were for basic infrastructure needs to address health and environmental quality concerns while 25% will be used to build or improve infrastructure to support economic opportunities.
- RIA funds leveraged more than \$67.5 million dollars from local and other resources for infrastructure.

Since 2013, 413 applications totaling over \$154 million in funding requests were received and 251 projects totaling more than \$96 million were awarded. RIA funds have been matched by \$337 million in additional infrastructure investments. Further, as a result of RIA assisted public infrastructure improvements, 7,500 jobs are expected to be created by announced economic development projects. These projects benefit communities by making reliable infrastructure available to residential and business customers as well as improving the quality of life, increasing community sustainability and boosting opportunities for economic impact.

**FIGURE 1: FY 18 PROJECTS FUNDED BY LOCATION**

**STATE REVOLVING LOAN FUNDS PROGRAM**

Low cost loan financing is provided through two federally capitalized State Revolving Funds (SRF) for Drinking Water and Clean Water (sewer). The SRF has been annually capitalized by the US Environmental Protection Agency (EPA) since 1989. The state program is administered jointly with the SC Department of Health and Environmental Control (DHEC). DHEC prioritizes projects, handles the technical aspects of the program and ensures compliance with EPA requirements. The RIA’s Office of Local Government (OLG) manages the financial component including credit reviews, loan agreements, closings and disbursement of funds as well as loan repayments and administration.

**SUMMARY OF RESULTS:**

- \$143.7 million in loans closed.  
(Second consecutive year with over \$100 million loans closed - first time in 30 year program history.)
- \$115 million in loan disbursements (highest level in program history and 37% increase over last year.)
- \$50.6 Million in loan repayments.
- \$1.1 Billion current loan portfolio.
- 12% growth in outstanding balances (highest rate of growth since 2006.)

The SRF program’s Office of Local Government was transferred to RIA in 2015. Nearly \$350 million in loans have been closed for major water, wastewater and storm water improvements since 2015. An improved economy, affordable interest rates and terms coupled with efforts to increase fund utilization have led to an all-time high level of demand for program resources. These results are due to expanded staff capabilities as well as enhanced outreach and coordination. Nearly a quarter of this year’s borrowers are new to the program. Such efforts have helped to establish a pipeline of infrastructure projects with access to affordable financing.

<b>AGENCY NAME:</b>	<b>Rural Infrastructure Authority</b>		
<b>AGENCY CODE:</b>	<b>P45</b>	<b>SECTION:</b>	<b>054</b>

***OUTREACH AND TECHNICAL ASSISTANCE EFFORTS***

One of the RIA’s strategies is to serve as a resource for communities, whether the need is for technical or financial assistance. Information about all available resources is communicated to stakeholders through electronic outreach, workshop presentations and other media. Four workshops for the grant and loan programs were held during the year with a total of 291 participants. In addition, one-on-one project development assistance is provided to potential grant applicants while current recipients receive help with administration and management of approved grants. While there will be an ongoing need for training, the number served through this type of assistance may become less as familiarity with the programs increase.

A customer satisfaction survey of the grant program was conducted this year and the user-friendliness of the program as well as the value of staff assistance received the highest ratings. (In all cases the average score was between 4.3 and 4.7 on a 5 point scale with 5 being the highest rating.)

**FACTORS IMPACTING PERFORMANCE AND FUTURE PLANS**

Because applications are generated at the local level, performance measures can be impacted by the number, type, location and quality of application requests that are received annually. Similarly, although it is recognized that leveraging increases overall impact, there is limited ability for distressed areas to generate additional local funding for infrastructure.

Since the agency began operating in 2012, the General Assembly expanded its ability to address infrastructure needs statewide and to provide grant and loan financial assistance. The RIA will continue its efforts to target technical assistance and capacity building efforts to rural, small and disadvantaged communities. RIA helps to identify affordable infrastructure solutions and works to leverage other resources. This increases the impact and promotes greater affordability and sustainability. RIA will continue to work with the SC Department of Commerce and other partners on ways to improve infrastructure capacity and boost economic opportunities particularly in the state’s rural areas.

RIA organized its measures slightly differently this year in order to eliminate previous duplication in the Strategic Planning Template for 2018-19.

**RISK ASSESSMENT AND MITIGATION STRATEGIES**

One of the biggest areas of concern for customers statewide is the deterioration of aging infrastructure systems. Much of the existing infrastructure is at least 50 years old and has reached the end of its useful life. The quality of life for residential customers depends on the availability of safe and affordable drinking water and sanitary sewer. Businesses need reliable infrastructure to thrive and grow. A lack of resources is the reason many communities are unable to properly operate and maintain the water, sewer and drainage systems that serve residents and businesses. Limited resources mean that budgets are stretched thin to cover necessary capital improvements. A delay in making the required investments can result in higher costs, business and service disruptions and increased health and environmental risks. Thus, access to reliable and affordable infrastructure serves as an important quality of life concern for protecting public health, improving environmental quality and encouraging economic opportunities. Significant investments will be needed to ensure that there is adequate capacity for future economic growth.

<b>AGENCY NAME:</b>	<b>Rural Infrastructure Authority</b>		
<b>AGENCY CODE:</b>	<b>P45</b>	<b>SECTION:</b>	<b>054</b>

Three key factors can help stretch the impact of limited resources: (1) Leveraging federal and state infrastructure finance programs with local funds; (2) developing partnerships with other funders and organizations to maximize coordination and provide technical assistance; and (3) promoting and encouraging the use of regional solutions whenever possible.

The RIA staffs the SC Infrastructure Funders Coordinating Committee, which is comprised of representatives from federal and state agencies. The Committee meets on a regular basis to address funding gaps and fund joint projects, share best practices and provide coordinated technical assistance to potential applicants. Representatives include the RIA, SC Department of Commerce, SC Department of Health and Environmental Control, US Department of Agriculture - Rural Development, and the US Department of Commerce - Economic Development Administration. It should be noted that the other funding sources involve federal programs with complex procedures and requirements. The State-funded RIA grant program provides the most flexible resource that can plug gaps in financing and bridge procedures so that these programs can be implemented together in the most efficient and effective manner.

RIA also works to develop partnerships with local government, water and sewer organizations as well as financial and technical groups to address growing infrastructure needs and enhance local capacity to manage existing assets in a sustainable manner. By taking a collaborative approach, limited resources can be leveraged and maximized for the greatest return on investment. Another way to maximize resources is by encouraging regional solutions and partnerships, whenever feasible. When two or more communities can work collaboratively to provide water and sewer services, there can be greater economies of scale operationally and more opportunities to serve customers in the most efficient and effective manner while protecting scarce environmental resources.

***RESTRUCTURING RECOMMENDATIONS: NONE***

**AGENCY ORGANIZATION**

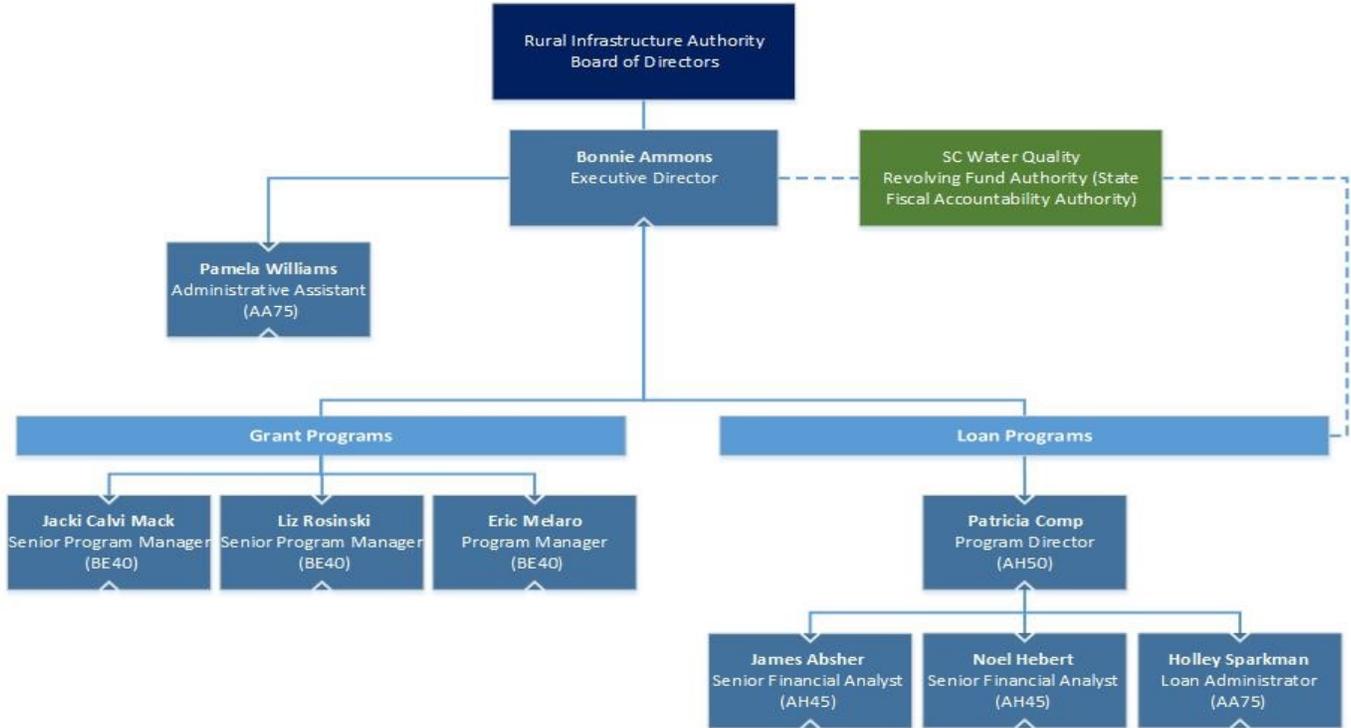

The RIA is governed by a Board of Directors (Board) that includes six members who reside in or represent distressed and/or least developed counties. The Secretary of the SC Department of Commerce serves as Chairman. Through a strategic planning process, the Board develops an annual strategy for addressing infrastructure needs. The Board establishes programs, sets priorities, selects qualified projects to receive grant funds and reviews performance.

RIA staff is organized by grant and Loan programs. The Office of Local Government, operates the financial and loan components of the State Revolving Funds (SRF) for Drinking Water and Clean Water (sewer). The SC Water Quality Revolving Fund Authority (State Fiscal Accountability Authority) oversees SRF financial program policies.

The RIA has an Executive Director and eight full time staff (See Figure 3: Organizational Chart). In order to foster administrative collaboration, RIA contracts with the SC Department of Commerce to provide office space, legal, financial and human resources services. This agreement allows for more efficient use of staff and resources available to the RIA.

An audit of the RIA’s FY2018 operations revealed no findings.
