**AGENCY’S DISCUSSION AND ANALYSIS**

The S.C. Department of Health and Environmental Control (DHEC) has undergone tremendous transformation during the past several years, including *a new executive leadership team, new priorities and a new approach to the way we do business*. This includes recently enhancing our [strategic plan](#) to better guide our more than 3,400 employees in fulfilling our vision of ***healthy people living in healthy communities***.

The minor revisions to the agency’s strategic plan clarify our intent and lay out the essential goals and initiatives that will enable us to meet our mission and vision. With our core values of ***embracing service, inspiring innovation, promoting teamwork and pursuing excellence*** always at the forefront, DHEC remains committed to ***improving the quality of life for all South Carolinians by promoting and protecting the health of the public and the environment***. In support of this ongoing effort, DHEC Director Rick Toomey has set forth the following three top priorities for the agency:

1. **Retention** – Engaging and developing our people
2. **Recruitment** – Growing the capacity of our skilled, productive workforce
3. **Reputation** – Upholding our agency’s mission, vision and values

These priorities align with our agency’s strategic plan and are intended to guide us closer to our aspiration of becoming a preferred public sector employer. Doing this will require us to continue to look at ways that we can better develop and recruit a skilled, productive workforce. This includes remaining steadfast in our commitment to our strategies, which outline DHEC’s ambitious and overarching goals.

**AGENCY STRATEGIES:**

- **Education and Engagement:** Engage our team members, stakeholders and communities by providing them access to relevant and timely information and education to improve quality of life and health outcomes.
- **Science in Action:** Utilize sound science, quality data and analytical processes to make fully informed, well-reasoned decisions that instill trust and confidence in the agency’s expertise and decision-making capabilities.
- **Leadership and Collaboration:** Collaborate with our partners, contribute expertise and lead efforts to establish a strong public health system that advances health and environmental protection on a state, regional and national level.
- **Service and Accessibility:** Facilitate access to and delivery of dependable, timely, professional and culturally appropriate services to meet the needs of communities and our partners.
- **Operational Excellence:** Develop our people, strengthen our processes and invest in our technology to support a high-performance organization and a culture of continuous improvement.

The examples shared throughout this report—from our response to Hurricane Florence to pursuing public health accreditation—spotlight how deeply committed DHEC is to continuous improvement and serving South Carolina.

### **DHEC BY THE NUMBERS**

Our team’s talents and dedication to public service improve the lives of South Carolinians every day. The agency performs countless important functions impacting nearly every citizen of our state. Our day-to-day activities are extensive. Here's a snapshot of what "business as usual" looks like for DHEC:

- In FY 2018, we had **650,778 clinical client encounters** in our local health departments, including:
  - 473,597 Women, Infant and Children (WIC) visits
  - 134,330 Preventive Health visits
  - 42,851 Immunization visits
- Our infectious disease experts investigated a total of **684 acute disease outbreaks** in 2018. During this time period, our staff also received and reviewed **41,650 reports of acute diseases** (including laboratory reports and morbidity reports).
- In 2018, more than **2.6 million laboratory tests** were performed by our Public Health Laboratory, including the evaluation of **429 clinical isolates** for enhanced multi-drug antibiotic resistance.
- In FY 2018, more than **103,150 birth and death records** were filed, and approximately **323,536 requests** for birth and death records were received.
- In FY 2018, our Environmental Affairs team conducted over **61,000 inspections**, covering programs as diverse as recreational waters, underground storage tanks and air quality.
- During this time, Environmental Affairs also managed more than **47,500 active environmental permits** for asbestos projects, private wells, septic tanks, industrial storm water general permits, mines and more.
- In addition, our Bureau of Environmental Health Service team responded to and investigated **11,000 complaints**, ranging from rabies exposures to open burning to emergency response spills and more.
- During FY 2018, our Health Regulation team conducted **10,000 inspections and investigations** of health facilities, providers and equipment. Other notable numbers for Health Regulation are:
  - **4,509 new prescription monitoring program (PMP) users** registered
  - **1,415,736 PMP patient queries** during June 2019, which is a **19% increase** from the 1,194,000 PMP patient queries during June 2017
  - **4,086 law enforcement officers** trained to carry and administer naloxone to combat opioid overdoses
  - 83 Certificate of Need (CON) decisions issued

### **EVENT RESPONSE**

DHEC continually prepares to respond to events that may impact the health of the public and the environment. The agency is proud of our successful response to both routine and extraordinary events, including Hurricane Florence, a statewide Hepatitis A outbreak and support of the Governor’s efforts to end opioid abuse in South Carolina.

### **HURRICANE FLORENCE**

Before Hurricane Florence made landfall in the Carolinas, DHEC began preparations for the storm's anticipated long-lasting rainfall and Category 4-force winds. **More than 750** members of DHEC's team were dispatched to communities across our state as part of South Carolina's **28-day, around-the-clock** storm response.

<b>AGENCY NAME:</b>	<b>Department of Health and Environmental Control</b>		
<b>AGENCY CODE:</b>	<b>J040</b>	<b>SECTION:</b>	<b>034</b>

During the storm, the agency worked tirelessly to ensure **131 health care facilities**, including 17 hospitals, were medically evacuated safely. DHEC also opened **14 Special Medical Needs Shelters (SMNS)**, housing a **record 163 shelterees** whose needs exceeded the capabilities of General Population Shelters. To support the safety of these and other individuals, DHEC **facilitated transport for more than 6,000 patients and caregivers to SMNS and hospitals statewide**. In addition, our call centers fielded **more than 8,400 calls** assisting the public.

As part of the agency's preparation for and response to Hurricane Florence, DHEC's Dam Safety Program once again demonstrated the remarkable improvements it has made in its response capabilities. Before and during the storm, the program deployed its CodeRED alert system multiple times to notify **more than 2,000 dam owners** via voice call, text messages and email. Dam owners were urged to evaluate their water levels and coordinate lowering levels with other owners downstream in order to avoid possible flooding. The team also assessed **262 dams prior to the storm** and monitored all identified high-risk dams. Following the significant impacts of Hurricane Florence, the agency partnered with the U.S. Army Corps of Engineers to conduct post-storm assessments of **265 regulated dams**. Of those dams, 11 were confirmed to have breached as a result of the storm, and one emergency order was issued.

### **HEPATITIS A OUTBREAK**

In May 2019, DHEC defined the increasing spread of hepatitis A cases in Aiken County and other parts of South Carolina as a statewide outbreak. This includes initially establishing a hepatitis A task force, and more recently moving to a partial Incident Command Structure to coordinate statewide efforts to control the spread of the disease. These efforts were focused on increasing vaccination rates among high-risk groups, building partnerships critical to reaching those high-risk groups and conducting extensive public outreach and education efforts.

DHEC continues to respond to reports of hepatitis A cases, with a case count of **283 individuals** as of August 8, 2019. In addition, our Public Health team is currently offering no-cost hepatitis A vaccines to individuals who are drug users, homeless, men who have sex with men and those with a recent history of incarceration. Similarly, outreach and vaccine efforts continue. To date, DHEC has performed **471 outreach activities** to venues where at-risk populations reside and administered **6,961 doses of hepatitis A vaccine**.

### **LEON PROGRAM & PRESCRIPTION MONITORING PROGRAM**

In December 2017, DHEC joined Governor Henry McMaster's Opioid Emergency Response Team in a united front to end opioid abuse in South Carolina. As part of this effort, we continued to work alongside the S.C. Department of Alcohol and Other Drug Abuse Services (DAODAS) and other key stakeholders to address awareness, prevention and treatment of the use and misuse of opioids.

Starting as an unprecedented collaborative effort between the Fifth Circuit Solicitor's Office, DAODAS and DHEC, the Law Enforcement Officer Naloxone (LEON) program consists of training, educating and equipping law enforcement officers to carry and administer the opioid antidote Naloxone to victims of a suspected opioid overdose. The success of LEON is due to the extensive collaboration with multiple agencies to solve a part of the opioid crisis. To date, **240 Law Enforcement Officer agencies** have joined the program, over **9,300 officers have been trained** and **891 lives have been saved**. The program currently has a presence in every county, and is comprised of local police departments, sheriff offices or state troopers.

Additionally, our agency's Bureau of Drug Control is leveraging the effectiveness of its prescription monitoring program, known as SCRIPTS (South Carolina Reporting & Identification Prescription Tracking System) to further intensify efforts to combat opioid abuse. During FY 2018, we registered **4,509 new prescription monitoring program users**. We also worked with several facilities and pharmacies to successfully integrate monitoring reports directly into the electronic health record systems and pharmacy dispensing systems. Since August 2017,

<b>AGENCY NAME:</b>	<b>Department of Health and Environmental Control</b>		
<b>AGENCY CODE:</b>	<b>J040</b>	<b>SECTION:</b>	<b>034</b>

DHEC has issued quarterly prescriber cards to more than **8,000 practitioners** who prescribe opioids to inform them about certain prescribing trends and specialty comparisons. We expect these numbers to continue to increase for 2019 as more practitioners and pharmacists use SCRIPTS.

**AGENCY ACCOMPLISHMENTS AND CHALLENGES**

As part of our effort to be the preeminent state public health and environmental protection agency in the nation, we remain committed to building and sustaining our talented team, reinvesting in our infrastructure and strengthening our partnerships across the state. We face challenges but are focused on tackling each one of these opportunities, some of which are discussed below.

**RURAL WATER SYSTEMS**

Access to safe drinking water is essential to human health. DHEC administers and enforces drinking water quality standards and regulations, working with public water systems to keep our drinking water safe. South Carolina's water systems have a very high (98%) overall compliance with all chemical and biological drinking water standards and federal lead action levels. Meanwhile, nearly one-third of our state's population is currently served by either small rural water systems or private wells.

As South Carolina continues to expand, the health of our rural communities and their drinking water will rely on our collective ability to meet the needs of our small water systems and private well owners. To identify and address these unique challenges, DHEC created the Office of Rural Water to facilitate collaboration between rural water systems, DHEC, regional service providers and other partners. In 2018, our Office of Rural Water participated in training sessions hosted by the South Carolina Rural Water Association that aimed to further enhance rural operators' knowledge of South Carolina water and wastewater regulations. These trainings gave us the necessary tools to further utilize partnerships with external stakeholders and assist rural communities. In addition, we engaged with numerous communities about technical or financial assistance opportunities and targeted efforts to provide much-needed outreach to local schools on water quality issues such as disinfection by-products, microbial growth and lead in drinking water.

**PUBLIC HEALTH ACCREDITATION**

As part of DHEC's commitment to continuous improvement, the agency is currently preparing to participate in a voluntary national public health accreditation (PHA) process to enhance our customer service and public health standards. This includes completing, for the first-time ever in South Carolina, a State Health Assessment and State Health Improvement Plan, with the involvement of multiple partners from across the state. Obtaining PHA will improve the agency top to bottom and set the agency apart from other state government organizations. The accreditation process will measure DHEC's performance against nationally recognized standards and launch the agency on a course to continually develop, revise and improve its public health standards. Developing a culture of continuous improvement will include developing employees, strengthening processes and investing in technology to support a high-performing organization. We are currently in the pre-application phase of accreditation. Over 100 staff members from across the agency have helped review the elements required for PHA and begun to take steps to address any major gaps in our policies, procedures and processes. Given the work still to be done, it is likely the agency will not submit its application until the second quarter of the 2019 State FY, with the earliest possible accreditation award anticipated in late 2020.

**TALENT RECRUITMENT AND EMPLOYEE RETENTION**

DHEC, like many government agencies, is facing an upcoming wave of employee retirements as more than a third of the agency's workforce is eligible to retire within the next three to five years. Meanwhile, **42 percent of employees** have been with the agency less than five years. Succession planning, knowledge transfer, recruiting and employee retention are critical success factors for the agency moving forward. To prepare for anticipated staff attrition, we are aggressively working to implement several succession planning,

<b>AGENCY NAME:</b>	<b>Department of Health and Environmental Control</b>		
<b>AGENCY CODE:</b>	<b>J040</b>	<b>SECTION:</b>	<b>034</b>

recruiting and retention initiatives designed to make DHEC the premier employer in South Carolina. This includes:

- Working with the S.C. Department of Administration to obtain increased hiring salary ranges for key positions to compete with the private sector
- Hiring a recruiting and talent management director and talent acquisition manager to develop the agency’s recruiting and retention strategy and position-focused succession plan
- Hiring a workforce development manager to build the public health competency and capacity of DHEC’s workforce, improve retention, oversee the agency’s student placement program and increase organizational alignment
- Implementing a comprehensive, electronic talent management system that includes modules for succession planning, onboarding and performance review
- Piloting a position-based succession plan that will focus on critical roles that are occupied by retirement eligible employees and other critical positions that could impact business operations

In addition, with the end of the Teacher & Employee Retention Incentive (TERI) Program in sight for all state agencies and state employees, DHEC began hosting an annual career fair in 2017 to boost recruiting of critical jobs and recognition of the agency within the community. After increasing attendance by **38 percent** in March 2018, we engaged other state government agencies to build upon the success of the career fair. In 2019, **four additional agencies** joined DHEC to create the State Government Career Fair: Department of Corrections, Department of Social Services, Department of Health and Human Services and Office of State Human Resources.

**ADDITIONAL INFORMATION**

*I. Risk Assessment and Mitigation Strategies:*

DHEC continues the process of implementing agency-wide risk assessment tactics and developing appropriate mitigation strategies. If DHEC does not accomplish its goals and objectives, risks categorized at the highest level could have a substantial impact on public health and the environment in South Carolina. Examples include: disease outbreak; environmental contamination; increased mortality; decreased or delayed medical care and diagnosis; increased medical costs; decreased oversight; and the inability to respond to a public health or environmental disaster.

Strategies to address the above impacts include partnering with other agencies and private entities whose missions and vision align with the examples outlined above. State partnership examples include: hospitals and physicians; medical associations; Rural Infrastructure Authority for water and sewer; Clemson Extension Service for food safety; S.C. Department of Health and Human Services for public health; S.C. Department of Natural Resources for environmental affairs; S.C. Emergency Management Division for emergency preparedness and response; and state colleges/universities for laboratories. Additional state health and environmental agencies and laboratories are available as needed. Federal assistance could potentially be provided through U.S. Environmental Protection Agency, Centers of Disease Control, Federal Emergency Management Agency, National Regulatory Commission, U.S. Health and Human Services and U.S. Department of Agriculture.

*II. Restructuring Recommendations:*

At this time, DHEC does not have any additional recommendations.

Yes	Yes	Other service or product our agency must/may provide	The Department licenses onsite wastewater system master contractors.
239	R. 61-58	State	Regulation	State Primary Drinking Water Regulations - provides standards and procedures for the maintenance of reasonable standards of purity of drinking water in the state.	No	No - But relates to sources of funding for one or more agency deliverables		
240	R. 61-58.1	State	Regulation	Construction and Operating Permits - provides requirements for permits to construct and operate a drinking water system.	Yes	Yes	Other service or product our agency must/may provide	Establishes procedures for obtaining construction and operational permits from the Department.
241	R. 61-58.2	State	Regulation	Groundwater Sources and Treatment - provides for regulation specific to groundwater sources of drinking water.	Yes	Yes	Other service or product our agency must/may provide	This regulation applies to all new construction and all expansions or modifications of existing public water systems. If the Department can reasonably demonstrate that safe delivery of potable water to the public is jeopardized, a system may have to upgrade
242	R. 61-58.3	State	Regulation	Surface Water Sources and Treatment - provides for regulation specific to surface water sources of drinking water.	Yes	Yes	Other service or product our agency must/may provide	This regulation applies to all new construction and all expansions or modifications of existing public water systems. If the Department can reasonably demonstrate that safe delivery of potable water to the public is jeopardized, a system may have to upgrade
243	R. 61-58.4	State	Regulation	Finished Water Pumping, Storage, and Distribution Facilities - provides for regulation of specific drinking water system facilities.	Yes	Yes	Other service or product our agency must/may provide	Pertains to permitting and operation of finished water pumping, storage, and distribution facilities.

244	R. 61-58.5	State	Regulation	Maximum Contaminant Levels in Drinking Water - adopts EPA standard for maximum contaminant levels in drinking water for various harmful constituents.	No		No - But relates to manner in which one or more agency deliverables is provided		
245	R. 61-58.6	State	Regulation	Reports, Record Retention, and Public Notification - establishes requirements for water system operators to report to the Department, to maintain records, and notify the public under specified circumstances.	No		No - But relates to manner in which one or more agency deliverables is provided		
246	R. 61-58.7	State	Regulation	Operation and Maintenance - provides operation and maintenance requirements for all public water systems.	No		No - But relates to manner in which one or more agency deliverables is provided		
247	R. 61-58.8	State	Regulation	Emergency Procedures - establishes the minimum requirements that must be met by all public water systems prior to, during, and after an emergency.	No		No - But relates to manner in which one or more agency deliverables is provided		
248	R. 61-58.9	State	Regulation	Variations and Exemptions - provides authority to issue variations and exemptions from primary drinking water regulations under limited circumstances no less stringent than the federal Safe Drinking Water Act.	Yes	Yes		Other service or product our agency must/may provide	Establishes the conditions and standards upon which the Department may issue a variance and exemption from the requirements of the primary drinking water regulations.
249	R. 61-58.10	State	Regulation	Filtration and Disinfection - establishes criteria and requirement for filtration and disinfection of drinking water served to the public.	Yes		No - But relates to manner in which one or more agency deliverables is provided		
250	R. 61-58.11	State	Regulation	Control of Lead and Copper - establishes corrosion control and other treatment techniques for drinking water systems.	Yes		No - But relates to manner in which one or more agency deliverables is provided		
251	R. 61-58.12	State	Regulation	Consumer Confidence Reports - establishes minimum criteria for annual reports from community water systems to their customers.	Yes		No - But relates to manner in which one or more agency deliverables is provided		
252	R. 61-58.13	State	Regulation	Disinfectant Residuals, Disinfection Byproducts, and Disinfection Byproduct Precursors (Stage 1 Disinfectants and Disinfection Byproducts Rule) - Establishes criteria and requirements for the control of disinfectants, disinfection byproducts, and disinfection byproduct precursors for water systems.	Yes		No - But relates to manner in which one or more agency deliverables is provided		
253	R. 61-58.14	State	Regulation	Initial Distribution System Evaluations - establish monitoring and other requirements for identifying compliance monitoring locations specified in 61-58.15.	Yes		No - But relates to manner in which one or more agency deliverables is provided		
254	R. 61-58.15	State	Regulation	Stage 2 Disinfection Byproducts Requirements - establishes additional criteria for control of disinfectants and byproducts.	Yes		No - But relates to manner in which one or more agency deliverables is provided		
255	R. 61-58.16	State	Regulation	Ground Water Rule - establishes additional requirements for all public water systems that use ground water except that it does not apply to public water systems that combine all of their ground water with surface water or with ground water under the direct influence of surface water prior to treatment.	Yes		No - But relates to manner in which one or more agency deliverables is provided		
256	R. 61-58.17	State	Regulation	Revised Total Coliform Rule - establishes limitation on total coliform in water systems.	Yes		No - But relates to manner in which one or more agency deliverables is provided		
257	R. 61-62	State	Regulation	Air Pollution Control Regulations and Standards - sets forth standards and procedures for maintaining reasonable air quality; specific standards and requirements set forth in R. 61-62.1 through 61-62.99.	Yes	Yes		Other service or product our agency must/may provide	The Air Pollution Control Regulations and Standards as a whole include a range of permitting, reporting, standard-setting and other services that may or must be provided by the Department.
258	R. 61-62.1	State	Regulation	Definitions and General Requirements - establishes definitions used throughout Regulation 61-62 inclusive of standards; sets forth construction and operating permit requirements, emissions inventory reporting requirements, source test requirements, and credible evidence standard.	Yes	Yes		Other service or product our agency must/may provide	Department to issue construction, operating, and registration permits; Department may grant extensions upon a showing that extension is justified; Department to create list of exemptions and make permit exemption determinations; Department to carry out required public participation procedures.
259	R. 61-62.2	State	Regulation	Prohibition of Open Burning - establishes regulatory limitations on open burning of materials.	Yes	Yes		Other service or product our agency must/may provide	Department to give prior approval before certain types of open burning may be conducted

260	R. 61-62.3	State	Regulation	Air Pollution Episodes - establishes criteria for declaration of air pollution "episodes" by the DHEC Commissioner; designates requested or required actions in response to pollution "episodes" depending on the episode level; requires plants located in a nonattainment area that emit 100 tons per year or more of a single pollutant to submit written plans for meeting required pollutant reductions.	Yes	Yes	Other service or product our agency must/may provide	Department to declare air pollution episodes based on specified criteria
261	R. 61-62.4	State	Regulation	Hazardous Air Pollution Conditions - establishes requirements for curtailment of any hazardous conditions presenting an imminent threat to health; prohibits emissions that create a traffic hazard on public roads; includes emergency, cleanup, and notice provisions to address imminently hazardous levels.	No	No - Does not relate directly to any agency deliverables		
262	R. 61-62.5	State	Regulation	Air Pollution Control Standards (inclusive of Standards 1-8 below) - establish limitations on discharges to the ambient air of specific constituents and on discharges to ambient air from specified types of operations.	Yes	Yes	Other service or product our agency must/may provide	See below descriptions for each of the specific standards regarding services that the Department may or must provide.
263	R. 61-62.5, Standard No. 1	State	Regulation	Emissions from Fuel Burning Operations - sets forth emission limits and requirements for fuel-burning operations, including restrictions on visible emissions, particulate matter, sulfur dioxide, and opacity; See R 61-62.5.	Yes	Yes	Other service or product our agency must/may provide	Department to review requests for exemptions from specified monitoring requirements.
264	R. 61-62.5, Standard No. 2	State	Regulation	Ambient Air Quality Standards - specifies primary and secondary ambient air quality standards for South Carolina, as well as methods for determining compliance; See R 61-62.5.	No	No - Does not relate directly to any agency deliverables		
265	R. 61-62.5, Standard No. 3	State	Regulation	Waste Combustion and Reduction - sets forth emission limits and requirements for sources that burn any waste other than virgin fuel; See R 61-62.5.	Yes	No - Does not relate directly to any agency deliverables		
266	R. 61-62.5, Standard No. 3.1	State	Regulation	Hospital, Medical, Infectious Waste Incinerators - sets forth emission limits and requirements for devices that combust hospital/medical/infectious waste; See R 61-62.5.	Yes	No - Does not relate directly to any agency deliverables		
267	R. 61-62.5, Standard No. 4	State	Regulation	Emissions from Process Industries - sets forth emission limits and requirements for specified industries; See R 61-62.5.	Yes	Yes	Other service or product our agency must/may provide	Department to review requests for exemptions from specified monitoring requirements.
268	R. 61-62.5, Standard No. 5	State	Regulation	Volatile Organic Compounds - sets forth standards and requirements for specified types of plants that have total potential emissions of VOCs above 550 pounds in one day or 150 pounds in any one hour; See R 61-62.5.	Yes	Yes	Other service or product our agency must/may provide	Department to review petitions for relief from the requirements of the regulation and petitions for alternative controls.
269	R. 61-62.5, Standard No. 5.2	State	Regulation	Control of Oxides of Nitrogen (NOx) - sets forth standards for specified sources of NOx that have not undergone a Best Available Control Technology analysis for NOx; See R 61-62.5.	Yes	Yes	Other service or product our agency must/may provide	The Department may consider exemptions on a case-by-case basis and may review requests for an alternate control limitations.
270	R. 61-62.5, Standard No. 7	State	Regulation	Prevention of Significant Deterioration - sets forth requirements applicable to the construction of a new major stationary source or major modification in an attainment or unclassifiable area; See R 61-62.5.	Yes	Yes	Other service or product our agency must/may provide	The Department reviews permit applications and issues Prevention of Significant Deterioration permits. Department makes BACT determinations.
271	R. 61-62.5, Standard No. 7.1	State	Regulation	Nonattainment New Source Review - sets forth requirements applicable to the construction of a new major stationary source or major modification in a nonattainment area; See R 61-62.5.	Yes	Yes	Other service or product our agency must/may provide	The Department reviews permit applications and issues nonattainment new source review permits. Department may approve the use of actuals PALs.
272	R. 61-62.5, Standard No. 8	State	Regulation	Toxic Air Pollutants - sets forth requirements for sources of toxic air pollutants; See R 61-62.5.	Yes	Yes	Other service or product our agency must/may provide	Department to prepare Air Quality Modeling Guidelines to provide assistance to facilities concerning compliance demonstrations and modeling issues. Department may also provide modeling assistance to small business stationary sources.
273	R. 61-62.6	State	Regulation	Control of Fugitive Particulate Matter - establishes requirements to control fugitive particulate matter.	No	Yes	Other service or product our agency must/may provide	The Department determines good dust control practices and recognized and generally accepted methods of controlling fugitive particulate matter.
274	R. 61-62.7	State	Regulation	Good Engineering Practice Stack Height - limits credit available based on stack height in setting source emission limits and calculating air quality impacts; requires Good Engineering Practice stack height for sources requiring modeling and prohibits credit for dispersion techniques.	Yes	Yes	Other service or product our agency must/may provide	The Department must notify the public of the availability of the demonstration study for any source whose emission limitation is based on a GEP stack height that exceeds specified levels, and the Department must provide an opportunity for a public hearing.
275	R. 61-62.60	State	Regulation	S.C. Designated Facility Plan and New Source Performance Standards - incorporates 40 CFR Part 60 federal performance standards for new and existing sources of air pollution.	No	No - Does not relate directly to any agency deliverables		
276	R. 61-62.61	State	Regulation	National Emission Standards for Hazardous Air Pollutants - incorporates 40 CFR Part 61 federal emission standards for hazardous air pollutants.	No	No - Does not relate directly to any agency deliverables		

277	R. 61-62.63	State	Regulation	National Emission Standards for Hazardous Air Pollutants (NESHAP) for Source Categories - sets forth emission standards for hazardous air pollutants for source categories.	Yes	Yes	Other service or product our agency must/may provide	Department to issue a case-by-case MACT determinations and provide related notices in response to applications submitted by sources seeking to construct or reconstruct major source of hazardous air pollutants; Department to provide EPA a copy of any final Notice of MACT Approval and prepare a summary for inclusion in the MACT database.
278	R. 61-62.68	State	Regulation	Chemical Accident Prevention Provisions - sets forth requirements to prevent the accidental release of regulated substances or other extremely hazardous substances into the air.	Yes	Yes	Other service or product our agency must/may provide	Department must include certain permit conditions for sources subject to both R. 61-62.68 and R. 61-62.70. Department will conduct completeness checks, source audits, record reviews, or facility inspections to ensure compliance. Department will initiate enforcement action as appropriate.
279	R. 61-62.70	State	Regulation	Title V Operating Permit Program - establishes comprehensive state air quality permitting systems consistent with the requirements of Title V of the Clean Air Act.	Yes	Yes	Other service or product our agency must/may provide	The Department will make applicability determinations upon written request. The Department will review permit applications and issue Title V operating permits. The Department must provide required notice to parties, the public, EPA, and affected states
280	R. 61-62.72	State	Regulation	Acid Rain - adopts and incorporates by reference 40 CFR Part 72 regulating acid rain.	Yes	No - Does not relate directly to any agency deliverables		
281	R. 61-62.96	State	Regulation	Nitrogen Oxides (NOx) Budget Program - implements NOx budget program regulations pursuant to EPA NOx SIP Call.	No	No - Does not relate directly to any agency deliverables		
282	R.61-62.97	State	Regulation	Cross-State Air Pollution Rule (CSAPR) Trading Program - incorporates CSAPR NOx Annual and SO2 Group 2 trading programs and budgets.	Yes	No - Does not relate directly to any agency deliverables		
283	R. 61-62.99	State	Regulation	Nitrogen Oxides (NOx) Budget Program Requirements for Stationary Sources Not in the Trading Program - sets forth requirements applicable to Portland cement kilns not covered in the R. 61-62.96 trading program.	Yes	No - Does not relate directly to any agency deliverables		
284	R. 61-63	State	Regulation	Radioactive Materials (Title A) - sets licensing and other requirements for the receipt, possession, use, transfer, and acquisition of radioactive materials; sets licensing requirements for the disposal of low-level radioactive waste.	Yes	Yes	Other service or product our agency must/may provide	Licensing for receipt, possession, use, transfer, acquisition, and disposal of radioactive waste.
285	R. 61-64	State	Regulation	X-Rays (Title B) - sets forth registration requirements and fees for X-rays.	Yes	Yes	Other service or product our agency must/may provide	Registration for facilities using x-ray machines and vendors.
286	R. 61-65	State	Regulation	Particle Accelerators (Title C) - sets forth registration requirements and fees for particle accelerators.	Yes	Yes	Other service or product our agency must/may provide	Registration for particle accelerators.
287	R. 61-67	State	Regulation	Standards for Wastewater Facility Construction - establishes standards for general and technical design requirements for use by the Department in reviewing engineering reports, establishing reliability classifications, and issuing state construction permits with respect to wastewater facilities.	Yes	Yes	Other service or product our agency must/may provide	Review and issuance of permits and includes enforcement provisions.
288	R. 61-67.1	State	Regulation	State Water Pollution Control Revolving Fund Loan Assistance - establishes authority for the state to create and administer a revolving fund loan program to assist in capital projects under the Clean Water Act.	Yes	Yes	Other service or product our agency must/may provide	DHEC creates numerical limits and narrative requirements for the quality of fresh and salt waters of the State
289	R. 61-68	State	Regulation	Water Classification and Standards - establish a system and rules for managing and protecting the quality of the state's surface and ground water, including specific numeric and narrative criteria for protecting classified and existing water uses.	Yes	Yes	Other service or product our agency must/may provide	Sets forth a system and rules for managing and protecting the quality of South Carolina's surface and ground water.
290	R. 61-69	State	Regulation	Classified Waters - specifies classifications for waterbodies within the state.	No	No - But relates to manner in which one or more agency deliverables is provided		
291	R. 61-71	State	Regulation	Well Standards - establish minimum standards for construction, maintenance, and operation of wells to protect underground sources of drinking water.	Yes	Yes	Other service or product our agency must/may provide	Establishes minimum standards pertaining to wells and set forth processes regarding violations and penalties.
292	R. 61-75	State	Regulation	Standards for Licensing Day Care Facilities for Adults - establishes licensing standards for adult day care facilities.	Yes	Yes	Other service or product our agency must/may provide	Licenses for day care facilities for adults.
293	R.61-77	State	Regulation	Standards for Licensing Home Health Agencies - establishes licensure standards for home health agencies.	Yes	Yes	Other service or product our agency must/may provide	Licenses for home health agencies.
294	R. 61-78	State	Regulation	Standards for Licensing Hospices - establishes licensure standards for hospice programs and in-patient hospice facilities.	Yes	Yes	Other service or product our agency must/may provide	Licenses for hospitals and institutional general infirmaries.

295	R. 61-79	State	Regulation	Hazardous Waste Management Regulations - provides procedures for regulating the generation, management and transportation of hazardous waste, the permitting of hazardous waste treatment, storage, and disposal facilities, and requirements for corrective action and financial assurance.	Yes	Yes	Other service or product our agency must/may provide	Department issues permits to regulated entities.
296	R. 61-80	State	Regulation	Neonatal Screening for Inborn Metabolic Errors and Hemoglobinopathies - establishes rules implementing provisions of Section 44-37-30 of the S.C. Code of Laws regarding testing of newborn children for inborn metabolic errors and hemoglobinopathies; the Department has been given the legislative mandate to promulgate rules and regulations for screening for inborn metabolic errors and hemoglobinopathies and to ensure compliance with the screening of every child born in South Carolina; the responsibilities of the various agencies, institutions, and persons involved in the screening process are defined; procedures for storage and use of blood specimens and maintenance of confidentiality are included.	Yes	Yes	Other service or product our agency must/may provide	Promulgate rules and regs and ensure compliance.
297	R. 61-81	State	Regulation	State Environmental Laboratory Certification Program - provides the mechanism to assure the validity and quality of the data being generated for compliance with state regulations.	No	Yes	Other service or product our agency must/may provide	State lab certifications
298	R. 61-82	State	Regulation	Proper Closeout of Wastewater Treatment Facilities - regulates the proper closing of wastewater treatment facilities.	Yes	No - Does not relate directly to any agency deliverables		
299	R. 61-83	State	Regulation	Transportation of Radioactive Waste into or within South Carolina - regulates the activities of any shipper, carrier, or other person who transports radioactive waste into or within this state, to any persons involved in the generation of radioactive waste within this state, and to any shipper whose radioactive waste is transported into or within this state or is delivered, stored, or disposed of within this state.	Yes	Yes	Other service or product our agency must/may provide	Department issues permits to regulated entities.
300	R.61-84	State	Regulation	Standards for Licensing Community Residential Care Facilities - establishes licensing standards for community residential care facilities (assisted living facilities).	Yes	Yes	Other service or product our agency must/may provide	Licenses for community residential care facilities.
301	R. 61-86.1	State	Regulation	Standards for Performance for Asbestos Projects - establishes performance standards for: any person involved in the in-place management, design, removal, encapsulation, enclosure, renovation, repair, demolition activity, or any other disturbance of asbestos-containing material; and any asbestos training course provider or asbestos training course instructor who conducts mandatory asbestos training courses.	Yes	Yes	Other service or product our agency must/may provide	Department issues asbestos personnel licenses and asbestos project licenses.
302	R. 61-87	State	Regulation	Underground Injection Control Regulations - sets forth the specific requirements for controlling underground injection in the state and includes provisions for: the classification and regulation of injection wells; prohibiting unauthorized injection; protecting underground sources of drinking water from injection; classifying underground sources of drinking water; and, requirements for abandonment, monitoring, and reporting for existing injection wells used to inject wastes or contaminants.	Yes	Yes	Other service or product our agency must/may provide	Permitting requirements and standards pertaining to underground injection well.
303	R.61-91	State	Regulation	Standards for Licensing Ambulatory Surgical Facilities - establishes licensure standards for ambulatory surgical facilities.	Yes	Yes	Other service or product our agency must/may provide	Licenses for ambulatory surgical facilities.
304	R. 61-92	State	Regulation	Underground Storage Tank Regulations - provides for the technical standards for release prevention and detection, the corrective action requirements, and the financial responsibility requirements for owners and operators of underground storage tanks.	Yes	Yes	Other service or product our agency must/may provide	issue permits, conduct inspections of permitted facilities, enforcement of permits, determining and approving plans for corrective action at facilities
305	R. 61-94	State	Regulation	WIC Vendors - establishes requirements for the application, approval, monitoring, and disqualification of vendors under the Women, Infants, and Children program.	Yes	No - Does not relate directly to any agency deliverables		
306	R.61-95	State	Regulation	Medicaid Nursing Home Permits - establishes application procedures, allocation processes, and enforcement provisions regarding permits for Medicaid Nursing Home days of care	Yes	Yes	Other service or product our agency must/may provide	application procedures, allocation processes, and enforcement provisions regarding permits
307	R. 61-96	State	Regulation	Athletic Trainers - establishes minimum qualifications for those individuals wishing to offer athletic trainer services to the public.	Yes	Yes	Other service or product our agency must/may provide	Athletic trainer certification.
308	R. 61-97	State	Regulation	Standards for Licensing Renal Dialysis Facilities - sets licensing standards for renal dialysis facilities.	Yes	Yes	Other service or product our agency must/may provide	Renal dialysis facility licenses
309	R. 61-98	State	Regulation	State Underground Petroleum Environmental Response Bank (SUPERB) Site Rehabilitation and Fund Access Regulation - establishes certain requirements for: site rehabilitation for releases from petroleum underground storage tanks (USTs); accessing the SUPERB Account; and the certification, suspension and decertification of site rehabilitation contractors by DHEC.	Yes	Yes	Other service or product our agency must/may provide	manages SUPERB Fund, approves funds from the SUPERB Account to be used for corrective actions, participate in the SUPERB Advisory Committee
310	R. 61-101	State	Regulation	Water Quality Certification - establishes procedures and policies for implementing state water quality certification requirements of Section 401 of the Clean Water Act, 33 U.S.C. Section 1341.	Yes	Yes	Other service or product our agency must/may provide	Water quality certification of federal Clean Water Act permits
311	R. 61-102	State	Regulation	Standards for Licensing Birthing Centers for Deliveries by Midwives - sets licensing standards for birthing centers.	Yes	Yes	Other service or product our agency must/may provide	Licenses for birthing centers.
312	R. 61-103	State	Regulation	Residential Treatment Facilities for Children and Adolescents - sets licensing standards for RTF facilities.	Yes	Yes	Other service or product our agency must/may provide	Licenses for residential treatment facilities for children and adolescents.
313	R. 61-104	State	Regulation	Hazardous Waste Management Location Standards - creates state requirements for the location of hazardous waste treatment, storage, and disposal facilities.	Yes	Yes	Other service or product our agency must/may provide	evaluates information submitted with permits under 61-79 to ensure the location of hazardous waste treatment, storage, and disposal facilities will have minimal impact upon human health and the environment

314	R. 61-105	State	Regulation	Infectious Waste Management Act - establishes a program to carry out the provisions of the South Carolina Infectious Waste Management Act, Act Number 134 of 1989, Chapter 93 of Title 44 of the 1976 Code of Laws, as amended.	Yes	Yes	Other service or product our agency must/may provide	Permits
315	R. 61-106	State	Regulation	Tanning Facilities - sets licensing standards for tanning facilities.	Yes	Yes	Other service or product our agency must/may provide	licensing standards for tanning facilities
316	R. 61-107	State	Regulation	Solid Waste Management Regulations - establishes regulatory guidance to achieve the purposes of the Solid Waste Policy and Management Act of 1991 (44-96-10 et seq.).	Yes	Yes	Other service or product our agency must/may provide	Department issues permits to regulated entities.
317	R. 61-107.1	State	Regulation	Solid Waste Management: Solid Waste Management Grants, Recycling, Education Grants, and Waste Tire Grants - establishes procedures for disbursement of solid waste management grants, recycling education grants, and waste tire grants to local governments or regions for solid waste management and recycling education in accordance with the intent of the legislature; to assist local governments, regions, and public school districts in meeting the requirements of the Solid Waste Policy and Management Act of 1991.	Yes	Yes	Other service or product our agency must/may provide	Permits, Registrations, and Certifications
318	R. 61-107.2	State	Regulation	Solid Waste Management: Full Cost Disclosure - requires local governments to account for and report full cost of solid waste management.	No	No - Does not relate directly to any agency deliverables		
319	R. 61-107.3	State	Regulation	Solid Waste Management: Waste Tires - regulates activities of waste tire haulers, collectors, processors, and disposers.	Yes	Yes	Other service or product our agency must/may provide	Permits and/or Registrations
320	R. 61-107.4	State	Regulation	Solid Waste Management: Compost and Mulch Production, Yard Trimming and Organic Residuals - establish minimum standards for the proper management of yard trimmings, land-clearing debris, and other organic material; to encourage composting and establish standards for the production of compost; and to ensure that operations are performed in a manner that is protective of public health and the environment.	Yes	Yes	Other service or product our agency must/may provide	Registrations
321	R. 61-107.5	State	Regulation	Solid Waste Management: Collection, Temporary Storage, and Transportation of Municipal Solid Waste - establishes minimum standards for the collection, temporary storage, and transportation of solid waste prior to processing, disposal, etc. of that waste.	No	No - Does not relate directly to any agency deliverables		
322	R. 61-107.6	State	Regulation	Solid Waste Management: Solid Waste Processing Facilities - establishes the procedures, documentation, and other requirements which must be met for the proper operation and management of all solid waste processing facilities, including the processing activities involving the unrecoverable solid waste at a Materials Recovery Facility.	Yes	Yes	Other service or product our agency must/may provide	Permits
323	R. 61-107.7	State	Regulation	Solid Waste Management: Transfer of Solid Waste - establishes minimum standards for facilities where solid waste is transferred from collection vehicles to other transportation units for movement to another solid waste management facility prior to its processing and disposal.	Yes	Yes	Other service or product our agency must/may provide	Permits
324	R. 61-107.8	State	Regulation	Solid Waste Management: Lead-Acid Batteries - regulates the proper disposal, collection, and recycling of lead-acid batteries and small sealed lead-acid batteries.	Yes	Yes	Other service or product our agency must/may provide	Regulations
325	R. 61-107.9	State	Regulation	Solid Waste Management: White Goods - establishes procedures for proper management and recycling or disposal of inoperative or discarded refrigerators, ranges, water heaters, freezers, dishwashers, trash compactors, washers, dryers, air conditioners, and commercial large appliances.	No	No - Does not relate directly to any agency deliverables		
326	R. 61-107.10	State	Regulation	Solid Waste Management: Research, Development, and Demonstration Permit Criteria - provides for permitting solid waste management facilities, or parts of these facilities, proposing to utilize an innovative and experimental solid waste management technology or process.	Yes	Yes	Other service or product our agency must/may provide	Permits
327	R. 61-107.12	State	Regulation	Solid Waste Management: Solid Waste Incineration and Solid Waste Pyrolysis Facilities - establishes the procedures, documentation, and other requirements which must be met for the proper operation and management of all solid waste incineration facilities, including all solid waste pyrolysis facilities, and waste-to-energy facilities burning solid waste used for energy recovery.	Yes	Yes	Other service or product our agency must/may provide	Permits
328	R. 61-107.14	State	Regulation	Solid Waste Management: Municipal Solid Waste Landfill Operator's Certification - establishes minimum training and certification requirements for operators of municipal solid waste landfills and municipal solid waste incinerator ash landfills.	Yes	Yes	Other service or product our agency must/may provide	Certifications
329	R. 61-107.15	State	Regulation	Solid Waste Management: Land Application of Solid Waste - establishes appropriate application rates, frequency of application, and monitoring requirements for the uniform surface spreading or mechanical incorporation of non-hazardous solid waste on, or into, soil that is being used for agricultural, silvicultural, and horticultural production. This regulation also applies to the application of solid waste on land that is being reclaimed to enhance its aesthetic value or to reduce environmental degradation. The land application of non-hazardous solid waste shall be for beneficial agricultural, silvicultural, and horticultural purposes and not used as a means of disposal.	Yes	Yes		
330	R. 61-107.17	State	Regulation	Solid Waste Management: Solid Waste Management: Demonstration of Need - establishes the criteria for the demonstration-of-need for the construction of new and the expansion of existing solid waste landfills.	Yes	Yes	Other service or product our agency must/may provide	Demonstration of Need Determinations
331	R. 61-107.18	State	Regulation	Solid Waste Management: Off-Site Treatment of Contaminated Soil - establishes minimum standards for the procedures, documentation, and other requirements which must be met for the proper site selection, design, operation, and closure of facilities treating contaminated soil and soil-like materials.	Yes	Yes	Other service or product our agency must/may provide	Permits
332	R. 61-107.19	State	Regulation	Solid Waste Management: Solid Waste Landfills and Structural Fill - establishes minimum standards for the site selection, design, operation, and closure of all solid waste landfills and structural fill areas.
