Fiscal Year 2020–2021 Accountability Report

SUBMISSION FORM

I have reviewed and approved the data submitted by the agency in the following online forms:

- Reorganization and Compliance
- Strategic Plan Results
- Strategic Plan Development
- Legal
- Services
- Partnerships
- Report or Review

I have reviewed and approved the financial report summarizing the agency's budget and actual expenditures, as entered by the agency into the South Carolina Enterprise Information System.

The information submitted is complete and accurate to the extent of my knowledge.

Agency Mission

The South Carolina Department of Veterans' Affairs leads and enables a state-wide coalition of partners with an interest in Veterans to create and sustain an environment in which Veterans can thrive as valued and contributing members of the South Carolina community.

Adopted in: 2020

Agency Vision

Secretary's Intent: The purpose of the South Carolina Department of Veterans' Affairs is to serve Veterans and their families. They are our customers, and customer service is our first and most important job.

Adopted in: 2020

Does the agency intend to make any other major reorganization to divisions, departments, or programs to allow the agency to operate more effectively and efficiently in FY 2021-22?

Note: It is not recommended that agencies plan major reorganization projects every year. This section should remain blank unless there is a need for reorganization.

No

Is the agency in compliance with S.C. Code Ann. § 2-1-220, which requires submission of certain reports to the Legislative Services Agency for publication online and the State Library? See also S.C. Code Ann. § 60-2-20.

Yes

If not, please explain why.

Is the agency in compliance with various requirements to transfer its records, including electronic ones, to the Department of Archives and History? See the Public Records Act (S.C. Code Ann. § 20-1-10 through 20-1-180) and the South Carolina Uniform Electronic Transactions Act (S.C. Code Ann. § 26-6-10 through 26-10-210).

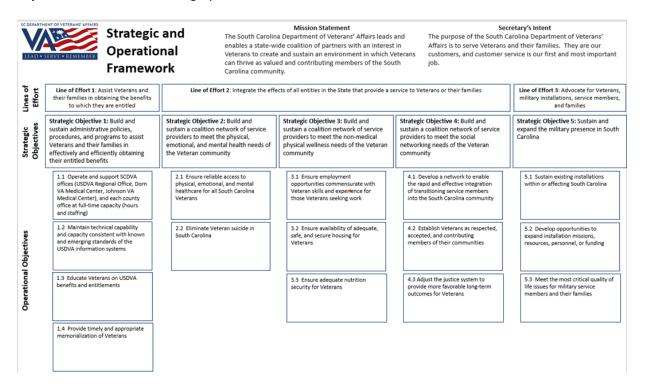

Yes

Does the law allow the agency to promulgate regulations?

No

| AGENCY CODE: | E260 | SECTION: | 101 |

- **I. Mission.** The South Carolina Department of Veterans' Affairs leads and enables a state-wide coalition of partners with an interest in Veterans to create and sustain an environment in which Veterans can thrive as valued and contributing members of the South Carolina community.
- **II. Scope of Report**. This report is the second annual report submitted by the Department of Veterans' Affairs, and the first reflecting an entire year under the first Secretary of Veterans' Affairs. During the fiscal year ending 30 June 2021, the Department developed an initial campaign plan, added the detailed analysis to identify strategic and operational objectives within each line of effort, and developed a detailed action plan for FY21-22 to include specific goals and metrics. While this report focuses on the activity of the Department in FY20-21, it is organized in accordance with the Department's current objectives, as detailed in the graphic below.

Throughout the past year the Department has been focused on initiating operations to accomplish its mission. A key component of the Department's activities in the past year centered on establishing integrated, multi-organization working groups to gain a better understanding of the scope of Veteran needs and to solicit a broad range of ideas concerning potential solutions to those needs. These multi-organizational working groups have been essential in actively engaging our many partners across the state of South Carolina, building coalitions aimed at achieving the common goal of aligning resources to the Veteran need and enabling the Veteran community to become mentally, emotionally, and physically sound. It is the first step in understanding the landscape of Veteran service providers across the state, whether they be non-profit, governmental, private, etc. As we enter FY21-22, our focus has shifted to gaining a deeper understanding of the assets that each member of the coalition brings to the effort.

| AGENCY NAME: | DEPARTMENT OF VETERANS' AFFAIRS | | |
|--------------|---------------------------------|----------|-----|
| AGENCY CODE: | E260 | SECTION: | 101 |

III. Agency Strategies, Goals, and Outcomes. Our strategic plan includes four main lines of effort with five associated strategic objectives. The following section details how we have addressed each of our strategic objectives under the main lines of effort over the past fiscal year (2020-2021).

A. Line of Effort 1: **Assist** Veterans and their families in obtaining the benefits to which they are entitled.

- 1) <u>Strategic Objective 1</u>: Build and sustain administrative policies, procedures, and programs to assist Veterans and their families in effectively and efficiently obtaining their entitled benefits.
 - a) <u>Claims and Appeals</u>. The assist line of effort is associated with the Division of Administration whose primary responsibilities are the operation of the state cemetery and the oversight of the benefits and appeals representatives stationed at the United States Department of Veterans Affairs locations. The Division of Administration also oversees the War Roster and free tuition applications.

In FY20-21, the County offices reported assisting Veterans in the filing of 30,190 claims from Jul-Dec 2020 and filed 29,190 claims from Jan-Jun21. Seven counties reported no data for one or both periods. Three hundred seventy-three claims were processed by the SCDVA representatives at the USDVA Regional Office. In support of these claims, service officers conducted a total of 242,827 interviews or consultations (2,523 of which were conducted by SCDVA representatives at the USDVA Regional Office).

In December 2020, the SCDVA implemented a claims management system at no cost to the county offices to assist the County Veterans Affairs Offices in filing claims and appeals for Veterans. This system provides a higher level of security for personal information than other systems in use across the State. It also allows for the Department and State level stakeholders (such as legislative delegations) to verify the work being done by the county offices. This system allows for the creation of reports to show the different levels of interactions the county office has with a Veteran. Some offices use this system to track all interactions with Veterans, to include phone calls and office visits. The system is designed for error-free electronic submission directly to the US Department of Veterans' Affairs through a digital portal. Although the direct submission feature is available, some offices continue to print and fax forms in; this is a submission option the US Department of Veterans Affairs plans to discontinue soon. Overall, the state-provided claims management system allows for the easiest and most reliable way of tracking claims, increasing both accountability and transparency in claims management.

Currently, only 31 counties are actively using the State-provided claims management system. Since the system became active on 1 January, 2021, these 31 counties created a total of 11,432 forms, of which 9,740 were electronically submitted to the US Department of Veterans' Affairs. To be clear, this means that, of the 29,190 claims County Offices report filing in the last six months of the fiscal year, the Department can only verify 9,740 (33.4%). Until all counties adopt the State-provided claims management system, we will remain largely reliant on self-reporting by the

| AGENCY NAME: | DEPARTMENT OF VETERANS' AFFAIRS | | |
|---------------------|---------------------------------|----------|-----|
| AGENCY CODE: | E260 | SECTION: | 101 |

counties to determine the effectiveness and efficiency of the claims management efforts statewide.

County offices assisted in the appeals for a total of 78 cases and the SCDVA representatives at the USDVA regional offices conducted 27 local appeal hearings and 291 hearings at the Board of Veterans Appeals.

We currently lack the ability to determine with confidence the "amounts of benefits obtained for Veterans." The US Department of Veterans' Affairs reports award decisions (which detail the amount of benefit a Veteran will receive) directly to the Veteran, not to the agent assisting with the claim or the appeal.

In the absence of reliable State data, we are dependent upon that provided by the US Department of Veteran's Affairs, which is aggregated at the State and County levels. In its most recent report, the USDVA reports that in FY20 (the year prior to the year covered in this report), South Carolina Veterans received \$2,760,668 in compensation and pension. With the data available, however, it is not possible to determine what portion of that total came as a result of assistance provided by SCDVA or county service providers. The USDVA data reflects the home location of the Veteran receiving the benefit, not the location from which he or she filed the claim. Given the significant number of Veterans who cross County and State lines when seeking assistance with their claims or those that file directly with USDVA without assistance, it is currently impossible to know how much of the benefits delivered in X County are the result of assistance of the service providers in X County.

As part of our effort to improve the services provided to Veterans at the County Offices, the Department signed a Memorandum of Understanding with the National Veterans Legal Services Program (NVLSP) to provide world-class, web-based training to service officers across the state. NVLSP is a highly regarded non-profit that provides direct legal services to Veterans appealing a US Department of Veterans' Affairs benefit decision, and publishes a variety of written and video resources to train service officers on the latest changes to USDVA regulations and trends in court decisions bearing on Veteran benefits.

Since January, 2021, the Department has hosted three web-based training seminars, all free for county offices.

- The first focused on recent court decisions Veteran advocates need to know about. 50% of counties participated in this training.
- The second focused on recent changes to the USDVA's rating system for musculoskeletal disabilities. 32% of counties participated in this training.
- The third focused on traumatic brain injuries and post-traumatic stress disorder in post-9/11 Veterans. 37% of counties participated in this training.

The low level of county participation in this highly relevant, world-class training is worrisome, especially in light of the changing demographics of our Veteran population. Nevertheless, the Department will continue to offer this training to any county office willing to participate.

| AGENCY NAME: | DEPARTMENT OF VETERANS' AFFAIRS | | |
|---------------------|---------------------------------|----------|-----|
| AGENCY CODE: | E260 | SECTION: | 101 |

- b) <u>Cemetery operations</u>. During this year, the M.J. "Dolly" Cooper Veterans Cemetery interred 522 remains (367 Veterans and 155 spouses). Of these, 398 were below-ground burials, 121 were columbarium placements, and 3 were scatterings. Additionally, the Cemetery processed 451 requests for pre-certification (advance arrangement for future burial). Of these, 419 were approved, 32 were denied as ineligible, and 11 were withdrawn by the Veteran or family member (interred elsewhere or moved out of state).
- c) <u>Free Tuition Program</u>. The Department processed 1,607 requests for Free Tuition. Of these, 261 were from students already approved for Free Tuition and seeking an in-state transfer from one institution to another, and an additional 1,371 were approved for the first time. 194 were denied as ineligible.
- d) War Records. As of Jul 2, 2021, the Department has added 43,875 DD-214s to the database. As of that date, an estimated total of 735,125 DD-214s remain to be scanned into the system. At the current pace and manning it will take more than 10 years to complete this task; the Department is expanding the resources committed to this task in order to accelerate its completion. Additionally, the Department is working with the US Department of Defense to gain automatic receipt of electronic DD-214s as service members transition; a number of regulatory obstacles must be overcome to make this a reality.
- e) <u>Nursing home operations</u>. South Carolina Code Section 25-11-10(D)(4) requires us to provide specific information concerning "the department's domiciliary and nursing homes." The Department has no domiciliary or nursing homes but works closely with the South Carolina Department of Mental Health, which operates three nursing homes for Veterans. The data in Table 1 was provided by the South Carolina Department of Mental Health.

| FY20-21 | Veteran Nursing Facility | | | |

| Receipts not CARE Funding | \$10,275,476 | \$18,267,507 | \$17,824,337 | |
| Expenditures | \$9,514,164 | \$17,212,214 | \$15,493,697 | |

 ${\bf Table\ 1.\ \ Veteran\ Nursing\ Home\ Data}$

B. Line of Effort 2: **Integrate** the effects of all entities in the State that provide a service to Veterans or their families

The Division of Operations is responsible for the execution and completion of Line of Effort 2. Throughout FY20-21, the Division of Operations was staffed with a small number of temporary hires and focused primary on establishing the relationships necessary for building regional and state-wide coalitions to support Veterans. With the full funding of the Operations Division in FY21-22, we

anticipate a significant expansion of this Division's efforts in addressing three of the Department's strategic objectives.

In our engagements over the past year, we discovered two promising models for regional coalitions, and we are currently engaged in supporting and expanding these and similar models.

- In the Upstate, the Upstate Veterans Alliance Network uses a single non-profit, Upstate Warrior Solution, as a "quarterbacking" organization to connect Veterans to a wide array of service providers from across the group's service area. We believe this model, expanded to cover an entire region, will prove valuable in the state's other regions as well.
- The US Department of Veterans' Affairs was instrumental in creating a series of Community Veteran Engagement Boards (CVEBs) across the state to bring together everyone in the community with an interest in Veterans. We believe this model is also a powerful tool for connecting Veterans to resources, particularly if expanded to cover an entire region and augmented with similar, but smaller, boards at the county level.

As the Division grows over the current fiscal year, our focus will expand to organizing regional coalitions to create an integrated care network as part of the broader state-wide effort. This effort will be technologically enabled by a digital network known as the South Carolina Veterans Coalition, powered by a State-wide, web-based referral management system. We are currently in the process of establishing this referral management system in the Upstate, with an incremental plan to expand across the State in the months ahead.

2) <u>Strategic Objective 2</u>: Build and sustain a coalition network of service providers to meet the physical, emotional, and mental health needs of the Veteran community.

As we move forward, a major focus of the Operations Division will be on developing strategies to address the transportation needs of Veterans, especially as they relate to access to the US Department of Veterans' Affairs Health Care Centers, to include regional medical centers and community-based outpatient clinics. This is a multi-faceted problem, as US Department of Veterans' Affairs Veteran Integrated Services Networks cross State lines and some Veterans must therefore travel out of State to receive care. To address this, we are seeking local solutions for travel within 55 miles of the Veteran's home, regional solutions for travel beyond 55 miles, and potentially a state solution for specialty visits to remote medical sites in North Carolina, Georgia, and Florida. Over the next year, we will seek to work out the details of these solutions.

Another goal of this division will be to increase enrollment in the Veterans Healthcare Administration. This will largely be done through outreach of the State-wide referral system and through our strategic communication partnership with the US Department of Veterans' Affairs. As Veterans sign onto the South Carolina Veteran Coalition, they will be surveyed as to their enrollment in the Veterans Healthcare Administration. Those that are not enrolled will be referred to the appropriate entity to assist them in obtaining those benefits to which they are entitled.

In addition to increasing overall enrollment in the VA Health Care System, the Division has a staff member dedicated to ensuring that Women and Minority Veterans

| AGENCY NAME: | DEPARTMENT OF VETERANS' AFFAIRS | | |
|---------------------|---------------------------------|----------|-----|
| AGENCY CODE: | E260 | SECTION: | 101 |

have access to the specialized care that they need. One of the major accomplishments of this Division this year was the hosting of the first annual Women Veterans Summit, where women Veterans came together to talk about their challenges they face in transitioning and reintegrating and to make recommendations about improving the support they receive. The information obtained from this Summit has been used to inform the Department's FY21-22 Action Plan.

3) <u>Strategic Objective 3</u>: Build and sustain a coalition network of service providers to meet the non-medical physical wellness needs of the Veteran community.

One of the major efforts of the Department this year has been improving employment among the Veteran population. As discussed in the Report of the Committee to Study Certain Veterans Issues

(https://www.scstatehouse.gov/CommitteeInfo/JointCommitteeToStudyCertainIssuesAf fectingVeterans/FINAL%20%20Report%20of%20the%20Joint%20Committee%20to%20S tudy%20Issues%20Affecting%20Veterans%20-%20Final.pdf), the major employment issue facing Veterans is not that Veterans have difficulty finding work; it is that Veterans have difficulty finding employment commensurate with their skills and abilities. Underemployment is the most common Veteran employment issue. In order to adequately address this problem, the Department worked with key coalition partners to create a Veteran Employment working group. This group meets monthly and has thus far held three Veteran-focused employment fairs.

We are currently in the process of hiring an Employment Coordinator for the Division who will take over the employment working group and continue to build our Veteran employment outreach in the State. Other key tasks of the Employment Coordinator will be to ensure that access to employment opportunities is available in all counties in the State through specialized Veteran employment assistance. Additionally, the Employment Coordinator will work with key stakeholders that specialize in Veteran small businesses to ensure that specialized training or counseling for Veteran business owners is available.

Another major effort of the Department, in conjunction with many state stakeholders, is to reduce the number of homeless Veterans in the State. The Division has created a homeless Veteran working group comprised of homelessness intervention specialists from across the State. The goal of this working group is to develop strategies for early intervention and outreach, as well as ensure the broadest use of available resources. The Department is in the process of hiring a Coordinator who will work with the regional integrators to address Veteran homelessness, with the goal of bringing Veteran homelessness to functional zero. Once again, the State-wide referral management system will play a major role in the early intervention to prevent Veteran homelessness.

4) <u>Strategic Objective 4</u>: Build and sustain a coalition network of service providers to meet the social networking needs of the Veteran community.

Another major discovery from the past year of experience is that a significant number of Veteran issues develop as a direct result of a poor transition from military

| AGENCY NAME: | DEPARTMENT OF VETERANS' AFFAIRS | | |
|---------------------|---------------------------------|----------|-----|
| AGENCY CODE: | E260 | SECTION: | 101 |

service to post-service life. Enabling more effective transitions for South Carolina's Veterans can, therefore, translate directly into more successful Veterans. As a result of this discovery, the Department is currently in the process of building a series of networks to aid service members as they transition to civilian life. Over the next year the Operations Division will be working with key stakeholders and coalition members to create a network of Pathfinders who will be trained, certified, and serve as mentors and aid military members in their transition into South Carolina citizens. The goal of the Palmetto Pathfinder Program is to create a network of Veterans across the State who are willing and able to provide pre-emptive prevention measures for Veterans at risk of suicide.

One of the ways the Division will identify those in need of these services is through a database managed by the Department. The Division will work with key recruiting commands in South Carolina to provide outreach to individuals prior to their service and stay connected throughout their term of service to ensure that when it is time for them to transition to post-service life we are recruiting them back to South Carolina and helping them integrate into the community of their choosing. The Division will also work to continue to identify separating Service members in order to provide assistance before they are in need.

- C. Line of Effort 3: Advocate for Veterans, military Instillations, service members, and families.
 - 5) Strategic Objective 5: Sustain and expand the military presence in South Carolina.

We have been engaged with our military bases and community leaders to understand how we as a state can better enable them to fulfill their mission in South Carolina. As we continue to understand the operational needs of the military bases, commanders, and service members and their families in South Carolina and Augusta we are developing strategies to address those operational needs and ensure that all South Carolina bases make a meaningful contribution to national defense in a manner that cannot be replicated more efficiently or more effectively from outside the state.

In October 2020, the military base commanders briefed the Governor of South Carolina and the Secretary of Veterans' Affairs in the annual Commanders' Brief, addressing the various challenges they face and the opportunities to improve or expand their operational capacity or improve the quality of life of their service members and families. The Department subsequently, worked with stakeholder state agencies to address a number of these concerns, in many cases resulting in solutions in the best interests of the military base and the state. For example, we connected personnel from Joint Base Charleston with the South Carolina Department of Transportation to make accommodations in the plan for the Don Holt Bridge expansion to ensure the expansion would not create traffic congestion for Joint Base Charleston. Additionally, we worked with the South Carolina Emergency Operations Center to ensure the Coast Guard receives timely notification of impending evacuation decisions associated with coastal weather, allowing the Coast Guard to simultaneously take measures to protect their own facilities and families while continuing to provide the support our coastlines depend upon. We also facilitated the creation of a working group of school district employees and community leaders to improve education concerns in the Sumter School

| AGENCY NAME: | DEPARTMENT OF VETERANS' AFFAIRS | | |
|--------------|---------------------------------|----------|-----|
| AGENCY CODE: | E260 | SECTION: | 101 |

District. Lastly, we advocated with federal legislators to resolve funding shortfalls on three military construction projects at Fort Jackson.

Although the risk of another Base Realignment and Closure proceeding is low at the moment, the risk of such an action, or a functional equivalent within the US Department of Defense, is increasing over time. With Department of Defense budgets seeing little or no growth, and with some service departments potentially experiencing a *de facto* decrease in funding, there will be increasing pressure to optimize efficiency and consolidate facilities.

When services examine the value of a military base, they consider operational effectiveness, environmental impact, and the quality of life provided to service members and their families. As the service Secretaries have consistently emphasized, they will heavily weight three key factors when determining quality of life: the quality of public education available to military children assigned to the base; the off-base employment opportunities for military spouses assigned to the base; and the availability of a robust off-base medical treatment network.

Our Military Base Task Force will continue to work closely with our military bases and their community stakeholders to make our bases as valuable as possible to the US Department of Defense. The General Assembly's decision to include a Base Protection Fund in this year's budget will greatly enhance our efforts.

In the past year the Military Base Task Force worked with stakeholders to streamline the process for spousal teacher certification, a key component of military spouse employment opportunity. For example, the South Carolina Department of Education has a military liaison who is a former military spouse. She walked each military spouse through the process and ensured their applications were processed quickly. The Department of Education changed its website as well so that applicants can provide the required information without excessive administrative challenges.

The Task Force also worked closely with the Military Child Education Coalition to help certify a total of nine South Carolina public school districts with Purple Star School status. In addition, the Governor signed a Purple Star Proclamation establishing the goal of making every public school district in South Carolina a Purple Star School. Because military families (Active, Reserve, and Guard) live in every county of the state, schools across the state need to address the unique challenges facing military children.

D. Line of Effort 4: **Inform** and educate the public, State and local leaders, and Veterans on all matters pertaining to Veterans.

A perpetual challenge in the field of Veteran service is that many Veterans are not aware of the federal, state, and local services available to them. Every day, some Veteran need goes unaddressed not because there is no resource available but because the Veteran is simply not aware of its existence.

Over the past year, the Department's Public Information Division has worked to build and expand a robust media presence focused on informing Veterans of the many tools available to Veterans in the South Carolina. The result has been significant growth in reach and influence over the past year.

| AGENCY NAME: | DEPARTMEN | T OF VETER | ANS' AFFAIRS |
|---------------------|-----------|------------|--------------|
| AGENCY CODE: | E260 | SECTION: | 101 |

In the last fiscal year, the South Carolina Department of Veterans' Affairs has been featured in more than 60 stories (40+ listed on scdva.sc.gov), and more than five TV/digital and radio advertisement campaigns that resulted in hundreds of commercial ad plays on air and online, and subsequent viewings by the general public.

South Carolina Department of Veterans' Affairs has more than doubled views of our web site (30,000+ visitors in the 20-21 fiscal year), gained 5,000+ subscribers to our monthly newsletter, and added 1,000+ followers on our Facebook page. We have also grown significantly in our social media outreach, to include 153 Twitter followers, 1,061 Facebook followers, and 531 LinkedIn connections. This increased social media presence is one of the primary forms of communication with the community to inform them of all things Veteran and military in the State of South Carolina. In addition to social media outreach, the Department implemented a weekly newsletter that highlights outstanding Veterans in the community, major events surrounding the Veteran and military community, and key interactions the Department is undertaking. There are 5,635 subscribers to the newsletter as of the close of the fiscal year.

IV. Risk Assessment. Table 2 depicts our current assessment of the risk of mission failure along each of our Lines of Effort. Generally, we assess risk to be lower this year than in last year's report, primarily as a result of funding decisions made by the General Assembly in the FY21-22 budget. The exception to this general trend is in Advocacy; as discussed in Strategic Objective 5 we assess the risk of another Base Realignment and Closure proceeding, or its functional equivalent, to be increasing as Department of Defense and service budgets see little or no growth.

| Line of Effort | Last Year's | This Year's | Trend | Explanation |
|------------------|-------------|-------------|--------------|---|
| | Assessment | Assessment | | |
| LOE 1: Assist | Very High | High | \downarrow | Improved training and cooperation with county offices has partially mitigated the risk |
| | | | | of failure. Many counties remain poorly resourced and narrowly focused, however. |
| LOE 2: Integrate | Very High | Moderate | \ | Significant resourcing by the General Assembly has reduced the risk and postured the Department to exploit a number of state and regional opportunities. |
| LOE 3: Advocate | Low | Moderate | ↑ | Although a formal round of Base Realignment and Closure procedures is not likely, the possibility of a functional equivalent of BRAC appears to be growing. |
| LOE 4: Inform | Moderate | Low | \ | Increased capacity, resulting from improved resourcing by the General Assembly, has largely mitigated this risk. |
