AGENCY'S DISCUSSION AND ANALYSIS

The Public Service Commission of South Carolina (Commission or PSC) regulates the rates and services of investor-owned public utilities in the State of South Carolina and has limited jurisdiction related to the South Carolina Public Service Authority (Santee Cooper). With more than 100 years of service to the state of South Carolina, the PSC establishes just and reasonable standards for investor-owned public utilities' rates and services.

The mission of the Public Service Commission of South Carolina is to serve the public by providing open and effective regulation and adjudication of the state's public utilities through consistent administration of the law and regulatory process. The State Regulation of Public Utilities Review Committee serves as the joint legislative committee that oversees the operations of the Commission authorized by Act 175 of 2004 and is chaired by Senator Thomas Alexander.

For the Public Service Commission of South Carolina to carry out its mission, the Commission must be alert to and anticipate emerging issues in the industries it regulates, including federal regulatory developments. Maintaining effective communications with its stakeholders aided the Commission in achieving this goal.

Executive Summary of Achievements

Strategic Goal I: Optimize Our Processes, Systems, and Decisions

- The Commission's Docket Management System (DMS) was enhanced to improve its user interface, data and logic management, and reporting features. Improvements and enhancements were made as follows: Links to archived hearing videos were added to the "Hearings" tab in a Docket; new matter types were added; and a pre-population feature was added to the eFiling System.
- The Commission conducted workshops and initiated rulemakings related to Act 41 of 2025 as follows: Directive Order No. 2025-744 was issued adopting "Customer Complaint Procedures" (amended in Directive Order No. 2026-331), Directive Order No. 2025-745 was issued adopting "Guidelines for Site Visits and Educational Tours", and a hearing was held regarding proposed new and/or amended regulations related to Act 41 of 2025's procedural requirements.
- The Commission conducted workshops and initiated rulemakings related to customer public hearings as follows: Two workshops were held, and as a result, the Commission filed proposed S.C. Code Ann. Regs. 103-845.1 with the General Assembly regarding Public Witness Testimony and Customer Public Hearings; a hearing was held on the proposed regulation on March 17, 2026, and the Commission issued Order No. 2026-361 approving the proposed new regulation on June 26, 2026.

Strategic Goal II: Maintain Our Commitment to the Judicial Process

- Commission Orders were issued within an average of 21.29 days of Commission Directives. This average accounts for a slight improvement in the time it took to issue Orders compared to fiscal year 2024-2025 (21.91 days).
- Commissioners and Staff participated in over 640 hours of professional education.
- Annual Ethics Training was conducted in accordance with S.C. Code Ann. Section 58-3-30(C).

Strategic Goal III: Improve Our Operations Continuously

- The PSC held three meetings with its Advisory Committee to discuss its processes and procedures. As a result of these meetings, the Commission improved/implemented the following action items: publication of a Regulatory Dictionary and identification/resolution of issues related to the Commission's eService System.
- The Commission held two Regulatory Process Review Forums on August 1, 2025, and June 12, 2026, to discuss the operations of the Commission.

Strategic Goal IV: Manage Risk

- Quarterly simulated phishing emails were sent to employees to test their recognition of a malicious email.
- Staff and Commissioners completed annual cybersecurity training.

The Commission continued to improve its hearing procedures to provide the public with accessible, transparent, and effective regulation of public utilities and with clear information about the regulatory process and its decisions. To increase transparency and engagement with public utility consumers, the Commission continued the implementation of a more robust communications platform, including its SC Utility Consumer website, social media accounts, and advertising campaign. The Commission also utilized its Public Information Notice (PIN) program and Order Alert System.

An ongoing goal of the Commission is to improve its operations through technological advances. As opportunities are identified, the Commission will investigate both costs and benefits before taking the appropriate actions.

The Commission must regulate the electric utility industry effectively, safeguarding ratepayers without unduly burdening the industry or stifling competition. On May 12, 2025, Governor McMaster signed the South Carolina Energy Security Act (Act 41 of 2025). Act 41 includes issues such as electric rate stabilization, energy infrastructure projects, changes to the Commission's regulatory processes, updates to utility facility siting and environmental protection laws, agreements concerning qualifying and transformational customers, and the addition of competitive procurement for energy storage facilities. The Commission conducted workshops and initiated rulemakings related to Act 41 of 2025 during the year, which resulted in new "Customer Complaint Procedures" and "Guidelines for Site Visits and Educational Tours" being adopted.

The public relies on the Commission's online systems to access information related to its operations. The Commission must budget funds to support maintenance and development of the systems.

The Commission's primary duty is to adjudicate cases involving the state's investor-owned utilities. In the last fiscal year, the Commission opened 369 new dockets, including non-docketed items, held 75 hearings, issued 125 orders, and 656 directive orders. In 2024-2025, the PSC issued 93 orders and 672 directive orders. A total of 7,960 matters were posted on the Commission's Docket Management System (DMS). The Commission also held 47 Commission Business Meetings during the year.

The Commission's hearings encompass the electric, gas, telecommunications, transportation, water, and wastewater industries. There continues to be a steady number of filings and/or hearings within the electric utility industry due to the impact of ongoing issues that the Commission must address from a regulatory standpoint, including Act 41 of 2025 (the South Carolina Energy Security Act). Some of these issues include demand-side management and energy efficiency programs, integrated resource plans, and major utility facility siting cases. The Commission also heard electric and water/sewer rate cases during the fiscal year. The following charts provide a breakdown by industry of the hearings and Allowable *Ex Parte* Communication Briefings held during the year.

During the fiscal year, the PSC disposed of 741 action items at the Commission's Business Meetings, and the Commission was advised of 3,751 matters. Action items are matters where the Commission makes a decision during a Commission Business Meeting. The Commission decided numerous important matters that required significant time and resources, including those in the chart on the next page.

In addition, the Commission conducted **twenty customer public hearings** virtually and in-person during the fiscal year. The table below details the case and locations of each customer public hearing the Commission held during the year.

The Commission issued 139 Directives, 656 Directive Orders, and 125 Orders throughout the fiscal year. Notably, the Commission issued its Orders within an average of 21.29 days of Commission Directives. This average accounts for a slight improvement in the time it took to issue Orders compared to fiscal year 2024-2025 (21.91 days). The following tables and charts display the number of advised versus action items, Orders issued with the Chairman's signature, Directives, and Directive Orders issued by industry.

Advised vs. Action Items		
Year	Advised	Action
19-20	2,676	876
20-21	3,850	893
21-22	3,619	821
22-23	3,972	923
23-24	3,524	924
24-25	2,649	778
25-26	3,751	741

The Commission remained active in national organizations, providing opportunities for involvement in emerging utility issues through attendance at national and regional regulatory conferences (NARUC, SEARUC, etc.) and

involvement in associated committees and related organizations. Involvement in these organizations provides an important means of staying abreast of key issues in the regulated arena.

The Commission continued to execute its robust digital communications program during the year to increase the transparency of the Agency's operations. This program included digital newsletters, livestreaming of Commission hearings and meetings, the use of social media, and an increased public communications plan through the Commission's Order Alert System and Public Information Notices program. In the most recent fiscal year, the Commission launched a new online complaint form that streamlines the submission process for complainants. Additionally, in response to Act 41 of 2025, the Commission adopted Site Visit Guidelines and Educational Tours, new procedures for complaints, and initiated rulemakings to implement customer public hearing procedures.

The Commission continued to use its Facebook, Instagram, and LinkedIn profiles during the fiscal year but primarily focused its advertisement strategy on driving traffic to its websites. The Agency exceeded its benchmarks and general expectations with traffic coming into the PSC website (www.psc.sc.gov) at an increased pace compared to previous years. Additionally, the Commission continued using Nextdoor to publicize consumer information via the official State of South Carolina account, which the PSC shares with other agencies and governmental organizations. As of June 2026, the Nextdoor account is followed by 1,744,721 users in 7,317 neighborhoods across South Carolina.

Over the course of the year, the PSC contracted with *The Post & Courier* to provide digital marketing and search engine optimization (SEO) for the Agency. The campaigns produced the following results:

FY 2025-2026 Marketing Campaign	
Total Impressions	54,120
Ad Click-Through Rate	.12%
SEO Conversions	87
SEO Click-Through Rate	17.84%

Impressions refer to the number of times PSC content was displayed on a user's screen because of the marketing campaigns.
SEO Conversions refers to the percentage of organic visitors who visited a PSC site due to a search result.
Click-Through Rate refers to the percentage of users who clicked on a search result or advertisement leading to the Commission's websites.

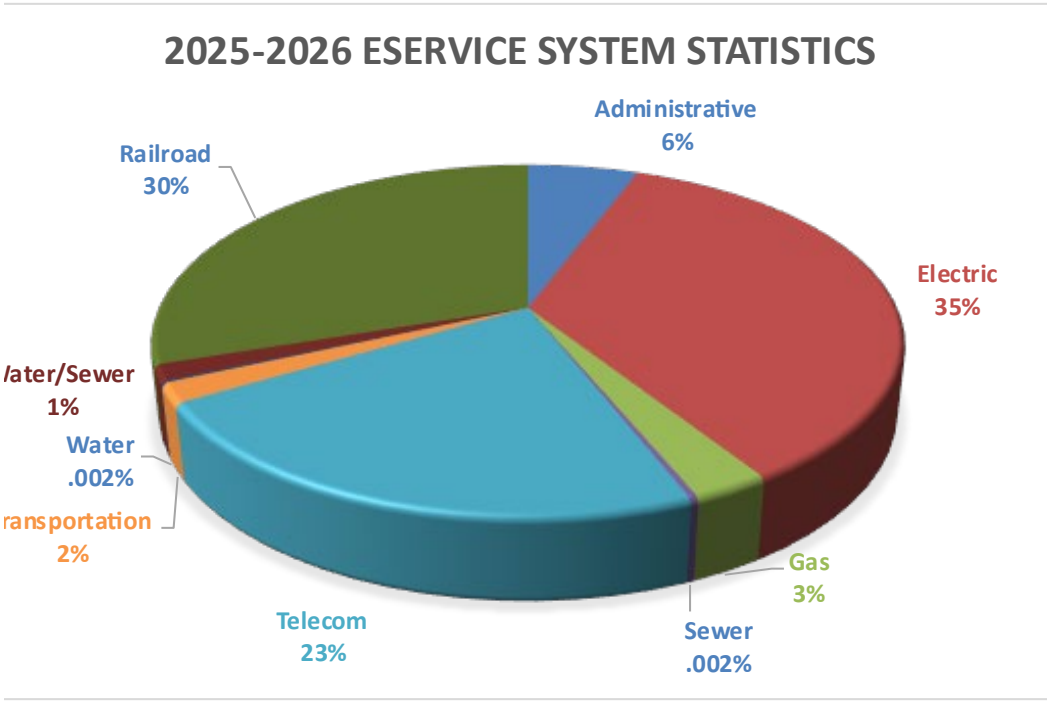

The Commission's digital advertising campaign yielded 54,120 impressions and a .12% click-through rate, exceeding the industry standard of .08%. The search engine marketing campaign also exceeded expectations and industry averages, with an average click-through rate well above the industry standard of 6.42%, and a cost-per-click of $1.56, compared to an industry average of $5.26. These favorable comparisons illustrate the success of the campaigns.

During the fiscal year, the Commission continued livestreaming its Commission Business Meetings, hearings, and training sessions. All 75 hearings, 47 Commission Business Meetings, and 22 workshops/forums were streamed during the year. The PSC also used its livestreaming service to stream three off-site customer public hearings from venues in Bluffton and twice in Aiken, South Carolina. Statistics for the livestream are provided in the following table. The Agency's annual average number of viewers after six years of livestreaming is 21,990. Most of our viewers come from the PSC's website (www.psc.sc.gov), frequently from the Livestream calendar page. The Commission will continue to track livestream traffic and analyze its trends over time.

During the 2025-2026 fiscal year, the Commission continued to use its eService System to serve matters and orders to parties of record in dockets. The system continues to be an effective and efficient resource for delivering matters and orders in a timely manner. The chart below provides a breakdown of the items served via the system by utility industry. The electric utility industry continues to be the most active.

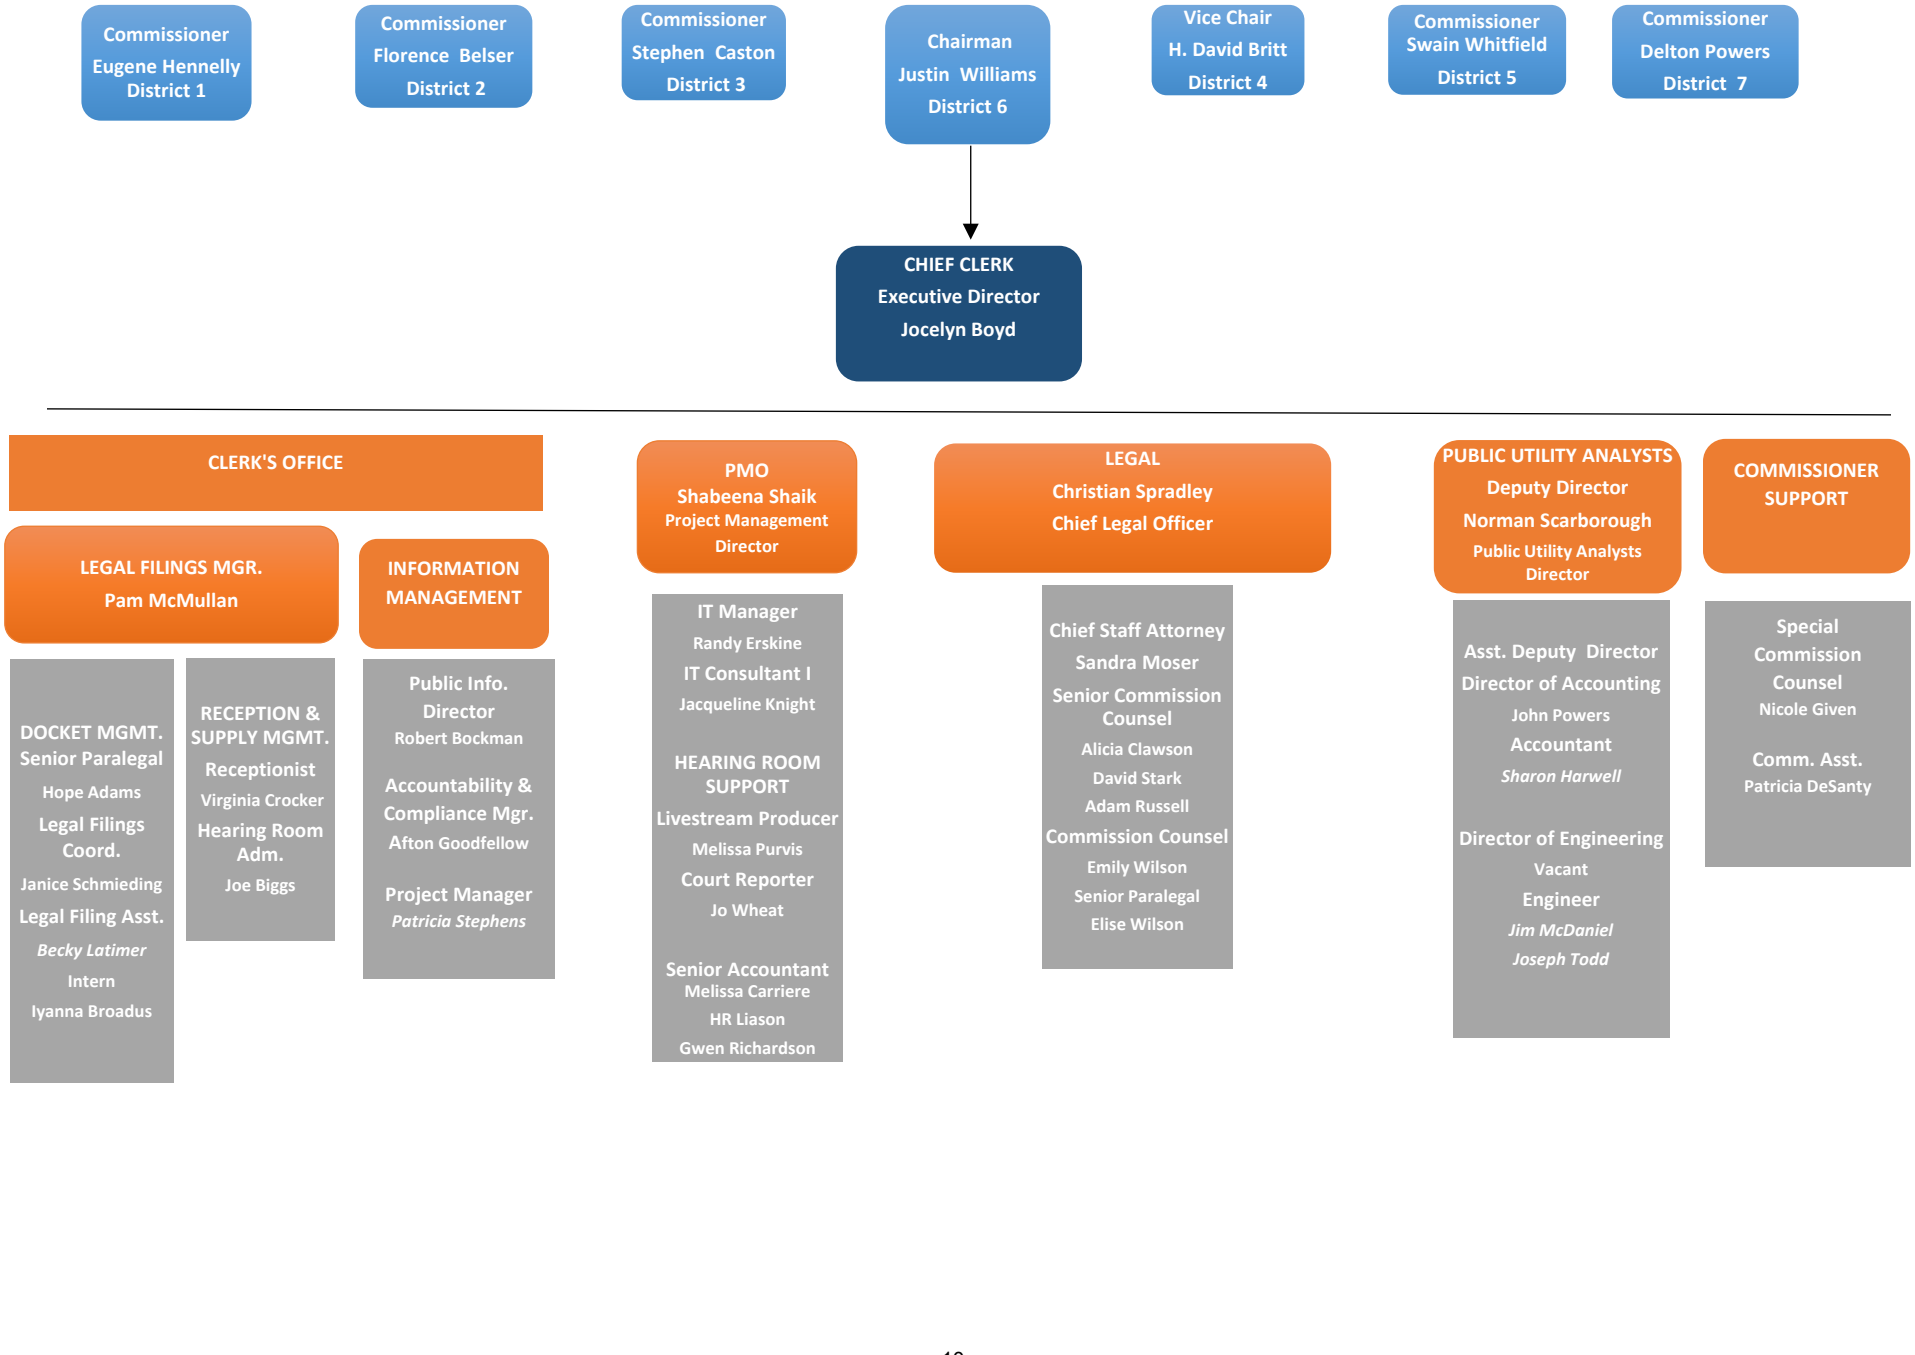

The Public Service Commission performs an annual exercise of developing performance measures in the areas that are critical to the successful operation of the Agency. The Agency's Strategic Plan serves as its compass in the performance measurement development process.

Significant events related to the agency that occurred in FY2026

Description of Event	Start	End	Agency Measures Impacted	Other Impacts
The Public Service Commission published a Regulatory Dictionary to its website as a resource for the general public. The dictionary is an accounting of commonly used regulatory terms.	July	March	Publish a Regulatory Dictionary on the Public Service Commission's website	Increased transparency and understanding of utility regulation terms and legal jargon for the general public and interested stakeholders.

The Commission conducted workshops and initiated rulemakings related to Act 41 of 2025 as follows: Directive Order No. 2025-744 was issued adopting “Customer Complaint Procedures” (these procedures were amended in Directive Order No. 2026-331), Directive Order No. 2025-745 was issued adopting “Guidelines for Site Visits and Educational Tours”, and a hearing was held regarding proposed new and/or amended regulations related to Act 41 of 2025’s procedural requirements. The Commission issued Order No. 2026-385 approving the proposed new and amended Regulations to Article 8 of the S.C. Code of Regulations.	July	June		Directive Order Nos. 2025-744 and 2026-331 adopting the Commission's "Customer Complaint Procedures" result in a more efficient complaint process by appointing a Hearing Examiner to review the complaint filings and issue a report and recommendation to the Commission. Upon Commission rejection of the Hearing Examiner's report, a hearing would then be scheduled in the matter. Prior to the adoption of the new complaint procedures, a hearing was automatically scheduled in complaint matters. Directive Order No. 2025-745 adopting "Guidelines for Site Visits and Educational Tours" provide important safeguards and transparency procedures regarding the allowance of utility site visits and educational tours provided in S.C. Code Ann. Section 58-3-260(I).
The Commission conducted workshops and initiated rulemakings related to customer public hearings as follows: workshops were held on August 22, 2025, and November 10, 2025, the Commission filed proposed S.C. Code Ann. Regs. 103-845.1 with the Legislative Council on January 8, 2026, regarding Public Witness Testimony and Customer Public Hearings, a hearing was held on the proposed regulation on March 17, 2026, and the Commission issued Order No. 2026-361 approving the proposed new regulation on June 26, 2026.	July	June		Proposed Regulation 103-845.1 addresses procedural issues related to public witness testimony and customer public hearings, including, but not limited to, pre-registration, the role of the Chairman and presiding officer, and cancellation of a public hearing. The proposed regulation provides a transparent, documented procedure for such hearings for the public's awareness and use. It also allows the Commission the right to cancel an off-site customer public hearing. This right creates efficiencies for the Commission when the cost to travel to an off-site hearing location outweighs the benefit of travel (i.e. low pre-registration numbers and the ability of customers to testify via telephone or WebEx).
The Commission continued to improve the average time to issue Commission Orders. The average time to issue orders in fiscal year 2025-2026 was 21.29 days. This average is a slight decrease from the fiscal year 2024-2025 average of 21.91 days. Notably, the Commission issued 32 additional orders during the year.	July	June	The Commission will track the issuance of its directives, directive orders, and orders with the goal of issuing these matters within 30 days of Commission decision	Increased internal Commission efficiencies positively impacts the agency's stakeholders by affording them the opportunity to respond/act more expediently in response to a Commission Order.
